I do believe the conservation programs should be the real centerpiece of this legislation. Unfortunately, funding for these vital programs was cut $4 billion below the level in the Senate-passed bill. I am disappointed the Senate did not prevail in the conference with the House. Nevertheless, existing conservation programs, such as CRP and EQIP, as well as the new Conservation Security Program, will help protect New Mexico's farm and ranchland for future generations, though not as much as they would have under the Senate bill. There is a new Water Conservation Program that will help slow the depletion of the Southern Ogallala Aquifer in Texas, New Mexico, Oklahoma, and Kansas.

This bill has funding for a new Grassland Reserve Program and a Water Conservation Program that will be helpful to farmers and ranchers in my State, especially with New Mexico now in the throes of an extended drought.

There is also mandatory funding in this farm bill for the Small Watershed Rehabilitation Program, which I cosponsored in the last Congress. This program supports reconstruction of the 100 small watershed dams in my State, many of which are 30 to 50 years old and reaching the end of their expected life.

Funding for the Market Access Program has been increased, which will help all farmers increase exports of their products.

I am pleased the conferees adopted my language that will allow New Mexico's Valencia peanut pool to continue to operate as an effective marketing association.

Within this farm bill's nutrition programs, I am pleased that Congress is finally restoring benefits for adult legal immigrants who have lived here for at least 5 years and all children of legal immigrants. I also support increased funding for the WIC and senior farmers' market nutrition programs.

This bill continues important rural development programs that have been critical to helping New Mexico's smaller communities improve infrastructure and promote economic development. There are new programs to train rural firefighters and to extend broadband service to rural areas. The additional funding for water and wastewater projects will be especially important to rural communities in my state facing major construction costs to meet EPA's new standard for arsenic in drinking water.

Finally, I cosponsored Senator JOHNSON's bill that requires country of origin labeling of meat, fruits and vegetables, fish and peanuts. The farm bill includes these new labeling provisions. I do believe consumers deserve to know the source of their commercial food products.

That is some of the good in this farm bill. However, as I said, I will not be voting in favor of the bill, and I would like to take a few minutes to explain why.

This farm bill does nothing to stem the staggering cost to the taxpayers of subsidies for agricultural commodities. In fact, this legislation will increase Federal subsidies by nearly $50 billion over the next decade; this is on top of the baseline funding of $77 billion. The Federal Government's role in agriculture will grow dramatically under this legislation. By some estimates, forty percent of net farm income now comes from the Federal Government.

Nearly three-quarters of all of the new money in this bill goes to crop subsidy programs. As we all now know from the analysis does by the Environmental Working Group, the vast majority of these federal subsidies go to growers in 10 central and southern States for only a few specific crops. Such massive subsidies drive up land prices and do nothing to stem over production, especially when commodity prices are low.

Even more troubling to me is the new national dairy subsidy program in this farm bill, which will cost taxpayers at least $1.3 billion over the next 3 to 4 years. At the same time it will actually lower the average revenue for milk producers in New Mexico by an estimated 17 cents per hundredweight.

That is correct, you heard it right. This program costs taxpayers $1.3 billion and will actually hurt dairy producers in my State. Moreover, we estimate that every producer with more than about 800 cows in all 50 States will lose revenue under this program. Because the average size of New Mexico's dairies is about 1,580 cows, nearly every producer in my State will be hurt by this legislation.

In the past decade, New Mexico has quietly come to the forefront of the nation's dairy industry. Milk production in my State has more than tripled since 1990. New Mexico is now seventh in the nation in total milk production and fifth in average milk production per cow. In the first 3 months of this year, production has grown 17 percent over the 2001 level. In Roosevelt and Curry Counties, production is up a whopping 32 percent.

There is no secret for my State's booming dairy industry. New Mexico is an ideal location for dairies because of our mild climate, which boosts milk production and does not require sheltering the animals from the weather. In addition, producers are moving to New Mexico because of the strong dairy infrastructure, moderate land prices, and well-integrated alfalfa industry. Currently, there are plans for 35 new dairies in new Mexico, most of which will have between 1,500 and 3,000 cows. These are not some kind of mega-industrial operations, but family-run farms just like dairies all over America.

The growth in dairy production in New Mexico is coupled with rapid growth in milk processing, including production of powder, cheese, and ultra-filtered milk. Soon, the Nation's first commercial plant producing milk protein concentrate will open in Portales, New Mexico. The economic impact of the dairy industry on New Mexico is now estimated at $1.8 billion per year.

Because New Mexico has mostly large, efficient, family-owned dairies, my State is the big loser under this new daily subsidy program. Independent analyses show the $1.3 billion Federal subsidy will encourage overproduction and depress market prices nationwide. According to FAPRI's preliminary analysis of this legislation, the excess production will drive down national class III and IV milk prices by 17 and 28 cents/cwt, respectively. This means every dairy producer in America will get a lower price for all of his or her milk.

Meanwhile, under existing law, the Federal Government must step in and purchase the surplus. The government already owns nearly a billion pounds of surplus nonfat dry milk, equal to an 18-month supply. In just the last month alone, the government has had to purchase 80-million pounds of nonfat dry milk at a cost of about $70 million. This legislation will add still more to the government's already bulging powder inventory. The taxpayers, of course, will be asked to bear the cost of purchasing all of this excess production on top of the new $1.3 billion subsidy. Sadly, this ill-conceived program will continue to erode the dairy industry for years to come.

Finally, we do not really know how much this program will cost because it depends on milk prices in the future and the number of participants in the program. The lower the price of milk, the higher the cost to the taxpayer. As I indicated, CBO scored the program at $1.3 billion. However, the Food and Agricultural Policy Research Institute has performed an independent analysis and estimates the total cost to the taxpayers at $3.6 billion—nearly three times more than CBO's estimate. Unfortunately, only time will tell how big the final bill will be for this program.

In short, the new dairy program is a real lose-lose proposal for the American people. There simply is no need for Congress to ask taxpayers to subsidize the dairy industry to the tune of billions of dollars.

From the outset, I said I could not support a farm bill that contained any massive new national dairy subsidy program. This bill suffers the added defect that it actually harms the dairy industry in my State. In fact, New Mexico's producers are hurt more than producers in any other state.

I would like to read part of a letter addressed to me from the Dairy Producers of New Mexico:

> The Farm Security Act of 2002 is not good for New Mexico. It introduces a new, expensive, and counter productive direct payment provision to dairy producers on some of their milk.

The letter goes on:

> This is not good policy for dairy farmers—it turns them from business people in the market to people on the government dole. It is not good for taxpayers because it misspends their money. It is not good for our Nation because it interferes with international trade.

I ask unanimous consent that the full text of this letter be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered. (See Exhibit 1.)

Mr. BINGAMAN. I would have liked to be able to vote for this farm bill, but regrettably, I cannot.

I will vote no on this conference report.

EXHIBIT 1

DAIRY PRODUCERS OF NEW MEXICO,
Roswell, NM, May 1, 2002.

Hon. JEFF BINGAMAN,
Hart Senate Office Building,
Washington, DC.

DEAR SENATOR BINGAMAN: On behalf of Dairy Producers of New Mexico and its membership, I want to thank you and your entire staff, particularly Dr. Dan Alpert, for representing our New Mexico dairy producers. We recognize that national dairy policy is very complex and regionalized, and often contentious. It is indeed very comforting to us to know that our U.S. delegation takes a stand to protect New Mexicans in the face of national politics.

The Farm Security Act of 2002 is not good for New Mexico. It introduces a new, expensive, and counter productive direct payment provision to dairy producers on some of their milk. The over one billion dollars thrown into the dairy economy will result in reduced milk prices on all milk regardless of the size of farm that produces it. The family run dairy farms in New Mexico will be especially hard hit.

According to FAPRI, the average payment will be about 85 cents a hundredweight but that will only be on the first 2.4 million pounds produced or a maximum payment of about $20,400. This payment will be more than offset by the average milk price on all milk of 14 cents a hundredweight. For the average dairy farmer in New Mexico that is about $52,500 per year.

This is a real loss of income. It is not a loss just to the dairy farmers, but to their families, their employees, and their vendors. The economics of the rural New Mexico communities will suffer this loss as well.

The Farm Security Act brings us anxiety—anxiety as to when and how the government will again adversely impact our industry.

This is not good policy for dairy farmers—it turns them from business people in the market to people on the government dole. It is not good for the taxpayers because it misspends their money. It is not good for our Nation because it interferes with international trade.

History will show that your amendment offered last December was wise and those who voted for it and stuck by their votes had a better vision for dairy than the Farm bill now before the Senate. It's a battle that we appreciate you taking on and fighting on our behalf.

Yes, there are some provisions that we like. These include dairy price support program extension of $9.90/cwt for six years; authorization of a new national Johne's disease control program; the extension of the Dairy Export Incentive Program (DEIP); fixing the statutory mandatory inventory and price reporting language to prevent further costly reporting errors by the USDA; and funds for dairy and other livestock producers through the Environmental Quality Incentives Program (EQIP). Those were by and large non controversial and they do not need to come at the great cost imposed by the dairy market loss program.

Again, Senator, we appreciate all of your hard work for the dairy industry in New Mexico. We sincerely appreciate your efforts on behalf of arc family farmers.

Sincerely,

SHARON L. LOMBARDI,
Executive Director.

Mr. SMITH of New Hampshire. Mr. President, today is a sad, sad day in America. It is a said day for the U.S. taxpayer and a sad day for the family farmers of our country. I believe the Wall Street Journal said it best when they editorialized, "that great rooting, snooting noise you hear in the distance, is the sound of election-year, farm-state politics rolling out of the U.S. Congress."

My colleagues know I stand for fiscal conservatism, so I don't imagine that many are surprised by my opposition to the farm bill 2002 conference report. But a "no" vote does not adequately describe my disappointment, my disgust, or my dismay at this, the largest non-military expansion of the Federal Government since the Great Society.

House and Senate conferees approved a farm bill that expands payments to farmers by nearly $50 billion over the next decade. More than 90 percent of this increase will go to farmers producing just five crops: wheat, corn, rice, cotton and soybean. Two-thirds of this money will benefit a mere 10 percent of farmers. If the goal of the so-called Freedom to Farm Act of 1996 was to wean farmers off the trough of government assistance, this bill represents a bloating of agriculture's dependency on the taxpayer's dime.

In these times of war and deficit spending, should we really be directing precious taxpayer dollars in such an irresponsible manner? I read an estimate that this legislation will cost the average American household $4,377 over the next 10 years, $1,805 in taxes and $2,572 in inflated food prices because of price supports. And for what, I ask? To prop up wealthy corporate farmers? To encourage farmers to continue overproducing unprofitable crops for which there is more supply than demand? To reinstate subsidies for honey, wool, and mohair?

Even the one provision in the Senate-passed version of the bill that made it somewhat palatable, payment limitations, was gutted to the extent that it is no longer meaningful: the cap was raised and loopholes, the prized toy of our top legislators, included to make the one attempt at payment control utterly ineffective. What good is a payment limitation that can be completely circumvented?

In response to some of the criticism that has been ladled on this pork-barrel monstrosity, Senators HARKIN and DASCHLE point to the $17.1 billion included for conservation programs. I find it ironic that they continue to do so when environmentalists are critical and have pledged opposition to the bill. As the ranking Republican member of the Senate Environment and Public Works Committee, I have to say, at what price conservation? It is worth the total price tag? I think not. What the conservation title represents is a transparent attempt to buy votes from those States that do not benefit from the commodities title. I am supportive of the conservation programs this bill funds. My State of New Hampshire relies on these programs. But I will not fall for it. Why should New Hampshire taxpayers, or any taxpayers, be asked to foot the bill for encouraging farmers to get on the Federal dole when our goal should be to do just the opposite?

This bill is a step backwards, as far as I am concerned, in agricultural policy. Our Chamber's two working farmers, Senators LUGAR and GRASSLEY, oppose its passage. I only hope that fiscal sanity will take hold of my colleagues and prevent this fat-laden conference report from ever reaching the President's desk.

Mr. KOHL. Mr. President, I rise this afternoon to commend Chairman HARKIN and all of the farm bill conferees on their work related to H.R. 2646, the Farm Security and Rural Investment Act of 2002. The Senate passed its version of this legislation on February 13, 2002 and I am pleased that the conferees were able to finish their work so we can send this legislation to the President for his signature and quick enactment. I am confident that the U.S. Department of Agriculture will work expeditiously to implement the new programs created in this legislation in time for the 2002 crop year. Rural America needs the assistance provided through this "rural" economic stimulus bill, and I am pleased that today we will respond to their needs.

I am especially pleased that this legislation includes the creation of a new, national dairy program that supports all dairy farmers regardless of location and regardless of the end use of their milk. I am also pleased with the increased investment in nutrition funding for programs like food stamps, the WIC and Seniors Farmers Market program. Finally, I am supportive of the enhanced commitment to conservation spending on programs like the Farmland Protection Program, the Conservation Reserve Program, the Environmental Quality Incentive Program and the new Conservation Security Program.

Of particular interest to my State of Wisconsin is the creation of a new, national dairy program that will, for the first time, create a more meaningful and credible safety net for all of our Nation's dairy farmers. This new program, while not perfect for any one region, moves us beyond the regional and divisive debate over dairy compacts. I am pleased that gone are the days of regional trade barriers and milk price fixing cartels that artificially support the price of milk in one region at the expense of farmers in others.

In addition to extending the very important dairy price support program at $9.90 per hundredweight, this farm bill creates a new counter-cyclical program that will provide assistance to farmers when the price of milk falls below $16.94 per hundredweight. A payment rate will be calculated by taking 45 percent of the difference between $16.94 and the class I, fluid, price in Boston. That payment rate will be made on the first 2.4 million pounds of a producer's production, or approximately 133 cows. The payment rate per hundredweight will be the same for all dairy farmers regardless of location and regardless of what their milk is used for. We in the Upper Midwest have argued over the years that all dairy farmers should be treated the same regardless of the end use of their milk and I am pleased that this conference report supports that position.

In addition to increased support for our dairy farmers, the Farm Bill Conference Report also provides nearly $6.4 billion in funding for nutrition programs. These nutrition programs include food stamps, the WIC and Seniors Farmers Market Nutrition Programs and the emergency food assistance program. This legislation also provides food stamp benefits to legal immigrants. The nutrition title of the bill is very important to our producers who provide the commodities for the programs, as well as low-income and less fortunate individuals who need help in getting access to a more nutritious and well-balanced diet.

Beyond the much needed increase in nutrition funding, the Farm Bill Conference Report also provides a much needed increase in conservation spending. The Farm Bill Conference Report reflects a total increase of 80 percent for conservation programs. Specifically, this legislation provides a new 20-fold increase for the Farmland Protection Program, a 10-fold increase for the Wildlife Incentives Program and phases up to achieve a $1.1 billion annual funding level for the Environmental Quality Incentive Program, EQIP. I am also pleased that there is an additional enrollment of 1.2 million acres for the Wetlands Reserve Program which works extremely well in Wisconsin.

Despite the many positive provisions in this farm bill, I am disappointed that the House Conferees refused to adopt two very important Senate provisions. I am disappointed that the House Conferees refused to adopt the Senate language regarding the ban on packer ownership of livestock, which the majority of the Senate supported in two separate votes. I am also disappointed that the House Conferees did not accept a meaningful limitation on farm payments.

First, this conference report does not include the so-called "Johnson Amendment," which would ban packer ownership of livestock. On December 11, 2001, with my support, the Senate adopted this amendment in order to provide ranchers who raise livestock with more marketing opportunities and hopefully a higher price for their product. However, the House Conferees, under pressure from the meat industry including large packers, refused to accept this provision. Without a ban of packer ownership of livestock, independent producers will continue to be shut out of markets, face lower prices and less competition while packers continue to give preference to their own supplies of livestock. I support Senator JOHNSON's call for hearings on this important issue in the Senate Agriculture Committee, and to investigate abusive market practices in the livestock sector.

Second, I am disappointed that the conference report does not include a meaningful limit on the level of farm subsidies going to large farmers located predominantly in the south. This conference report, while reducing the overall payment limit to $180,000 annually is meaningless as the "triple-entity" rule remains in place. The final bill retains loopholes that not only permit a recipient to double the $180,000 level to $360,000 through the "triple-entity" rule but also makes it effectively limitless for the purpose of marketing loan gains and loan deficiency payments. The conference report also allows for the continued use of the generic certificate program. This program allows the largest of producers to enjoy the benefits of the marketing loan program without repayment while allowing the producer to hold onto their commodity for future sale on the open market. The loopholes that remain make the payment limitation provisions in the conference report meaningless and I am disappointed that the conferees could not agree on a way to prevent large payments from going to those producers who need the assistance the least.

I realize this bill is not perfect. There are provisions and changes that I wish could have been included in the final conference report. But this bill restores a much needed economic safety-net to an industry that experiences wide fluctuations in prices. The combination of a new counter-cyclical dairy program, increased nutrition spending and an increase in funding for conservation programs makes this new farm bill one that I can support and one that I think will help our farmers and ranchers across the country. We have a commitment to rural America to ensure farming remains a viable industry in our Nation and I commend Senator HARKIN for his leadership on this very important legislation.

Mr. FEINGOLD. Mr. President, I want to make a few comments on my opposition to the farm bill conference report. While I strongly support the dairy provision that Senator KOHL and I helped secure for Wisconsin's dairy farmers, I am deeply concerned that the conference report eliminated a number of important Senate-passed provisions that targeted assistance to small and medium-sized family farmers.

Specifically, I am concerned that the conference committee weakened the Senate-passed payment limitation amendment and reduced the conservation funding. It then used these funds for the misguided purpose of increasing payments to corporate owned farms and agribusinesses. I am also deeply disappointed that a number of Senate-approved amendments aimed at providing competition in rural America were completely eliminated in the conference committee.

I am disturbed that the conferees stripped the payment limitations provision that both the House and Senate supported. As my colleagues will recall, the Senate voted 66–31 to target Federal assistance to small and medium-sized family farmers by imposing a $275,000 payment limitation on overall payments.

I support the Senate-passed provision of a $275,000 payment limitation, but this conference report permits up to $360,000 and includes significant loopholes. I am not sure who this increase is meant to benefit. I know it isn't benefitting many people in Wisconsin, where only 14 out of our 60,000 farms receive over $275,000 in government payments.

At the same time the bill provides increased funds to the largest producers and agribusinesses, it reduces funding for important conservation programs that benefit family farmers of non-traditional crops such as those produced in Wisconsin. Many Wisconsin commodities—such as potatoes, sweet corn, green beans, cranberries, and cherries—are simply not eligible for most commodity programs, but do receive benefits under a number of the conservation programs.

Wisconsinites certainly support a strong safety net for America's farmers, but this bill is fiscally irresponsible. The Congressional Budget Office now estimates that the bill before us would cost $124.6 billion through 2007, or almost $21 billion annually. That is about $2 billion more a year than previously calculated. I cannot support a bill where payments are targeted to larger agribusinesses instead of family farmers. Moreover, these new numbers indicate that this bill would force Congress to retreat from other budget priorities, including shoring up Social Security and Medicare.

This bill also does not contain important Senate-passed provisions that would have added much needed competition to rural America. It makes little sense that the conferees rejected the Senate-passed ban on packer ownership and my amendment giving farmers a choice of venue to resolve disputes associated with agricultural contracts.

The Senate-passed packer ownership ban would have been an important first step to provide a competitive marketplace, and curtail the vertical integration by agribusinesses. My amendment reforming mandatory arbitration clauses would have ensured that the decision to arbitrate is truly voluntary and that the rights and remedies provided for by our judicial system are not waived under coercion. Again, more than 60 Senators supported my amendment, but it was dropped in conference.

I do want to join Senator KOHL and my other colleagues to commend the dairy provision included in this farm bill. This provision finally begins to move our dairy policy in the right direction by treating all dairy farmers the same—regardless of where they live. I am proud to have worked with my senior Senator to have defeated efforts to extend and expand the northeast dairy compact and to have established a national safety net that provides equal support to producers regardless of where they live. I am also pleased that this program has a sensible limitation in terms of its payment structure. By capping these payments at the first 2.4 million pounds of production, we will help to ensure that large factory farms out west do not flood the market with milk and depress the price for those in the upper Midwest.

So it is with regret that I must oppose this legislation, because I am proud of what Senator KOHL and I were able to secure through the dairy safety net. But Wisconsin taxpayer dollars should not be used to support agribusinesses and others who put our farmers on an un-level playing field in the marketplace.

Mrs. BOXER. Mr. President, the farm bill has been the subject of a lengthy debate among many diverse interests. This bill is the product of compromise and like any compromise, it is an effort to satisfy a wide range of viewpoints.

California agriculture is itself very diverse, and I have heard from many groups in the State on this Farm bill. What I have heard from California constituents overall is that on balance, this farm bill is a net positive for the State.

I have a stack of letters from Californians on this bill—and I have listened carefully to what they have had to say. I have been asked to support the bill by a long list of California groups, including: the California Farm Bureau; Western United Dairymen; the Alliance of Western Milk Producers; California Citrus Mutual; California Apple Commission; California Walnut Commission; Diamond of California; California Dried Plum Board; California Strawberry Commission; Sunsweet Growers, Inc.; California Rice Commission; Farmer's Rice Cooperative; Sacramento Central Labor Council/AFL-CIO; International Longshore and Warehouse Union, Local 17; Calcot, Ltd. representing 1700 grower members; Dunavant of California—California Cotton Farmers; Anderson Clayton Corp.—Serving the California Cotton industry; California Food Policy Advocates—representing food banks throughout the State; Los Angeles Coalition to End Hunger and Homelessness; Health Access; National Council of La Raza; Coalition for Humane Immigrant Rights of Los Angeles; National Immigration Forum; Jack Fleming Ranches; Big Valley Packers; and Meyers Farming.

These groups represent many different interests—from California dairy to specialty crops, cotton and rice farmers, labor unions, advocates for food banks, advocates for humane treatment of legal immigrants on food stamp policy, just to name a few.

These groups have one thing in common. Each has asked for my support on final passage of the Farm Bill Conference Report.

Some wish California could do better in the farm bill. I do not disagree.

I am particularly disappointed that the farm bill conference report includes $4.2 billion less for agriculture conservation programs than the Senate passed bill. The Senate version of the bill set aside a record $21.3 billion for conservation. Unfortunately, the House did not maintain this level of support. However, the conference report contains an 80 percent increase in conservation funding over previous farm bills. This represents an important step in the right direction.

The conferees also decided to drop a provision that I authored to deal with Sudden Oak Death Syndrome. This syndrome has already killed many of California's beloved oak trees and has hurt our wood product and nursery industries.

It is my understanding that the Sudden Oak Death language was the victim of a broader controversy over other provisions of the forestry title. I hope I can count on my colleagues to move this desperately needed and non-controversial legislation as a stand-alone bill.

I also remain concerned about the equity in the distribution of resources in this bill. California specialty crops, in particular, should get a greater share of Federal resources. There are improvements in several programs available to specialty crop growers, but the bill does not go nearly as far as it should to ensure an equitable distribution of Federal dollars to California.

At the same time, there are many good things about the bill for California, and on the whole, I believe the strengths of the conference report outweigh the weaknesses. Let me take a few minutes to explain why.

The California dairy industry benefits from a price support program that assures an important safety net in difficult times. California dairy farms will also benefit from a new formula that will provide additional access to environmental improvements funding through the Environmental Quality Incentives Program.

Specialty Crop producers in California—such as walnuts, dried plums, and pears also benefit from a number of programs in this bill, including a minimum of $200 million per year authorized for purchases of surplus commodities for school lunch and other programs.

The Market Access Program has been substantially increased in the conference report from the current $90 million per year increasing to $200 million over 6 years. This program helps California agriculture market its products abroad, including our dairy, specialty crops and our wine industry. I have worked for years to save this program and increase its funding. The substantial increase authorized in this bill is a real victory for California farmers.

Rice and cotton farmers and the communities they live and work in have suffered difficult economic times. The commodity payments in this bill give these farmers a light at the end of the tunnel. An important reform included in the bill are new limitations on payments to multi-millionaire farmers. This is a reform I strongly supported and I am pleased that it is included in the final conference report.

I am also particularly grateful that the House and Senate conferees set aside $50 million to be used specifically for water conservation efforts in the Klamath region. I would have preferred the $175 million in the Senate bill, but the $50 million provided will make a significant contribution to the needs of the people and the wildlife in the Klamath basin.

The Nutrition title of the farm bill will also provide substantial benefits to my State. In California, the nutrition title has the potential to deliver more than $1.7 billion in new assistance to more than 3.5 million people. According to the California Food Policy Advocates, an organization that works with food banks throughout the State, “this is one of the most important pieces of Food Stamp legislation since the landmark 1977 Act.”

The conference report also restores eligibility for participation in the Federal food stamp program for many legal immigrants who lost those privileges in 1996 as a result of welfare reform.

Legal immigrants pay taxes, are eligible for the draft, and many proudly serve in the Armed Forces. Yet, 1 in 10 immigrant families with a citizen child report not eating for at least one day during the past 6 months. One in four is forced to cut the size of their children's meals due to lack of resources. This bill will provide critical assistance to the neediest members of our immigrant communities.

Along with Senator GRAHAM, I also sponsored an amendment that is in the final bill authorizing $10 million over 10 years for farm worker training.

Training farm workers to upgrade and expand their skills leads to added value for agricultural crops and increased worker productivity. It also improves worker pay, thereby helping to alleviate poverty in farm communities.

On balance, this farm bill includes key provisions that are important to the agriculture economy in California. After carefully considering the pros and cons on this important legislation, I have decided to support final passage of the Farm Bill Conference Report.

Mr. JEFFORDS. Mr. President, I rise today to express my support for the farm bill conference report. It has taken us months to get to this point, but we now have a comprehensive farm bill that addresses the needs of our farmers, as well as our consumers. I thank the members of the conference committee for their hard work and dedication, and I urge my colleagues to recognize their good work by voting in favor of final passage.

The 2002 farm bill represents a step forward on many issues. This is evident in several of the provisions in the bill, especially those relating to dairy, conservation, nutrition and preservation. In these areas, the new farm bill goes well beyond current policy, building on the successes of yesterday, to help meet the demands of today.

I am particularly encouraged by the program this farm bill puts in place to protect our Nation's dairy farmers. House and Senate conferees have achieved consensus on legislation that provides direct, counter-cyclical payments when the Boston Class I price falls below a target price of $16.94 per hundredweight. When the price of fluid milk drops below this level, farmers will receive a payment on 45 percent of the difference between $16.94 and the market price. These payments, capped at 2.4 million pounds of milk per year, will be paid to all producers across the Nation. To ensure the counter-cyclical nature of these payments, the 2.4 million pound cap is intended to apply only to milk production marketed during months when payments are made to producers.

These counter-cyclical payments are especially important in my home State of Vermont, and throughout New England, where the expiration of the Northeast Interstate Dairy Compact has left producers vulnerable to volatile dairy markets. Since July of 1997 until September of last year, the Northeast Dairy Compact made payments to producers during months when Class I prices fell below the compact over-order price of $16.94. If the compact had been in place, producers would have collected payments each of the last 5 months due to the steep decline in prices last December. Since then, dairy markets have remained depressed, with no recovery forecasted in the near future.

Recognizing that the loss of the compact has significantly impacted dairy farms in New England, this legislation makes payments under this program retroactive to December 1, 2001. Retroactive payments will not only help our farmers in New England, but they will make up for the losses that all producers have endured since last December. These losses have been incurred on all milk, and it is my expectation that retroactive payments will be made to cover each gallon produced during that period.

The dairy program included in the 2002 farm bill will continue to deliver payments almost identical to those producers received under the compact. And, although my farmers would rather see these payments taken out of the marketplace than out of the treasury, I know for many of my producers, these payments will mean the difference between staying in business, rather than calling the auctioneer.

While the dairy program is by far the most important provision in the farm bill for my farmers, I am pleased that this legislation includes an 80 percent boost in funding for conservation programs. This money will increase the funding levels of programs that have proven successful, as well as establish a new program to provide incentives to producers for continuing and adopting conservation practices on working lands.

Although some of us would have preferred that additional funding be provided for conservation programs focused on improving water quality and protecting wildlife habitat, this legislation offers important resources that will help agricultural producers improve their stewardship of the land. The Conferees have included a provision in the bill to authorize the Secretary of Agriculture to enter into stewardship agreements with State and local agencies, Indian tribes, and nongovernmental organizations and to designate special projects to enhance technical and financial assistance provided to agricultural producers. This provision will help agricultural producers meet the requirements of the Clean Water Act, the Safe Drinking Water Act, and other environmental requirements.

The Senate passed farm bill had included a number of provisions that would have encouraged the development of pilot programs and new efforts to promote this kind of cooperation and partnership. Although these provisions were not included in the final bill, the Conferees have made clear in the Statement of Managers that they intend for the Secretary to use her authority to establish such partnerships. I believe such partnerships could be a valuable tool in addressing water quality issues, particularly nonpoint source pollution. There couldn't be a better time to encourage water utilities, landowners and the U.S. Department of Agriculture to work together to utilize the conservation programs to protect drinking water source areas.

Farmers are great caretakers of our land. I am encouraged that we have given them greater resources with which to preserve our open space, protect our rivers and streams, and sustain the vitality of our rural communities and economies. I support the Senate's emphasis on conservation in this farm bill and believe that it will provide an important foundation for promoting sound environmental practices in agriculture.

I am also delighted that this farm bill authorizes such sums as necessary for the Office of Rural Development of USDA to establish a national historic barn preservation program. This provision allows farmers to receive funds administered through States and nonprofit organizations to bring older barns into productive use, or make necessary investments in functioning facilities to prevent them from falling beyond repair. I strongly urge my colleagues to appropriate the Senate authorization level of $25 million that was included in the Senate farm bill.

In my home State of Vermont, the State Historic Preservation Office currently administers a small-grant program for barn preservation that has been funded by the Vermont Legislature since 1993. While this program has been very successful, applications continue to significantly outnumber the grants made through this program. Federal funding through the new national historic barn preservation program will help address the growing backlog of requests for barn preservation grants in Vermont and across the country.

Historic barns are some of America's greatest national treasures, symbolizing the agricultural foundations upon which our Nation was built. Preserving these barns will not only ensure their survival for generations to come, but will also provide practical benefits to farmers, and the communities and economies that surround them.

Finally, I would like to commend the Senate Conferees for their efforts on the nutrition title of the farm bill. Although the conference report includes less funding than was originally included in the Senate bill, conferees fought to include $6.4 billion over 10 years for nutrition programs. This title includes several provisions that will improve and enhance the food stamp program. Although there was resistance in the House, I am pleased that the restoration of food stamp benefits to legal immigrants was included in the final bill. The benefits that were taken away from immigrants in the 1996 Welfare bill have finally been returned to immigrants that have been in the United States for 5 years.

Other important modifications to the food stamp program serve to extend transitional benefits to those leaving welfare and allow States to better align food stamp regulations with other public programs such as TANF and Medicaid. These provisions strengthen the existing food stamp program and extend eligibility to those in need of assistance.

In closing, I would like to praise the Conferees for their vision in crafting this Conference Report. I believe this legislation takes a step in the right direction in improving the regional equity of America's farm policy. It is only fair that we work to help all of our farmers receive a fair price for their product regardless of size, region or commodity. I know that my farmers in Vermont work as hard as any in the Nation, and because of that they deserve the same protection against the volatile markets that others share. I'm pleased that this bill provides them with this protection.

Finally, I would like to commend Majority Leader DASCHLE and Assistant Majority Leader REID for their leadership in getting a contentious bill through the Senate, and for seeing the farm bill through to final passage. Majority Leader DASCHLE was instrumental in this effort, and I am personally most grateful.

Mrs. MURRAY. Mr. President, 6 years ago, Congress passed a farm bill that simply did not work for farmers in Washington State.

It destroyed the safety net for Washington State wheat growers and did little for other farmers and ranchers in my State. Congress was forced to respond with four consecutive years of emergency payments.

The farm bill before us is not intended to guarantee any Washington farmer a profit. It simply guarantees what it should guarantee: A safety net for our commodity producers when prices are low. That is a fair approach and one I believe the nation can and must support to ensure our long-term food security.

I support this bill because it is a victory for our farmers and ranchers, the working poor and seniors, rural communities, and the environment.

However, this new farm bill is not a perfect one for Washington State. The final bill strikes some provisions that I believe in very strongly, and it makes new policy choices that do not work for my State's producers.

The Senate farm bill would have expanded Washington State exports by lifting the restriction that prohibits private financing of sales of food and medicine to Cuba. Unfortunately, the House leadership remains committed to an irrational, lose-lose policy toward Cuba. As a result, the Senate amendment died in conference.

The House leadership was also responsible for defeating an amendment by Senator BAUCUS to provide emergency assistance to farmers and ranchers hurt by drought and other natural disasters. Farmers and ranchers throughout the West deserved better on this issue.

I want to say how disappointed I am with the direction this bill takes on dairy policy. On many fronts, from exports to conservation, the bill will help all dairy producers. Unfortunately, the new dairy market loss payments strongly discriminate against West Coast dairy farmers. We had an opportunity to craft a dairy policy that worked for all producers nationwide. Instead, Congress again chose to create regional winners and losers.

The Senate farm bill included my amendment to promote better cooperation between Native American tribes and the U.S. Forest Service. It also included an amendment sponsored by Senator CANTWELL that would require the Inspector General of the U.S. Department of Agriculture to investigate any future deaths of forest firefighters in the line of duty. The House refused to adopt these common-sense amendments.

Finally, the Senate farm bill included my amendment that would allow communities to develop plans to bring high-speed access to rural areas. Unfortunately, the House conferees refused to accept it, and it is not included in the final bill.

I look forward to working to pass my legislation to promote rural broadband development and to promote a stronger relationship between tribes and the Forest Service. I also look forward to revisting the other issues I mentioned above in future legislation.

While I am disappointed with a number of decisions made by the conference committee, this new farm bill includes many of the priorities I identified prior to the debate.

I am very pleased the farm bill restores food stamps for legal immigrants who have been in the United States for five years, and it restores food stamps for all children and disabled individuals regardless of how long they have been in the United States. The legal immigrant provision is the centerpiece of a new $6.4 billion investment in better nutrition policy. The bill will also streamline the Food Stamp Program and rationalize the quality control system.

The conference bill helps Washington state recover salmon and improve conservation practices. The $17.1 billion in new conservation spending over the next ten years will promote water conservation, help dairy producers, ranchers, and farmers protect water quality and save farmland and open space from development through an expanded Farmland Protection Program.

The bill enhances economic development in rural communities by providing $100 million in loans and loan guarantees to establish high-speed, high-quality broadband service. The bill also makes an important attempt to reduce the backlog of water and wastewater projects in rural areas.

This new farm bill strengthens our Nation's energy security by investing $405 million in renewable energy and biodiesel development. The Senate bill included the first energy title ever included in a farm bill. Given the uncertain future of the energy bill passed by the Senate, I am pleased this section survived the conference negotiations.

With respect to an issue I have worked for three years on, the farm bill sustains struggling apple growers through $94 million in direct assistance. With Senator CANTWELL, I fought hard to include this funding, and I want to thank Senators DASCHLE and HARKIN for their work in protecting this vital assistance in conference.

The conference bill establishes a new safety net program for many eastern Washington farmers by creating marketing loans and loan deficiency payments for producers of dry peas, lentils, and small chickpeas. I was an early cosponsor of similar Senate legislation. Peas, lentils, and chickpeas are important rotational crops for our wheat growers, and they help to break disease cycles.

The bill increases the Market Access Program to $200 million by 2006. In 1999, and again in 2001, I introduce legislation to enhance our agricultural trade promotion programs. The final bill supports my efforts to open and expand overseas markets for U.S. farm products.

The farm bill mandates country-of-origin labeling for meat and fish, and fruits and vegetables. I believe this is a great idea for farmers and ranchers, but also for consumers. However, it is my understanding the conference report would not allow fish caught by U.S. fishermen in international waters to be labeled as produced in the United States. That is a concern to fishermen in my state who fish in international waters.

In another win-win situation for farmers and consumers, the final bill increases purchases of fruits and vegetables for federal feeding programs. That means better nutrition for our young people and a larger market for our fruit and vegetable growers.

Finally, I want to mention an amendment I authored that was included in the Senate bill and the final bill. My amendment authorizes emergency assistance for farmworkers when natural disasters strike. While Congress has often been slow to provide natural disaster assistance to farmers and ranchers, it has rarely provided meaningful assistance to farmworkers. We should not ignore these workers when disaster strikes.

Implementing this farm bill will not be easy and there will be challenges along the way. I look forward to working with my farmer, ranchers, and rural communities to ensure that we implement this bill quickly and fairly.

Mr. WYDEN. Mr. President, today I rise to support the 2002 farm bill conference report because it is good for Oregon producers at home and in the world market.

Agriculture in Oregon is a $3.5 billion business. There are 40,000 farms in Oregon, totaling over 17 million acres. The average farm size is 430 acres, with a stunning variety of crops, made up of 10,000 plus wheat farms in the eastern part of the State to 100 acre vineyards in the western part of the State.

Overall, the Oregon Farm Bureau supports this farm bill. Oregon wheat and barley growers are anxious to see the workings of the new loan rates and market transition payments. They are also pleased to hear that all changes are in effect for the 2002 crop.

Oregon dairy producers tell me the compromise that maintains a permanent $9.90 milk price support program will help them in the long term, whereas the establishment of a 3.5 year National Dairy Program to provide assistance to all U.S. dairy producers will help them in the short term.

Oregon's wool producers are pleased that the conference report provides marketing loans or loan deficiency payments to them based on a loan rate of $1 per pound for graded wool and $.40 per pound for non-graded wool.

This conference report also provides $94 million, nationally, for apple producers who have suffered low market prices.

But those are just specific examples of how this conference report will be good for Oregon producers. In a more general sense, this conference is good for Oregon's specialty crop producers in the following ways: specialty crop purchases for section 32 requiring not less than $200 million for fruits and vegetables. At least $50 million of that amount is for schools through the DoD Fresh Program; MAP funds—$650 million over the life of the bill, hitting the authorized ceiling of $200 million in the fifth year; Technical Assistance for Specialty Crops provides $19 million for exporter assistance to address barriers that restrict US specialty crop exports; $400 million for food assistance of which some is destined for specialty crop purchases; in addition, increased funds for school lunch programs, the WIC program, and the Seniors Farmers Market program, of which Oregon is one of the pilot States; and, Country of Origin Labeling for fresh meats, fruits, vegetables and fish will help Oregon's producers.

In addition, while some environmental organizations are not pleased by the increases provided in the conservation title of this conference report, Oregon farmers will benefit overall from the 80 percent increase in conservation programs. Specifically, $50 million is provided for the Klamath Basin under a new Water Conservation Program that provides cost-share incentives and assistance for efforts to conserve ground and surface water.

The nutrition title is supported by Oregonians who strongly supported, and were successful in maintaining, the provision that reinstates food stamp benefits for legal immigrants. Oregonians will benefit from simplifications to the TANF and food stamp programs.

Oregonians will also benefit from the $1.03 billion Rural Development title that will, in addition to other new and improved rural development programs, make $100 million available nationally to allow rural consumers to receive high-speed, high-quality broadband service. It also provides $50 million for the Rural Firefighters and Emergency Personnel Grant Program which will help as rural Oregon communities face increasing fire danger from public lands.

For years I have supported increased funding for agricultural research. Research dollars have been important to Oregon agriculture because they enable Oregon agriculture to be competitive in the world markets. This title increases funding from $120 million/year to $200 million/year in fiscal year 2006.

This conference report contains a new $100 million cost share program to assist private non-industrial forest land owners in adopting sustainable forest management practices. It also authorizes research pilot programs in carbon sequestration for agriculture producers and forest land owners. Both of these programs will be available to Oregonians, regarded as leaders in these areas.

There are additional programs in this conference report that will benefit Oregonians that I have not specifically mentioned. However, the real work will begin when the President signs this conference report into law, as he has indicated he will do. We will start the arduous process of implementation. I will be there, with my Senate and House colleagues, as that process moves forward.to make sure the intent and spirit of this law is adhered to: to encourage environmentally sound, economically stable agriculture.

Mr. STEVENS. Mr. President, the farm security and rural development act of 2002 contains two important provisions for the protection and revitalization of Alaska's wild salmon industry. One is country of origin labeling and whether the fish is farm raised or wild caught and the other, a report on efforts to promote and use pouched and canned salmon within the food and nutrition programs of the Agriculture Department.

Last year, Chilean pen-raised, farm salmon was purposefully delivered the same time as Alaskan fishermen brought their salmon to market. It was and is the intent of Chile to devastate and erase the Alaskan wild-salmon market. Canada, Norway and China are increasing their farmed salmon capabilities and are flooding the U.S. market with pen-raised, pellet-fed, and chemically-enhanced salmon. In fact, dye is injected into the flesh of pen-raised salmon in order to obtain the orange and reddish salmon color that occurs naturally in wild salmon, which are born in fresh water streams, then travel out to the deep ocean and back again to the same stream to spawn.

The conference committee report includes a provision that will require any retail seafood product in the United States to be labeled at the time of sale with its country of origin and whether the fish is wild-caught or farm-raised. This will help consumers make informed decisions about the seafood they put on their dinner tables. Alaskans know that wild fish from our waters are healthier and better tasting then farmed fish from overseas. This provision will allow the rest of America to make a more informed choice between pen-raised and wild salmon and learn about all the benefits of Alaskan seafood.

The conference committee also retained an amendment which calls on the Secretary of Agriculture to report to Congress on efforts to expand the promotion, marketing, and purchase of U.S. pouched and canned salmon within the food and nutrition programs of the Agriculture Department. It is imperative to the short term success of Alaska's salmon industry to move existing inventories of pouched and canned salmon. The farm bill does a great deal to insure the commodities markets for southern and midwestern farmers, and these provisions will begin to provide some assistance and much needed protections for America's fishermen, the farmers of the sea.

An amendment that did not remain in the conference committee report, but is absolutely necessary considering how pen-raised salmon are altered and chemically developed, is the eligibility of wild seafood for an organic product promotion effort. This amendment by my good friend and colleague FRANK MURKOWSKI, would have directed the Secretary of Agriculture to incorporate wild seafood into the organic labeling program. Wild salmon that go out into the oceans and feed in their natural habitat are by definition organic and completely natural, void of hormones or other chemicals and are undeniably deserving of the "organic" label.

Mr. KERRY. Mr. President, I would like to congratulate Senator HARKIN for his hard work in bringing this farm bill together. As Chairman HARKIN said yesterday, this conference report is not anyone's idea of perfection. It's not the bill Senator HARKIN passed in the Senate, nor is it, I think it's fair to say, the bill that Senator HARKIN or any of us might have written were legislation written to match an ideal standard. But the legislation before us today is a product of hard work and tough negotiating, and U.S. Senators are only afforded the opportunity to vote on what's before us, to make a judgment about whether we're going to provide relief and support to farmers in Massachusetts and nationwide in need of relief today, or whether we're going to vote it down and hope for an ideal farm bill the legislative process itself has proven will not be forthcoming.

Given that choice, I will support this farm bill—I will support it because it will meet needs in Massachusetts and all around the country that are absolutely critical and which we cannot afford to leave unmet.

This legislation includes record amounts of funding for land and water conservation programs, nutrition spending and reestablishing a dairy program that keeps small dairy farmers in business. This bill increases spending for land and water conservation programs by $17 billion, an 80 percent increase. This funding allows producers to qualify for assistance if they voluntarily incorporate conservation practices on their lands. In addition the bill provides $1 billion for the Farmland Protection Program, which provides for protection around urban areas and prevents sprawl. Massachusetts has a model program for protecting farmland and this funding will only allow us to preserve and protect more farmland in the Commonwealth.

Nutrition and food programs under this bill total $6.4 billion. Like most of us I would have preferred the Senate number, however as we all know compromises have to be made in large bills such as this. We all should be proud of the fact that this bill restores benefits to legal immigrant adults who have lived in the United States for at least 5 years. This bill also restores benefits to children and the disabled without a 5-year waiting period. The bill will also provide benefits for working families moving from welfare to work.

The dairy provision in the bill is very important to Massachusetts as well. I wish to thank Senator LEAHY for all of his work in this area. He has crafted a compromise that allows small dairy farmers in the Northeast to compete with larger producers in the Midwest. I am especially grateful that the dairy provisions are retroactive to December 1, 2001 so that these small dairy farmers who have been severely impacted by the expiration of the old Northeast Dairy Compact, in October of last year, can now look forward to much needed help as they struggle to survive. This is yet another way that we can protect open space and prevent urban sprawl by giving these small dairy farmers a helping hand.

This bill contains an authorization for a $10 million buyback of groundfish permits in New England. I strongly believe that we need to help family fishermen just like we lend a hand to farmers. The fishermen in New England are reeling from a recent court decision that has reduced their ability to fish by a minimum of 20 percent and in some cases by 75 percent. These fishermen are going to need some help and I intend to work with my colleagues to get these fishermen some assistance so that they can retire with dignity and seek opportunities elsewhere.

As I stated earlier, this is not a perfect piece of legislation. I am disappointed that the bill does not contain the strong payment limitations that were contained in the Senate bill nor does this conference report prohibit meat packers from owning livestock. I supported both of these amendments when we debated this bill in the Senate and I believe that both of these provisions would go a long way to protecting rural America and small family owned farms. I wish to go on record as saying that I will work with my colleagues Senators JOHNSON and WELLSTONE to have these measures enacted in the future.

I remain very concerned about a flaw of this legislation, one which I know many Democrats worked very hard to avoid but which remains a serious problem in this bill. Without meaningful payment limitations we run the risk that large, powerful, corporate farms will continue to gobble up America's small, family-owned, environmentally responsible farmers. We cannot allow this to happen. This bill should protect rural America rather than subsidize another round of corporate giveaways that put at risk our environment, endanger the livelihood of family farmers, and lavish hard earned taxpayer money on corporations that need it the least. By that measure, this farm bill is a far cry from what our family farms need the most, and I would respectfully suggest that in the future we consider a whole host of efforts that do better than this bill does today.

We all should remain concerned about the cost of this legislation as well. The bill will increase the cost of Federal agricultural programs by $45 billion over the next 6 years and $73.5 billion over the next 10 years. With our country at war against terrorism and our economy still not recovered we should all be concerned about the deficits that this country could potentially face.

Lastly, the conference report contains a number of animal protection provisions that I do not support. Particularly troubling were the provisions on animal fighting and downed animal protection that were nearly identical in both bills and yet the conference report contains a weakened provision. I strongly believe we should revisit these issues at the earliest possible time.

In summary, this bill is not perfect, but it is the choice before us, and in the Senate this year I see no better choices being offered. And while I think it's critical that we do better in the future, that we strike a better balance, I do not believe it would be in the best interests of our nation to deny family farmers and America's small farms the lifeline they so desperately need today.

Mr. THURMOND. Mr. President, I rise today to speak on the conference report for H.R. 2646, the Farm Security and Rural Investment Act of 2002, FSRIA Act. This is the eleventh farm bill since the Congress enacted the Agricultural Act of 1949, the last permanent farm legislation, and the first farm bill of the 21st century.

The previous farm bill, the Federal Agriculture Improvement and Reform Act of 1996, the FAIR Act, contained at least three favorable objectives—to instill market discipline upon U.S. agriculture, to foster agriculture exports, and to eliminate Government-mandated planting requirements. That legislation represented the most radical change in farm policy since the inception of Federal farm programs in the 1930s, and in my view was a step in the right direction.

I would have preferred a farm bill which would assist family farmers in becoming more efficient and more productive, thereby becoming more competitive. Instead of strengthening market oriented agricultural sector, I am concerned this bill will make farmers more dependent upon government subsidies.

Our farm policy should promote the strength and ability of American agriculture to produce more and safer food and fiber with fewer chemical inputs. The United States has a competitive advantage in the production of many crops and most kinds of livestock. However, American farmers and ranchers are plagued by low prices. While this bill attempts to deal with low farm gate prices, it does not address the fact that U.S. agricultural producers sell in a world market where low prices are the norm. A U.S. agricultural policy that results in American food and fiber products being produced at higher than world prices does no good for American farm families.

I am very concerned about the regional bias in this bill. Southern cotton, rice, and peanut farmers, particularly large family farms State will be adversely affected by the payment limitations. These large farms are some how construed to be corporate farms when, in fact, most are family farms. Also, I am not satisfied that our peanut farmers are being treated fairly. This bill ends the peanut quota program, the last of the old style farm quota programs, and enacts a peanut marketing loan program, affecting both farmers and rural communities. We should have a farm bill that treats all farmers equally, that allows them to be competitive, and that continues to provide the American consumer with wholesome, good quality food and fiber.

I note that this bill authorizes considerable spending for conservation. There is nothing more important to agriculture than conservation. In South Carolina, it is said that if you do not take care of your land it will not take care of you. It is encouraging that successful programs such as the Environmental Quality Incentive Program are strengthened in this bill. However, I question the addition of programs, which in my State could lead to land being taken out of agricultural production. Once taken out of agriculture, the land rarely returns to the farm and that increases the demand for land thereby raising the price of land or the land rental.

I am disappointed the FSRIA Act does not do enough to strengthen our agricultural research assets including our land-grant university system and the Agricultural Research Service. The research done by these institutions and agency have materially added to the competitiveness and productivity of American agriculture. They should be cultivated and given the funding they need to continue their outstanding research. Emphasis should be directed at ensuring these results are translated into practical measures that can be used by the food and fiber sector of our economy. More could also have been done to help beginning farmers. However, no piece of legislation is perfect.

I thank the conferees for retaining my amendment regarding farm reconstitutions in the conference report. As I said in prior statements I made earlier this year, the Department of Agriculture could have handled the problem itself without legislation. Flue-cured tobacco producers and quota owners in the Carolinas and Virginia will be better off with this amendment. This amendment will allow flue-cured tobacco allotments and quotas to continue to be transferred through the process of farm reconstitutions.

Despite my concerns regarding the shortcomings of this bill, I will vote in favor of the conference report. Throughout my long career in public service, I have fought for the farmers of my State. This bill will provide farmers with financial resources to improve their efficiency and productivity.

Mr. BYRD. Mr. President, since Congress passed the 1996 farm bill, farmers throughout America have been pointing out the holes in the farm safety net that was intended to help family farmers and prevent the demise of America's agriculture industry. The new farm bill, The Farm Security and Rural Investment Act of 2002, authorizes a wide variety of U.S. Department of Agriculture programs and strengthens the safety net for America's farmers, ranchers, and rural communities.

This farm bill, not unlike other authorizing bills that have moved through the Congress in recent years, approves, in one broad stroke, huge amounts of spending on the mandatory side of the budget. Without adequate controls and without the political will to make tough decisions, mandatory spending has been annually eating up greater portions of the nation's budgetary resources.

That is not to say that there are not a number of worthwhile, and necessary, provisions in this bill. Certainly we do not wish to see our agricultural industry go the way of others that have drifted overseas, where costs are lower and health and safety precautions are weak or nonexistent. Moreover, at a time when we are becoming more attuned to the real threats of bioterrorism and agroterrorism, our farming industry and the need to preserve it can be seen in a new and different light. But Senators need to be more aware of the fact that voting for authorizing legislation is not just supporting policy. It is advocating spending, often uncontrolled mandatory spending, that has a real effect on our national budget. It also meets expectations for additional discretionary spending by authorizing new and expanded discretionary programs. I hope that Senators will remember that later this year when we debate the overall discretionary spending levels.

I am disappointed about a few items that are not included in this farm bill. For example, I had hoped that this bill would include funding for livestock producers who are suffering from drought conditions that we know are going to worsen. Previous farm bills had provided this sort of assistance, and I wish that this one had. On the positive side, this bill provides funding for a number of programs important to America's family farmers and rural communities. It, as well, makes important repairs to the farm safety net. But, unfortunately, the conference report also allows significant holes to remain when it comes to the humane treatment of animals.

Procedurally, it is discouraging that certain provisions to protect animals included in both the House-and Senate-passed versions of H.R. 2646 were eliminated or weakened during conference committee action. For example, both the House and the Senate versions included an identical provision to prohibit the interstate transport of animals for the purpose of fighting, but this language was weakened during conference. At the same time, a provision included only in the Senate version of the bill that would permanently limit the scope of Animal Welfare Act protections—the so-called birds, rats, and mice prohibitions—was retained during conference.

The conference report, however, also eliminates the Senate-passed provisions that would have improved the standards of care and treatment for certain puppies intended for sale as pets. It is unfortunate and disappointing that the conference committee made these decision. Clearly, there is still so much more to do to promote the humane treatment of animals. Animals cannot vote, and cannot write or call to voice their concerns, but they do have many advocates, and I count myself as one of them.

While the farm bill conference report is deficient in its protections for animals, the bill includes provisions that will greatly help family farmers and rural communities in West Virginia, and throughout the nation.

By providing $17.1 billion for conservation activities, for example, the bill will help farmers in their efforts to be good stewards of their land, even while they continue to cultivate crops. Farmers from many states, including West Virginia, will also benefit from the expansion of assistance for producers who grow non-commodity crops—crops like apples, peaches, and many types of vegetables. In addition, dairy farmers can look forward to counter-cyclical payments that will provide more assistance when prices are low.

The new farm bill will also make a significant investment in rural communities. The Rural Development programs authorized in this bill will help rural communities invest in the kind of basic infrastructure necessary for economic development. Most notable is the $360 million provided to fund the backlog of applications for water and wastewater development projects.

Although I am disappointed with the limited protections for animals included in the new farm bill, overall, The Farm Security and Rural Investment Act of 2002 conference report is a compromise I shall support.

Mr. HARKIN. Mr. President, many Senators have not had the time to digest the many pages of the conference report and final legislative language of the nutrition title. I would like to take this opportunity to provide some detail on the provisions so that Senators will have a full understanding of what we have achieved in their conference report.

When we set out to re-authorize the food stamp program our goals were to improve benefits for the neediest families and to simplify the food stamp program, making it easier for States to administer and to remove obstacles for working poor families. We wanted to strengthen the program and ensure that eligible needy families can participate in this critical nutrition and work support program.

We have taken significant steps to improve benefits for households with children by improving and reforming the standard deduction. Currently, all households, regardless of their size, receive the same $134 standard deduction from their income before food stamp benefits are calculated. This approach effectively limits benefits for larger households, which typically include children. The legislation solves this problem by making the deduction more responsive to household size. Now, all households will receive a standard deduction set at 8.31 percent of that year's poverty line. Another aspect of this change is that the standard deduction will be indexed for inflation each year. Indexing the standard deduction will help maintain the food purchasing power of food stamp benefits over time. This provision will take effect with all of the other annual adjustments in the food stamp program's benefit structure. Some States apparently are concerned that this will be a difficult deadline to meet. USDA should take a pragmatic approach toward those States that are working in good faith to implement the provision in a timely manner, but who may miss the deadline.

One of the most significant benefit improvements included in the nutrition title is restoring food stamp eligibility to legal immigrants. The Senate passed food stamp restorations for legal immigrants with overwhelming support. It is gratifying to see the majority of the Senate proposal in the final package. The bill restores eligibility to three groups of legal immigrants. First, it restores eligibility to qualified low-income legal immigrant children regardless of their entry date into the United States. Second, it makes qualified legal immigrant adults who have lived in the United States for 5 or more years with that status eligible. Finally, the legislation allows legal immigrants receiving benefits under specified disability-based programs to qualify for food stamps.

Children who are made eligible under this provision are exempt from sponsor deeming, although adult sponsored immigrants are still subject to sponsor deeming rules. The policy USDA implemented last year on deeming represents a reasonable and balanced approach to providing food stamps to low-income families in need, while still ensuring that sponsors remain responsible for immigrants that they bring into this country. USDA should maintain this policy.

Immigrants frequently live with their sponsors. Over the years, Congress has consistently rejected proposals to require food stamp recipients to repay properly issued food stamp benefits. That principle is not incompatible with sponsor liability. Low income immigrants may be deterred from participation if they believe that their family members may be sent a bill if they participate in the food stamp program. We do not intend for low-income sponsors who are a part of the food stamp household or family unit to incur a liability as a result of their family's or household member's participation in the food stamp program.

The broad restoration for adults will bring food stamp rules into conformity with Medicaid and TANF immigrant eligibility rules for recent immigrants. Now, under all three programs, an adult becomes eligible for benefits 5 years after obtaining a qualified status. The 5 year waiting period begins when the immigrant gains qualified status regardless of what type of immigrant status he or she had prior to that point. This alignment should make it much easier for immigrants to understand the immigrant eligibility rules in the three programs and for States to administer them.

Since 1996, the proportion of food stamp recipients who work has increased dramatically and the proportion who receive welfare has plummeted. Food stamps is no longer a mere adjunct to cash welfare programs. It is a work support program and a nutritional safety net for a wide spectrum of low-income people. Paperwork and administrative requirements that might have been appropriate when food stamps were a supplement to welfare have become unnecessary barriers to meeting the nutritional needs of more diverse eligible low-income households.

Although some States have shortened their applications, current rules require information on too many obscure types of income and resources, even though few households have these items. This approach is the result of a policy that seeks to cast a very wide net in collecting information about households' incomes and resources. A solution to this problem is to narrow the applications' scope to those relatively few types of income and resources that would make a significant difference in the food purchasing power of applicants.

Sections 4102 and 4107 of the bill allow states to conform their definition of income and resources in the food stamp program to definition in their TANF and Medicaid programs. Each section lists major items that fairness requires to be counted. USDA will have the authority to add to the list of items states cannot exclude. Since we worked closely with USDA in crafting the statutory list, the Department should not have reason to exercise that authority in the absence of unforeseen circumstances. In addition, the legislation does not require states to wait for new regulations before simplifying their programs.

States now have the option of semi-annual reporting in the Department's current regulations. This bill allows States to extend semi-annual reporting to the vast majority of the food stamp caseload. States will be able to conform their food stamp reporting rules more closely to those of Medicaid and other work support programs.

Separate rules and requirements for each program burden both families and state administrators. Joint guidance or regulations from USDA and HHS can make a real difference. Families should be able to comply with both programs' requirements by completing a single report. An eligible family should not put its food stamps at risk by complying with Medicaid reporting requirements. The Department should ensure that this no longer happens.

The same procedural protections the Department has long applied to monthly reporting are just as appropriate for any other system of periodic reporting. Just as a household that files a late or incomplete monthly report needs a second chance, so too does a family having trouble with a quarterly or monthly report. In addition, the Americans with Disabilities Act and rules for individuals with limited English proficiency would apply equally no matter what period is covered by the report.

USDA should further reduce reporting burdens for the elderly and persons with disabilities using the broad regulatory authority it used in late 2000 to reduce burdens for many types of households.

To reduce the number of reports required of households, the conference report provides states the option to freeze households' deductions between eligibility reviews with two limited exceptions. First, if the household reports that it has moved, the food stamp office will have to provide the household a shelter deduction based on its new circumstances. Second, whenever the Department's regulations require the food stamp office to act on a change in earned income, it will have to apply the 20 percent earned income deduction to the new amount. Any household that believes this freeze is causing it a hardship may reapply and have its benefits recalculated without waiting for the next scheduled review of its eligibility. States may implement this change as soon as it becomes effective. Significant new regulations from USDA in this area are not expected.

The conference report does not include a Senate provision that would have replaced the current food stamp re-certification process with a re-determination process. In years past, the rigidity of certification periods was a serious problem, but USDA has taken steps in recent years to introduce flexibility and allow certification periods to be extended simply and easily. The allowance of transitional food stamp benefits, both as they exist today under USDA regulations and as expanded in this legislation, further reduces the need for fixed certification periods.

Families leaving welfare can face particular difficulties with the food stamp program's current procedural requirements. Recent studies have shown that as many as 60 percent of families leaving cash assistance do not continue to receive food stamps even though almost all are still eligible.

To ensure a much smoother transition from cash assistance to work, this legislation provides States with a new option to provide up to 5 months of transitional food stamps to families leaving cash assistance. Since virtually all of these families are already eligible for food stamps, the goal of the program is to eliminate any unnecessary administrative hurdles that families or States might face. When a household leaves the State's cash assistance program, the state will simply subtract the cash benefit from the family's income and recalculate food stamp benefits. There will be no contact between the State and the household and no procedural requirement on the household. This transitional benefit amount will be the correct food stamp benefit for all purposes. The benefit will essentially be frozen for the next 5 months, except that States will have to update the benefit to reflect any general changes in food stamp benefit amount such as an increase in the thrifty food plan.

States may also elect to adjust the transitional benefit if they become aware of changes in the household's circumstances. For example, if a mother reports the birth of a child to the Medicaid program, the State can elect to increase the food stamp allotment to reflect the new child. In addition, the household retains the right to reapply to have its food stamps recalculated based on current circumstances. This is especially important in cases where the wage-earner in the family loses a job.

Families that pay or receive child support can have special difficulty under current rules. These payments may fluctuate for any number of reasons. Keeping track of them can be difficult for both the food stamp office and the household. In addition to established regulations, USDA circulated some useful guidance on this subject last year and may want to do more.

Many States do not have computers in their child support enforcement agencies that can communicate effectively with the systems that calculate food stamps. The bill requires USDA to establish simplified systems for using data from child support agencies even if it is a few months older than most information used to calculate food stamp benefits. Unless a household submits more current information, the State would use what it has. This legislation only addresses families that pay child support. A State should not rely upon State data about child support a family receives unless, under the income anticipation rules, it is reasonably certain that the family will continue to receive those amounts.

Although the focus of the bill is on procedural simplifications, we did simplify the program's benefit calculation rules in some respects. Simplification is not intended to be applied in ways that would reduce benefits. New rules for estimating households' utility costs in this bill will allow States to elect to allow use of a flat, standardized amount used to calculate the shelter deduction for families with utility bills other than telephone. States do not have to inquire further into the family's living arrangements. This simplification as long as USDA and states ensure that these standardized estimates keep pace with increases in utility costs. States do not have to inquire further into the family's living arrangements. This simplification will not reduce benefits as long as USDA and states ensure that these standardized estimates keep pace with increases in utility costs.

The Senate bill included a simplification in the procedures states use to convert weekly and biweekly earnings into monthly income. However, the Department's current regulations already allow states to do that if they follow these same conversion procedures in TANF. Accordingly, the legislative provision was not adopted, but USDA should encourage more states to take this regulatory option.

The other simplification we made in the food stamp benefit structure involves people who live in institutions and are unable to manage their own food stamps. This will primarily involve people who are recovering from substance abuse problems and some people with severe disabilities. Although these procedures can apply to homeless people or to women living in shelters for victims of domestic violence, we expect many people in those facilities will choose to retain their own food stamp benefits because of their relatively brief stays or because they need to obtain some of their meals outside the shelter. Where, however, the recipient consents or is incapable of managing his or her own affairs, this provision will allow the benefit to be calculated under a standardized formula that will not require the institution to gather a great deal of detail about the circumstances of each resident. USDA's current rules that define an institution as a facility consistently providing more than half of a recipient's meals will continue to apply and limit this provision's scope. We also included safeguards to ensure that persons leaving centers in mid-month will receive their fair share of benefits for the remainder of the month and will get help from both the center and the food stamp office to re-enter the regular food stamp program.

Many States have been operating EBT for some time now and have a great deal of experience. This legislation requires USDA to issue a report on the current status of EBT. It requires USDA to provide a wide array of information on how systems are operating, including issues with contract renewals and client access. The report will include valuable information about how states ensure that claimants have full access to their food stamps within EBT systems and on how they ensure that EBT complies with the Americans with Disabilities Act and the Rehabilitation Act.

The Senate bill included a provision to ensure that households that have accumulated benefits in an electronic system would not have their benefits made inaccessible for some time. Elderly and disabled households who often receive very small food stamp benefits and store them, might otherwise lose food stamp benefits. The Department is already planning to implement this policy via regulation, so the bill does not include the provision.

Reforms to the food stamp quality control system in the bill are based to a great extent on the recommendations of the National Academy of Sciences. The current quality control system, for measuring program performance, only focuses on payment accuracy. Under the new system, payment accuracy will not override the program's basic goal of providing food assistance to eligible families.

Under current law, States with payment error rates in excess of the national average face fiscal sanctions each year. Thus, close to one-half of the States are in violation each year. The new system focuses on those states with persistent payment accuracy problems. Only those States which USDA is statistically certain have payment error rates above 105 percent of the national average will be targeted as problem States. When a State exceeds this threshold for 2 consecutive years, USDA will be required to take action and may use any combination of three specific options as its response.

First, USDA may require the State to reinvest up to 50 percent of the sanction to improve administration of the program. The bill does not specify in what activities States should reinvest, although states may use reinvestment funds to improve program access. States have discretion to determine what type of reinvestment will most improve its program. Second, USDA can designate up to 50 percent of state's potential liability to be held at risk, but cannot collect sanctions during the year in which they are assessed. The State must pay at risk amounts from the previous year if the State's error rate is subject to sanction in the current year. If the State is not subject to sanction in the following year, the amount held at risk is automatically waived. Finally, USDA can waive any portion of the sanction amount. Sanctions that are not reinvested or held at risk must be waived.

USDA should consider the causes of the State agency's problems, and whether the State's error rate is declining along with other relevant factors when determining how much of a State's sanction to waive. If a State is making progress on reducing its error rate, USDA should consider a waiver of its sanction. As under the current system, States may appeal these decisions. If a State loses an appeal, USDA may withhold funds that have not yet been reinvested pending appeal. The Department should not use this authority in a way that undermines reinvestment plans when a State raises an appeal in good faith.

The Senate bill would have adjusted sanctions for States doing a particularly good job of serving low-wage working families or immigrant households. USDA assured the conferees that it would continue its current practice of adjusting sanctions to account for enrolling high or rising numbers of participants more likely to involve errors, such as working poor households. USDA should also continue to adjust for the impact of high numbers of legal immigrant households and, in the future, to adjust for other factors, as the need arises.

The current system will remain in place for fiscal year 2002. USDA may use its authority to waive the fiscal year 2002 sanctions for those States that would not have faced sanctions under the new system. Similarly, it may waive sanction amounts in excess of the new sanction formula.

The new system begins in fiscal year 2003. No State will be subject to paying a sanction until 2005. The administration requested this delayed implementation timetable. USDA must now ensure that this delayed effective date does not undermine the progress states are currently making toward lowering error rates.

The legislation provides $48 million each year for new quality control performance bonuses to States. Bonuses will be provided to States with the best or most improved performance relating to correcting errors, reducing rates of error, and improving eligibility determinations and other indicators of effective administration determined by USDA in consultation with the States. Correcting errors is crucial. USDA should recognize and reward States that improve their staff training and establish systems that give State administrators early warning when eligibility workers encountering problems. USDA should also consult other program experts such as client advocates, research organizations and academics.

The bonuses should be balanced and reflect many important aspects of State administration, in addition to payment accuracy and program integrity. Timeliness and denying benefits only to those applicant households that are truly ineligible, should be a significant portion of the bonus calculation.

Regrettably, the conference agreement does not include the Senate provision to move toward the more reasonable version of the time limit for able-bodied adults without dependents that the Senate passed in 1995 and again in 1996. Congress should revisit the issue in the near future, but in the meantime, the administration should continue to do everything possible to limit harsh and inequitable effects of this provision.

In addition, the bill restructures the employment and training funding to eliminate the requirement that 80 percent of employment and training funds be set-aside for individuals subject to the time limit, although it does reserve a small mount of money specifically for that population. USDA should give this group of people and the States that elect to serve them special consideration when distributing employment and training funds. States that have agreed to ensure that no one who is willing to work is denied benefits under the time limit should receive the funds to do so.

In this bill, States have a greater flexibility to provide employment and training services to people that are subject to the time limit yet do not meet the definition of a work activity. Such individuals can still benefit from, for example, job search activities and training programs that are less than 20 hours per week. USDA should respect the broad authority states already have to decide how to coordinate and apply these various employment-related requirements under the act.

This bill also eliminates the current $25 cap on the amount States may reimburse E&T participants for expenses other than dependent care. This cap had not kept pace with inflation and limited States' ability to provide needed work support as part of their education and training programs. USDA should continue its longstanding policy of providing States with broad flexibility in providing these funds to employment and training participants.

This nutrition title is among the strongest that the Congress has ever passed. It will improve benefits, support families' efforts to move from welfare to work, and simplify program rules. The bill will improve nutrition benefits for low-income Americans and reduce hunger and poverty in our country for a number of years into the future.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. HARKIN. Mr. President, I yield myself whatever time I have remaining.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HARKIN. Mr. President, I want to take this opportunity to close my part of the debate on this farm bill. We will be voting very soon. I want to say a few things.

This is a comprehensive bill. This isn't a bill just for commodities for one part of the country or other. This is a comprehensive bill that takes into account a lot of different factors. This is a farm bill that has taken a long time and a lot of hard work, both in our committee and in the Senate, under the leadership of, first, Senator LUGAR, and under my chairmanship beginning in the middle of last year; also, on the House side, under the chairmanship of Congressman COMBEST, and his ranking Member, Congressman STENHOLM.

We have had a lot of debate on this bill in the committee and on the floor, and, quite frankly, a lot in conference also.

Out of this has come, I think, a good bill, a strong bill—a bill that is good for all of America.

Is it a perfect bill? No, it is not perfect, at least not from my viewpoint. And I daresay, there isn't one Senator here who would think it would be perfect from his or her viewpoint. I am sure that everyone here can find one or two things they do not like in the bill. But keep in mind, it is a comprehensive bill for America and for our future.

The bill comprises a number of different parts which I think enable us to turn the corner. If I were to say what was my view on this farm bill, it turns the corner from where we have been in the past.

In commodities, we have strengthened income, we have provided stability and predictability. We have ended the Freedom to Farm. Freedom to Farm was built on a two-legged stool: low loan rates and AMTA payments—direct payments.

Well, if you ever tried to sit on a two-legged stool, you know it is unstable, it is unpredictable, you never know which way you are going to fall.

So this bill puts four legs under that stool for our farmers and our ranchers: higher loan rates, a target price, a direct payment, and conservation—four strong legs under that stool by which we support and enhance our farmers' livelihoods. So we have turned the corner.

Large farms in the past got everything. Under Freedom to Farm, it was a dog-eat-dog world. And in a dog-eat-dog world, the biggest dog gets it all. We have turned that corner. Now, for example, people like Scottie Pippen and Ted Turner and Sam Donaldson will not be able to get a dime from this farm bill. I cannot tell you how many editorials I have seen lately saying the farm bill continues to give all this money to people like Ted Turner and Scottie Pippen, and people like that. Absolutely untrue. We have turned that corner. They now will not get one single dime.

We have more help for our moderate and mid-sized farms, with the higher loan rates, with the conservation payments, with the target price. We have support in here for beginning farmers. We even have a specific provision in here for organic farmers, which we have never had before. We have a provision in this bill for specialty crops, a floor of $200 million a year for the purchasing of fruits and vegetables. That helps small orchards, small vegetable farmers, in every state, like in Washington, in Michigan, and in New England. This is good not only for them but for the health and welfare of America. So we have turned the corner in just focusing on the biggest farmers and in focusing only on a few crops.

We now are saying to moderate and mid-sized farmers: You, too, will have support and help. We say to farmers who are growing specialty crops: You now have support and help. We say to organic farmers: You now have support and help. We say to farmers who want to practice conservation: You now have help. And especially to our smaller and mid-sized farmers.

So we have turned the corner. On conservation, we have an 80-percent increase in conservation, a huge increase over 1996 Farm Bill. We have turned the corner. The Conservation Reserve Program, nearly 3 million more acres will be added; the Wetlands Reserve Program, we have more than doubled it; the Wildlife Habitat Program, a fourteen-fold increase; the EQIP program, to help our livestock farmers clean up and stop runoff into places such as the Chesapeake Bay and the Mississippi River and the Missouri River and the Great Lakes and our crop producers to reduce their nutrient run-off, among many other important conservation activities, five and a half times more money. More money for EQIP than we have ever had before, going from $2 billion to $11 billion.

There is a new provision for ground water protection that we have never had before; $600 million to help conserve ground and surface water. There is a brand new conservation program called the Conservation Security Program that will help all farmers, especially our moderate and mid-sized and small farmers be good conservationists, like they want to be, like many of them are already. This will help support them and encourage them to be even better conservationists in the future. We have turned the corner on conservation. This is a program that many farmers are eagerly waiting for and I strongly encourage the Secretary to expedite implementation of CSP so we no longer leave producers out of conservation programs and so we no longer continue to ignore the stewards of our nation's natural resources.

On nutrition, as I mentioned, the last farm bill did not even include a nutrition title. We included it in this farm bill at a level of $6.4 billion, almost twice what the House level was. Yes, I say to my friend from Texas, you bet we restored food stamp benefits to legal immigrants who have lived in the United States for at least 5 years. The President himself wanted that. We also said that children and people with disabilities don't have to wait 1 day to get food stamps. Yes, we answered that need.

We also did away with a lot of the red tape and the paperwork associated with the food stamp program. In addition, we provide 5 months of food stamps for people who are making the transition from welfare to work.

On the Emergency Food Assistance Program—the TEFAP program it is called—we provide more money for commodities that are distributed in food banks and food pantries.

There are 33 million Americans—13 million of whom are children—who go to bed hungry every night. This farm bill speaks to them. That is why 51 organizations, including Second Harvest, Bread for the World, the Children's Defense Fund, the Food Research Action Center, and many others—51 food groups—in America support this bill and urge its passage. Our bill sticks up for needy people. We say, they, too, are part of our great country.

Someone said we are buying votes in this bill for commodity programs. How about nutrition? How about all the money we put in for nutrition, for all the poorest people in America, for legal immigrants? Many of them cannot vote. We are not buying any votes there. But we are meeting a humanitarian need and we are meeting our obligations as a decent and caring society.

Rural development: We provide the funds to clear up the backlog of water and wastewater. Broadband access: This is the first time we have money in there to bring broadband access to our small towns and communities. We have a Rural Equity Capital Fund we have never had before, a provision to provide for grants and loans for value-added businesses owned by farmers around small towns and communities. We have turned the corner on rural development.

Energy: This is the first time ever we have had a title in the farm bill dealing with energy, to provide grants and loans to farmers and ranchers for renewable energy—wind, solar, biomass, that type of energy—to build biofuels processing plants for soy diesel, soy lubricants, ethanol. Yes, we are providing new markets for our farmers out there, and the new market is energy—energy for our country, to make us energy independent, to provide us the kind of independence that we need in energy, based on renewable resources on our farms and ranches. It is the first time ever. We have turned the corner.

On trade, we provide more money for the Market Assistance Program, to make sure we are able to sell our value-added products overseas, and we have the Foreign Market Development Program to get our bulk commodities overseas. We have provided more money for that. So we have turned the corner there.

We have heard a lot of talk about competition. I will say this, we have done more in this bill on fairness and transparency than any bill since the Packers and Stockyards Act was passed in 1921—more. Farmers and consumers scored a big win, and the big meat processors suffered their biggest loss in decades when we kept the country of origin provision.

The PRESIDING OFFICER (Ms. STABENOW). The Senator's time has expired.

Mr. HARKIN. Madam President, I ask unanimous consent that I be given 4 more minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HARKIN. I thank my colleagues for giving me this time.

The big meat processors lost out. We got country-of-origin labeling, as well a crucial amendment to the Packers and Stockyards Act that brought swine production contractors under the Packers and Stockyards Act. So now farmers who have swine production contracts have the same protections against unfair practices as poultry growers and livestock owners. This provision makes sure that the Packers and Stockyards Act evolves with the changing industry.

We were also able to keep a provision to make it clear that farmers who have marketing and production contracts have the right to discuss those contracts with their close advisors and family, no matter what the contract or the meatpacker says.

Let me say this about payment limits. Do I wish we could have done more? Yes. But I want to point this out: Right now the payment limitation is $460,000, the maximum that any one person can get or any one entity can get under the freedom to farm bill. The House came with $550,000. They raised it. We brought it down to $360,000. It is $460,000 now. We brought it down to $360,000. We were at $275,000 in the Senate. The House was at $550,000. So we actually came in closer to the Senate at $360,000. As I mentioned, we cut out the Scottie Pippens and the Ted Turners and all those people who were getting payments. That has ended.

We set up a commission that will have members appointed from the Senate, from the House, and from the administration, to advise us on further processes that we should do to address the issue of payment limitations.

And this is another thing we did: We provide for transparency. From now on, we will be able to track every payment made to every farmer, track it right from the beginning right down to who gets it. Right now, people hide behind entities, such as partnerships and co-ops and corporations. Now, with transparency, we will see who gets what, for the first time ever. So now we have transparency in all of our programs, transparency in the EQIP program, transparency in the commodity price support program.

So, yes, we have turned the corner on competition. Maybe we did not get to the goal of where we want to be, but we have turned the corner. From now on we are going to have transparency. We are going to have a better handle on exactly who is getting what.

I conclude my remarks by saying: You can vote no on this bill. I could pick out two or three things, if I wanted to, and vote no myself. But this bill moves us forward, to turn that corner, to turn away from the Freedom to Farm bill and what it stood for, and to chart a new course for the future. We can vote no on this bill. All that means is we go back to Freedom to Farm, with none of the provisions I just mentioned applicable. They would all be gone. Is that what we want to do? Step back in time? Step back to where we were? I don't think so.

The bill is not perfect, but it is a good, strong, fair, and equitable bill for farmers and ranchers all over this country. It is fair and equitable to our consumers because they are still going to continue to get the most reliable, safest, cheapest food anywhere in the world. We meet our social obligations in ensuring that we provide food and food stamps to those most needy in our society. That is why I urge Senators to vote for this bill and move it ahead.

I thank all of our staff members who have worked so hard on this bill. In particular, I thank Mark Halverson, my staff director. When this is all over, I will tell him he has to go to bed and get some sleep because I don't think he has slept in about a month or two or three. I thank Charlie Rawls, our general counsel; Bob Sturm, chief clerk, who made sure everything was set up for us in our meetings, took care of all the paperwork; Rich Bender; Karil Bialostosky; Seth Boffeli; Kevin Brown; Alison Fox; Amy Fredregill;

Sara Hopper; Ellen Huntoon; Eric Juzenas; Susan Keith; Jay Klug; Stephanie Mercier; Frank Newkirk; Doug O'Brien; Vershawn Perkins; Erin Peterson; Lloyd Ritter; Terri Roney; John Moreland; Bob Soukup. I thank all of those.

I ask unanimous consent for 1 more minute to continue to thank my staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HARKIN. I thank particularly the family members of these individuals, the spouses, significant others, the children. I know they haven't seen spouses, loved ones, parents, father and mother, in this case, for some time because of the long hours we have worked. Sometimes when Members would go until 9 or 10 at night, we went home. Staff stayed until 1 or 2 in the morning to clean up the mess we made and do all the paperwork and get us ready for the next day. I particularly thank their families.

I close by saying my special thanks to my ranking member and my good friend Senator LUGAR from Indiana. I know we disagree on this bill, but there are a lot of things on which we do agree. There are a lot of things we worked very closely on when we developed the bill in committee. I look forward to working with him in the future.

This is not the last farm bill. This is not the end of what we will do to address the needs of rural America and our people who live there. I look forward to working with Senator LUGAR.

As I said, we may have a disagreement, but I echo what someone said the other day: Senator LUGAR has been from the beginning intellectually honest and forthright in his approach on this farm bill. No one can fault that. We just see it differently; that is all. But he has been a great friend. He has helped move the process forward. Even though he didn't agree with the bill, he wanted to make sure the process moved forward. I think that is the mark of a true Senator and a statesman—to make sure, even though you don't agree, that the process must continue forward.

I thank my good friend and my ranking member Senator LUGAR for his help and his support in getting us to this point where we now are approaching a final vote on the bill.

Mr. LUGAR. Madam President, I thank my colleague, the distinguished chairman, for his generous remarks. I will simply say, as I did at the beginning of the debate, he came into the chairmanship of the committee at a difficult time. This is a long process. He and his staff have done a remarkable job, and our staff has worked with them. We look forward to continuing to do so.

We are going to have much more of an agenda before the Agriculture Committee. The distinguished chair will be a part of that as well as the distinguished majority leader who is on the floor whose remarks we now await.

I do have a disagreement with my chairman, but we have expressed our views at length and hopefully to the profit of all who have listened to this debate.

I thank the Chair and yield the floor.

Mr. HARKIN. Madam President, I wanted to thank the legislative counsel who worked so hard on this: Gary Endicott; Darcie Chan; Janine Johnson; Heather Flory; and Tim Trushel. They were indispensable in helping us work through this bill.

I thank the Congressional Research Service: Geoff Becker; Joe Richardson; and Jeff Zinn. I thank the Congressional Budget Office analysts. When we always asked them, in the middle of the night, they would come through with the information we needed. They are David Hull, Jim Langley, Greg Hitz, Valeri Baxter-Wolmer, and Lanette Walker. And at the USDA Office of General Counsel, I thank Dave Grahn and Pia Ruttenburg.

I will yield the floor, but someone asked me what was the best thing we had going for us when we went into conference with the House. I said: We had our secret weapon. We had the majority leader of the Senate.

The majority leader is a valuable member of our Agriculture Committee. I can't think of anyone who has worked longer and harder for our farmers and ranchers in America than TOM DASCHLE. Since the day he first came to the House of Representatives, we have been close friends. We have worked together. He has been one of best leaders on agriculture in all these years. It is a source of pride to me to have him on the Agriculture Committee with us.

I can tell you, it was a great source of pride in getting the job done and getting us to this point that Senator DASCHLE was there with us every step of the way, helping us out and bringing us to the point where we are.

I publicly thank my good friend, my leader, Senator DASCHLE, for all of his help on this.

The PRESIDING OFFICER. The distinguished Senate majority leader.

Mr. DASCHLE. Madam President, I will use my leader time to finish comment on this bill before we go to a vote. I will try to be brief because I know Senators are hoping to have the opportunity to vote very shortly.

Let me simply return the compliment of the distinguished Senator from Iowa, the chairman of the committee. He and I have spent more hours than either of us have been able to count over some long months with the hope and expectation that we would be coming to this point. His extraordinary tenacity, his leadership, his vision for agriculture, his ability to work with all sides, his ability to articulate positions of our caucus and of Senators with whom he both agreed and disagreed is remarkable.

The people of Iowa have had many proud moments in their history. I cannot think of a prouder moment for the State of Iowa, this special time for us as we bring this very important issue to a close in the Senate.

In the most heartfelt way, I offer my congratulations to Senator HARKIN for his leadership.

I must say, without being repetitive, his comments about the distinguished Senator from Indiana are so true. There isn't anybody in this Chamber I have greater respect for than DICK LUGAR. I am reminded again why, as I watch how effectively he presented his arguments. The old adage about disagreeing without being disagreeable applies exponentially in so many ways to DICK LUGAR. He is never disagreeable. He will disagree and he will make his voice known and heard, but he is a remarkable Member of this body. I am honored to serve with him and to work with him on all issues, especially this one.

My colleagues have thanked their staffs. I could not go to the vote without thanking publicly Bart Chilton, Jonathon Lehman, and Mark Childress of my staff, especially. As Senator HARKIN has noted, we would not have accomplished what we did were it not for their remarkable work, their tremendous effort, night and day, and well into the night, sometimes into the wee, early morning hours, in order to achieve what we were able to accomplish over these past several weeks and months. But those three individuals deserve special thanks.

I must say, whatever I can accomplish as leader is only accomplishable because of the tremendous professionalism my staff demonstrates daily. Mark, Bart, and Jonathon certainly have done that in this case in ways for which I will never be able to thank them adequately.

It is no secret that many of us have had difficulty supporting farm legislation in the past. So I can sympathize with Senator LUGAR as he articulates his reasons for opposing this particular piece of legislation. He has been an advocate of prior farm bills because he believed in them. I am an advocate of this bill because I believe in it. I believe in it because I think it does so many things we have heard the chairman so eloquently articulate just now. I will not recount them; to do so would be redundant. But I really believe that, for the first time in a long time, we will be able to send a message of hope to farmers and ranchers all over the country; hope to farmers in South Dakota who may have lost some of the reason for hope in recent years; hope to young farmers who really want to become part of rural life and productive citizens, as the farmers and ranchers of the future; hope to those who believe we can do better in nutrition and find ways to do a better job with conservation; hope to those who believe we can figure out a way to balance the imbalance that exists now in the unfair trading practices used by some, and make sure consumers have the ability to know where their products are coming from now with country-of-origin labeling.

So I must say, this is a great day for agriculture. This is a great day because we send a strong message to our farmers and ranchers of all generations, and to those who look to us for some expectation that they can survive and achieve great things, having chosen this wonderful profession. So I am very pleased with the result. I am hopeful that our colleagues on both sides of the aisle will support this result with a resounding vote this afternoon.

I hope we can continue to build on what we have done. I have heard my colleagues come to the floor and suggest that now what we have to do is focus our attention on packer concentration. I heard Senator HARKIN speak powerfully about his determination to continue that effort. So we know our work is not done, but we do know we have accomplished a good deal. We have created a foundation for the next 6 years upon which we can build even more—sending hope and creating even better and more promising days in the future for our farmers and ranchers, the likes of which I didn't think we would see this year.

I thank the Chair and my colleagues, and I thank those on the committee. I thank the conferees, and I thank our staffs for a job well done.

I yield the floor.

The PRESIDING OFFICER. The Senator from Indiana is recognized.

Mr. LUGAR. Madam President, how much time remains on our side?

The PRESIDING OFFICER. Two minutes.

Mr. LUGAR. Madam President, I thank the distinguished majority leader for his very thoughtful and generous comments. It is my privilege now in the remainder of our time to thank people who have been very vital to this farm bill and with whom certainly I have had the pleasure of serving in this committee. They are our minority staff and detailees. I would like to name each one.

Obviously, Keith Luse, my right-hand person, who is right by me now, our staff director throughout all of this; Dave Johnson, chief counsel; Carol Dubard; Andy Fisher; Michael Knipe; Walt Lukken; Andy Morton, our economist, who has been so helpful during this debate and for many years; Terri Nintemann; Carol Olander; Chris Salisbury; Erin Shaw; Daniel Spellacy; Pat Sweeney; Mark Tyndall; Dave White; and Benny Young. All of them are very able people, with great futures ahead of them. We look forward to continuing our work with the majority staff and with our distinguished chairman.

With that, I yield back the remainder of our time.

Mr. HARKIN. Madam President, on this vote, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The question is on agreeing to the conference report to accompany H.R. 2646. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. NICKLES. I announce that the Senator from North Carolina (Mr. HELMS) is necessarily absent.

I further announce that if present and voting the Senator from North Carolina (Mr. HELMS) would vote "no."

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 64, nays 35, as follow:

[Rollcall Vote No. 103 Leg.]

NOT VOTING—1

Helms

The conference report was agreed to.

Mr. HARKIN. I move to reconsider the vote.

Mr. LEAHY. I move to lay that motion on the table.

Mr. LIEBERMAN. Madam President, I voted today for the farm bill because I believe that it provides some needed relief to our strapped farm industry as well as provides some new and much-appreciated assistance to the farmers of Connecticut. Our farm economy right now is in dire shape, and farmers from across the nation have pleaded with the Congress to give them the assurances that this bill possesses. I do not believe it is a time at which we can turn our back on the nation's farmers.

The bill also provides some precedent-setting relief to the often ignored farm industry in my home state of Connecticut. In particular, the extension of the dairy program, the new assistance for the speciality crops that dominate our farmland, the increases in conservation funding over the status quo, and the various incentive programs for organic agriculture all will bring benefits to Connecticut farmers. Finally, the provision of $600 million annually in new nutrition programs, including the restoration of food stamps to many legal immigrants, will allow many Connecticut residents to provide essential supplies of food for their families.

While this bill does provide support for who depend on the land for their living, like most legislation it is not perfect, and so I cast this vote with some reservations. I am concerned that several of the features that made the Senate-passed bill desirable have been weakened in conference. In particular, the conservation funding has been reduced and appears to be backloaded far into the future. The payment limitations that were adopted in order to ensure that funds were distributed more equitably, and not disproportionately to large corporate farms, also appear to have been weakened. While I cast my vote today for this bill, I hope that we can revisit these important issues in the near future.

Mr. REID. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DASCHLE. Madam President, I ask unanimous consent the order for the quorum call be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Madam President, the majority leader has asked me to announce there will be no further rollcall votes tonight.

ANDEAN TRADE PREFERENCE EXPANSION ACT—Resumed

The PRESIDING OFFICER. The clerk will report the pending business.

The assistant legislative clerk read as follows:

An act (H.R. 3009) to extend the Andean Trade Preference Act, to grant additional trade benefits under that Act, and for other purposes.

Pending:

Daschle amendment No. 3386, in the nature of a substitute.

Dorgan amendment No. 3387 (to amendment No. 3386), to ensure transparency of investor protection dispute resolution tribunals under the North American Free Trade Agreement.

AMENDMENT NO. 3387

The PRESIDING OFFICER. The question is on agreeing to amendment No. 3387.

The amendment (no. 3387), was agreed to.

Mr. REID. Mr. President, I move to reconsider the vote.

Mr. DASCHLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Madam President, I would like to take this time to talk in some detail about the Trade Adjustment Assistance Reform Act, the underlying bill. This is a bill which is a renamed version of S. 1209, which was reported out of the Finance Committee last December. It is the first part of a trade package to which the pending motion—actually it is the first part of the substitute underlying the bill.

I think it is important to put this bill in context. That is why I want to spend some time reviewing the history of the TAA program, its purpose, and recent proposals for reform, and how those factors are reflected in the bill.

I also want to review some important points about what this bill does and does not do. Unfortunately, there is a lot of misinformation out there. I want to clear up some of the inaccuracies that have cropped up about specific parts of the bill.

Last, I want to review my efforts to make this a bill with bipartisan appeal. That has been my goal—and, I think, one I share with Senator DASCHLE and Senator BINGAMAN—from the beginning. I really believe we have achieved that goal. So I want to touch on how that happened as well.

First, I will start with a little history.

Trade Adjustment Assistance—what we call TAA—was created in the Trade Expansion Act of 1962 and revised to its current form in the Trade Act of 1974. It was last revised in the 1993 NAFTA Implementation Act, which created a special program for NAFTA-impacted workers.

The purpose of the TAA program is to help workers who lose their jobs and firms that face layoffs as a consequence of international trade.

In 1962, President Kennedy said.

> Those injured by . . . trade competition should not be required to bear the full brunt of the impact. There is an obligation [for the Federal Government] to render assistance to those who suffer as a result of national trade policy.

When President Kennedy said those words, the United States had a trade surplus. Imports amounted to less than 5 percent of GDP. But the President and a bipartisan majority of the Congress were wise enough to realize that the benefits of increased trade are not evenly distributed. They realized that we, as a government, have an obligation to help those who are displaced by trade policy to get back on their feet.

Today, as we all know, there is a huge trade deficit. Imports as a share of GDP have tripled. These facts can lead to only one conclusion—the rationale for having a strong, effective trade adjustment assistance program are even stronger today than they were when the program was created. That is why 66 percent of Americans responding to a recent poll agreed with the following statement:

> I favor free trade, and I believe that it is necessary for the government to have programs to help workers who lose their jobs.

Congress has regularly reauthorized the TAA program—about every 5 years—and always with bipartisan support. It was with that history in mind that Senator BINGAMAN, Senator DASCHLE, and I embarked on this current exercise to reauthorize and reform the program.

But before turning to the specific provisions of the bill, I want to spend a moment on what the current TAA program does.

There are currently three TAA programs: regular TAA for workers, NAFTA-TAA for workers, and TAA for firms.

The two worker programs run out of the Department of Labor. They help workers who lose their jobs due to trade to get retrained for new careers. To achieve that goal, TAA provides a very modest level of income support to tide over workers while they retrain. It also pays for training and provides job search and relocation assistance where needed.

The TAA for firms program provides technical assistance to mostly small- and medium-sized businesses that face layoffs due to import competition. The program helps firms become more competitive so they can retain and expand employment.

People sometimes call TAA the "Cadillac" of U.S. displaced worker programs. I find that misleading. It is true that TAA provides more benefits that other U.S. programs for displaced workers. But please remember that no one wants to be in TAA. The prospect of a government check for about $250 a week is not an incentive to linger in this program when you have a mortgage to pay, a family to feed, and medical expenses to pay. I hope we can get past this "Cadillac" discussion and get down to the real issues.

The TAA program has a 40-year history, and we have learned some things from experience. Over the last few years there has been a growing consensus that it was time to take another look at this program and see how it could work better.

In the past 2 years, the GAO has done four very comprehensive studies of every aspect of the TAA program. GAO has noted some problems in the way the program operates and made some concrete recommendations for reform.

In addition, the bipartisan Trade Deficit Review Commission has looked at TAA. The Commission included our current USTR, Ambassador Zoellick, as well as Secretary Rumsfeld, former USTR Carla Hills, and others representing a wide range of views. As you probably know, they did not agree on much of anything. But their report contains one unanimous chapter recommending revision and expansion of the TAA program.

The GAO and the Trade Deficit Review Commission's recommendations for improving the TAA program include expanding TAA to cover secondary workers and assisting TAA participants with health insurance.

Also, they recommend making sure income support lasts as long as training. After all, you need work while you are getting trained.

They recommend creating a performance evaluation system to track program outcomes to see if it is working.

They recommend providing wage insurance.

They recommend assisting trade-impacted communities and assuring adequate funds for training.

That is the unanimous recommendation of the Trade Commission.

That, in a nutshell, is how this bill began. We didn't start out trying to add as many bells and whistles as possible to this program. We didn't add too much in the expectation of negotiating down later.

We simply took the nonpartisan and bipartisan recommendations of the GAO and the Trade Deficit Review Commission and wrote them into statutory language. This is basically what we did along with Senators DASCHLE and BINGAMAN. And we tried to do it in a fair and sensible way that would make the program work better and treat all trade-impacted workers equally.

Let me take a few minutes now to walk through some of the major provisions of the bill.

The first thing this bill does is unify the two TAA programs for workers—regular TAA and NAFTA-TAA. The unified TAA program pretty much adopts the existing NAFTA-TAA rules, which are the more recent. Consolidating these two programs creates a single set of application procedures, eligibility criteria, and training requirements. This makes the program a lot more user friendly for workers and easier for the Department of Labor to run. Unlike current law, the unified program will provide income support for the full length of training. That way workers can finish the training they need instead of dropping out when income support runs out. The Administration supports these changes.

The second thing this bill does is extend TAA coverage to workers who lost their jobs when their plants relocate abroad.

Right now, these so-called "shifts in production" are covered under NAFTA–TAA, but not under regular TAA. That means that if a factory relocates to Mexico or Canada, the displaced American workers are covered. But if the factory relocates to Thailand or Chile, they are not. That is not fair. It is not sensible.

This is not a fair or sensible way to run a trade adjustment program. There is no difference between a worker whose job moves to Mexico and one whose job moves to China. Their adjustment needs are exactly the same. The bill cures the unfairness of current law by extending TAA to cover shifts in production to any country.

The third thing this bill does is extend TAA coverage to secondary workers. Secondary workers are workers who supply parts to or perform finishing operations on a product produced by another so-called "primary" firm.

Right now, regular TAA does not cover secondary workers. Think about a case where an auto assembly plant closes because of import competition from Japan or Korea and that forces the nearby plant that supplies tires for the cars to close. All these worker lost their jobs for the same reason. But right now, the auto plant workers get TAA benefits while the workers at the nearby tire plant do not.

In 1993, secondary worker coverage was added in NAFTA–TAA. But workers can only get the benefits when the imports are from Mexico or Canada. At that time, it made some sense to extend this coverage for trade between the three countries in the new NAFTA agreement.

But now, nearly ten years later, it is time to extend the same benefits to all secondary workers. When we added secondary workers in NAFTA, it was understood that eventually it would only make sense to do it for everyone. Since then, the WTO Uruguay Round agreements have expanded trade with 145 countries, we have granted permanent normal trading relations status to China, and we have entered an FTA with Jordan and a trade agreement with Vietnam. It doesn't make sense anymore to limit these benefits to imports from Mexico and Canada. It is time to apply them across the board.

Now there have been a lot of misunderstandings about the secondary worker coverage in this bill. You have probably heard someone say that this is a radical expansion of the concept of secondary workers—that it will sweep in all sorts of people with very tenuous ties to the imports at issue. I have to say that the people making those claims have not read the bill very carefully. The definitions of secondary workers in the bill are based closely on the definitions used in the NAFTA. We have broadened the definition of supplier firms slightly, to catch some people we think are unfairly left out under current law. But other than that, this bill does not change how secondary workers are defined—it just makes secondary worker coverage universal.

The fourth thing this bill does is reauthorize the TAA for firms program. This is a jewel of a little program that operates out of the Commerce Department. It has helped small- and medium-sized companies in Montana and nationwide that face layoffs due to import competition. Technical assistance provided under this program helps these firms become more competitive so they can retain and expand employment. The program is very cost effective. It requires the firms being helped to pay a share of the cost of assistance, and it pays the government back in federal and state tax revenues when the firms succeed.

The fifth feature of the bill is a new TAA program for communities.

Communities that experience mass layoffs due to trade competition are really in a bind. This is especially true in smaller and rural communities, such as we have in Montana. These communities may not have a lot of job opportunities for displaced workers, even with TAA retraining. Indeed, one of the main criticisms of the current TAA program is that it does nothing to make sure there are jobs for workers at the end of the retraining process.

There are a number of federal programs out there that might offer some help. They are all over the map—in Commerce, Treasury, Labor, Agriculture, HUD, and the SBA, just to name a few. But these communities have no way to start, no go-to person or resource to guide them through the maze of potential help. And the federal government doesn't make it any easier. There is very little coordination of response among the various agencies. Finally, even if communities can find these Federal resources, most existing programs are not tailored to the special needs of trade-impacted communities.

This bill tries to make federal economic assistance work better for trade-impacted distressed communities in a few simple ways. It creates a single office responsibility for coordinating the federal response. And it creates a single point of contact for the community throughout its recovery process. It gives communities the technical assistance they need to develop a strategic plan—basically a roadmap for economic recovery. That helps ensure that Federal resources are being used in the most coordinated and cost-effective way possible. Finally, it makes sure that there are expertise and resources tailored to the special needs of trade-impacted communities.

The next real innovation in this bill is the TAA program for farmers, ranchers, and fishermen.

Family farmers, ranchers and fishermen are nominally covered by the current TAA programs for workers. But hardly any have participated. They usually can't qualify, because they don't become unemployed in the traditional sense and they often don't qualify for unemployment insurance—two TAA prerequisites.

In NAFTA–TAA, there was an attempt to shoe-horn family farmers into the program by waiving some of the eligibility requirements. But even that has not worked to bring trade-impacted farmers into the program.

After several decades of trying with little success to squeeze farmers into eligibility rules designed for manufacturing workers it is time to try something new.

What this bill does is create a TAA program better tailored to the needs of farmers, ranchers, and fishermen. Basically, the program creates a new trigger for eligibility. Instead of having to show a layoff, the farmer, rancher or fisherman has to show commodity price declines related to imports.

The trigger is different, but the program serves the same purposes. It is basically a hybrid of the TAA for workers and TAA for firms programs, using parts of each that make sense for agricultural producers. It assists the farmer, rancher or fisherman to adjust to import competition, to retrain, to obtain technical assistance, and to have access to income support to tide them over during the process. And the income support is capped and is subject to gross income limitations to make sure that the program is not being abused.

The last important innovation in this bill deals with health insurance. One common criticism of the existing program is that it does nothing to help workers with health insurance.

It is virtually impossible for a worker to pay the mortgage, feed his family, and pay health insurance premiums on $250 a week. The worker faces a terrible choice. He can retrain under TAA in the hope of a better job—but risk going without health insurance for his family for up to two years. Or he can pass up the opportunity to retrain for a better future and take a dead-end job right away to make ends meet.

The bipartisan Trade Deficit Review Commission concluded that lack of assistance with health insurance is a significant disincentive to complete TAA training. As I said before, this group unanimously recommended that the Government help workers bridge the insurance gap between old and new jobs. And that is what we have done with this bill. Again, Secretary Rumsfeld, Ambassador Hills, and Ambassador Zoellick agreed to this point.

The bill before us today includes a 73-percent advanceable, refundable tax credit for COBRA premiums for workers eligible for TAA benefits. TAA participants who are not eligible for

COBRA can use the tax credit to purchase health insurance from various State-sponsored group plans.

This issue has been surprisingly controversial. I am not saying that there is only one right way to address this issue. But what has shocked me is the number of voices suggesting that we should do nothing at all; that is, that we not help people, who are displaced on account of trade, with health insurance. That is just not acceptable. I hope we are past that now and headed toward a reasonable compromise and that we can move forward constructively to help people who need health insurance.

Now that I have gone over the main parts of the bill, I want to speak a little about the tradition of bipartisanship on trade adjustment assistance.

Since its inception, the TAA program has always enjoyed wide bipartisan support. As I said before, a lot of work has gone into making sure this bill is no exception.

Before the bill was drafted, we consulted widely with our colleagues on both sides of the aisle. We have continued that outreach throughout the process. I thank again, Senator BINGAMAN and Senator DASCHLE for their leadership on this issue. But I also thank Senator GRASSLEY, whose proposal with Senator CONRAD for a TAA for farmers program became the core of the farmers and fishermen portions of this bill. And I thank Senator SNOWE, who has made some very important contributions to the bill dealing with fishermen, small businesses, and other issues. Her support and cosponsorship are very much appreciated.

We have also talked with the administration. They raised some technical and not-so-technical issues, and we have been able to come to understandings on many of them.

The administration wanted us to tighten up training waivers, and we did. They wanted us to cap the wage insurance program, and we did. They wanted us to revise TAA's on-the-job training provisions to work more like WIA. We did. They wanted us to clarify the definition of secondary workers and to make sure the Department of Labor has enough time to consider secondary worker petitions. We did that, too.

This process of give and take has been healthy. It has been useful. And I think the result is a good, solid, thoughtful bill, one that will make this program more fair, more efficient, and more user friendly.

If we want to rebuild the center on trade, improving trade adjustment assistance is critical. It is an integral part. It is a necessary part. I urge all my colleagues to support this provision and support the larger trade package, particularly when we proceed to consider it at a later point either this week or next.

I thank the Chair. And I particularly thank my friend from Alaska for his indulgence.

MORNING BUSINESS

Mr. DASCHLE. I ask unanimous consent the Senate now proceed to a period for morning business.

The PRESIDING OFFICER (Mr. BIDEN). Without objection, it is so ordered.

Mr. DASCHLE. Let me further stipulate, Senators be limited to 10 minutes in time.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Alaska.

(The remarks of Mr. STEVENS pertaining to the introduction of S. 2481 are printed in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

Mr. STEVENS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. NELSON of Nebraska). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RAISING EPA TO CABINET-LEVEL STATUS

Mr. REID. Mr. President, in recent years, some of my colleagues have opposed elevating the Environmental Protection Agency to Cabinet-level status. You and I have argued that the protection of our public health and environment, EPA's mandate, is as important as the congressional mandates which guide other Cabinet-level agencies. If the EPA enjoyed the same status as the Department of Energy or the Interior Department, maybe EPA's policies would carry the day occasionally.

As things stand, EPA is certainly losing the battle within this administration from clean air to climate change to snowmobiles in our national parks. EPA's views are overridden, undervalued, and watered down.

Take the issue of snowmobiles in Yellowstone and Grand Teton National Parks. I have spoken about these issues before. I have offered amendments that have been adopted in this regard. Snowmobiling in Yellowstone National Park and Grand Teton National Park has become popular in recent years; so popular, in fact, that the activities overwhelm the parks, its employees, and its wildlife.

Up to 1,000 snowmobilers enter the Yellowstone Park on winter weekends, most of them through the gateway community of West Yellowstone, MT. On steel cold days, a visible haze hangs over the park's gate and surrounding area. Rangers at this park wore Park Service-issued respirators this winter because the air quality had been so degraded by emissions from snowmobile engines.

I repeat, park rangers at Yellowstone National Park wore respirators because the air was so bad because of snowmobiles. These respirators were issued by the Park Service.

What have we come to when rangers have to wear a respirator in our national parks? At the very least, it is an embarrassment. I think it is a tragedy.

EPA, the protector of the air we breathe, wisely advocated banning snowmobiles due to their air quality impacts, but those were not the only impacts EPA raised. Snowmobiles also stress Yellowstone's wildlife. The noise generated by so many snowmobiles, coupled with the vehicle's capacity to reach speeds of up to 90 miles an hour, force the park's wildlife, to say the least, to expend valuable energy to avoid contact with these snowmobilers.

The National Park Service studied the snowmobiles' impact on the parks for the better part of 10 years, receiving hundreds of thousands of public comments on this subject. The comment included those from the EPA. As I have said, EPA recommended a ban based on air quality concerns.

In November of 2000, the Park Service ordered the snowmobiles be gradually phased out in Yellowstone National Park and Grand Teton National Park and the 8-mile road connecting the two.

By the year 2004, snowmobiles would be banned completely from these parks. With so many proconservation Clinton-era policies, the Bush administration balked at implementing this rule. With the snowmobile industry in mind, rather than the millions of Americans who visit our parks, the White House ordered the Park Service to restudy the impact of snowmobiles on park resources.

The writing was on the wall that this administration expected the Park Service to reach a different conclusion when it reexamined the data. Perhaps they hoped the evidence would support the position they favored, some sort of a faith-based approach to science.

As part of the new review, EPA had the integrity and the courage to stick to the position it held throughout the history of this debate. I commend Governor Whitman for that.

In its public comments, EPA repeated the assertion from 3 years ago that banning snowmobiles is the best available protection for air quality and health of workers and visitors alike. EPA said even a limited number of snowmobiles may violate air quality standards.

I ask unanimous consent that the comments of the Environmental Protection Agency to the Assistant Superintendent at Grand Teton National

Park setting out their position be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ENVIRONMENTAL PROTECTION
AGENCY, REGION VIII,
Denver, CO, April 23, 2002.

Re Draft supplemental EIS for winter use CEQ #020130.

STEVEN F. IOBST,
Assistant Superintendent, Grand Teton National Park, Moose, WY.

DEAR MR. IOBST: As a Cooperating Agency in the Supplemental Winter Use Planning Process, and in accordance with our responsibilities under the corresponding Memorandum of Agreement with the National Park Service (NPS), the U.S. Environmental Protection Agency (EPA) has reviewed the Draft Supplemental Environmental Impact Statement (DSEIS) for Winter Use Plans at Yellowstone and Grand Teton National Parks and John D. Rockefeller, Jr. Memorial Parkway (the Parks). We provide the following comments to assist NPS in producing a document that meets the intent of the National Environmental Policy Act (NEPA) and the terms of the Settlement Agreement that led to this Supplement. These comments are provided in accordance with EPA's responsibilities under NEPA and Section 309 of the Clean Air Act, and we hope they will be useful to you as you complete this supplemental analysis.

EPA thanks the NPS for the opportunity to participate in this SEIS as a Cooperating Agency. NPS has again fully involved the Cooperating Agencies at every point in this process. NPS was extremely responsive to the Cooperating Agencies, and we appreciate the almost weekly opportunity to provide input and ask questions. We also appreciate NPS' efforts to fully evaluate and utilize applicable information and input from the Cooperators. While the Settlement Agreement set a very tight time frame for this analysis, and though NPS received much of the new information much later than expected, the NPS planning and analysis team is to be commended for doing a remarkable job in assembling this DSEIS.

This DSEIS amends the Final Winter Use EIS (FEIS) issued in October, 2000. The two primary purposes of the DSEIS are as follows: (1) to solicit more public input, and (2) to include data from new snowmobile technology and other new information. This DSEIS analyzes four alternatives that fall within the range of those alternatives presented in the FEIS.

Alternative 1a represents the November 2000 Record of Decision (ROD), fully phasing in he transfer of motorized access to snowcoaches by 2003–2004. The existing ROD implements FEIS Alternative G with minor modifications.

Alternative 1b is identical to 1a except implementation is extended one additional year, with full implementation in 2004–2005.

Alternative 2, at full implementation, requires 50 percent lower emissions on all snowmobiles, and caps snowmobiles in Yellowstone at 1,300/day pending a carrying capacity analysis.

Alternative 3, at a full implementation, requires "best available technology" for reducing emissions and noise for all snowmobiles entering the Parks, and all snowmobiles would be accompanied by a NPS licensed guide. Alternative 3 caps use in Yellowstone at 930 snowmobiles per day until a carrying capacity analysis is completed.

EPA fully supports continued winter access to these National Parks. Given the analysis presented in the DSEIS, EPA is satisfied that if applicable regulation, law, and federal policy are followed. Park resources can be protected while maintaining motorized winter access to these Parks. While this comment letter will suggest some adjustments and additional analyses, EPA finds the Park Service again used the best-available information, scientific analyses, expert agency comment, and public input in assembling both the DSEIS and FEIS (as required by 40 CFR 1500.1(b)). The assessment of impacts in the DSEIS and FEIS is supported by an extremely thorough and credible body of human health, environmental, and wildlife science, much of which is site-specific to the Yellowstone ecosystem. NPS, academic and agency researchers have actively studied the impacts of snowmobile use for over 10 years in these Parks. The Yellowstone ecosystem has the benefit of more peer-reviewed scientific research on the effects of motorized winter recreation than any other place on earth.

EPA's primary concern with this supplemental analysis is that three of the four DSEIS alternatives (1b, 2 and 3) threaten to exceed National or Montana Ambient Air Quality Standards for carbon monoxide in the first year of implementation (2002–2003). NPS has the ability, information and authority to set interim limits to vehicle numbers that would assure compliance with Air Quality Standards. EPA encourages interim vehicle limits be sufficiently reduced in the FSEIS to assure compliance with these standards. Although complying with Air Quality Standards does not assure elimination of the impairment to visibility of human health caused by vehicle exhaust, it is an achievable first step toward resolving the impaired air quality in these Parks.

In November, 2000, NPS issued a Record of Decision (ROD) that resolved the winter-use threat to National and State air Quality Standards as well as the significant impairments to human health, visibility, wildlife and soundscapes. This remedy was to being with actions taken this past winter (2001–2002), with full implementation in 2003–04. EPA recently learned that some actions required by the ROD to reduce impacts to air quality this past winter were not implemented. The ROD is an active policy document and represents an agreement with the public for managing winter use in these Parks. EPA is concerned that air quality, human health and visibility continued to be impaired this past season. As discussed in our enclosed Detailed Comments, EPA is suggesting that interim limits be adjusted in each of the SEIS alternatives to assure compliance with air quality standards beginning this coming season (2002–2003).

Environmentally preferred alternative

EPA has carefully considered the new information, analysis and alternatives presented in the DSEIS, and we find FEIS Alternative G remains the environmentally preferred alternative. The analysis presented in this EIS clearly indicates FEIS Alternative G would provide the best available protection to human health, wildlife, air quality, water quality, soundscapes, visitor experiences, and visibility while maintaining motorized and non-motorized winter access to these Parks. We are confident that Alternative G will fully comply with all applicable environmental regulations, policy and Executive Orders. EPA has no objections to this alternative.

EPA rating

Based primarily on the disclosure in this DSEIS that Alternatives 1b, 2 and 3 would likely result in noncompliance with air quality standards and that air quality could negatively impact human health, EPA is rating these three action alternatives EO–2 (Environmental Objections, 2—Insufficient Information). Alternatives 2 and 3 are likely to be inconsistent with NPS environmental policy regarding protection of air quality and related values. "EO–2" indicates that the EPA review has identified environmental impacts including possible violation of environmental regulations that can and should be avoided in order to fully protect the environment. Corrective measures may require substantial changes to the alternatives or consideration of additional project alternatives. The identified additional information, data, analyses or discussion should be included in the Final SEIS (FSEIS). While Alternatives 1b, 2 and 3 all receive the same EO–2 rating, EPA notes that there are substantial differences in environmental performance between these alternatives (see enclosed Detailed Comments). EPA finds no environmental objection to the No Action Alternative (1a). A full description of EPA's EIS rating system is enclosed.

Because the decision maker can select from among alternatives in both the DSEIS and the FEIS, EPA is providing a brief assessment of the alternatives in the FEIS as well. Because FEIS Alternatives A, B, C, D, E and F would likely not comply with environmental regulation, policy and executive orders, EPA has expressed environmental objections with these alternatives (see EPA comments on Draft and Final EISs). Again, EPA finds no environmental objection with Alternative G.

We appreciate the opportunity to review this DSEIS and provide comments. A set of detailed comments on the DSEIS is enclosed. Thank you for your willingness to consider our comments at this stage of the process, and we hope they will be useful to you. Should you have questions regarding these comments, please contact Phil Strobel of my staff.

Sincerely,

MAX H. DODSON,
Assistant Regional Administrator for Ecosystems Protection and Remediation.

Mr. REID. Mr. President, it is important to print this in the RECORD because the administration had already signaled it expected the EPA to again sacrifice its own best scientific judgment to the political will of special interests. Again, the administration is signaling that the agency views will not be afforded weight.

When the comments were revealed this past weekend, Administrator Whitman immediately came under fire to repudiate the longstanding policy of the EPA. While they have not gotten that for yet, EPA immediately instituted new policy designed to ensure that its views were in line with Cabinet-level counterparts. Perhaps elevating EPA to a Cabinet-level department would begin to change the outcome of these cases and elevate the importance of environmental protection to this administration. In this case, it is critically important that EPA and their views prevail.

I ask Governor Whitman to stand strong. Yellowstone and Grand Teton are national treasures. People visit from all over the world in all seasons to see Old Faithful and the Grand Teton range.

As I have said here before and other places, snowmobiling is an important form of recreation for many Americans. I snowmobile, and it is a lot of fun. Thousands of Nevadans snowmobile. But banning these vehicles from Yellowstone and Grand Teton will have almost no impact on the opportunities open to snowmobilers around this country. There are 130,000 miles of snowmobile trails in the United States. These two national parks have a combined total of 600 miles. If the Park Service bans snowmobiles from these places, there will still be 129,400 miles of trail for snowmobilers.

I hope my colleagues will join me in recognizing the value of the Environmental Protection Agency. To the administration, I hope they will join me in recognizing the value of our national parks and the need to preserve these wonderful national treasures of which Nevada has one, the Great Basin National Park, and it is a beauty. The Great Basin National Park is the second newest. We have a mountain peak that is about 13,000 feet high, but yet below that the park has some of the desert foliage. It represents everything in the Great Basin.

In addition to that, the park has the oldest living attractions in the world in it, such as bristle corn pines more than 5,000 years old. So it is one of our great national parks.

I have talked about two national parks today that I am particularly concerned about and hope we do not have snowmobiles rushing through there and we do not see park rangers with their Smokey the Bear hats with a respirator.

HAPPY BIRTHDAY, EVY DUBROW

Mr. BYRD. Mr. President, it is rare that I get to extend a birthday greeting to someone older than I. It is even more uncommon for me to extend such a greeting to someone who has been working the halls of the U.S. Senate longer than I. Today, I do both. With delight, I want to take a few minutes to extend a very warm and sincere, if a little belated, birthday greeting to a dear friend, Ms. Evelyn Dubrow, whose birthday was May 6.

Affectionately, as well as professionally, known throughout Congress, Washington, D.C., and the labor unions around the country as "Evy," she has been involved in the American labor movement for more than sixty years, most of the time as a labor lobbyist. She was with the International Ladies Garment Workers Union, ILGWU, for more than forty years. More recently, she has been vice president and legislative director of the Union of Needles Trades, Industrial and Textile Employees, UNITE.

Today, women lobbyists are quite common on Capitol Hill. According to the Hill newspaper, women now account for about one-third of the Capital's more than 11,000 registered lobbyists. When Evy first arrived as a lobbyist in 1956, women lobbyists were rare, and the U.S. Senate was still overwhelmingly a men's club.

Evy was not deterred. She had come with a determination and a cause—to improve the living and working conditions of American workers—and she was not to be denied. Her very first fight was opposing a proposal to outlaw secondary boycotts. For this effort, she enlisted none other than Massachusetts Senator John F. Kennedy, who sponsored her amendment.

Her next issue was seeking an increase in the minimum wage to an unheard of level of one dollar an hour!

Since then, she has had a tireless and active role in helping to bring about most of the important laws on economic and social justice since the 1960s. She has worked on civil rights legislation, the establishment of Medicare, minimum wage, pension protection, and occupational safety and health rules. She stands for everything that is good and best about the American labor movement. As my good friend and colleague, Senator ERNEST HOLLINGS said of her, "She is the union label."

Although Evy stands less than 5 feet tall, I have seen her stand eye-ball-to-eye-ball with the likes of the 6 foot 5 inch Senator Bill Bradley, the 6 foot 6 inch Senator JAY ROCKEFELLER, and 6 foot 7 inch Senator Alan Simpson.

And that is exactly the way she has always lobbied, eye-ball-to-eye-ball. It is not through the fax machine, or over the cell phone, or from e-mail. This little workhorse walks right into your office, meets you person-to-person, and makes her case.

Evy is never heavy-handed. Good lobbying, she says, is "presenting your case and proving it," and that is what she does.

As a liberal labor lobbyist, her heros have tended to be liberal Democrats, including Harry Truman, John F. Kennedy, and Hubert Humphrey. But on her list of heros, she also includes Senator Barry Goldwater, hardly a liberal Democrat. When asked why she did so, Evy replied, "He was completely honest and didn't mince words."

That is a perfect description of Evy, she is "completely honest" and does not "mince words."

As a lobbyist on Capitol Hill for more than four decades, Evy has become more than an institution, she has become a fixture in the U.S. Congress. She has known almost every member of the Congress from the first day she arrived, and today she is as well known, and just as equally at home in Congress, than many members.

In addition to the Members of Congress, she has befriended doorkeepers, receptionists, Capitol Hill police, and many others who work here. She always has a kind word and a smile for anyone and everyone.

Her credentials are as long as they are impressive. She worked a decade for the legendary president of the ILGWU, David Dubinsky. With but a single exception, she has attended every Democratic Convention since 1948. She has met with every President from Eisenhower to Clinton. She has been awarded the Presidential Medal of Freedom, the Nation's highest civilian honor. Perhaps her greatest accomplishment came years ago when she served as a babysitter for the likes of Al Gore and CHRIS DODD when their fathers were Senators.

But I want to make it clear, to most, if not all Members of Congress, she is more than a lobbyist. She is more than a friend. She is "Evy!"

At any rally, any party, or any gathering in Washington, you will eventually hear someone say, "Evy is here," and everyone knows exactly what is meant, and nearly everyone smiles. As I have heard it said many a time: "Everyone loves Evy."

Indeed we do. Her admirers are many. Her friends are legion.

God bless you Evy and happy birthday!

LOCAL LAW ENFORCEMENT ACT OF 2001

Mr. SMITH of Oregon. Mr. President, I rise today to speak about hate crimes legislation I introduced with Senator KENNEDY in March of last year. The Local Law Enforcement Act of 2001 would add new categories to current hate crimes legislation sending a signal that violence of any kind is unacceptable in our society.

I would like to describe a terrible crime that occurred November 1, 1991 in Brattleboro, VT. Two gay men were beaten by two juveniles who were heard to make anti-gay remarks. The assailants were charged with a hate crime in connection with the incident.

I believe that government's first duty is to defend its citizens, to defend them against the harms that come out of hate. The Local Law Enforcement Enhancement Act of 2001 is now a symbol that can become substance. I believe that by passing this legislation and changing current law, we can change hearts and minds as well.

THE SECTORAL MARKET ASSESSMENT FOR REGIONAL TRAINING ENHANCEMENT AND REVITALIZATION ACT

Ms. COLLINS. Mr. President, I rise today to speak on a bill that Senator CANTWELL and I introduced yesterday that will make it easier for States and localities to secure meaningful work for dislocated workers. Senator CANTWELL is a true advocate for unemployed workers and for economic development, and it has been a pleasure to work with her on this and other initiatives designed to strengthen our workers and our communities.

This is designed to increase the ability of States and local workforce investment boards, under the Workforce Investment Act, WIA, to match trained workers with productive jobs and also to create systematic change in a targeted industry or occupation. Our bill creates a three-step process for States and local workforce boards to accomplish this goal:

The first step involves a study. Using the latest labor market and economic information, States or local workforce boards will prepare detailed assessments of local areas that identify the gaps between the expected and demand and supply of labor in industry sectors. The second step involves plan. Local workforce boards will join with partners from industry, labor, and the economic development and training sectors to develop comprehensive plans for implementing the assessments, in order to fill the gap between supply and demand. The third and final step involves grants. The local boards will make seed grants for training individuals to meet the demand for workers in certain industries.

In my home State of Maine, I have worked with local workforce boards, regional technical colleges and high schools, businesses, workers and community leaders to develop training programs that focus on particular market sectors within a particular region. I secured Federal appropriations for programs to train workers in the metal trades in northern and western Maine. Today, dislocated workers in Aroostook County and Rumford, Maine are being trained as metal workers.

I also secured funding for a training pilot project in the Central Maine area that will introduce a photonics curriculum in the regional technical high school to train students for careers in the growing field of photonics. This year I am hopeful that a request to fund a program targeted at training in the health care area in Southern Maine will be granted.

This bill takes an innovative approach and provides tools to States, localities and regions to implement the provisions of the Workforce Investment Act more effectively. By retraining dislocated workers, we give them access to productive and well-paying work. We also make our workforce stronger to face the challenges of the global marketplace.

IN HONOR OF SECRETARY OF STATE COLIN POWELL'S 65TH BIRTHDAY

Mr. LIEBERMAN. Mr. President, I rise to recognize a milestone in the life of one of America's most honored and honorable leaders on the occasion of his 65th birthday, our 65th Secretary of State, Colin Powell.

Time and again, when Colin Powell's country has needed him, he has answered the call. He spent 35 years as a professional soldier, in which he rose to the rank of four-star general and then served as Chairman of the Joint Chiefs of Staff under the first President Bush. In 1991, Secretary Powell led the American effort to liberate Kuwait from Iraqi aggression in the Persian Gulf War.

In 1997, then-General Powell helped found America's Promise the Alliance for Youth—designed to marshal Americans to get involved in the lives of young people so that every child, regardless of race or income, has a life with caring adults, safe places, a healthy start, marketable skills, and opportunities to serve. In this capacity, Colin Powell proved that his tenacity, skill, and focus could just as easily help inspire a child as it could help win a war.

Now, as our Secretary of State, Colin Powell faces yet another formidable challenge, and he is once again leading with confidence, competence, and a principled vision. Our country is deeply grateful for his service as he guides our foreign policy, including the twin challenges of coordinating the diplomatic component of the war against terrorism and attempting to guide the Middle East toward peace. America needs his sharp mind, calm voice, and sound judgment now more than ever, and I know that Secretary Powell will not let us down. He will help this country protect its people, live up to its most precious values, and build a safer, freer, and more democratic world.

Thomas Jefferson, our Nation's first Secretary of State, once said that, "A character of justice . . . is (as) valuable to a nation as to an individual." I can't think of a life that exemplifies that sentiment more powerfully than that of Colin Powell.

Secretary of State Powell talked candidly about his life's accomplishments, and the many challenges before him, in a revealing profile on the occasion of his birthday, written by White House and State Department correspondent Trude Feldman. To pay tribute to one of our strongest and most admired leaders, I ask unanimous consent that Ms. Feldman's article, syndicated, by International Press Syndicate, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

COLIN POWELL AT 65: A DYNAMIC STATESMAN

(By Trude B. Feldman)

At an age when most Americans are looking towards a comfortable and secure future for themselves and their families, Secretary of State Colin L. Powell is confronting two of the most serious crises the U.S. has faced in the past 50 years.

Between the war on terrorism and the powder keg in the Middle East, there was little time for reflection as Mr. Powell marked his 65th birthday last month.

"I'm not terribly sentimental about birthdays," he told me in an interview. "But frankly, I don't feel any different at 65. Aging is part of living and I'm not bothered by it. Every now and then, I realize that there are fewer years ahead, but that is also part of living. Most important is that I've been blessed with continued good health, a loving family and sincere friends."

While Colin Powell grew up in modest circumstances, he has always been rich in spirit and an inspiration to others. He personifies success, achieved not because it was handed to him, but because he earned it.

Today, a major player on the international scene, he has a strong presence, a calm voice and his demeanor generates confidence and admiration. He is the one President Bush sent to the Middle East to meet with Israeli Prime Minister Ariel Sharon and Palestinian leader Yasir Arafat to arrange a ceasefire between the parties.

He is not content to retire and enjoy leisure activities like playing golf or fixing old Volvos (one of his hobbies). His attention and energy are focused on making safer a troubled, dangerous world.

In the Middle East, Mr. Powell is demonstrating diplomatic elegance by relating, respectfully, to each of the participants, however intractable they may be. His dynamism and apparent empathy are qualities much in need for his current challenge.

I asked the Secretary if he would do anything differently if he were able to relive his 65 years.

"I never look back to see what I could do or might have done differently," he responds. "I guess I'm a total pragmatist. I can't relive my life, not for one minute, so why reflect on that instead of thinking about today and tomorrow? Each day I do the best I can, and move on. I also learn from lessons of the past by improving on the present and future."

What are some of his regrets? "Oh, what good are regrets? Regrets slow you down. Regrets cause you to fail to pay attention to the future. So I never log, count or inventory my regrets. I move on."

Colin Powell has used his years to break down barriers. He has been a role model, not only for America's men and women in the Armed Forces, but for millions of people the world over.

Since becoming America's 65th Secretary of State on Jan 20, 2001, he has visited 49 countries, including Russia, China, Nigeria, South Africa, and most of the capitals in Europe and the Middle East.

According to the Secretary's chief of staff, Bill Smullen, Secretary Powell relies on intellect, integrity and instincts to get the job done. "And that is coupled with a loyalty that works both ways—to those he works for and who work for him," Smullen adds. "It's an Army work ethic that works well for a man who has been a public servant for nearly 45 of his 65 years."

Smullen also notes that Colin Powell is armed with a healthy sense of himself and a firm set of values. "He is flattered to be seen as a role model, complete with G.I. Joe Action Figure," he says. "The Secretary has achieved considerable success through careers as a soldier, author, champion of children and now, statesman."

These qualities are used in the service of problem-solving such as alleviating poverty around the world, as attested to, for example, by one who should know—World Bank Group President James D. Wolfensohn.

"I believe that Colin Powell has combined his capacity for effective management with a true understanding of global humanitarian issues," President Wolfensohn says.

"In all that I have seen him do, he shows great sensitivity to the issue of poverty and to the concerns of those less fortunate than we are. I believe he acts in this way out of a sense of moral and ethical principles combined with an understanding that poverty anywhere is a domestic issue for the U.S. in this interdependent world in which we live."

James Wolfensohn, former Chairman of the Board of Trustees of the John F. Kennedy Center for the Performing Arts in Washington, DC, adds: "I not only wish Colin Powell a happy birthday and many more, but I hope he will be able to give the world his sensitive and enlightened leadership for many more years."

Stuart E. Eizenstat, former Deputy Secretary of the Treasury and Special Representative of The President and Secretary of State on Holocaust Issues, echoes similar sentiments. "I know, from my former State Department colleagues, that, in just over a year, Colin Powell has established himself among the career professionals as the most respected and admired Secretary of State in a generation.

"During the first six months of this Bush Administration, when I continued to serve the State Department as Senior Adviser to implement our Holocaust agreements, I could always depend on Secretary Powell's full support. In general, he has been an important ballast in this Bush Administration's foreign policy, adding a significant element of wisdom and good judgment."

I asked Secretary Powell whether he has changed, in a personal or official manner, since September 11th when terrorists attacked the World Trade Center and the Pentagon, murdering over 3000 people.

"You know, that tragedy struck the U.S., and put us in a war," he cautiously responds. "I have been in wars before; and I knew what I had to do as Secretary of State—to pull together a coalition, and take our case to the world. Today, some seven months later, the greatest public diplomacy challenge is to take our case to the Moslem world."

Born in 1937 in the Harlem section of New York City, and raised in the South Bronx, Colin Luther Powell is the son of Jamaican immigrants, whom he credits for his success. At City College of New York, his main interest was in the Reserve Officers Training Corps (ROTC). His degree, however, was in geology.

After he was commissioned a Second Lieutenant in the Army, he served in Germany; in Korea; and for two tours in Vietnam, where he was wounded twice. In 1971, he earned a Master of Business Administration from The George Washington University in Washington, DC. In 1990, he returned to George Washington to receive from its President, Stephen Trachtenberg, an Honorary Doctorate of Public Service.

"We take pride in watching one of our own graduates go 'from strength to strength,'" Dr. Trachtenberg says. "And Colin Powell is a splendid person."

As a White House Fellow in 1972–3, he worked in the Office of Management and Budget under Directors Frank Carlucci and Caspar Weinberger. Later, Colin Powell served as Military Assistant to Secretary of Defense Caspar Weinberger.

Now Chairman of Forbes Magazine, Secretary Weinberger observes: "It is hard to believe that Colin Powell is 65 years old because he looks exactly the same as he did when I met him more than 30 years ago. He keeps himself in excellent shape, another attribute that not everyone has. He also has a lovely wife, Alma, who is a great help to him.

"I have always known Colin Powell to be extremely able. He frequently knew more about a meeting than anyone else there because he prepared himself so very well. He has extraordinary leadership qualities, and although his only real ambition was to lead the troops in the field, those leadership qualities brought on the numerous other things that came his way.

"And because of those qualities he was unable to turn away from things that needed to be done. I know he will continue to serve our country in different capacities for many years to come."

When Colin Powell was Commander of the U.S. Army's Fifth Corps in Frankfurt, West Germany in 1986, President Ronald Reagan asked him to return to the White House as his Deputy National Security Adviser. On October 1, 1989, President George H.W. Bush selected General Powell as the 12th Chairman of the Joint Chiefs of Staff, the first African American and the youngest man to hold that office.

After the General's retirement, President Bush told me: "He was the ideal Chairman of the Joint Chiefs. He was always a soldier and advocate for a strong military, but his personal style, his decency and his sense of loyalty and honor made him great."

In recalling his relationships with the last four presidents, Secretary Powell notes: "What a privilege it was for me to serve each of these presidents. I consider myself fortunate to have been given that opportunity. Each one is different. Each is totally committed to our nation and what it stands for."

In 1993, upon Gen. Powell's retirement as chairman, President Bill Clinton stated: "I have come to see firsthand why our citizens view Gen. Powell as a man of stature and statesmanship. He stands as a model to all who believe that merit, hard work and integrity are the real foundation of achievement. America is in particular debt to Colin Powell. He has served our nation brilliantly."

That year, the Board of Trustees of The Ronald Reagan Presidential Foundation selected Colin Powell as the recipient of the 1993 Ronald Reagan Freedom Award for his "commitment to safeguard the freedoms and liberties of our nation and advance the spirit of these ideals worldwide."

General Powell was presented the award by President Reagan at his Presidential Library and Center For Public Affairs in Simi Valley, California on November 9, 1993. In an interview soon after, President Reagan described Colin Powell as a man of the highest integrity, intelligence and skills.

"I came to know him as someone I could rely on as a steady and wise adviser," the former president told me. "Colin is a man of tremendous decency. I admire him for his depth of character and steady determination to work for what is right and good. He has served our country well, and earned the respect of all who know him. I will always consider him a dear friend."

Thomas R. Pickering, Senior Vice President of the Boeing Company and respected diplomat, who served as Ambassador to Russia, India, Israel, Jordan, El Salvador and Nigeria, and who, as U.S. Ambassador to the United Nations from 1989–92, worked with Gen. Powell during the Gulf War, concurs.

"No one has earned congratulations for his 65th birthday more than Colin Powell," Ambassador Pickering says. "He is a marvelous leader and is making a huge difference in American foreign policy from the Middle East to the Far East and from Russia to China."

Richard Perle, now chairman of the Pentagon's Defense Policy Board, worked with Gen. Powell in the Pentagon in the 1980's and came to know him well. He is, Mr. Perle says, a man of "immense experience and talent, much wisdom, and rare candor. He is also a key part of the most impressive national security team since the end of the Cold War."

In December, 1993, Gen. Powell was given a private audience with Britain's Queen Elizabeth at London's Buckingham Palace, where she presented him with an honorary knighthood. (Gen. Powell's parents were born as British subjects). He was cited in recognition of his contribution to the Gulf War campaign (1991) to oust Iraqi forces from Kuwait.

In describing his philosophy of life, Secretary Powell maintains: "I strongly believe in living for today and preparing for tomorrow. I tell young people that the world is before them; that the only limitation to their success in the U.S. is that of their own dreams."

As to his secret for success, he puts it this way: "I still haven't found a secret for success because there isn't one. But I would say perseverance, working hard, studying hard, liking people and being loyal, tend to be traits for people who are successful.

"I have always worked extremely hard and been loyal to those for whom I worked, as well as to those who work for me. And like I did in school, or in the Army or in the Pentagon, or here at the Department of State, I diligently study the subject at hand, and I try to be well prepared on all issues."

How does Colin Powell view race relations in the U.S. today?

"My sense is that there is too much intolerance of one another," he replies. "That has manifested itself in many ways and places—in our colleges, workplaces and on the streets. Intolerance is destroying our communities. It is unfortunate when those who have suffered hate and cruelty turn their bitterness on one another. That violates every sense of what America is all about.

"If one brief lifetime of perseverance could pull down the Iron Curtain between the East and West, then our perseverance in America can bring down the iron curtain of hate that, in too many places, separates Americans from each other."

Like most cabinet officers, Secretary Powell has his critics, but he shrugs them off, with a grin. "I don't find it necessary to try to seek relief from critics," he asserts. "I have accomplished a public record of which I am proud."

Colin Powell is able to use any of several titles. Which one gives him the most satisfaction?

"I don't compare my positions with respect to which is better or most satisfying," he muses. "I care that I do each job well, whether it is that of battalion commander or Secretary of State."

So which title does he now prefer?

"I still prefer General, but am now used to Secretary. In fact, this was a subject of considerable discussion when I first arrived here at State. Word went out that I wanted to be called General. Not so. Call me anything. I like all my titles, from Lieutenant to Secretary. Secretary seems to have won out and that is appropriate. On the phone, I say, 'Hello, Secretary Powell here.'"

Prior to his secretaryship, Colin Powell was chairman of America's Promise—The Alliance for Youth, a national non-profit organization dedicated to mobilizing people from every sector of American life to build the character and competence of young people.

He also wrote his best-selling autobiography, "My American Journey", published seven years ago.

Bill Smullen also recalls that, often, during the past twelve years that he has worked for Colin Powell, he (Smullen) was asked whether the real Colin Powell is at all like the Colin Powell the public sees.

"My answer is always the same—Colin Powell is the real article. For all the right reasons, he has become someone the American people have come to know and trust. Now, as the President's chief foreign policy adviser, his exposure to foreign diplomats and publics around the world has expanded his popularity and respectability ratings."

In a 1993 interview, then-General Powell told me about the obstacles he confronted in his climb to become the first African American to reach the top in the military.

"The military is a very demanding profession," he recalled. "I was examined and screened at every level and in a thousand different ways over a period of 35 years. There was a process of reducing obstacles as I went through that. I might have had some earlier obstacles coming out of the inner city and being a product of a public school system.

"But it turned out that the school system in New York City was pretty good. Any disadvantages I had as a young person or because of my background, I overcame by my motivation to succeed."

And he succeeded in becoming the first African American Secretary of State.

Colin Powell has long had a vision of the U.S. and its role in the world. "I'm not embarrassed to call America a superpower because our power is one that underwrites peace in the world," he also told me in that interview—almost nine years ago.

"When we have to go somewhere to use our power we don't go to stay. We don't go to rule populations. We don't go to exploit anyone. We go to help and we come home when we are done. Even after WW II, the only land we claimed from anyone was the land we needed to bury our honored dead . Because of who we are, we have an obligation to be a strong leader in the world."

How does Colin Powell want to be remembered?

"I hope to be remembered as one who served his country faithfully and loyally," he told me. "Also, I'd like to be remembered as one who raised a nice family and devoted much time to making a difference in other people's lives."

And, if he were granted three wishes for his 65th birthday, what would they be?

"On a personal level, I've had a good life with every wish fulfilled I could imagine," he concludes. "I also have had a satisfying career. But if it were possible to have three wishes fulfilled in my lifetime, I would hope for real peace throughout the world; for prosperity for all Americans; and that we could reconcile all the differences that exist among people in our country, differences which keep us from achieving the dreams of our forefathers."

ADDITIONAL STATEMENTS

RECOGNIZING BRAIN TUMOR WEEK

• **Mr. THOMAS.** Mr. President, I rise today to recognize May 5-11, 2002 as Brain Tumor Action Week. In addition, I ask to include in the RECORD a truly inspirational account written by a young, Wharton MBA student.

The material follows:

MY JOURNEY WITH A BRAIN TUMOR

(By Adrienne McMillan Burns)

A recent Wall Street Journal article highlighted the fact that a brush with death can temporarily change our perspective on life for the better. Experiencing more than a brush—an extended fight against a potentially fatal disease—has served to sustain such a view for me. I believe these experiences, both brushes and extended fights with death, can ultimately be used to benefit many people. And I believe that those of us with these experiences serve our fellow humans well by sharing our stories.

Three years ago, after giving birth to my first child, I had a grand mal seizure. I awoke the next day in an ICU, and ultimately I was diagnosed with a brain tumor. The diagnosis was good as far as brain tumors go, but it was still a brain tumor, and the overall effect was a fast and harsh realization of my own mortality. I was 33 years old.

Life changed for me. As you might expect, I became interested in brain structure and function, and specifically in my own diagnosis and treatment. But life also changed for me in a more unexpected way. After living a life focused, to a great degree, on my own career goals and personal pleasure, I came to a different point of reference. I began to more fully appreciate that we have responsibilities in our journey on earth, not the least of which is the one to our fellow humans. I came to believe that the responsibility is simply to help one another—from the heart—in whatever way we can do it.

I changed my definition of success. Ralph Waldo Emerson once said, "To know even one life has breathed easier because you have lived, that is to have succeeded." I immediately needed to know that not one, but many lives breathed easier because of me. As I lay down for my surgeon to cut my head open, it became amazingly clear what really mattered to me. It mattered how I treated people—how I developed and conducted myself in relationships, especially my relationship with my maker. It mattered how proud I could be of the way I conducted my life, something no person in the world but me could know. My personal integrity, my adherence to my core beliefs, mattered. That's it. Nothing else.

I survived brain surgery and recovered, and I desperately wanted to share my good fortune. I wanted to make someone "breathe easier." My husband and I left established careers in Washington, DC (mine in the energy industry), and I returned to school to pursue an MBA focused on healthcare management. I was determined to use my experience to influence what I believed to be the most significant way to help others: improving the patient's experience in health care delivery. Personally, I experienced exceptional technical care, but I also experienced tender, compassionate care. It mattered greatly to me that a nurse who handed me medications in the middle of the night smiled as she did so. Her tender smile assured me, as I lay in great vulnerability, that the people to whom I entrusted my life cared abut my life. There were other smiles in the hospital, and they had the same effect on me. In retrospect, I'll never know if the smiles really indicated such a care. People could have been smiling for any number of reasons. But, I believed it was care, and that made a difference to me. There was an overall feeling of compassion in the hospital, and I know it had as much to do with my healing as did the expert hands of my surgeon.

My plans focused on systemic change. While not attributing health outcomes solely to smiles (!), I wanted to foster compassionate health care delivery. I wanted to provide hospital environments that allowed doctors, nurses and every other employee to deliver compassionate care along with the very important technical care. I believed that basic respect and appreciation of all employees was at the heart of inducing the much-appreciated smile and compassionate care.

With a newly found passion, I set an ambitious goal. I believed systemic change could primarily be effected from the top of an organization, therefore, that's where I wanted to be. I envisioned personally catalyzing movement to a higher health service standard by which every patient in the world eventually would be treated!

Two years later I had a recurrence of the tumor. Again, my surgeon expertly brought me through surgery, and this time I received radiation therapy in hopes of being done with the patient side of the health care world! Other than the affront to my vanity from lost hair, brain radiation wasn't all that bad, and getting to know other patients in the waiting room was a blessing.

In the interim two years, I've worked towards my goal. I completed half of the MBA, and I worked at a major academic medicine center. What I learned most during that time is that there are a lot of compassionate, smart people out there working to make patients breathe easier. I learned that we are a fortunate people to have so much effort directed at the goal of improving the lives of others.

I'll finish school this year and God willing, I'll work to effect smiles of compassion in health care delivery. But the recurrence gave me another, perhaps more important, insight. Not only can I improve lives through systemic efforts in health care delivery, but I also can improve the lives, in small ways, of the people with whom I come into contact each day. I can look people in the eye and smile. I can give people the respect we each deserve. I can seek out the good in all people; if I'm looking for the good, perhaps it's what I'll see, and it will probably influence my relationship with that person. That person probably needs to experience a relationship based on that view of him or herself. M.K. Gandhi once said, "Be the change you want to see in the world." I can do that, and I can do it now. That is significant.

In my experience, appreciation of mortality becomes a filter through which everything is forevermore received. This appreciation brought an amazing shift in my perception, and it's made the world seem an ever better place to me. I look for and I find more serenity, compassion, and integrity in the world. I find things more beautiful, and I find more beautiful things. I looked up—to God—and I remembered that He is my compassionate and tender caregiver. After experiencing acute depression, He (and a very good psychiatrist!) led me to rediscover pure, unaltered joy—the kind my three year old seems to feel when I allow him to choose any one thing he wants in the bakery near our home.

So, that tumor, as unwanted as it was, changed my life for the better—forever. It's been said that it's easy to forget a lesson from a brush with death, and I do catch myself taking life for granted on occasion. Yet, there's an underlying permanence to the shift in perception that cannot be reversed for me. I've talked with other patients—brain tumor and otherwise—who've said the same thing. It amazes me. It takes something terribly frightening to make us appreciate all the fortunes we have.

I'll close by going back to my thoughts on responsibility. It seems that many of my friends are searching—soul-searching or otherwise—and it seems that others are too. I want to do my small part to help someone in their search, or to make them breathe easier. Perhaps we all can help. Perhaps those of us who have had the occasion to contemplate mortality, at any level, can perpetuate the important lessons we each learn from the experience. We can tell our stories, thereby reminding ourselves and informing others of what we've found when everything but the basics of life are stripped away. By telling our stories, maybe we help each other to help each other. Maybe then we all breath a little easier. What a success!!●

SPECIAL AGENT TIMOTHY LATTERNER

● Mr. CORZINE. Mr. President, I want to bring to your attention a true American hero, FBI Special Agent Timothy Latterner.

Almost one year ago to the day, Special Agent Latterner confronted an armed suspect in the lobby of a busy Manhattan hotel. But putting his life on the line was nothing new to Tim. After all, he was a decorated army veteran who bravely served as an enlisted infantryman and officer in the 82nd Airborne.

However, during the early morning hours of May 11, Special Agent Latterner came face to face with a violent felon and one of the Federal Bureau of Investigation's Most Wanted. Following a lead, Latterner and his colleagues entered the hotel lobby taking by surprise a man wanted for sexual assault, kidnaping, armed robbery, and murder. With shouts of "he's got a gun" echoing throughout the lobby, bewildered hotel guests sought cover while Special Agent Latterner struggled with the suspect, who had drawn his weapon. Due to Special Agent Latterner's instinctive and heroic actions, the fugitive was subdued without injury to innocent civilians or law enforcement officers. Indeed, Special Agent Latterner's lightning quick reflexes saved the lives of his partners, hotel guests and staff.

One year later, Special Agent Latterner continues to be a role model, dedicated to his family, community, country, and the Bureau. On another fateful day, September 11, Tim provided invaluable assistance to the victims of the attack on the World Trade Center, again disregarding his own safety to help others.

Today, this honored eight-year veteran of the Federal Bureau of Investigation focuses his indefatigable efforts on a different type of criminal—terrorists who threaten our very way of life.

I am proud that such a man is one of my constituents, residing in the bucolic Borough of Allendale. His devotion to duty and professionalism will long be remembered and appreciated. I am pleased that I had the opportunity to bring him to your attention.●

BRIGADIER GENERAL WILLIAM E. ALBERTSON RETIRES

● Mr. NELSON of Nebraska. Mr. President, today it is my honor to share with my colleagues the life and achievements of Brigadier General William E. Albertson, a man who has served his country honorably and enthusiastically.

Brigadier General Albertson is a distinguished graduate of the United States Army's Engineer Officer Candidate School. Over his thirty-four year career, Brigadier General Albertson has served as an individual mobilization augmentee in the U.S. Army Reserve, Office of the U.S. Army Assistant Chief of Staff Intelligence, the Pentagon, and the Air Force Reserve.

For five years, Brigadier General Albertson served as the mobilization assistant to the director of intelligence at Offutt Air Force Base, the United States Strategic Command Headquarters in Bellevue, NE. He currently serves as the mobilization assistant to the director of the Defense Intelligence Agency in Washington, DC.

His awards and decorations include the Aerial Achievement Medal, Joint Meritorious Unit Award, Air Force Outstanding Unit Award with two oak leaf clusters, Air Force Organizational Excellence Award with two oak leaf clusters and numerous service medals.

He is a Certified Public Accountant and Certified Cost Analyst, as well as a member of the Air Force Association, American Society of Military Comptrollers, American Institute of Certified Public Accountants, Air War College Alumni Association and University of Missouri Alumni Association.

Brigadier General William E. Albertson has honored us with his dedication and on May 17, 2002, the day of his retirement, it is my honor to recognize him for his 34 years of service to our country.●

SEATTLE SLEW: TRIBUTE TO A TRUE CHAMPION

● Mr. BUNNING. Mr. President, I proudly rise today among my colleagues to pay tribute to one of the greatest thoroughbreds that horse racing has ever known: Seattle Slew. Yesterday morning, 25 years to the day after his victory in the 1977 Kentucky Derby, Seattle Slew died peacefully in his sleep in his stall at the Hill 'n Dale Farm near Lexington, KY. He was the last living winner of the Triple Crown and truly a great champion.

On July 19, 1975, Dr. James Hill, a New York veterinarian, and his wife helped Karen and Mickey Taylor pick out a yearling at the Fasig-Tipton's sale. The horse they bought that day for a mere $17,500, a near-black beauty, was the ideal confluence of strength, grace, and class. In the 1940s, the American thoroughbred industry began importing European stallions in a concentrated effort to produce the greatest species of thoroughbreds in the world. One such stallion, Nasrullah, had begotten Bold Ruler and this genealogical line led to an amazing eight Kentucky Derby Winners in the 1970s, including Seattle Slew.

During the 1970s, the sport of horse racing was at its ultimate peak. There were great speed horses such as Mr. Prospector, Danzig and Ruffian. And how can anyone forget such classic winners as Secretariat, Affirmed, Alydar and Spectacular Bid? Although these horses were great champions in their own right, none were able to combine amazing raw speed with distance-running capability like Seattle Slew. As owner Mickey Taylor stated, "He was the most complete thoroughbred the industry has seen."

From the very beginning of his racing career, Seattle Slew was destined for greatness. He won his first three starts as a 2 year-old, including the prestigious Champagne Stakes, which he won by nearly 10 lengths, running a mile in an astounding 1 minute 34⅖ seconds and smashing the record set in 1942 by the great Count Fleet. After these three victories, he was named champion 2 year-old colt. In 1977, Seattle Slew became one of only 11 horses in history to win the coveted and elusive Triple Crown. On May 7 after breaking slowly from the gate and swerving to the outside, Slew won the Kentucky Derby in a heated and intense battle with For the Moment by just 1¾ lengths. Two weeks later, he won the Preakness by an impressive 1½ lengths with the second fastest time, 1:54⅖, ever in that race. In June of '77, he captured the Triple Crown with a 4-length win at the Belmont Stakes and become the first horse to win the illustrious Triple Crown while still undefeated. As a 4-year-old, Seattle Slew continued to build on his reputation for greatness. In two epic battles of Triple Crown winners, Seattle Slew outsped Affirmed at the Marlboro Cup and easily defeated him in a race at Belmont Park. In 1979, Seattle Slew retired to stud at Spendthrift Farm having won 14 of his 17 career races. Although his racing career was now over, Seattle Slew's impact on the industry was just beginning. Overall, Seattle Slew sired 102 stakes winners including the great horses Swale and A.P. Indy. As of last year, there were 1.066 Slew foals around the world. In 1984 when Swale won the Kentucky Derby for Clairborne Farm, Slew became the first Kentucky Derby winner in more than 20 years to sire a Derby winner. In 1985 after 7 years at Spendthrift Farm, Seattle Slew was moved to Three Chimneys Farm in Woodford County. After surgeries in April of 2000 and March of 2002, Slew was moved to Hill 'n Dale Farm in April of 2002. At the age of 28, with his loving owners by his side, Seattle Slew passed away.

I ask that my fellow colleagues join me in honoring Seattle Slew. He was a great champion. The racing industry has lost one of its ultimate treasures.•

HONORING KENTUCKY'S TOP YOUTH VOLUNTEERS

• Mr. BUNNING. Madam President, I would like to congratulate and honor two young Kentucky students who have achieved national recognition for exemplary volunteer service in their communities. Elizabeth Scoville of East Bernstadt and David Tao of Bardstown have been named State Honorees in The 2002 Prudential Spirit of Community Awards program, an annual honor conferred on only one high school student and one middle-level student in each State, the District of Columbia and Puerto Rico.

Elizabeth Scoville, a junior at North Laurel High School, is being recognized for her entrepreneurial spirit and commitment to community. She started a computer collection project that provided refurbished personal computers to 26 low-income students in the Appalachian region of eastern Kentucky. Elizabeth asked businesses that were upgrading their computer systems to donate their old hardware to needy children. She cleaned and repaired every donated machine, and then worked with teachers and counselors at her school to select students to receive them, based on need and effort in school. Elizabeth also trained each recipient in basic computer skills.

David Tao, a seventh-grader at Bardstown Middle School, designed and created a candle and broom-making exhibit for a log cabin in the Old Bardstown Village and Civil War. When David found out that the village needed a new display for pieces of donated Shaker broom-making tools, he saw a unique opportunity to contribute to Bardstown's historical preservation. He researched the history of brooms and candles, then traveled across the Commonwealth to learn Shaker broom-making techniques. After the individual components were finished, David and his mother set up the display, which is now a permanent part of the Old Bardstown Village exhibits.

It is vital that we encourage and fully support the kind of selfless contributions these young people have made. People of all ages need to think more about how we, as individual citizens, can work together at the local level to ensure the health and vitality of our towns and neighborhoods. Young volunteers like Elizabeth and David are inspiring examples to all of us, and are among our brightest hopes for a better tomorrow.

The program that brought these young role models to our attention, The Prudential Spirit of Community Awards, was created by Prudential Financial in partnership with the National Association of Secondary Principals in 1995 to impress upon all youth volunteers that their contributions are critically important and highly valued, and to inspire other young people to follow their example. Over the past 7 years, the program has become the nation's largest youth recognition effort based solely on community service, with nearly 125,000 youngsters participating since its inception.

Elizabeth and David should be extremely proud to have been singled out from such a large group of dedicated volunteers. As part of their recognition, they visited Washington on May 5 for several days of special events, including a Congressional breakfast reception on Capitol Hill. While here in Washington, 10 will be named America's top youth volunteers of the year by a distinguished national selection committee.

I heartily applaud Elizabeth and David for their initiative in seeking to make their communities better places to live, and for the positive impact they have had on the lives of others. I also would like to salute other young people in the Commonwealth of Kentucky who were Distinguished Finalists by The Prudential Spirit of Community Awards for their outstanding volunteer services. They are: Robert Campos of Lexington, Daniel Knausz of Neon, Lydia Kullman of Owensboro, and Kathryn Reynolds of Louisville.

All of these young people have demonstrated a level of commitment and accomplishment that is truly extraordinary in today's world, and deserve our sincere admiration and respect. Their actions show that young Americans can, and, do play important roles in their communities, and that America's community spirit continues to hold tremendous promise for the future.•

CONGRATULATIONS TO THE JOHNSON CENTRAL ACADEMIC EAGLES

• Mr. BUNNING. Mr. President, I rise today to honor the Johnson Central High School Academic Eagles for winning the prestigious and coveted Derby Festival Academic Challenge. The 14th Annual LG&E Energy Foundation Derby Festival Academic Challenge is a quick recall tournament which began in 1989 with just 16 middle schools from Jefferson County. Over the years, the tournament has grown to include both middle and high school quick recall teams from around the Commonwealth. In this year's competition, 105 middle and high school teams throughout Kentucky competed in each of the two divisions for 3 days for the $1,000 prize and the right to be named the Derby Festival champion.

Led by coaches Brenda Porter and Freda Spencer, the Johnson Central team dominated the competition from the onset and proved to everyone involved that they are the best-of-the-best. Josh Daniel, the captain of the Academic Eagles, deserves special recognition for placing an impressive second in the Catherine Burmleve Individual Achievement Award competition for performance on individual assessment exams. By capturing the Derby Festival Academic Challenge crown, the Eagles were presented with a crystal trophy, $1,000 prize, medals, commemorative Kentucky Derby Pins, and Derby Festival Academic Challenge Championship jackets. Furthermore, the team participated in the 128th annual Kentucky Derby Pegasus Parade as Kentucky's premier academic team.

I once again congratulate the members of the Johnson Central High School Academic team on their amazing accomplishment. They proved that teamwork, hard work, and dedication lead to success. I thank them for their commitment to education and urge them to continue to reach for the stars.•

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Williams, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations and a treaty which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

At 11:41, a.m., a message from the House of Representatives, delivered by Ms. Niland, one of its reading clerks, announced that the House has passed the following bill, without amendment:

S. 378. An act to redesignate the Federal building located at 3348 South Kedzie Avenue, in Chicago, Illinois, as the "Paul Simon Chicago Job Corps Center".

The message also announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 2818. An act to authorize the Secretary of the Interior to convey certain public land within the Sand Mountain Wilderness Study Area in the State of Idaho to resolve an occupancy encroachment dating back to 1971.

H.R. 2911. An act to designate the Federal building located at 5100 Paint Branch Parkway in College Park, Maryland, as the "Harvey W. Wiley Federal Building."

H.R. 3908. An act to reauthorize the North American Wetlands Conservation Act, and for other purposes.

H.R. 3954. An act to designate certain waterways in the Caribbean National Forest in the Commonwealth of Puerto Rico as components of the National Wild and Scenic Rivers System, and for other purposes.

H.R. 4006. An act to designate the United States courthouse located at 100 Federal Plaza in Central Islip, New York, as the "Alfonse M. D'Amato United States Courthouse."

H.R. 4028. An act to designate the United States courthouse located at 600 West Capitol Avenue in Little Rock, Arkansas, as the "Richard S. Arnold United States Courthouse."

H.R. 4486. An act to designate the facility of the United States Postal Service located at 1590 East Joyce Boulevard in Fayetteville, Arkansas, as the "Clarence B. Craft Post Office Building."

H.R. 4560. An act to eliminate the deadlines for spectrum auctions of spectrum previously allocated to television broadcasting.

The message further announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 271. Concurrent resolution expressing the sense of the Congress that public awareness and education about the importance of health care coverage is of the utmost priority and that a National Importance of Health Care Coverage Month should be established to promote these goals.

At 1:25 p.m., a message from the House of Representatives, delivered by Mr. Hays, one of its reading clerks, announced that the House has agreed to the following concurrent resolution, without amendment:

S. Con. Res. 106. Concurrent resolution to correct the enrollment of H.R. 3525.

The message also announced that the House agrees to the amendments of the Senate to the bill (H.R. 3525) to enhance border security of the United States, and for other purposes.

ENROLLED BILLS SIGNED

At 2:15 p.m., a message from the House of Representatives, delivered by Mr. Hays, one of its reading clerks, announced that the Speaker has signed the following enrolled bills:

H.R. 2305. An act to authorize certain Federal officials with responsibility for the administration of the criminal justice system of the District of Columbia to serve on and participate in the activities of the District of Columbia Criminal Justice Coordinating Council, and for other purposes.

H.R. 3525. An act to enhance border security of the United States, and for other purposes.

H.R. 2048. An act to require a report on the operations of the State Justice Institute.

MEASURES REFERRED

The following bills were read the first and the second times by unanimous consent, and referred as indicated:

H.R. 2818. An act to authorize the Secretary of the Interior to convey certain public land within the Sand Mountain Wilderness Study Area in the State of Idaho to resolve an occupancy encroachment dating back to 1971; to the Committee on Energy and Natural Resources.

H.R. 2911. An act to designate the Federal building located at 5100 Paint Branch Parkway in College Park, Maryland, as the "Harvey W. Wiley Federal Building"; to the Committee on Environment and Public Works.

H.R. 3908. An act to reauthorize the North American Wetlands Conservation Act, and for other purposes; to the Committee on Environment and Public Works.

H.R. 3954. An act to designate certain waterways in the Caribbean National Forest in the Commonwealth of Puerto Rico as components of the National Wild and Scenic Rivers System, and for other purposes; to the Committee on Energy and Natural Resources.

H.R. 4006. An act to designate the United States courthouse located at 100 Federal Plaza in Central Islip, New York, as the "Alfonse M. D'Amato United States Courthouse"; to the Committee on Environment and Public Works.

The following concurrent resolution was read, and referred as indicated:

H. Con. Res. 271. Concurrent resolution expressing the sense of the Congress that public awareness and education about the importance of health care coverage is of the utmost priority and that a National Importance of Health Care Coverage Month should be established to promote these goals; to the Committee on Health, Education, Labor, and Pensions.

MEASURES READ THE FIRST TIME

The following bill was read the first time:

S. 2485. A bill entitled the "Andean Trade Promotion and Drug Eradication Act."

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC–6752. A communication from the Chief of Regulations and Administrative Law, United States Coast Guard, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Drawbridge Regulations; Florida East Coast Railroad Bridge, St. Johns River, Jacksonville, Florida" ((RIN2115–AE47)(2002–0037)) received on May 2, 2002; to the Committee on Commerce, Science, and Transportation.

EC–6753. A communication from the Chief of Regulations and Administrative Law, United States Coast Guard, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Drawbridge Regulations: Long Island, New York Inland Waterway from East Rockaway Inlet to Shinnecock Canal, NY" ((RIN2115–AE47)(2002–0038)) received on May 2, 2002; to the Committee on Commerce, Science, and Transportation.

EC–6754. A communication from the Chief of Regulations and Administrative Law, United States Coast Guard, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Drawbridge Regulations: New Rochelle Harbor, NY" ((RIN2115–AE47)(2002–0043)) received on May 2, 2002; to the Committee on Commerce, Science, and Transportation.

EC–6755. A communication from the Chief of Regulations and Administrative Law, United States Coast Guard, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Drawbridge Regulations; Great Egg Harbor Bay, New Jersey" ((RIN2115–AE47)(2002–0042)) received on May 2, 2002; to the Committee on Commerce, Science, and Transportation.

EC–6756. A communication from the Chief of Regulations and Administrative Law, United States Coast Guard, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Drawbridge Regulations; Pascagoula River, Mississippi" ((RIN2115–AE47)(2002–0041)) received on May 2, 2002; to the Committee on Commerce, Science, and Transportation.

EC–6757. A communication from the Chief of Regulations and Administrative Law, United States Coast Guard, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Safety/Security Zone Regulations; California and Arizona Border on the Colorado River" ((RIN2115–AA97)(2002–0066)) received on May 2, 2002; to the Committee on Commerce, Science, and Transportation.

EC–6758. A communication from the Chief of Regulations and Administrative Law, United States Coast Guard, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Safety/Security Zone Regulations: Oahu, Maui, Hawaii, and Kauai, HI" ((RIN2115–AA97)(2002–0065)) received on May 2, 2002; to the Committee on Commerce, Science, and Transportation.

EC–6759. A communication from the Chief of Regulations and Administrative Law, United States Coast Guard, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Drawbridge Regulations; Hatchett Creek (US 41), Gulf Intracoastal Waterway, Venice, Sarasota County, FL" ((RIN2115–AE47)(2002–0040)) received on May 2, 2002; to the Committee on Commerce, Science, and Transportation.

EC–6760. A communication from the Chief of Regulations and Administrative Law, United States Coast Guard, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Drawbridge Regulations; Bayou Boeuf, Louisiana" ((RIN2115–AE47)(2002–0045)) received on May 2, 2002; to the Committee on Commerce, Science, and Transportation.

EC–6761. A communication from the Chief of Regulations and Administrative Law, United States Coast Guard, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Drawbridge Regulations; Newtown Creek, NY" ((RIN2115–AE47)(2002–0046)) received on May 2, 2002; to the Committee on Commerce, Science, and Transportation.

EC–6762. A communication from the Chief of Regulations and Administrative Law, United States Coast Guard, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Drawbridge Regulations; Force River, ME" ((RIN2115–AE47)(2002–0044)) received on May 2, 2002; to the Committee on Commerce, Science, and Transportation.

EC–6763. A communication from the Chief of Regulations and Administrative Law, United States Coast Guard, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Safety/Security Zone Regulations; Long Island Sound, Thames River, Great South Bay, Shinnecock Bay, Connecticut River and the Atlantic Ocean Seventeen Annual Firework Displays" ((RIN2115–AA97)(2002–0068)) received on May 2, 2002; to the Committee on Commerce, Science, and Transportation.

EC–6764. A communication from the Chief of Regulations and Administrative Law, United States Coast Guard, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Drawbridge Regulations; Mississippi River, Iowa and Illinois" ((RIN2115–AE47)(2002–0039)) received on May 2, 2002; to the Committee on Commerce, Science, and Transportation.

EC–6765. A communication from the Chief of Regulations and Administrative Law, United States Coast Guard, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Safety of Uninspected Passenger Vessels Under the Passenger Vessel Safety Act of 1993" ((RIN2115–AF69)(2002–0001)) received on May 2, 2002; to the Committee on Commerce, Science, and Transportation.

EC–6766. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14–333, "International House of Prayer for All People Equitable Real Property Tax Relief Act of 2002"; to the Committee on Governmental Affairs.

EC–6767. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14–332, "Civil Rights Tax Fairness Act of 2002"; to the Committee on Governmental Affairs.

EC–6768. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14–335, "Simplified Sales and Use Tax Participation Act of 2002"; to the Committee on Governmental Affairs.

EC–6769. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14–334, "Health Care and Community Residence Facility, Hospice and Home Care Licensure Penalties Amendment Act of 2002"; to the Committee on Governmental Affairs.

EC–6770. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14–337, "Metropolitan Police Department Video Surveillance Regulations Temporary Act of 2002"; to the Committee on Governmental Affairs.

EC–6771. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14–336, "Compensating Use Tax Clarification Act of 2002"; to the Committee on Governmental Affairs.

EC–6772. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14–340, "Comcast Cable Franchise Extension Temporary Act of 2002"; to the Committee on Governmental Affairs.

EC–6773. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14–339, "Owner-Occupant Residential Tax Credit Temporary Act of 2002"; to the Committee on Governmental Affairs.

EC–6774. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14–352, "HomeStart Regulatory Improvement Amendment Act of 2002"; to the Committee on Governmental Affairs.

EC–6775. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14–353, "Tax Parity Rates and Unincorporated Business Franchise Tax Rate Clarification Temporary Act of 2002"; to the Committee on Governmental Affairs.

EC–6776. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14–354, "Child and Youth, Safety and Health Omnibus Temporary Amendment Act of 2002"; to the Committee on Governmental Affairs.

EC–6777. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14–323, "District of Columbia Youth Advisory Council Establishment Act of 2002"; to the Committee on Governmental Affairs.

EC–6778. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14–324, "Florida Avenue Baptist Church Equitable Real Property Tax Relief Act of 2002"; to the Committee on Governmental Affairs.

EC–6779. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14–325, "Homestead and Senior Citizen Real Property Tax Act of 2002"; to the Committee on Governmental Affairs.

EC–6780. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14–326, "Organ and Bone Marrow Donor Leave Amendment Act of 2002"; to the Committee on Governmental Affairs.

EC–6781. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14–327, "Continuation of Health Coverage Act of 2002"; to the Committee on Governmental Affairs.

EC–6782. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14–328, "Securities Amendment Act of 2002"; to the Committee on Governmental Affairs.

EC–6783. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14–329, "Kings Court Community Garden Equitable Real Property Tax Relief Act of 2002"; to the Committee on Governmental Affairs.

EC–6784. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14–330, "Standby Guardianship Act of 2002"; to the Committee on Governmental Affairs.

EC–6785. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14–331, "Insurance Economic Development Amendment Act of 2002"; to the Committee on Governmental Affairs.

EC–6786. A communication from the Chairman of the National Endowment for the Humanities, transmitting, pursuant to law, the Performance Report for Fiscal Year 2001; to the Committee on Governmental Affairs.

EC–6787. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of Air Quality Implementation Plans; State of Montana; Great Falls Carbon Monoxide Redesignation of Attainment and Designation of Areas for Air Quality Planning Purposes" (FRL7208–8) received on May 3, 2002; to the Committee on Environment and Public Works.

EC–6788. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of Implementation Plans South Carolina: Approval of Miscellaneous Revisions to the South Carolina State Implementation Plan" (FRL7207–2) received on May 3, 2002; to the Committee on Environment and Public Works.

EC–6789. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of Implementation Plans; Georgia; 1-Hour Ozone Attainment Demonstration, Motor Vehicle Emissions Budgets, Reasonably Available Control Measures, Contingency Measures and Attainment Date Extension" (FRL7206–2) received on May 3, 2002; to the Committee on Environment and Public Works.

EC–6790. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of State Air Quality Plans for Designated Facilities and Pollutants; Pennsylvania; Control of Emissions from Existing Hospital/Medical/Infectious Waste Incinerators" (FRL7205–6) received on May 3, 2002; to the Committee on Environment and Public Works.

EC–6791. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Award of Grants and Cooperative Agreement for the Special Projects and Programs Authorized by the Agency's FY 2002 Appropriations Act" received on May 3, 2002; to the Committee on Environment and Public Works.

EC–6792. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Interim Final Determination that State has Corrected a Deficiency in the California State Implementation Plan, San Joaquin Valley Unified Air Pollution Control District" (FRL7171–5) received on May 3, 2002; to the Committee on Environment and Public Works.

EC–6793. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Effluent Limitations Guidelines, Pretreatment Standards, and New Source Performance Standards for the Iron and Steel Manufacturing Point Source Category" (FRL7206–7) received on May 3, 2002; to the Committee on Environment and Public Works.

EC–6794. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Ocean Dumping; Site Modification" (FRL7207–5) received on May 3, 2002; to the Committee on Environment and Public Works.

EC–6795. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "OMB Approvals Under the Paperwork Reduction Act; Technical Amendment" (FRL7173–6) received on May 3, 2002; to the Committee on Environment and Public Works.

EC–6796. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Revisions to the California State Implementation Plan, San Joaquin Valley Air Pollution Control District" (FRL7171–3) received on May 3, 2002; to the Committee on Environment and Public Works.

EC–6797. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Revisions to the Definitions and the Continuous Emission Monitoring Provisions of the Acid Rain Program and the NOx Budget Trading Program" (FRL7207–4) received on May 3, 2002; to the Committee on Environment and Public Works.

EC–6798. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Utah: Final Authorization of State Hazardous Waste Management Program Revision" (FRL7205–9) received on May 3, 2002; to the Committee on Environment and Public Works.

EC–6799. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, a report entitled "Response to John G. Palfrey, Analine, Requesting Opinion About Compliance of "Partial—E" Process for Federal Hazardous Waste Manifests"; to the Committee on Environment and Public Works.

EC–6800. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, a letter to Ms. Karen Logistics Manager, Criterion Catalysts and Technologies; to the Committee on Environment and Public Works.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second times by unanimous consent, and referred as indicated:

By Ms. CANTWELL:

S. 2471. A bill to provide for the independent investigation of Federal wildland firefighter fatalities; to the Committee on Energy and Natural Resources.

By Mrs. CARNAHAN:

S. 2472. A bill for the relief of Rosemary Bichage; to the Committee on the Judiciary.

By Mr. THOMAS:

S. 2473. A bill to enhance the Recreational Fee Demonstration Program for the National Park Service, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. CRAIG:

S. 2474. A bill to provide to the Federal land management agencies the authority and capability to manage effectively the Federal lands, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. BENNETT:

S. 2475. A bill to amend the Central Utah Project Completion Act to clarify the responsibilities of the Secretary of the Interior with respect to the Central Utah Project, to redirect unexpended budget authority for the Central Utah Project for wastewater treatment and reuse and other purposes, to provide for prepayment of repayment contracts for municipal and industrial water delivery facilities, and to eliminate a deadline for such prepayment; to the Committee on Energy and Natural Resources.

By Mr. SCHUMER (for himself, Mr. Smith of Oregon, and Mrs. Clinton):

S. 2476. A bill to improve antiterrorism efforts, and for other purposes; to the Committee on Foreign Relations.

By Mrs. MURRAY:

S. 2477. A bill to exempt from duty certain entries of peanuts; to the Committee on Finance.

By Ms. LANDRIEU (for herself and Mr. Smith of Oregon):

S. 2478. A bill to promote enhanced nonproliferation cooperation between the United States and the Russian Federation; to the Committee on Foreign Relations.

By Mr. KERRY (for himself and Mr. Hatch):

S. 2479. A bill to amend the Internal Revenue Code of 1986 to include in the criteria for selecting any project for the low-income housing credit whether such project has high-speed Internet infrastructure; to the Committee on Finance.

By Mr. LEAHY (for himself, Mr. Hatch, Mr. Baucus, Mr. Domenici, Mr. Cleland, Mr. McConnell, and Mr. Sessions):

S. 2480. A bill to amend title 18, United States Code, to exempt qualified current and former law enforcement officers from state laws prohibiting the carrying of concealed handguns; to the Committee on the Judiciary.

By Mr. STEVENS:

S. 2481. A bill to amend the Communications Act and the Miscellaneous Appropriations Act, 2000, to require auction of 700 megahertz spectrum in compliance with existing statutory deadlines and to give the Federal Communications Commission discretion to set the auction date for all other spectrum auctions in the future; to the Committee on Commerce, Science, and Transportation.

By Mr. WYDEN:

S. 2482. A bill to direct the Secretary of the Interior to grant to Deschutes and Crook Counties in the State of Oregon a right-of-way to West Butte Road; to the Committee on Energy and Natural Resources.

By Mr. CLELAND (for himself, Mr. Kerry, Ms. Landrieu, Mr. Jeffords, Mr. Harkin, Mr. Bingaman, Mrs. Carnahan, Mr. Leahy, Mr. Lieberman, and Mr. Johnson):

S. 2483. A bill to amend the Small Business Act to direct the Administrator of the Small Business Administration to establish a pilot program to provide regulatory compliance assistance to small business concerns, and for other purposes; to the Committee on Small Business and Entrepreneurship.

By Mr. BAUCUS (for himself, Mr. Johnson, and Mr. Daschle):

S. 2484. A bill to amend part A of title IV of the Social Security Act to reauthorize and improve the operation of temporary assistance to needy families programs operated by Indian tribes, and for other purposes; to the Committee on Finance.

By Mr. McCAIN (for himself, Mr. Gramm, and Mr. Nickles):

S. 2485. A bill entitled the "Andean Trade Promotion and Drug Eradication Act."; read the first time.

By Ms. STABENOW (for herself, Mr. Daschle, Mr. Miller, Mr. Durbin, Mrs. Carnahan, and Mr. Wellstone):

S. 2486. A bill to amend the Internal Revenue Code of 1986 to limit the deduction for advertising of FDA approved prescription drugs by the manufacturer of such drugs to the level of such manufacturer's research and development expenditures, and for other purposes; to the Committee on Finance.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. McCAIN (for himself, Mr. Durbin, Mr. Lieberman, Mr. Voinovich, and Mr. Biden):

S. Res. 263. A resolution congratulating the Republic of Croatia on the 10th anniversary of its recognition by the United States; to the Committee on Foreign Relations.

By Mr. KERRY (for himself and Mr. Bond):

S. Res. 264. A resolution expressing the sense of the Senate that small business participation is vital to the defense of our Nation, and that Federal, State, and local governments should aggressively seek out and purchase innovative technologies and services from American small businesses to help in homeland defense and the fight against terrorism; to the Committee on Small Business and Entrepreneurship.

By Mrs. CLINTON:

S. Res. 265. A resolution recognizing the Ellis Island Medal of Honor and commending the National Ethnic Coalition of Organizations; to the Committee on the Judiciary.

ADDITIONAL COSPONSORS

S. 88

At the request of Mr. Rockefeller, the name of the Senator from Missouri (Mrs. Carnahan) was added as a cosponsor of S. 88, a bill to amend the Internal Revenue Code of 1986 to provide an incentive to ensure that all Americans gain timely and equitable access to the Internet over current and future generations of broadband capability.

S. 212

At the request of Mrs. Murray, her name was added as a cosponsor of S. 212, a bill to amend the Indian Health Care Improvement Act to revise and extend such Act.

S. 214

At the request of Mrs. Murray, her name was added as a cosponsor of S. 214, a bill to elevate the position of Director of the Indian Health Service within the Department of Health and Human Services to Assistant Secretary for Indian Health, and for other purposes.

S. 326

At the request of Ms. Collins, the name of the Senator from Maryland (Mr. Sarbanes) was added as a cosponsor of S. 326, a bill to amend title XVIII of the Social Security Act to eliminate the 15 percent reduction in payment rates under the prospective payment system for home health services and to permanently increase payments for such services that are furnished in rural areas.

S. 871

At the request of Mr. Cleland, the name of the Senator from Illinois (Mr.

DURBIN) was added as a cosponsor of S. 871, a bill to amend chapter 83 of title 5, United States Code, to provide for the computation of annuities for air traffic controllers in a similar manner as the computation of annuities for law enforcement officers and firefighters.

S. 885

At the request of Mr. HUTCHINSON, the name of the Senator from South Carolina (Mr. HOLLINGS) was added as a cosponsor of S. 885, a bill to amend title XVIII of the Social Security Act to provide for national standardized payment amounts for inpatient hospital services furnished under the medicare program.

S. 999

At the request of Mr. BINGAMAN, the name of the Senator from Oklahoma (Mr. NICKLES) was added as a cosponsor of S. 999, a bill to amend title 10, United States Code, to provide for a Korea Defense Service Medal to be issued to members of the Armed Forces who participated in operations in Korea after the end of the Korean War.

S. 1193

At the request of Mr. BAYH, the name of the Senator from Missouri (Mrs. CARNAHAN) was added as a cosponsor of S. 1193, a bill to provide for the certain of private-sector-led Community Workforce Partnerships, and for other purposes.

S. 1248

At the request of Mr. KERRY, the name of the Senator from Missouri (Mrs. CARNAHAN) was added as a cosponsor of S. 1248, a bill to establish a National Housing Trust Fund in the Treasury of the United States to provide for the development of decent, safe, and affordable, housing for low-income families, and for other purposes.

S. 1258

At the request of Mr. DORGAN, the names of the Senator from Minnesota (Mr. WELLSTONE) and the Senator from Connecticut (Mr. DODD) were added as cosponsors of S. 1258, a bill to improve academic and social outcomes for teenage youth.

S. 1350

At the request of Mr. DAYTON, the name of the Senator from New Jersey (Mr. CORZINE) was added as a cosponsor of S. 1350, a bill to amend the title XVIII of the Social Security Act to provide payment to medicare ambulance suppliers of the full costs of providing such services, and for other purposes.

S. 1523

At the request of Mrs. FEINSTEIN, the name of the Senator from Virginia (Mr. ALLEN) was added as a cosponsor of S. 1523, a bill to amend title II of the Social Security Act to repeal the Government pension offset and windfall elimination provisions.

S. 1617

At the request of Mr. DODD, the name of the Senator from Rhode Island (Mr. REED) was added as a cosponsor of S. 1617, a bill to amend the Workforce Investment Act of 1998 to increase the hiring of firefighters, and for other purposes.

S. 1785

At the request of Mr. CLELAND, the names of the Senator from Massachusetts (Mr. KENNEDY), the Senator from Idaho (Mr. CRAIG), the Senator from Minnesota (Mr. DAYTON), and the Senator from Kansas (Mr. BROWNBACK) were added as cosponsors of S. 1785, a bill to urge the President to establish the White House Commission on National Military Appreciation Month, and for other purposes.

S. 1800

At the request of Mr. DURBIN, the name of the Senator from Virginia (Mr. ALLEN) was added as a cosponsor of S. 1800, a bill to strengthen and improve the management of national security, encourage Government service in areas of critical national security, and to assist government agencies in addressing deficiencies in personnel possessing specialized skills important to national security and incorporating the goals and strategies for recruitment and retention for such skilled personnel into the strategic and performance management systems of Federal agencies.

S. 1929

At the request of Mr. MCCONNELL, the name of the Senator from Kentucky (Mr. BUNNING) was added as a cosponsor of S. 1929, a bill to amend title II of the Social Security to permit Kentucky to operate a separate retirement system for certain public employees.

S. 2025

At the request of Mr. HUTCHINSON, the name of the Senator from Georgia (Mr. CLELAND) was added as a cosponsor of S. 2025, a bill to amend title 38, United States Code, to increase the rate of special pension for recipients of the Medal of Honor and to make that special pension effective from the date of the act for which the recipient is awarded the medal of Honor and to amend title 18, United States Code, to increase the criminal penalties associated with misuse or fraud relating to the Medal of Honor.

S. 2051

At the request of Mr. REID, the names of the Senator from Utah (Mr. HATCH) and the Senator from Utah (Mr. BENNETT) were added as cosponsors of S. 2051, a bill to remove a condition preventing authority for concurrent receipt of military retired pay and veterans' disability compensation from taking affect, and for other purposes.

S. 2078

At the request of Mrs. HUTCHISON, the name of the Senator from Alabama (Mr. SESSIONS) was added as a cosponsor of S. 2078, a bill to amend section 527 of the Internal Revenue Code of 1986 to eliminate notification and return requirements for State and local political committees and candidate committees and avoid duplicate reporting by certain State and local political committees of information required to be reported and made publicly available under State law, and for other purposes.

S. 2184

At the request of Mr. BREAUX, the names of the Senator from New Jersey (Mr. CORZINE) and the Senator from Missouri (Mrs. CARNAHAN) were added as cosponsors of S. 2184, a bill to provide for the reissuance of a rule relating to ergonomics.

S. 2194

At the request of Mrs. FEINSTEIN, the name of the Senator from Maryland (Ms. MIKULSKI) was added as a cosponsor of S. 2194, a bill to hold accountable the Palestine Liberation Organization and the Palestinian Authority, and for other purposes.

S. 2199

At the request of Mr. CRAIG, the name of the Senator from Pennsylvania (Mr. SANTORUM) was added as a cosponsor of S. 2199, a bill to amend title XIX of the Social Security Act to permit additional States to enter into long-term care partnerships under the Medicaid Program in order to promote the use of long-term care insurance.

S. 2213

At the request of Mr. SESSIONS, the name of the Senator from Alabama (Mr. SHELBY) was added as a cosponsor of S. 2213, a bill to amend the Internal Revenue Code of 1986 to exclude from gross income certain overseas pay of members of the Armed Forces of the United States.

At the request of Mr. DAYTON, the name of the Senator from Massachusetts (Mr. KENNEDY) was added as a cosponsor of S. 2213, supra.

S. 2232

At the request of Mr. DAYTON, the name of the Senator from Minnesota (Mr. WELLSTONE) was added as a cosponsor of S. 2232, a bill to amend title XVIII of the Social Security Act to establish a program to provide for medicate reimbursement for health care services provided to certain medicare-eligible veterans in facilities of the Department of Veterans Affairs.

S. 2233

At the request of Mr. THOMAS, the names of the Senator from South Dakota (Mr. JOHNSON) and the Senator from New Hampshire (Mr. GREGG) were added as cosponsors of S. 2233, a bill to amend title XVIII of the Social Security Act to establish a medicare subvention demonstration project for veterans.

S. 2430

At the request of Mr. CRAIG, his name was added as a cosponsor of S. 2430, a bill to provide for parity in regulatory treatment of broadband services providers and of broadband access services providers, and for other purposes.

S. 2465

At the request of Mr. GREGG, the name of the Senator from Rhode Island (Mr. CHAFEE) was added as a cosponsor of S. 2465, a bill to extend and strengthen procedures to maintain fiscal accountability and responsibility.

S. RES. 252

At the request of Mr. WELLSTONE, the name of the Senator from Wisconsin (Mr. FEINGOLD) was added as a cosponsor of S. Res. 252, a resolution expressing the sense of the Senate regarding human rights violations in Tibet, the Panchen Lama, and the need for dialogue between the Chinese leadership and the Dalai Lama or his representatives.

S. RES. 253

At the request of Mr. SMITH of Oregon, the names of the Senator from Georgia (Mr. CLELAND), the Senator from Maine (Ms. COLLINS), the Senator from California (Mrs. BOXER), the Senator from North Dakota (Mr. DORGAN), the Senator from Florida (Mr. NELSON), and the Senator from New Jersey (Mr. CORZINE) were added as cosponsors of S. Res. 253, a resolution reiterating the sense of the Senate regarding Anti-Semitism and religious tolerance in Europe.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Ms. CANTWELL:

S. 2471. A bill to provide for the independent investigation of Federal wildland firefighter fatalities; to the Committee on Energy and Natural Resources.

Ms. CANTWELL. Mr. President, I rise today to introduce legislation that would direct the Inspectors General of the Departments of Interior and Agriculture to conduct independent investigations any time there is a fatality within the ranks of our Federal wildland firefighters. I believe this is a modest, but critically important, proposal that begins to address the fundamental issue of accountability within our federal wildland firefighting agencies.

This morning the Energy and Natural Resources Committee, on which I serve, held a hearing on the Department of Interior's and Forest Service's preparations for the 2002 fire season. I am glad we held this hearing, because the importance of fire preparedness was driven home for many of my constituents last year, when Washington State suffered a particularly devastating fire season.

On July 10 near a town called Winthrop, in the midst of the worst drought on record in our State, the Thirtymile fire burned out of control. Four courageous young firefighters were killed. Their names were: Tom Craven, 30 years old; Karen FitzPatrick, 18; Jessica Johnson, 19; and Devin Weaver, 21.

I believe we all must recognize the courage and commitment of the men and women who fight wildland fires, and the important work the Forest Service and Department of Interior do on our behalf. We know that firefighting is a dangerous profession, or in the case of these young people, summer jobs that they had taken to help pay for college. But despite the inherent danger, I believe we owe it to the firefighters who lost their lives, and to their families—to ensure that, when planning for this year's fire season, our federal agencies have taken meaningful actions to avoid a reoccurance of the Thirtymile tragedy.

Because in the words of the Forest Service's own report on the Thirtymile incident, this tragedy "could have been prevented."

I want to again thank Chairman BINGAMAN, as well as Senator WYDEN who chairs the Subcommittee on Public Lands and Forests, for holding an oversight hearing last November on the Thirtymile tragedy, which cemented in my mind the three areas in which the Forest Service needs to improve its commitment to the safety of its employees: accountability, from the firefighter on the line all the way up to the Chief; training our firefighters to put safety first; and independent and consistent review of incidents in which safety rules have been broken, whether or not they result in fatalities.

I believe these observations were further reinforced by an OSHA investigation released in February that found the Forest Service had committed two serious and three willful violations of employee safety policy during the Thirtymile Fire, even stronger citations than those handed down after 1994's Storm King fire, in which 14 Federal firefighters died.

One of the issues that came to our attention in our oversight of the Thirtymile fire is that no one, not the Energy and Natural Resources Committee, not the families of the victims, not the public, is at all satisfied with how firefighter fatalities are investigated. After the Thirtymile Fire, the Forest Service basically investigated the incident itself. When concerns were raised that the investigation's conclusions were simply not fair to the victims, who, afterall, are no longer here to tell their side of the story, the Forest Service saw fit to reopen the investigation and modify some of its conclusions.

While the Occupational Safety and Health Administration, OSHA, did conduct a subsequent investigation, OSHA simply doesn't have binding authority over the Forest Service.

I believe this entire investigatory process is flawed. To inject accountability into federal agencies' approach to firefighter safety, I firmly believe these agencies and their chiefs must know that, if employees under their command are injured or killed in the line of duty, there is no question that there will be a thorough, independent and balanced investigation of the incident. This investigation will happen regardless of politics and regardless of whether a member of Congress takes a particular interest in the incident.

I understand that after-the-fact investigations do not soothe the pain of the families and communities involved in such incidents. However, my hope is that a proactive system of accountability, which includes a rational investigatory process, will help prevent these tragedies from occurring time and time again.

As some of my colleagues may be aware, I added a provision to the Forestry Title of the Senate's farm bill, with the help of Senator HARKIN and support of Senators on the Energy Committee, that was very similar to this bill. It would have directed the Inspector General of the Department of Agriculture to conduct an independent investigation any time a Forest Service firefighter death occurs as a result of entrapment or burnover.

Unfortunately, despite the fact a modified version of the forestry title did survive the Farm Bill conference, this small yet crucial provision was deleted. While my office worked very closely with Senate conferees, this provision encountered a great deal of resistance from House conferees, who tied it to the unrelated issue of stewardship contracting authority.

On February 17, 2002, the Yakima Herald-Republic editorialized that this measure would be "a good start to change one of the biggest flaws in last summer's investigations into the needless deaths of the four local firefighters." On May 1, 2002, after it was killed in conference, the paper wrote: "In another disgusting display of politics over principle, a move to stop federal agencies from investigating themselves when people are killed fighting fires has been scuttled. Incredibly, there was little disagreement about the value of more oversight of the U.S. Forest service after its bungled handling of both a fire and follow-up investigation of the deaths of four local firefighters."

On May 2, 2002 a Seattle Times editorial called the fight for independent investigations ". . . a cause worth fighting for." It went on to say, "The changes championed by Cantwell and Representative Hastings are all about accountability and the difficulty of getting the Forest Service to correct known training deficiencies and leadership problems."

During negotiations on the farm bill, the Department of Agriculture did not oppose this language and it is my sincere hope that the relevant agencies will support the legislation that I am introducing today. I believe it is good policy, and it is ultimately in the best interest of both the management of these agencies and their employees who are out on the lines fighting fires.

Moreover, congressionally mandated IG investigations are not unprecedented. Already, the Department of Agriculture's IG must conduct automatic investigations for the proper disclosure of costs associated with pesticide registration. The Department of Defense's IG must conduct investigations for the effectiveness of voting assistance programs. HUD, and the Department of Commerce's IGs have also been directed to conduct investigations of this sort. And the list goes on. I hope we will soon add to this list the investigations proposed in this legislation.

There must be an automatic, independent investigation of any fire-related fatality. The families who have lost loved ones are asking for these independent investigations. The impacted communities are asking for this. And editorials from major dailies across my home State of Washington have cited the lack of investigatory independence as a critical problem during the Thirtymile tragedy's aftermath.

I believe we can go a long way to begin addressing these concerns if we were to enact the legislation I have introduced today.

By Mr. THOMAS:

S. 2473. A bill to enhance the Recreational Fee Demonstration Program for the National Park Service, and for other purposes; to the Committee on Energy and Natural Resources.

Mr. THOMAS. Mr. President, I rise today to introduce the Recreation Fee Authority Act of 2002. This legislation modifies the congressionally created Recreation Fee Demonstration Program.

The issue of user fees on public lands is a difficult one. As you know, our Nation's parks and recreation areas are in serious trouble and have significant maintenance and infrastructure needs. The National Park Service alone has roughly an $8 billion blacklog in maintenance and infrastructure repair. There are a number of reasons for this funding shortage, including poor park management, congressional inaction and apathy from the American public.

Currently, the Recreation Fee Demonstration Program allows the National Park Service, Bureau of Land Management, Fish and Wildlife Service and the U.S. Forest Service to collect and expend funds for areas in need of additional financial support. Agencies collect fees for admission to a unit or site for special uses such as boating and back country camping fees and are able to use 80 percent of the receipts for protection and enhancement of that area. Fees are typically used for visitor services, maintenance and repair of facilities as well as cultural and natural resource management. The remaining 20 percent is used on an agency-wide basis for parts of the system, which are precluded from participating in the Recreation Fee Demonstration program.

The legislation I am introducing today allows permanent authorization of the Recreation Fee Demonstration Program for national parks, and provides some new flexibility. For example, many visitors frequent national and State parks, but are not allowed to use State and national passes interchangeably. In cooperation with State-agencies, the Secretary of the Interior will be authorized to enter into revenue sharing agreements to accept State and national park passes at sites within that State, providing cost savings and convenience for the visitor.

In the past, concerns have been expressed about "nickel and dime" efforts where there appears to be a lack of planning and coordination by agency officials. Fee programs under this legislation would be established at fair and equitable rates. Each unit would perform a market analysis to consider benefits and services provided to the visitor, cumulative effect of fees, public policy and management objectives and feasibility of fee collection. This review would serve as a business plan for each site so that managers could utilize scarce resources in the most efficient manner.

The Recreation Fee Demonstration program was an effort by Congress to allow public land agencies to obtain funding in addition to their annual appropriations. This legislation will help provide resources for badly needed improvement projects and ensure an enhanced experience for all visitors.

We need to guarantee our national treasures are available for generations to come. I believe that Congress, the Park Service and those interested in helping our parks should cooperate on initiatives to protect resources, increase visitor services and improve management throughout the system. Working together, we can ensure that these areas will remain affordable and accessible for everyone.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2473

Be it enacted by the Senate and the House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Recreational Fee Authority Act of 2002".

SEC. 2. RECREATION FEE AUTHORITY.

(a) DEFINITION OF SECRETARY.—In this Act, the term "Secretary" means the Secretary of the Interior.

(b) DEFINITION OF AGENCY.—In this Act, the term "Agency" means the National Park Service.

(c) IN GENERAL.—Beginning in Fiscal Year 2003 and thereafter, the Secretary is authorized to—

(1) establish, charge, and collect fees for the following:

(A) admission to a unit, area, or site administered by the Agency, and

(B) the use of Agency administrated areas, lands, sites, facilities, and services (including reservations) by individuals and/or groups.

(2) establish fair and equitable fees that are a result of a market analysis taking the following criteria into consideration—

(A) the benefits and services provided to the visitor;

(B) the cumulative effect of fees charged to the public;

(C) the comparable fees charged on other units, areas, sites, and other public agencies;

(D) the comparable fees charged by nearby private sector operators;

(E) the direct and indirect cost to the government;

(F) the revenue benefits to the government;

(G) the public policy or management objectives served;

(H) the economic and administrative feasibility of fee collection, and

(I) any other pertinent factors or criteria deemed necessary by the Secretary.

(3) The Secretary shall ensure that individual park units assess only the minimum number of fees consistently on an agency-wide basis in order to avoid the collection of multiple or layered fees for a wide variety of uses, activities and/or programs.

(4) The results of the market analysis, new fees, increases or decreases in established fees, shall be published in the Federal Register and any change in the amount of fees shall not take place until at least 12 months after the date the notice is published in the Federal Register.

(d) ADDITIONAL AUTHORITIES.—Beginning in Fiscal Year 2003 and thereafter, the Secretary is authorized to—

(1) enter into agreements, including contracts, which provide for reasonable commissions or reimbursements, with any public or private entity to provide visitor reservation services, fee collection and/or processing services;

(2) use National Park Service volunteers, as appropriate to collect fees charged pursuant to Section 2(C);

(3) in establishing fees under this Act, the Secretary may provide discounted or fee admission days or use as deemed appropriate by the Secretary;

(4) the Secretary may modify the National Park Passport, established pursuant to Public Law 105-391; and

(5) the Secretary shall take such steps as may be necessary to provide information to the visitor concerning the various fees programs available to them and the costs and benefits of those programs.

(e) STATE AGENCY ADMISSION AND SPECIAL USE PASSES.—Beginning in Fiscal Year 2003 and thereafter—

(1) notwithstanding the Federal Grants Cooperative Agreements Act, the Secretary is authorized to enter into revenue sharing agreements with State agencies to accept their annual passes and convey the same privileges, terms and conditions as offered under the auspices of the National Park Passport, established pursuant to Public Law 105-391, (hereinafter referred to as the "National Park Passport") or as Public Law 105-391 may be amended.

(2) State agency annual passes shall only be accepted for all of the units of the National Park System within the boundaries of the State in which the specific revenue sharing agreement is entered into;

(3) The Secretary may enter into revenue sharing agreements with other Federal agencies and/or Tribal governments to establish, charge and collect fees at areas, sites or projects located on other areas under the jurisdiction of the Secretary, the Secretary of Agriculture and/or the specific Tribal government in which the agreement is made.

SEC. 3. DISTRIBUTION OF RECEIPTS.

(a) IN GENERAL.—

(1) The Secretary of the Treasury shall establish a special account in the Treasury for the Agency.

(2) Amounts collected by the Agency under Section 2 shall be deposited in its special account in the Treasury and shall remain available for expenditure without further appropriation until expended.

(3) Amounts collected from sales of the National Park Passport, or from revenue sharing agreements entered into under Section 2 of this Act shall be deposited in its special account in the Treasury in accordance with guidelines established by the Secretary of the Interior.

(b) DISTRIBUTION OF FEES.—The amounts deposited in the special account established by subsection (a) shall be distributed as follows:

(1) Not less than 80 percent of amounts collected pursuant to the Act at a specific area, site, or project as determined by the Secretary, shall remain available for use at the specific area, site or project at which the fees were collected, except that the Secretary may change the allocation amount to not less than 60 percent of fees collected to be returned to the area, site, or project when the Secretary determines that site specific revenues in any given Fiscal Year exceed that site's reasonable needs for that year; except that for those units of the National Park System which participate in an active revenue sharing agreement with a State under Section 2(e) of this Act, not less than 90 percent of amounts collected pursuant to this Act at a specific area, site, or project as determined by the Secretary shall remain for use at the specific area, site or project at which the fees were collected.

(2) The balance of the amounts collected at a specific area, site, or project not distributed in accordance with paragraph (1), shall remain available for use by the Agency on an agency-wide basis as determined by the Secretary.

(3) Monies generated as a result of revenue sharing agreements established pursuant to Section 2(e) may provide for a fee-sharing arrangement among the parties to the revenue sharing agreement. Agency shares of fees collected shall be deposited and distributed as described in subsection (b) equally to all units of the National Park System in the specific State that are parties to the revenue sharing agreement.

(4) Monies generated as a result of the sale of the National Park Passport shall be distributed as follows: not less than 50 percent of the amounts collected pursuant this Act, as determined by the Secretary shall remain available for use at the specific area, site, or project at which the fees were collected, the balance of the monies generated shall be distributed in accordance with paragraph 2 of this Section.

SEC. 4. EXPENDITURES.

(a) USE OF FEES AT SPECIFIC AREA, SITE, OR PROJECT.—Amounts available under Section 3 of this Act for expenditure at a specific area, site or project shall be accounted for separately and may be used for—

(1) repair, maintenance, facility enhancement, media services and infrastructure including projects and expenses relating to visitor enjoyment, visitor access, environmental compliance, and health and safety;

(2) interpretation, visitor information, visitor service, visitors needs assessments, monitoring, and signs;

(3) habitat enhancement, resource assessment, preservation, protection, and restoration related to recreation use, and

(4) law enforcement relating to public use and recreation.

(b) The Secretary may use not more than fifteen percent of the revenues derived under the authorities of this Act to administer the recreation fee program including direct operating or capital costs, cost of fee collection, notification of fee requirements, direct infrastructure, fee program management costs, bonding of volunteers, start-up costs, and analysis and reporting on program accomplishments and impacts.

SEC. 5. REPORTS.

(a) Once every three years after the enactment of this Act the Secretary shall submit to the Committee on Energy and Natural Resources of the United States Senate and the Committee on Resources of the United States House of Representatives a report detailing the status of the Recreation Fee Program conducted in units of the National Park System.

(1) The report under this section shall contain an evaluation of the Recreation Fee Program conducted at each unit of the National Park System;

(2) with respect to each unit of the National Park System where a fee is charged under the authorities granted by this Act, a description of projects that were funded, work accomplished, and a description of future projects and programs identified for funding with monies expected to be generated under the authorities granted by this Act, and

(3) any recommendations for changes in the overall fee system along with any justification as appropriate.

SEC. 6. REGULATIONS.

The Secretary may promulgate such rules and regulations as may be necessary to implement this Act.

By Mr. CRAIG:

S. 2474. A bill to provide to the Federal land management agencies the authority and capability to manage effectively the Federal lands, and for other purposes; to the Committee on Energy and Natural Resources.

Mr. CRAIG. Mr. President, the bill I am introducing today represents a significant modification to S. 1320, which I introduced in the last Congress. This modification represents a large body of work that reflects my belief that forest planning and public land management continues to evolve and that underlying law needs to be updated. It also represents thousands of hours of hearings and working with a variety of interests to modernize the laws governing our stewardship over federally-managed, multiple-use lands.

I first undertook an effort to improve our National Forest lands' forest planning process in the 104th Congress with the introduction of S. 1253. I then refined that effort when I reintroduced the legislation in S. 1320. Today, I am introducing legislation that represents a refinement of earlier efforts in S. 1253 and S. 1320.

For those of you who have just tuned in, this bill is the result of 15 oversight hearings that my Subcommittee on Forests and Public Land Management held during the 104th Congress. These hearings involved more than 200 witnesses, representing all points of view, and reviewing all aspects of the management of the Forest Service and Bureau of Land Management lands. The overwhelming conclusion from all of these witnesses, developers and environmentalists alike, public and private sector employees alike, was that the statutes governing federal land management, the 1976 Federal Land Policy and Management Act and the 1976 National Forest Management Act, are antiquated, and in need of updating. These statutes were passed by Congress in the mid-1970s to help solve land management problems. Today, they are a large part of the problem.

It also represents my continued frustration with the process paralysis that grips the planning and implementation of much needed land management activities on our National Forests. Our new Chief of the Forest Service, Dale Bosworth, tells me that it now takes up to ten years to produce a forest plan that has a life expectancy of 15 years. We have seen example after example of projects that require three to five years to plan. In the case of many fire rehabilitation projects, the financial viability of the project demands that NEPA be completed in a matter of months, not years.

More importantly, we are spending months and sometimes years planning and documenting the need for the rehabilitation of these burned areas, and then failing to get the land management underway before natural events over take the health of our forests. This is occurring to the detriment of the environment.

While our current forest planning and project planning processes stumble along, delaying important rehabilitation work, these burned areas are assailed by the elements of wind and rain. Almost every single person heard from agrees that the planning and environmental documentation process are broken. If we leave the agency in utter gridlock, we have done nothing to protect the environment. If during all of our careful planning and environmental documentation, an area suffers a series of thunder storms that washes thousands of tons of soil into critical fish habitats, as occurred after the 1990 fires on the Bitteroot National Forest, we and our system have failed the forests, the environment, and the American public.

By imposing a cumbersome, if not impossible, planning process on our federal land managers we guarantee more fires, more destruction of critical wildlife habitats, more water and air pollution, and the increased likelihood of dangerous and destructive catastrophic fires.

We do nothing good for the environment by spending two or three years to design, document, and plan salvage operations to halt the spread of insects or disease as they rampage through our forests. We can see this today in the Red River drainage of the Nez Perce National Forest.

I look at laws as "tools" for use by professional land managers and resource scientists that help them to establish priorities and make management decisions. These tools are as antiquated as the slide-rule and computer punch cards that were the tools used by land managers at the time that these statutes were passed.

As a consequence of oversight review during the 104th Congress, and subsequent oversight hearings, I drafted and circulated S. 1253 at the outset of the 105th Congress. That draft, and the subsequently-introduced bill were, in turn, the subject of six informal workshops and another eight legislative hearings to review the concepts embodied in both the first draft and the introduced version of S. 1253. The ideas that emanated from the oversight hearings were modified to reflect the suggestions of witnesses, and in recognition of how resource management problems have subsequently evolved. A similar review was conducted upon the introduction of S. 1320 which has helped me improve upon my previous efforts.

As you know I continued to hold hearings during both the 106th and the beginning of the 107th Congress and enjoyed additional dialogue about how to best modify the 1976 statutes. For instance, at one hearing all four of the former Chiefs of the Forest Service and one former Bureau of Land Management Director shared their views about the current state of Federal land management, and where legislative action could assist their successors in discharging the public trust more effectively.

During that time period there was at least one seminal decision from the Supreme Court. In Ohio Forestry Association versus Glickman, the Supreme Court, in my view, clarified the interrelationship between forest plans and project level decisions. In that decision, the Court denied standing to challenge resource management plans, essentially on the basis that no real decisions were made. We now have several years of court rulings that reflect that ruling. And we believe that the Forest Service will soon be proposing forest planning regulations that will reflect the process certified by the Supreme Court.

The bill I am introducing today would refine current planning law, rather than rewrite the law to alter our course. I believe this bill is more of a refinement than a revision and that it will be complementary to what we hope to see in the Forest Service's new forest planning rules, rather than in conflict with those rules. In various other ways of a less significant nature, the bill I am introducing today also reflects the product of court decisions that have been rendered during the period that we were reviewing these issues.

In many ways my frustration with the forest planning and project planning process that our Federal land managers are saddled with, is a lot like the Hubble Telescope when it was first launched into space in 1990. You'll recall that initially the Hubble telescope didn't work. The pictures it sent back were fuzzy and useless. It had a design flaw, a mirror was not ground correctly and as a result its images were unclear. NASA has spent millions of dollars to design and launch this marvel of technology and it didn't work.

Our National Forest planning process, the result of the 1979 Federal Land Policy and Management Act, the 1976 National Forest Management Act and subsequent Federal regulations, is broken. It has cost the public several hundred million dollars, and we continue to get fuzzy images of what the solution should be. The problem is that the public and land managers do not believe or trust the results. Now we learn we are spending up to ten years to complete plans that will remain in place for only 15 years.

In the case of the Hubble Telescope, NASA identified the problem, designed a fix, and went into space and corrected the problem, all within a very short 3 year time period. In the case of the forest planning process, most undertook the regulations would need periodic updating. During the late 1980's and early 1990's the Forest Service worked to develop and propose new forest planning regulations. Election year politics prevented the agency from finalizing those regulations.

In the last two years of the Clinton years, the Forest Service again made an effort to make changes to its planning regulations. Again election year politics intervened and now the current Administration is working toward some changes.

The bottom line here is that we can repolish the regulations over and over again but it still produces fuzzy pictures. It is my estimation that it is time to make some changes to the underlying law, so to speak the design of our telescope. It is time to make the changes our Federal managers need to assure reasonable, environmentally sound, and timely land management.

It is my hope that we will now move forward with additional hearings on this proposal, confident that we are on the correct path to improve the quality of Federal land management, and through a variety of means, increase public support for the future management of our Federal forest lands.

I look forward to working with Senator WYDEN, the chairman for the Subcommittee on Public Lands and Forests, and to hold hearings to further refine this regulation. It is my hope that Senator WYDEN and I can build on our efforts to end the Federal forest gridlock that we started with the passage of Secure Rural Schools and Community Self-Determination Act of 1999.

I invite both the administration and Members on both sides of the aisle to join us in this effort. We will move forward knowing that this proposal, like any other, is a working draft that will by necessity change, probably significantly.

We also move forward knowing that legislative change in this arena is both inevitable and vital. It is clear to me that this area of public discourse vitally needs a vibrant legislative debate and a new legislative charter so that our Federal land managers can be provided with tools a little more modern that the slide-rule and maniframe computer punch cards.

By Ms. LANDRIEU (for herself and Mr. SMITH of Oregon):

S. 2478. A bill to promote enhanced non-proliferation cooperation between the United States and the Russian Federation; to the Committee on Foreign Relations.

Ms. LANDRIEU. Mr. President, the United States Government and all of us personally have conducted a serious reassessment of our priorities in the months since the horrific events of September 11, 2001. The work of this body has been radically reshaped as we work together to effectively combat the menace of international terrorism. We have appropriated billions of dollars so our military can wage war in Afghanistan and prepare for the possibility of future military operations. We have devoted billions of dollars to strengthening our homeland defense capabilities, everything from beefing up border and port security to manufacturing additional vaccines to prepare for the possibility of a biological weapons attack. The time has also come to reassess what needs to be done to ensure that nuclear weapons and other weapons of mass destruction and the expertise to employ them do not leak out of the former Soviet Union and find their way into the hands of terrorist or terrorist states.

Last year, I sponsored the Nuclear Threat Reduction Act of 2001, S. 1117, which called for expanding and accelerating programs to prevent diversion and proliferation of Russian nuclear weapons, and fissile materials; reducing the number of nuclear warheads in the United States and Russian arsenals; and for reducing the number of nuclear weapons of those two nations that are on high alert. The NTRA enjoyed success on a number of fronts: U.S.-Russia threat reduction and nonproliferation programs were expanded and accelerated; the Senate, working with the Administration, paved the way for the deep cuts that Presidents Bush and Putin generally agreed to in November 2001; and the possibility of taking some weapons off high alert was studied as part of the Nuclear Posture Review. Solid steps were taken, but we all know that more needs to be done.

I rise today to introduce legislation that will help to address what is probably the most serious threat to U.S. national security: the possibility that terrorists or terrorist states will acquire nuclear weapons and materials, and other weapons of mass destruction from the massive and poorly secured former Soviet nuclear weapons complex.

The scope of the problem that we face is difficult to fathom, but I will attempt to illuminate it by citing a few facts. Today, Russia possesses approximately 20,000 nuclear weapons and enough weapons-grade material to fabricate over 60,000 more. Not including the United States, Russia possesses approximately 95 percent of the world's nuclear weapons and weapons-grade material, a testimony to the great resources and effort that both sides devoted in waging the cold war. These weapons and material are stored in literally hundreds of sites across Russia's 11 time zones. Making this problem even more disconcerting is the fact that Russia is unable to reliably account for its huge stock of warheads and materials, having inherited a substandard accounting system from the totalitarian Soviet state. Additionally, there are over 20,000 scientists and technicians in the former Soviet Union that are considered proliferation risks.

As the Members of this Chamber will recall proudly, Senators Sam Nunn and RICHARD LUGAR, along with others, took the lead in the early 1990s to put together a suite of programs that still work to address the threat posed by the possible proliferation of former Soviet nuclear weapons and other materials. As the Soviet Union and Warsaw Pact fell apart, there was a palpable fear that nuclear weapons and materials would proliferate widely. In conjunction with the work in the Senate, the first Bush administration also took up the challenge by backing the Nunn-Lugar programs as well as supporting initiatives to help Soviet Premier Gorbachev as he attempted to keep the Soviet Union from radical collapse. The events of September 11 serve as another wake-up call. There is a growing realization that Russia desperately needs our help. But more remains to be done—much, much more.

Fortunately, the Bush Administration has devoted considerable time and effort to working to increase cooperation between the United States and Russia on these matters, as exemplified by U.S.-Russian cooperation in the war against terrorism, the Bush-Putin summit in November 2001, and the May 2002 U.S.-Russia summit in Russia. The administration wisely realizes that only through greater cooperation with Russia can we deal effectively with this problem.

As I mentioned, Russian nuclear weapons and materials are stored in hundreds of sites. While helping to improve the security of these sites is a daunting task, we should ponder how much more difficult preventing an attack would become if even a miniscule portion of these warheads or materials were to proliferate. As members of this body know, the warning signs are growing. It is well known that groups such as al Qaeda and states such as Iraq, Iran, and North Korea wish to develop or acquire WMD. Even more disconcerting are reports that members of al Qaeda have attempted to break into Russian nuclear weapon facilities. We would do well to meditate on these reports and ask ourselves if the United States is doing enough to prevent the myriad groups and states that wish to acquire WMD from Russia from being able to do so.

Mindful of this serious challenge to U.S. and global security I am introducing the Nuclear and Terrorism Threat Reduction Act of 2002, NTTRA. The NTTRA would promote policies that will greatly reduce the likelihood of nuclear terrorism.

First, the NTTRA states that it is the policy of the United States to work cooperatively with the Russian Federation in order to prevent the diversion of weapons of mass destruction and material, including nuclear, biological and chemical weapons, as well as scientific and technical expertise necessary to design and build weapons of mass destruction. As a review by the Bush administration found last year, "most U.S. programs to assist Russia in threat reduction and nonproliferation work well, are focused on priority tasks, and are well managed." The NTTRA proposals complement the increases that the Bush administration has proposed for these programs.

The NTTRA also calls for the President to deliver to Congress, no later than six months after the enactment of the NTTRA, a series of recommendations on how to enhance the implementation of U.S.-Russia non-proliferation and threat reduction programs, including suggestions on how to improve and streamline the contracting and procurement practices of these programs and a listing of impediments to the efficient and effective implementation of these programs.

Second, recognizing the shortcomings in the Russian system for accounting for nuclear warheads and weapons-grade material, the NTTRA states that it is the policy of the United States to establish cooperatively with Russia comprehensive inventories and data exchanges of Russian and U.S. weapons-grade material and assembled warheads with particular attention to tactical, or "nonstrategic," warheads—one of the most likely weapons a terrorist organization or state would attempt to acquire—and with particular attention focused on weapons which have been removed from deployment.

Only through such an accounting system will we be able to reliably say that Russian warheads and materials are sufficiently secure.

Third, the NTTRA calls upon the President to deliver to Congress a plan laying out progress toward irreversibility involving the elimination of launchers and transparency measures involving warheads. As the Bush administration works to lock in the gains that the United States and Russia have generally agreed to, this plan will help keep the Senate fully apprised.

Fourth, the NTTRA calls for the establishment of a joint U.S.-Russia Commission on the Transition from Mutually Assured Destruction to Mutually Assured Security. The U.S. side of the Commission would be composed of private citizens who are experts in the field of U.S.-Russia strategic stability. The NTTRA also calls upon the President to make every effort to encourage the Russian Government to establish a complementary Commission that would jointly meet and discuss how to preserve strategic stability during this time of rapid and positive change in the U.S.-Russia relationship.

Working with Russia to address the many serious issues which still exist over 10 years after the end of the cold war should be one of the top U.S. priorities in the overall battle against global terrorism. Allow me to be frank and to say that this work will not be easy and there will certainly be testing times as the United States and Russia work to fully put the cold war to rest and to reach a level of foreign and defense policy cooperation which was unfathomable only a few years ago. But we are faced with few other options. We must shore up our first line of defense against the possibility of terrorism turning nuclear.

I call upon the members of this body to collectively redouble our efforts to prevent the unthinkable from happening by supporting the Nuclear and Terrorism Threat Reduction Act of 2002.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2478

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Nuclear and Terrorism Threat Reduction Act of 2002".

SEC. 2. ENHANCING THREAT REDUCTION.

(a) Statement of Policy.—

(1) It is the policy of the United States to work cooperatively with the Russian Federation in order to prevent the diversion of weapons of mass destruction and materials relating thereto, including nuclear, biological, and chemical weapons, as well as the scientific and technical expertise necessary to design and build weapons of mass destruction.

(2) With respect to enhancing threat reduction, there should be three primary objectives, as stated in the President's review of 30 different United States-Russia cooperative programs, as follows:

(A) To ensure that existing United States cooperative non-proliferation programs with the Russian Federation are focused on priority threat reduction and non-proliferation goals, and are conducted as efficiently and effectively as possible.

(B) To examine what new initiatives might be undertaken to further United States threat reduction and non-proliferation goals.

(C) To consider organizational and procedural changes designed to ensure a consistent and coordinated United States Government approach to cooperative programs with the Russian Federation on the reduction of weapons of mass destruction and prevention of their proliferation.

(3) The goal of United States programs to assist the Russian Federation should be to have them work well, be focused on priority tasks, and be well managed.

(4) In order to further cooperative efforts, the following key programs should be expanded:

(A) The Department of Energy Material Protection, Control and Accounting (MPC&A) program to assist the Russian Federation secure and consolidate weapons-grade nuclear material.

(B) The Department of Energy Warhead and Fissile Material Transparency Program.

(C) The International Science and Technology Center (ISTC).

(D) The Redirection of Biotechnical Scientists program.

(E) The Department of Defense Cooperative Threat Reduction project to construct a chemical weapons destruction facility at Shchuch'ye, Russia, to enable its earliest completion at no increased expense.

(5) Other programs should be adjusted, refocused, or reexamined, including—

(A) approaches to the current plutonium disposition program in the Russian Federation, in order to make the program less costly and more effective;

(B) the project to end production by the Russian Federation of weapons-grade plutonium, in order to transfer the project from the Department of Defense to the Department of Energy;

(C) consolidation of the Department of Energy's Nuclear Cities Initiative (NCI) with the Initiative for Proliferation Prevention (IPP), with a focus on projects to assist the Russian Federation in reduction of its nuclear warheads complex; and

(D) acceleration of the Department of Energy's Second Line of Defense program to assist the Russian Federation install nuclear detection equipment at border posts.

(b) Increased Funding of Certain Key Programs.—In order to guarantee that the United States-Russia non-proliferation and threat reduction efforts operate as efficiently as possible, certain key programs should receive additional funding above current levels, including—

(1) the United States-Russia Highly Enriched Uranium Purchase Agreement;

(2) the Second Line of Defense program;

(3) the Initiatives for Proliferation Prevention;

(4) the Fissile Materials Disposition program;

(5) the Redirection of Biotechnical Scientists program;

(6) the Department of Energy Material Protection, Control, and Accounting (MPC&A) program;

(7) the International Science and Technology Center; and

(8) the Warhead and Fissile Material Transparency program.

(c) Report.—Not later than six months after the date of enactment of this Act, the President shall submit to Congress a report containing recommendations on how to enhance the implementation of United States-Russia non-proliferation and threat reduction programs, which shall include—

(1) recommendations on how to improve and streamline the contracting and procurement practices of those programs; and

(2) a listing of impediments to the efficient and effective implementation of those programs.

SEC. 3. COMPREHENSIVE INVENTORIES AND DATA EXCHANGES BETWEEN THE UNITED STATES AND THE RUSSIAN FEDERATION ON WEAPONS-GRADE MATERIAL AND NUCLEAR WEAPONS.

(a) Findings.—Congress finds that inventories of weapons-grade material and warheads should be tracked in order, among other things—

(1) to make it more likely that the Russian Federation can fully account for its entire inventory of weapons-grade material and assembled weapons; and

(2) to make it more likely that the sources of any material or weapons possessed or used by any foreign state or terrorist organization can be identified.

(b) Statement of Policy.—It is the policy of the United States to establish jointly with the Russian Federation comprehensive inventories and data exchanges of Russian and United States weapons-grade material and assembled warheads, with particular attention to tactical, or "nonstrategic" warheads, one of the most likely weapons a terrorist organization or terrorist state would attempt to acquire, and with particular attention focused on weapons that have been removed from deployment.

(c) Assistance in Developing Comprehensive Inventories.—Notwithstanding any other provision of law, the United States Government shall work with the Russian Federation to develop comprehensive inventories of Russian weapons-grade plutonium and highly enriched uranium programs and assembled warheads, with special attention to be focused on tactical warheads and warheads that have been removed from deployment.

(d) Data Exchanges.—As part of this process, to the maximum extent practicable, without jeopardizing United States national security interests, the United States is authorized to enter into ongoing data exchanges with the Russian Federation on categories of material and weapons described in subsection (c).

(e) Report.—Not later than six months after the date of enactment of this Act, and annually thereafter until a comprehensive inventory is created and the information collected from the inventory exchanged between the governments of the United States and the Russian Federation, the President shall submit to Congress a report, in both an unclassified and classified form as necessary, describing the progress that has been made toward that objective.

SEC. 4. COMMISSION TO ASSESS THE TRANSITION FROM MUTUALLY ASSURED DESTRUCTION (MAD) TO MUTUALLY ASSURED SECURITY (MAS).

(a) Statement of Policy.—With the end of the Cold War more than a decade ago, with the United States and the Russian Federation fighting together against global terrorism, and with the Presidents of the United States and the Russian Federation agreeing to establish "a new strategic framework to ensure the mutual security of the United States and Russia, and the world community", the United States and the Russian Federation should increase significantly their efforts to put dangerous and unnecessary elements of the Cold War to rest.

(b) Establishment.—In order to assist with the policy expressed in subsection (a), the President is authorized to conclude an agreement with the Russian Federation for the establishment of a Joint United States-Russia Commission to Assess the Transition from Mutual Assured Destruction (MAD) to Mutual Assured Security (MAS) (in this section referred to as the "Commission").

(c) Composition.—The United States delegation of the Commission shall consist of 13 members appointed by the President, as follows:

(1) Three members, after consultation with the Speaker of the House of Representatives.

(2) Three members, after consultation with the Majority Leader of the Senate.

(3) Two members, after consultation with the Minority Leader of the House of Representatives.

(4) Two members, after consultation with the Minority Leader of the Senate.

(5) Two members as the President may determine.

(d) Qualifications.—The United States members of the Commission shall be appointed from among private United States citizens with knowledge and expertise in United States-Russia strategic stability issues.

(e) Chair.—The chair of the Commission should be chosen by consensus from among the members of the Commission.

(f) Russian Commission.—The President should make every effort to encourage the Government of the Russian Federation to appoint a Russian Federation delegation of the Commission that would jointly meet and discuss the issues described in subsection (g).

(g) Duties of the Commission.—The duties of the Commission should include consideration of how—

(1) to ensure that the reduction of strategic nuclear weapons announced by the United States and the Russian Federation in November 2001 take effect in a rapid, safe, verifiable and irreversible manner;

(2) to preserve and enhance START I monitoring and verification mechanisms;

(3) to develop additional monitoring and verification mechanisms;

(4) to preserve the benefits of the unratified START II agreement, especially those measures that affect strategic stability;

(5) to ensure the safety of warheads removed from deployment;

(6) to safely and verifiably dismantle warheads in excess of the ceiling established by the President Bush at the November 2001 United States-Russia summit;

(7) to begin a new high-level dialogue to discuss United States and Russian Federation proposals for a global and theater level missile defense systems;

(8) to extend presidential decision-making time as it relates to nuclear weapons operations;

(9) to improve Russian-American cooperative efforts to enhance strategic early warning, including but not limited to the Joint Data Exchange Center and the Russian-American Observation Satellite; and

(10) to increase cooperation between the United States and the Russian Federation on the programs and activities described in sections 2 and 3.

(e) COOPERATION.—In carrying out its duties, the Commission should receive the full and timely cooperation of United States Government officials, including providing the Commission with analyses, briefings, and other information necessary for the fulfillment of its responsibilities.

(f) REPORT.—The Commission shall, not later than six months after the date of its first meeting, submit to Congress an interim report on its findings and, not later than six months after submission of the interim report, submit to Congress a final report containing its conclusions.

By Mr. KERRY (for himself and Mr. HATCH):

S. 2479. A bill to amend the Internal Revenue Code of 1986 to include in the criteria for selecting any project for the low-income housing credit whether such project has high-speed internet infrastructure; to the Committee on Finance.

Mr. KERRY. Mr. President, I am very proud to introduce legislation today with Senator HATCH that would amend the Low-Income Housing Tax Credit to make access to Internet and broadband technology one of the criteria that State housing agencies must consider when awarding the credits. This bill will help more low-income families gain access to the new technologies and services that are driving today's modern economy, and it will do so at very minimal cost to developers. The bill will take effect for all new housing built with the credit beginning on January 1 of next year.

My colleagues should understand that the Kerry-Hatch bill would not require that new housing units have Internet or broadband capability; it is not an unfunded mandate. Rather, our bill simply adds broadband access to the list of things that State agencies would have to consider when they award the credits each year. Our bill also does not specify any particular technology, meaning that developers and providers can decide for themselves which technology will work best for a given community.

This bill has the support of many well-known companies and associations from the technology and telecommunications industries, including Corning, Nortel Networks, BellSouth, SmartForce, the Telecommunications Industry Association, Siemens, and Cisco Systems. This is just a partial list. A number of well-known national nonprofit organizations and representatives of the housing industry, such as Habitat for Humanity, the National Leased Housing Association, and the National Housing Conference also support the bill. Senator HATCH and I hope that the Finance Committee, of which we are both members, will consider adding this provision when it marks up charity-related legislation later this month. There is no revenue cost associated with the bill, making it more likely that the committee will be able to include it.

Several States are running ahead of the Federal Government and are enacting their own local policies to do what the Kerry-Hatch legislation will do nationally. To date, the States of Oregon and Nebraska have re-written their policies with technical assistance from One Economy Corporation, a national nonprofit organization that works to bring technology to low-income populations and make that technology a tool to help them build assets and raise their standards of living. Oregon and Nebraska now have an incentive for broadband in awarding the low-income credits. Dialogues are currently underway with housing finance agencies from the States of North Carolina, Michigan, Kentucky, and Minnesota, several of which may change their policies very soon.

Understandably, there may be some Senators that believe that building access to broadband technology into these new low-income housing units will be prohibitively expensive. Well, I am happy to report that this is not so. Engineers from Cisco Systems have evaluated the costs of wiring buildings at the time of construction. When wiring a new building, the baseline cost to run telecommunications infrastructure into a unit, a fixed cost in new construction, is approximately $150. When adding conduit for high-speed connectivity, the cost increases anywhere between $1 and $25. So for a 50-unit building, that's an added cost of about $1,250 if you assume the highest cost. This is likely to be less than one-quarter of 1 percent of total construction costs, a small increase that is more than offset by the increased value of the property. The added cost is insignificant, and the added value is great.

This legislation is critical because having access to and understanding of technology is increasingly a prerequisite for succeeding in today's knowledge-based economy. Technology can be a significant tool to help low-income families move up and out of poverty. I believe that this small change to section 42 of the tax code will help to close the digital divide in the United States by getting modern technology into the homes of more low-income Americans.

Recently, some influential opinion leaders in Washington and the press have begun to "debunk" the digital divide. They claim that since so many more people have access to technology in the workplace, the percentage of families with incomes between $15,000 and $25,000 that now use computers at home or in the workplace is now close to 50 percent, concerns about the digital divide are overstated.

These statistics only tell part of the story, because there are key Internet services that people will only feel comfortable using at home due to privacy concerns, such as those related to one's health or personal finance. Access to computers in the workplace is not sufficient. Sure some people might check out Yahoo when they have a free moment at work. They might perform an Internet search, check driving directions on MapQuest, or bid on something on eBay. But they are not going to seek financial advice, research their kids' health, or do anything of a truly personal nature from the workplace. And in terms of computer use in the home, there is still a huge digital divide: Even with all of the technological advances and price reductions of the past few years, less than 30 percent of households earning under $35,000 are online at home. In fact, more than one-quarter of zip codes with median incomes under $35,000 do not have a single high-speed Internet subscriber, despite the fact that the services are available. In my opinion, this is a real problem if we want these millions of Americans to participate in the Information Economy and access the online services that the rest of us take for granted.

Here are some real stories from the Columbia Heights neighborhood here in Washington, brought to my attention by One Economy Corporation, that speak to the power of access to technology in the home: A mother of three young children uses her computer to take an online course to get A+ Certification from the Department of Employment Services. Having a computer at home means that she can take the classes online at night when her kids are asleep. Once she has the certification she will qualify for a better, higher-paying job; a young woman in her mid-20s uses her home computer to look for jobs and pursue educational opportunities. After September 11, she went online to find people to talk to for support; and a 50-something grandmother has a three-year old grandson who suffers from recurring ear infections. The doctor said that the little boy needed to get an operation to put tubes in his ears. His grandmother used the computer to research this treatment on the Internet and ultimately decide that it was the best thing for her grandson. When asked what she would have done without the Internet, she said that she would have "left it up to God."

These are just a few examples. The central point is that access to computers and Internet technology in the workplace is no substitute for having similar access in the home.

Another important issue to consider is the amount of time that many families of modest means spend interacting with public agencies. I've been told that can often be as high as 10 hours a month, sometimes more. Many of these services could undoubtedly be provided online, which would allow parents to spend more time at work and less waiting on line. Parents would also be able to spend more time with their children. In other words, Internet access at home could alleviate some of the stresses in these families' daily lives. I guess the best way to put it is: Being online is far better than waiting on a line.

I look forward to promoting this important bill in the Finance Committee.

I would like to take a moment to speak about the housing crisis in the country more generally.

My colleagues know that I have spoken frequently on the Senate floor about the lack of affordable housing throughout the country. Recent changes in the housing market have further limited the availability of housing, while the growth in our economy over the last decade has dramatically increased the cost of the housing that remains. Many working families have been unable to keep up with these increased costs.

While the bill I am introducing today does not specifically address the supply of housing, I want to reiterate my concern about and dedication to this issue. The low-income housing tax credit is only one tool, but is an effective one, generating about 85,000 new housing units per year. It is an important program, but it only helps a small fraction of the more than 5 million American households that the Department of Housing and Urban Development estimates to have "worst case" housing needs, an increase of 12 percent since 1990. Many of these families are spending more than half their income on housing, or are living in severely substandard housing. On average, a person needs to earn more than $11 per hour just to afford the median rent on a two-bedroom apartment in the United States. This hourly figure is dramatically higher in many metropolitan areas, an hourly wage of $22 is needed in San Francisco; $21 on Long Island; $17 in Boston; $16 in the D.C. area; $14 in Seattle and Chicago; and, $13 in Atlanta. I have mentioned these statistics before. In fact, there is not one metropolitan area in the country where a minimum wage earner can afford to pay the rent for a two-bedroom apartment. A person trying to live in Boston would have to make more than $35,000 annually just to afford such a home. This means teachers, janitors, social workers, police officers, and other full-time workers may have trouble affording even a modest place to live, segregating our communities by class and occupation.

We can no longer ignore the lack of affordable housing, and the impact it is having on families and children around the country. It is not clear to me why this crisis has not caused more concern here in Congress. How many families need to be pushed out of their homes and into the streets before action is taken? Do we not act because these people vote less often, or because they don't give to political campaigns? Do we not believe that most of these Americans would prefer more affordable housing to the measly tax cut they received in last year's tax bill?

I believe it is time for our Nation to take a new path, one that ensures that every American has the opportunity to live in decent and safe housing. Everyone knows that decent housing plays an enormous role in shaping young lives, and we need to do more to address this quiet, but simmering, crisis. While the bill I am introducing today with Senator HATCH will certainly help bring more Americans of modest means into the Information Age, it won't help those Americans with substandard housing, or no homes at all. Addressing that problem requires a greater commitment from all of us, and our mayors and Governors back home will all thank us.

By Mr. LEAHY (for himself, Mr. HATCH, Mr. BAUCUS, Mr. DOMENICI, Mr. CLELAND, Mr. MCCONNELL, and Mr. SESSIONS):

S. 2480. A bill to amend title 18, United States Code, to exempt qualified current and former law enforcement officers from state laws prohibiting the carrying of concealed handguns; to the Committee on the Judiciary.

Mr. LEAHY. Mr. President, I am pleased today to introduce legislation to permit current and retired Federal, State and local law enforcement officers to carry a concealed firearm, the Law Enforcement Officers Safety Act of 2002. I am pleased that Senators HATCH, BAUCUS, DOMENICI, CLELAND, MCCONNELL, and SESSIONS are joining me as original cosponsors in this effort to make our communities safer and to protect law enforcement officers and their families.

I am introducing this companion measure to H.R. 218 at the request of the Fraternal Order of Police, which strongly supports this legislation to protect officers and their families from vindictive criminals and to permit officers to respond immediately to a crime when off duty. Many of my friends in the law enforcement community believe that national legislation is necessary due to the patchwork of conceal-carry laws in State and local jurisdictions, and that off-duty and retired officers should be permitted to carry their firearms across state and other jurisdictional lines.

Our bipartisan bill will allow thousands of equipped, trained and certified law enforcement officers continually to serve and protect our communities, regardless of jurisdiction, at no cost to taxpayers. This bill is designed to promote better law enforcement and improved public safety.

Our legislation would permit qualified law enforcement officers and qualified retired law enforcement officers across the nation to carry concealed firearms in most situations. The bill, however, preserves any State law that permits citizens from restricting a concealed firearm on private property and preserves any State law that restricts the possession of a firearm on State or local government property. While I support this approach to strike a proper balance between providing law enforcement officers with the uniformity in the law needed to protect public safety, I still have some federalism concerns about the legislation. I look forward to working with my colleagues as the bill moves through the legislative process to further preserve essential rights of the states.

To qualify for the bill's uniform standards a law enforcement officer must be authorized to use a firearm by the law enforcement agency where he or she works, be in good standing with that agency, and meet any standards established by that agency to regularly qualify to use a firearm. A qualified retired law enforcement officer under the bill must have retired in good standing, been employed at least five years as a law enforcement officer unless forced to retire due to a service-related injury, have a non-forfeitable right to benefits under the law enforcement agency's retirement plan, and annually complete a State-approved firearms training course. As a result, our bipartisan legislation maintains the State or local jurisdiction's power to determine whether a law enforcement officer or retired law enforcement officer is qualified in the use of a firearm.

Representative RANDY CUNNINGHAM introduced a similar bill in the House, H.R. 218, which has garnered more than 250 bipartisan cosponsors. In 1999, the House of Representatives adopted similar legislation, by a vote of 372-53, as a floor amendment during its gun safety debate before the overall legislation was defeated. I applaud my colleagues in the other legislative body for such strong bipartisan showing of support for this legislation.

As a former state prosecutor, I know that law enforcement officers are never "off-duty." They are dedicated public servants trained to uphold the law and keep the peace. When there is a threat to the peace or to our public safety, law enforcement officers are sworn to answer that call. Our legislation enables law enforcement officers across the country to be armed and prepared when they answer that call, no matter where or when it comes.

I urge my colleagues to support the Law Enforcement Officers Safety Act to make our communities safer and to protect law enforcement officers and their families.

Mr. HATCH. Mr. President, today I rise along with Senator LEAHY and others to introduce the Law Enforcement Officers Safety Act of 2002. This bill, which exempts qualified active and retired law enforcement officers from certain local and State prohibitions on the carrying of concealed firearms, will help protect the American public, our Nation's officers and their families.

Over the past several Congresses, Senator CAMPBELL has been a leader in this area. As a former deputy sheriff in Sacramento County, California, he has a first-hand understanding of the challenges law enforcement officers face as they cross state lines. Last March, he introduced a similar bill, S. 442, the Law Enforcement Protection Act of 2001, which I co-sponsored. I will continue to support S. 442 as we seek to enact such legislation during this Congress.

Like S. 442, the Law Enforcement Officers Safety Act of 2002 permits qualified law enforcement officers and retired officers to carry, with the appropriate identification, a concealed firearm that has been shipped or transported in interstate or foreign commerce regardless of State or local laws. However, like S. 442, this bill does not supersede any State law that permits private persons to prohibit or restrict the possession of concealed weapons on their properties, or prohibits or restricts the possession of firearms on any State or local government properties, installations, buildings, bases or parks. Additionally, both bills clearly define what is meant by "qualified law enforcement officer" and "qualified retired [or former] law enforcement officer" to ensure that those individuals permitted to carry concealed firearms are highly trained professionals.

Such legislation not only will provide law enforcement officers with a legal means to protect themselves and their families when they travel interstate, it will also provide added security to the American public. By enabling qualified active duty and retired law enforcement officers to carry firearms while off-duty, retired or outside their own jurisdictions, more trained law enforcement officers will be on our streets to enforce the law and to respond to crises.

I look forward to working on a bipartisan basis with my colleagues in both Houses to ensure that this legislation is enacted into law.

Thank you. I yield the floor.

By Mr. STEVENS:

S. 2481. A bill to amend the Communications Act and the Miscellaneous Appropriations Act, 2000, to require auction of 700 megahertz spectrum in compliance with existing statutory deadlines and to give the Federal Communications Commission discretion to set the auction date for all other spectrum auctions in the future; to the Committee on Commerce, Science, and Transportation.

Mr. STEVENS. Mr. President, several years ago, after a period had gone by wherein spectrum available to the FCC to relicense had been involved in a lottery process, I suggested that we auction spectrum. And after some time passed, Congress did see fit to follow that suggestion, and we have been having spectrum auctions by the FCC.

There is currently pending the auction of spectrum in the 747 to 762 megahertz and 777 to 792 megahertz bands. That has been postponed several times now, and I think that is wrong.

I do believe spectrum should be made available, in a competitive process, to those people who want to use it, and to improve our economy, to put into effect new technologies. But it should not be used just for speculation. And it should not be auctioned just because of market demands for spectrum, per se, in order to get the Government the highest level of return for the spectrum.

The highest level of return to the taxpayers, in the long run, comes from developing the spectrum, from enhancing the economy, and providing a long period of development for new technologies and new income streams, which will provide a new tax base for the Treasury. I believe we should reiterate to the FCC that it has the authority to proceed.

I will send to the desk a bill which would create the Auction Completion Timing Act, and it really is saying: Act now. The Commission has its authority, and it should act within its own discretion.

In order that this situation may not develop again, my bill also suggests future spectrum auction deadlines will be determined by the Commission alone, unless Congress specifically passes a law that the President signs that would interfere with that authority.

I believe the Federal Communications Act of 1934 should be amended to make clear that notwithstanding any other provisions we put in any bills to the contrary in the past, the Commission may determine the date of any auction conducted pursuant to section 309(j) of the Communications Act of 1934, as amended.

By Mr. WYDEN:

S. 2482. A bill to direct the Secretary of the Interior to grant to Deschutes and Crook Counties in the State of Oregon a right-of-way to West Butte Road; to the Committee on Energy and Natural Resources.

Mr. WYDEN. Mr. President, today I introduce legislation transferring from Federal to county jurisdiction the West Butte Road, located in the counties of Crook and Deschutes, Oregon. In exchange for the new right-of-way for the West Butte Road, Crook and Deschutes counties will transfer their right-of-way on the George Millican Road to the U.S. Department of Interior Bureau of Land Management, BLM.

The right-of-way exchange authorized by this legislation would clear the way for a paved road, pursued for more than 30 years by Prineville, in Crook County, OR, to connect their community with U.S. Highway 20. Such a road would substantially enhance the economic development potential for Prineville, a community suffering from 15 percent unemployment, by providing an alternative route for passenger and commercial traffic traveling between Portland and Boise, ID. It would also encourage commerce in Prineville by efficiently directing traffic to the Prineville/Crook County Industrial Parks, areas set aside for the sole purpose of promoting industrial diversification within Crook County. By increasing the traffic to these areas, the opportunity to promote and increase their occupancy would be greatly improved.

In addition to economic advantages, the paved road would provide important environmental benefits. It would reduce traffic congestion on the overloaded highway 97 passing through Bend and Redmond, OR. It would eliminate the prospect of major improvements to the Crooked River Highway. The Crooked River Highway follows the meander of the Crooked River, a tributary of the salmon-bearing Deschutes River. Improvement of that road would entail substantial impacts to riparian areas, expensive bridge maintenance, and likely adverse effects to the river. In contrast, the proposed new road would reclaim a straight section of the old Prineville-Lakeview highway, surveyed in 1915, which crosses flat desert lands and no riparian zones. In addition, the legislation directs the BLM to propose affirmative measures to protect wildlife and game habitat in the area traversed by the new road.

Some suggest that this legislation is not necessary because the BLM already has the authority to issue a right-of-way. That may be true, but it is also true that the BLM decided it can make a decision on the county right-of-way application only thought an extended process, which close observers tell me could take anywhere from four to six years, with no guarantee of success. I am not willing to stake Prineville's economic or environmental future on such an uncertainty.

Improvement of the Millican/West Butte road is supported by the City of Prineville, Crook County, Deschutes County, the City of Bend, the City of Redmond, the Oregon Department of Transportation and the Central Oregon Transportation Commission. They have identified the new right-of-way as a means of reducing environmental impacts associated with the existing road, reducing traffic congestion, improving the northwest-southeast connections between the state's wealthiest and poorest regions, and offering the community the chance to retain its largest employers so as to address some of the economic woes of the region.

By Mr. CLELAND (for himself, Mr. KERRY, Ms. LANDRIEU, Mr. JEFFORDS, Mr. HARKIN, Mr. BINGAMAN, Mrs. CARNAHAN, Mr. LEAHY, Mr. LIEBERMAN, and Mr. JOHNSON):

S. 2483. A bill to amend the Small Business Act to direct the Administrator of the Small Business Administration to establish a pilot program to provide regulatory compliance assistance to small business concerns, and for other purposes; to the Committee on Small Business and Entrepreneurship.

Mr. CLELAND. Mr. President, in order to provide regulatory compliance assistance to small businesses, Senator KERRY and I are introducing the Senate companion bill to H.R. 203, the "National Small Business Regulatory Assistance Act," which passed the House last year by voice vote. I also want to thank Senators LANDRIEU, JEFFORDS, HARKIN, BINGAMAN, CARNAHAN, LEAHY, LIEBERMAN, and JOHNSON for their co-sponsorship.

In today's business environment, one of the greatest obstacles blocking the path to prosperity for America's small businesses is regulatory compliance. Small businesses regularly find themselves lost in a maze of Federal regulations that are designed to create safer and healthier workplaces. Chairman KERRY and I want all of our businesses to comply with the regulations that preserve the health, environment, and well-being of our workers and our communities. But, too often, small businesses do not have access to the information they need in order to comply with regulations in good faith.

The National Small Business Regulatory Assistance Act calls for the establishment of a pilot project in which 20 selected Small Business Development Centers, SBDCs, would provide regulatory compliance assistance to small businesses. This pilot project would be administered by the Small Business Administration, SBA, which would be authorized to award grants between $150,000 and $300,000 to selected SBDCs. The bill also requires that the Congress receive a progress report annually on the pilot program's accomplishments at each SBDC.

Under our legislation, SBDCs would need to form partnerships with Federal compliance programs, conduct educational and training activities and offer free-of-charge compliance counseling to small business owners. Further, the measure would guarantee privacy to those who receive compliance assistance. This privacy provision has also been extended to all small businesses that seek any assistance from their local SBDC.

The adoption of the National Small Business Regulatory Assistance Act will provide small businesses with the support they need to navigate the often complicated world of Federal regulations.

I urge all Members of the Senate to join me in support of the National Small Business Regulatory Assistance Act of 2002.

Mr. KERRY. Mr. President, I am pleased to join with my distinguished colleague, Senator MAX CLELAND, and the cosponsors of our legislation in introducing the National Small Business Regulatory Assistance Act.

The bill we are introducing today is the Senate version of H.R. 203, which bears the same name as our legislation. H.R. 203 passed the House by voice vote in October of last year with the strong support of the House Committee on Small Business. However, our version deals with several issues that have been raised since House passage and will help ensure that small businesses receive the regulatory compliance assistance the legislation envisions.

I am pleased to say that we have the full support of the Association of Small Business Development Centers, which has been working closely with us since January of this year to draft the Senate version of this legislation, correcting several issues with the House passed bill. I am also pleased to say that we have kept Congressman SWEENEY, the House sponsor, and Congressman MANZULLO, chairman of the House Committee on Small Business, informed of our actions throughout the process to ensure our changes would have the support of the House committee, as should be the case.

Small businesses, especially small businesses with few employees, often face a daunting task when seeking advice on how to comply with Federal regulations, particularly when implementation varies for different regions of the country, or from State to State. Many small businesses fail to comply with important and needed labor and environmental regulations not because they want to break the law, but because they are unaware of the actions they need to take to comply. Often, small businesses are afraid to seek guidance from Federal agencies for fear of exposing problems at their business.

One important way to help small business comply with Federal regulations is to provide them with free, confidential advice outside of the normal relationship between a small business and a regulatory agency. The Small Business Administration's, SBA, Small Business Development Centers, SBDC, are in a unique position to provide this type of assistance.

Our bill establishes a pilot program to award competitive grants to 20 selected SBDCs, two from each SBA region, which would allow these SBDCs to provide regulatory compliance assistance to small businesses. The SBA would be authorized to award grants between $150,000 and $300,000, depending on the population of the SBDC's State.

Under our legislation, the SBDCs would need to form partnerships with Federal compliance programs, conduct educational and training activities and offer free-of-charge compliance counseling to small business owners. Further, the measure would guarantee privacy to those who receive compliance assistance. This privacy provision has also been extended to all small businesses that seek any assistance from their local SBDC.

The legislation we are introducing today uses only SBA funds and will serve to complement current small business development assistance as well as existing compliance assistance programs. Versions of this legislation introduced in previous Congresses used Environmental Protection Agency, EPA, enforcement funds to pay for these grants.

Small businesses can succeed when it comes to complying with Federal regulations, if provided with the necessary tools and information. The National Small Business Regulatory Assistance Act will go a long way toward assisting our Nation's small businesses who want to comply with Federal Regulations.

I urge all of my colleagues to support this legislation.

By Mr. BAUCUS (for himself, Mr. JOHNSON, and Mr. DASCHLE):

S. 2484. A bill to amend part A of title IV of the Social Security Act to reauthorize and improve the operation of temporary assistance to needy families programs operated by Indian tribes, and for other purposes; to the Committee on Finance.

Mr. BAUCUS. Mr. President, today, I am introducing the American Indian Welfare Reform Act of 2002, an important step in improving the lives of this country's Native Americans. I am glad to be joined by Senators JOHNSON and DASCHLE in this effort.

In 1996 we enacted a sweeping welfare reform law. It was a long-past-due fundamental change and ended a failed system for helping low-income families in America. I was a strong supporter of that law. This year, we are reauthorizing it. As we in the Finance Committee have reviewed the evidence I have been struck by how successful it has been. The ranks of those dependent on welfare in this country has been reduced by half in just five years. There is more to be done, of course. Child poverty has declined but not by as much as the fall in the welfare caseload, for example. I am at work with my Finance Committee colleague Senator GRASSLEY on comprehensive legislation to renew and improve the 1996 law.

One important aspect of the 1996 law which is often overlooked is that it didn't just devolve authority to States, it also permitted Indian tribes to operate their own welfare programs for the first time. The new welfare program, Temporary Assistance for Needy Families, TANF, is very flexible. Tribes can take advantage of that flexibility to design culturally-appropriate programs to move people from welfare to work. This is smart policy and is consistent with the important value of tribal sovereignty. I support it.

My own State of Montana is home to several tribes and I have given much thought to how we can build upon the provisions of the 1996 welfare law to help them and their members. Too often in Montana, and elsewhere, poverty has an Indian face. The numbers are cold and hard. According to the Census Bureau, 25 percent of American Indians live in poverty, more than twice the national poverty rate. The average household income for Indians in 2000 was only 75 percent of that of the rest of Americans. This is simply not right. We must do better. Welfare reform needs to work for everyone.

Luckily, the provisions of the 1996 law provide a good start. Now we must build upon them. The legislation I introduce today, the product of extensive dialogue and consultation, does that in several important ways.

First, more than 30 tribes, including the Confederated Salish-Kootenai and Fort Belknap tribes of Montana, have taken advantage of the opportunity to operate their own TANF programs. This bill contains provisions to help those tribes improve their programs. For example, tribes operating TANF are not eligible for the TANF high performance bonus or the TANF contingency fund while state TANF programs are. This oversight is rectified by this bill.

Second, there are many tribes interested in operating TANF programs which do not believe the current set-up allows them to do so. They want to exercise their sovereignty and adapt their program to better fit the needs of their people. We should help them do so. To that end, I proposed creating a new grant fund to improve tribal governmental capacity. We have funded State administrative capacity for decades, helping states buy computer systems and train workers. We should do the same for tribal human services administration. Under this bill, a tribe which wants to operate TANF but needs to upgrade its computers to do it could receive the funding it needs, which will enable it to take over TANF.

Third, there are some tribes not interested in running a TANF program or a long time from being able to do it. Their low-income families will continue to receive assistance from State programs. I have included provisions to facilitate State-tribe dialogue in these cases so that the state can better understand the unique circumstances of each Indian reservation. We must ensure all Indian families are able to get help when they need it.

Finally, there is the all-important issue of economic development. A General Accounting Office review of Census Bureau data found that 25 of the 26 counties in the U.S. with a majority of American Indians had poverty rates "significantly" higher than average. Welfare reform is about moving people to work. On most of our Indian reservations there is simply far too little work to be had. Like everyone else, Indians want to work. We need to do better in giving them the opportunity.

This legislation provides tribes with an expanded authority to issue bonds, which will encourage additional economic activity on reservations, such as housing construction. This means more jobs, as well as a better quality of life. It also includes grants to help tribes improve their own economic development strategies. Tribes with uniform commercial codes and effective microenterprise programs can see more business activity on their lands. This bill helps tribes helps themselves. We need to let Indians find their own way to prosperity, not impose top-down strategies. But we must make sure they have the tools to get there.

This is an important bill. It includes other key provisions. One is a fine bill originally introduced by Senators DASCHLE and MCCAIN to allow tribes to receive direct Federal reimbursement for operating foster care programs. Another provision funds research on tribal welfare reform programs so we can learn what works as well as providing funds for "peer-learning" so that tribes can learn from one another. I am a strong supporter of welfare reform. We need to make sure it works for everyone. This bill does not.

I ask unanimous consent that a summary of the legislation be printed in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

THE AMERICAN INDIAN WELFARE REFORM ACT OF 2002—SUMMARY

I. FINDINGS

The Federal Government bears a unique trust responsibility for American Indians. Despite this responsibility, Indians remain remarkably impoverished. According to the Census Bureau, 25.9 percent of American Indians live in poverty, more than twice the national poverty rate. The average household income for Indians in 2000 was only 75 percent of that of the rest of Americans. In some States with substantial Indian populations the welfare caseload has become increasingly Indian because it has been harder for Indians to leave welfare for work. A General Accounting Office review of Census Bureau data found that 25 of the 26 counties in the U.S. with a majority of American Indians had poverty rates "significantly" higher than average. Further, many Indian tribes are located in isolated rural areas, far from economic opportunity. Welfare reform has not brought enough change to Indian Country.

II. THE TRIBAL TANF IMPROVEMENT FUND

The 1996 welfare reform law permits tribes to opt to operate their own Temporary Assistance for Needy Families, TANF, programs. A new Tribal TANF Improvement Fund of $500 million, to be available for five years, would be created to build upon these programs and allow more tribes to start them. It would have four parts:

Tribal Capacity Grants.—State governments have benefitted from decades of federal investment in their administrative capacity, particularly in their information management systems. $225 million of the Fund would be reserved for grants to improve tribal human services program infrastructure, with a priority for management information systems and training. Tribes applying to operate TANF would be given priority. Tribes already operating TANF or applying to operate IV–E foster care programs with direct federal funding would also be eligible for grants. HHS would be required to assure that tribes of all sizes received funding and to maximize the number of tribes which receive funding. Tribes would be eligible for one grant per year.

Adjusted Tribal TANF Grants.—Tribes which take over operation of TANF often experience significant increases in caseload as poor families apply for help for the first time because they are more comfortable asking assistance from the tribe or simply because they are more able to access services. Yet tribal TANF allocations are based on estimates of Indians served by state programs in 1994, which can leave the tribe facing funding levels which are too low. To better support families in tribal TANF programs, $140 million of the fund would be reserved for grants to tribal TANF programs where the tribe can demonstrate it has a significantly higher true caseload than originally estimated. Tribes with cash assistance caseloads two years after beginning operation of a TANF no program which are 20 percent higher than originally estimated would be eligible for additional funding. The funds would be allocated proportionate to a tribe's size and service population as well as the caseload increase, on the basis of a formula to be determined by HHS in consultation with tribes. The funding level would be $35 million per year, from FY 2004–2007.

Tribal TANF MOE Incentive.—A key factor in tribes being able to operate TANF programs has been the willingness and ability of states to contribute funding as part of the broader state maintenance of effort, MOE, requirement. To encourage states to do this, up to an additional $120 million would be available for "rebates" of TANF funds to states which provide MOE support to tribal TANF programs. For each $1 in MOE funds provided, the federal government would provide an additional 30 cents in TANF funding to the state. If funding is insufficient, HHS would provide pro-rata funding to ensure each state contributing MOE receives a share of the incentive funds.

Technical Assistance.—HHS would receive $15 million to provide technical assistance to tribes. At least $5 million on these funds would be reserved to support peer-learning programs among tribal administrators and at least $7.5 million would be reserved for grants to tribes to conduct feasibility studies of their capacity to operate TANF.

III. TRIBAL TANF HIGH PERFORMANCE FUND AND CONTINGENCY FUND ACCESS

There are separate sources of funding within TANF that tribes do not have the ability to access. To better support tribal TANF programs, three percent of the current TANF "high performance" bonus, or $6 million/year, would be reserved for distribution to tribal TANF programs. The criteria would be determined by HHS through consultation with tribes, but should involve effectiveness in moving TANF recipients into employment and self-sufficiency. In addition, $25 million of the $2 billion TANF Contingency fund would be reserved for tribal TANF programs operating in situations of increased economic hardship. The criteria for tribal access to the Contingency Fund would also be determined by HHS through consultation with the tribes, but would include a worsening economic condition and loss of reservation employers. In addition, current restrictions on the use of "carryover" TANF funds would be eliminated, permitting tribes to spend prior year TANF funds with just as much flexibility as current year TANF funds.

IV. ECONOMIC DEVELOPMENT

There are three elements in the bill to stimulate more economic activity on economically-depressed reservations.

Expanded Tribal Authority To Issue Tax-Exempt Private Activity Bonds.—Currently, tribes have a limited authority to issue private activity bonds for "essential" governmental functions and for certain manufacturing-related purposes. This provision would allow bonds to be used for residential rental properties and qualified mortgage bonds, spurring construction. In addition, tribes could allocate authority for financing businesses that would qualify as enterprise zone businesses if the reservation were a zone. All property financed would have to be on the reservation of the issuing tribal government and qualified tribal governments would have to have an unemployment rate of at least 20 percent. Casinos and certain other forms of businesses could not be financed by the bonds. The authority would be for calendar years 2003–2007, and up to $10 million total would be available for each qualifying tribe.

Tribal Development Grants.—A key part of tribal economic development is the investment climate on the reservation. Tribes with clear legal codes and which encourage microenterprise activities are more likely to generate economic growth. To facilitate this, the Administration for Native Americans within HHS would receive $50 million to distribute in grants to tribes, tribal organizations and non-profit organizations to provide technical assistance to tribes in the areas of: development and improvement of uniform commercial codes; creating or expanding small business or micro-enterprise programs; development and improvement of tort liability codes; creating or expanding tribal marketing efforts; for-profit collaborative business networks; and telecommunications.

Job Access and Reverse Commute Grants.—A lack of transportation often hinders tribal economic development. To help address this need, tribes would be made directly eligible to receive Job Access and Reverse Commute grants from the federal Department of Transportation, which would permit tribes to pursue innovative TANF strategies around transportation. A tribal set-aside of 3 percent would be established in the program. Matching funds could be provided by tribes on an in-kind basis or with other federal funds, such as TANF.

V. TRIBAL JOB TRAINING PROGRAMS

There are currently two tribal job training programs, the NEW program and Welfare-to-Work grantees. To simplify and better co-ordinate programs, a new Tribal Employment Services Program, TESP, would be created in the Department of Labor by combining the two programs. It would be funded at $37 million annually and distributed to current Tribal NEW and Welfare-to-Work grantees as well as new applicants. TESP funds could be used for employment training efforts for those on, or at-risk of being on, public assistance. Tribes could also use the funds to assist non-custodial parents of children on, or at risk of being on, public assistance. To encourage state-tribal partnerships, TANF funds transferred to tribal TESP programs would be governed by TESP rules, not TANF rules. The bill also clarifies that the single plan, single budget, and single reporting requirements of PL 102–477 should be respected.

VI. TRIBAL CHILD CARE

The availability and quality of child care is basic to the success of welfare reform. Tribal welfare reform efforts are no exception. The tribal set-aside within the Child Care Development Block Grant, CCDBG, would be increased to 5 percent to better support tribal welfare reform programs. HHS would be required to go through a negotiated rulemaking process, in consultation with tribal representatives, to determine an equitable allocation of funds among tribes. In addition, each tribe receiving CCDBG funding would develop their own health and safety standards, subject to approval of HHS. Tribal child care programs would have additional authority to use funds for construction and renovation.

VII. EQUITABLE ACCESS

Many American Indians are—and will continue to be—served by state TANF programs. States will be required to consult with tribes within their borders on TANF state plans. Under current law, States are required to provide "equitable access" to services for Indians. State and tribal TANF plans would be required to describe how "equitable access" is provided to encourage better state-tribal co-operation. HHS would also be required to include in the annual TANF report to Congress state-specific information on the demographics and case load characteristics of Indians served by state TANF programs.

In addition, HHS would be required to convene a new advisory committee on the status of non-reservation Indians. Too little is known about how these Indians are faring. The committee is to make recommendations for ensuring these Indians receive appropriate assistance. The committee would include Federal, State, and tribal representatives as well as representatives of Indians not residing on reservations. A majority of those on the committee should be representatives of Indians not residing on reservations. GAO would also be required to conduct a study of the demographics of Indians not residing on reservations, including economic and health information, as well as reviewing their access to public benefits.

VIII. JOBLESSNESS

As acknowledged by the 1996 welfare law, the federal time limit on assistance is not an appropriate policy on Indian reservations with severe unemployment. This provision would be adjusted so that the time limit will not apply during months where the joblessness is above 20 percent, provided that TANF recipients are not in sanction status. In addition, in these areas of high joblessness, states would have flexibility to define work activities required for TANF participants, provided the recipient is participating in activities in accordance with an Individual Responsibility Plan and the state has included information in its state plan describing its policies in Indian Country areas of high joblessness. Tribal TANF programs already have flexibility in work activity definition.

IX. ALASKA PROVISIONS

The 1996 provision limits the ability of tribes in Alaska to design and operate programs. These provisions involving differential treatment for Alaskan Natives, such as those requiring tribal TANF programs to be "comparable" to the state program, would be removed.

X. TRIBAL FOSTER CARE PROGRAMS

Due to a long-standing oversight, tribes are not allowed to receive direct federal reimbursement when they operate foster care programs to take care of abused and neglected children. The provisions of S. 550, the Daschle-McCain legislation to rectify this oversight and allow tribes to receive direct federal funding to operate foster care programs, are included.

XI. FOOD STAMPS, MEDICAID, AND SCHIP

Tribes operating TANF programs would be given clear authority to perform eligibility determination for Food Stamps, Medicaid, and SCHIP. Quality control measures in each program would apply to tribes making such decisions, although states and tribes may negotiate separate agreements on these measures.

XII. CHILD SUPPORT ENFORCEMENT

HHS would be required to promulgate final regulations concerning tribal child support programs within one year of enactment.

XIII. SOCIAL SERVICES BLOCK GRANT, SSBG

When funding for SSBG exceeds $2.4 billion in a year, $10 million plus 2 percent of all funds beyond $2.4 billion is reserved for tribes. All tribes operating social service programs would be eligible for a share. HHS is required to develop a distribution formula through a consultation process with the tribes.

XIV. RESEARCH

$2 million would be provided to HHS for research on tribal welfare programs and efforts to reduce poverty among American Indians in general. To expend the funds, HHS would first have to issue a planned course of research and consultation with the tribes. Research funding applicants which propose to include tribal governments and tribal colleges in their work would have priority.

XV. FAITH-BASED INITIATIVE

The HHS Office of Faith-Based and Community Initiatives would be required to convene an advisory committee of Indians expert in social services and the spiritual aspects of traditional Indian cultures. This committee shall issue a report within 18 months of enactment with "best practices" advice for tribal and state TANF administrators.

By Ms. STABENOW (for herself, Mr. DASCHLE, Mr. MILLER, Mr. DURBIN, Mrs. CARNAHAN, and Mr. WELLSTONE):

S. 2486. A bill to amend the Internal Revenue Code of 1986 to limit the deduction for advertising of FDA approved prescription drugs by the manufacturer of such drugs to the level of such manufacturer's research and development expenditures, and for other purposes; to the Committee on Finance.

Ms. STABENOW. Mr. President, I rise to introduce the Fair Advertising and Increased Research Act, the FAIR Act. The FAIR Act is designed to lower prescription drug prices by limiting taxpayer subsidies to pharmaceutical companies for advertising to those for research and development. I am pleased to be joined by my colleagues, Senators DASCHLE, MILLER, DURBIN, CARNAHAN, and WELLSTONE.

American taxpayers contribute about $16 billion a year to drug research through the National Institutes of Health. But what do they get for their investment? They get the highest drug prices in the world.

At the same time, drug companies spend nearly $16 billion a year on advertising, marketing and promotion of prescription drugs. What does this mean for Americans? It means life-saving drugs become unaffordable. And unaffordable means unavailable or it means making cruel choices. For seniors it can mean choosing between food and medicine.

We need to do something to address excessive advertising that leads to higher and higher prescription drug prices. The FAIR Act will help do so. Simply, it will limit pharmaceutical companies' deduction of annual expenditures for advertising, promoting or marketing—in any medium—of any Food and Drug Administration approved prescription drug to the amount of research and development expenditures in any taxable year. For example, if a company spends $110 million on advertising, promoting or marketing FDA approved prescription drugs and but spends only $100 million on research and development in one year, the company would not be able to deduct $10 million of advertising expenses in that year. Any savings resulting from this legislation will be credited to the Medicare Trust Fund.

This is necessary because recent evidence shows that advertising, marketing and promotion of prescription drugs is out of control. According to an analysis of company earnings reports, the top 11 pharmaceutical spend 30 percent of their revenues on advertising, marketing, promotion, and administration and only 12 percent on research and development. Furthermore, pharmaceutical companies have dramatically increased their direct-to-consumer advertising by 300 percent from 1996 to 2000. Direct to consumer advertising includes all of those television, radio and print ads you see and hear daily.

I would like to provide one example of excessive advertising to demonstrate the need of this legislation. In the year 2000, Merck spent $160 million advertising Vioxx, a drug to treat arthritis. This is more than PepsiCo spent on promoting Pepsi—$125 million—and more than Anheuser-Busch allocated to get the American people to buy Budweiser—$136 million.

This bill does not prevent the pharmaceutical companies from advertising as much as they want. Under our Constitution, they are free to do so. All we are seeking to do is limit how much the taxpayers should subsidize this advertising. We think the logical limit should be the amount that companies spend on research in a given year.

While there is much compelling evidence that pharmaceutical companies spend more on advertising, marketing, and promotion than research and development, the trade association representing these businesses, PhRMA, claims that they spend more on research than on advertising. If this is true, then the pharmaceutical lobbyists should support this measure because it will not affect them and would only set a reasonable parameter for advertising in the future.

We have to do something about spiraling prescription drug prices. This bill is a step in that direction. It will seek to stop taxpayer subsidies for excessive advertising and lower the price we pay for prescription drugs at our local pharmacy.

I ask unanimous consent that a copy of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2486

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Fair Advertising and Increased Research (FAIR) Act".

SEC. 2. LIMITATION ON TAX DEDUCTIONS FOR ADVERTISING BY FDA PRESCRIPTION DRUG MANUFACTURERS.

(a) IN GENERAL.—Part IX of subchapter B of chapter 1 of subtitle A of the Internal Revenue Code of 1986 (relating to items not deductible) is amended by adding at the end the following:

"SEC. 280I. LIMITATION ON TAX DEDUCTIONS FOR ADVERTISING BY FDA PRESCRIPTION DRUG MANUFACTURERS.

"(a) IN GENERAL.—No deduction shall be allowed under this chapter for any taxable year for any expenditure relating to the advertising, promoting, or marketing (in any medium) of any FDA prescription drug manufactured by the taxpayer to the extent the aggregate amount of such expenditures exceeds the taxpayer's aggregate research and development expenditures for such taxable year.

"(b) DEFINITIONS AND SPECIAL RULES.—For purposes of this section—

"(1) FDA PRESCRIPTION DRUGS.—The term 'FDA prescription drug' means any drug or biological approved by the Federal Drug Administration which requires a prescription of a physician for its use by an individual.

"(2) RESEARCH AND DEVELOPMENT EXPENDITURES.—The term 'research and development expenditures' means any expenditures which may be treated as expenses under section 174.

"(3) AGGREGATION RULES.—All members of the same controlled group of corporations (within the meaning of section 52(a)) and all persons under common control (within the meaning of section 52(b)) shall be treated as 1 person.".

(b) CONFORMING AMENDMENT.—The table of sections for such part IX is amended by adding after the item relating to section 280H the following:

"Sec. 280I. Limitation on tax deductions for advertising by FDA prescription drug manufacturers."

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 2001.

(d) TRANSFER TO THE FEDERAL HOSPITAL INSURANCE TRUST FUND OF RESULTING BUDGETARY SAVINGS.—There is appropriated to the Federal Hospital Insurance Trust Fund established under section 1817 of the Social Security Act amounts equal to the increase in Federal revenues resulting from the amendment made by subsection (a). Such appropriated amounts shall be transferred from the general fund of the Treasury on the basis of estimates of such revenues made by the Secretary of the Treasury.

STATEMENTS ON SUBMITTED RESOLUTIONS

SENATE RESOLUTION 263—CONGRATULATING THE REPUBLIC OF CROATIA ON THE 10TH ANNIVERSARY OF ITS RECOGNITION BY THE UNITED STATES

Mr. MCCAIN (for himself, Mr. DURBIN, Mr. LIEBERMAN, Mr. VOINOVICH, and Mr. BIDEN) submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 263

Whereas the United States recognized the Republic of Croatia on April 7, 1992, acknowledging the decision of the Croatian people to live in an independent, democratic, and sovereign country;

Whereas, during the 10 years since the recognition, the people of Croatia have overcome the legacy of the autocratic Tudjman government and persevered in building a democratic society, based on the rule of law, respect for human rights, and a free market economy, as shown by the democratic parliamentary and presidential elections held in January and February 2000;

Whereas the people and Government of the Republic of Croatia share the democratic values of the international community and the responsibility to uphold them, actively promoting democratic values in international organizations;

Whereas Croatia, cooperating on the basis of partnership and solidarity, participates in the Vilnius Group, which is committed to the common values of security and democratic stability through future North Atlantic Treaty Organization membership;

Whereas Croatia is a reliable friend and ally of the United States, actively contributing to the stabilization of South Central Europe; and

Whereas Croatia immediately positioned itself within the antiterrorism coalition of nations, sharing the common interests and values of the free and democratic world: Now, therefore, be it

Resolved, That the Senate—

(1) commends the Republic of Croatia for the significant progress it has made during the past decade, and encourages its democratic orientation and further strengthening

of respect for human rights, the rule of law, and the free market;

(2) supports the Republic of Croatia's aspirations to become a member of the North Atlantic Treaty Organization (NATO), welcomes its commitment to the reforms required for NATO membership, acknowledges the importance of its continued commitment to those reforms, and recommends its acceptance into the Membership Action Plan at the NATO Ministerial in Reykjavik, Iceland in May 2002;

(3) encourages Croatia's continued contributions in bringing peace, stability, and prosperity to the region of South Central Europe, including continuing its cooperation with the International Criminal Tribunal for the former Yugoslavia; and

(4) recognizes the important role of the Croatian-American community in supporting the strengthening of bilateral relations between the United States and the Republic of Croatia.

SENATE RESOLUTION 264—EXPRESSING THE SENSE OF THE SENATE THAT SMALL BUSINESS PARTICIPATION IS VITAL TO THE DEFENSE OF OUR NATION, AND THAT FEDERAL, STATE, AND LOCAL GOVERNMENTS SHOULD AGGRESSIVELY SEEK OUT AND PURCHASE INNOVATIVE TECHNOLOGIES AND SERVICES FROM AMERICAN SMALL BUSINESSES TO HELP IN HOMELAND DEFENSE AND THE FIGHT AGAINST TERRORISM

Mr. KERRY (for himself and Mr. BOND) submitted the following resolution; which was referred to the Committee on Small Business and Entrepreneurship:

S. RES. 264

Whereas on September 11, 2001, the people of the United States were subject to the worst terrorist attack in American history;

Whereas in October 2001, the Pentagon's Technical Support Working Group, which is responsible for seeking new technologies to assist the military, sent an urgent plea, seeking ideas on how to fight terrorism;

Whereas in just 2 months, over 12,500 ideas were submitted to the Technical Support Working Group, most of them from small businesses;

Whereas small businesses remain the most innovative sector of the United States economy, accounting for the vast majority of new product ideas and technological innovations; and

Whereas despite their achievements, small businesses often have difficulty marketing and supplying goods and services to Federal, State, and local governments: Now, therefore, be it

Resolved, That it is the sense of the Senate that—

(1) small business participation is vital to the defense of the United States and should play an active role in assisting the United States military, Federal intelligence and law enforcement agencies, and State and local police forces to combat terrorism through the design and development of innovative products; and

(2) Federal, State, and local governments should aggressively seek out and purchase innovative technologies and services from, and promote research opportunities for, American small businesses to help in homeland defense and the fight against terrorism.

Mr. KERRY. Mr. President, I am pleased today to submit a Resolution expressing the sense of the Senate that small business participation is vital to the defense of our Nation, and that Federal, State, and local governments should aggressively seek out and purchase innovative technologies and services from American small businesses to help in homeland defense and the fight against terrorism.

Since the events of September 11, the people of our Nation have come together in many ways to help protect our land and its citizens. Whether it is the high number of individuals signing up to become Sky Marshals, fighter pilots pulling letters of resignation and staying in the military, expressions of pride through the display of the American flag or other patriot memorabilia, or the desire of innovative small businesses to sell products to the Federal Government for the fight against terrorism or for homeland defense, the ground swell of patriotism has been truly uplifting.

But today, I want to focus the attention of my colleagues on the contributions being made specifically by our small businesses. Throughout the years, small businesses have also heard the call to arms and to defend the nation, and have responded through the development of innovative products to protect our Nation.

Whether it's a need for a new type of night vision scope for a lonely sniper in the field, lighter materials for a Marine's backpack, more reliable field communications gear, or nonlethal weaponry, America's small businesses have heard the call and met the challenge.

Fortunately, our government has recognized the need to promote a diverse defense industrial base, and since World War II, the Federal Government has actively sought to grow and maintain a thriving small business sector. And like many policies designed to promote defense, government policy to foster small business creation and growth has turned out to be a great boon for the U.S. economy. Today, small businesses represent more than 99 percent of all employers, employ 51 percent of private sector workers, account for 96 percent of all exporters of goods, and provide 75 percent of net new jobs. Additionally, small businesses are more adaptable, more innovative and more likely to retain and hire employees during an economic downturn than their larger brethren.

Our government's commitment to purchasing goods and services from small businesses is a key element in creating a positive environment for small business creation and growth. It results in more competition and increased productivity, which leads to lower prices and new innovations.

Yet with all of these positive elements, today, we are faced with a unique challenge. Budgetary pressures in the Federal Government have resulted in demands for faster and cheaper purchases of goods and services. Federal procurement personnel have retired and not been replaced, government streamlining has hurt competition by eliminating or severely reducing the array of small business suppliers in the Federal procurement arena, and contract bundling has made it increasingly more difficult for small businesses to compete for government contracts.

That is why, as our Nation looks for new technologies to promote homeland defense and fight terrorism, small businesses should play an active role.

I would like to commend the Pentagon's Technical Support Working Group, which is responsible for seeking new technologies to assist the military, for sending an urgent plea seeking ideas on how to fight terrorism. America's small businesses responded, and in just two months, over 12,500 ideas were submitted to the Technical Support Working Group, most of them from small businesses.

This not only demonstrates the commitment of America's small businesses and demonstrates their ability to be innovative, it clearly shows that when the Federal Government calls for action, small businesses respond.

The Resolution I am introducing today, along with the support of Senator BOND, the ranking member of the Committee on Small Business and Entrepreneurship, which I chair, seeks to encourage Federal procurement officials to seek out and purchase innovative technologies and services from, and promote research opportunities for, American small businesses to help in homeland defense and the fight against terrorism.

This Resolution is a precursor to the Small Business Homeland Defense Exposition that Senator BOND and I are jointly sponsoring, which will take place this July here on Capitol Hill. At the Expo, a selection of small businesses will help send the message to Federal officials that they should look to small businesses for true innovations that will help us win the war against terrorism. The Expo will showcase high-tech, innovative products that have been developed by our nation's small businesses.

For the last month, Senator BOND and I have been soliciting small business homeland defense nominees from our colleagues, so that we can select truly unique products for the Expo. As expected, the response has been enthusiastic and I would encourage all of my colleagues to attend this event so that they may see and try these products. My only regret is that we do not have the space available to allow every small business to participate. However, every nominee will be included in our event book highlighting these innovative small businesses.

I would like to conclude by once again stressing the importance of our Nation's small businesses, both to our economic security and our national security. Supporting small businesses is supporting America.

I urge all of my colleagues to cosponsor this Resolution.

SENATE RESOLUTION 265—RECOGNIZING THE ELLIS ISLAND MEDAL OF HONOR AND COMMENDING THE NATIONAL ETHNIC COALITION OF ORGANIZATIONS

Mrs. CLINTON submitted the following resolution; which was referred to the Committee on the Judiciary:

S. 265

Whereas the Ellis Island Medal of Honor, established by the National Ethnic Coalition of Organizations in 1986, pays tribute to individuals of various ethnic origins who have distinguished themselves through their contributions to the United States;

Whereas the Ellis Island Medal of Honor has been awarded on a bipartisan basis to 6 Presidents and numerous Representatives and Senators;

Whereas the National Ethnic Coalition of Organizations is the largest organization of its kind in the United States, representing more than 5,000,000 family members and serving as an umbrella group for more than 250 organizations that span the spectrum of ethnic heritage, culture, and religion;

Whereas the mandate of the National Ethnic Coalition of Organizations is to preserve ethnic diversity, promote equality and tolerance, combat injustice, and bring about harmony and unity among all peoples;

Whereas the Ellis Island Medal of Honor is named for the gateway through which more than 12,000,000 immigrants passed in their quest for freedom of speech, freedom of religion, and economic opportunity;

Whereas the Ellis Island Medal of Honor celebrates the richness and diversity of American life by honoring not only individuals, but the pluralism and democracy that have enabled the Nation's ethnic groups to maintain their identities while becoming integral parts of the American way of life;

Whereas during the 15-year history of the Ellis Island Medal of Honor, more than 1,500 individuals from scores of different ethnic groups have received the Medal, and more than 5,000 individuals are nominated each year for the Medal; and

Whereas at the 2002 Ellis Island Medal of Honor ceremony in New York City, individuals from different ethnic groups will be honored for their contributions to the rescue and recovery efforts of September 11, 2001, the war against terrorism, and the enhancement of the Nation's homeland security: Now, therefore, be it

Resolved, That the Senate—

(1) recognizes the Ellis Island Medal of Honor for acknowledging individuals who live exemplary lives as Americans while preserving the values of their particular ethnic groups; and

(2) commends the National Ethnic Coalition of Organizations for its—

(A) sponsorship of the Ellis Island Medal of Honor; and

(B) ongoing work to promote harmony and understanding between groups.

AMENDMENTS SUBMITTED AND PROPOSED

SA 3394. Mr. KENNEDY (for himself and Mrs. FEINSTEIN) submitted an amendment intended to be proposed by him to the bill H.R. 3009, to extend the Andean Trade Preference Act, to grant additional trade benefits under that Act, and for other purposes; which was ordered to lie on the table.

SA 3395. Mr. KENNEDY (for himself and Mr. DEWINE) submitted an amendment intended to be proposed by him to the bill H.R. 3009, supra; which was ordered to lie on the table.

SA 3396. Mr. DAYTON (for himself, Mr. CRAIG, Mr. DURBIN, Mr. SHELBY, Mr. KERRY, Mr. HELMS, Mr. WELLSTONE, Ms. COLLINS, Ms. MIKULSKI, Mr. SMITH of New Hampshire, Mr. DORGAN, Mr. ALLEN, Mr. HOLLINGS, Mr. WARNER, Mr. LEVIN, Mr. CRAPO, Mr. ROCKEFELLER, Mr. ENZI, Mr. FEINGOLD, Mr. SPECTER, Mr. JOHNSON, Mr. CAMPBELL, Ms. STABENOW, Mr. SESSIONS, Mrs. CLINTON, and Mr. BURNS) submitted an amendment intended to be proposed to amendment SA 3386 proposed by Mr. DASCHLE to the bill (H.R. 3009) supra; which was ordered to lie on the table.

SA 3397. Mr. BAYH (for himself, Mr. DURBIN, and Mrs. CARNAHAN) submitted an amendment intended to be proposed to amendment SA 3386 proposed by Mr. DASCHLE to the bill (H.R. 3009) supra; which was ordered to lie on the table.

TEXT OF AMENDMENTS

SA 3394. Mr. KENNEDY (for himself and Mrs. FEINSTEIN) submitted an amendment intended to be proposed by him to the bill H.R. 3009, to extend the Andean Trade Preference Act, to grant additional trade benefits under that Act, and for other purposes; which was ordered to lie on the table; as follows:

Beginning on page 248, strike line 21 and all that follows through page 249, line 4, and insert the following:

(v) providing strong enforcement of intellectual property rights, including through accessible, expeditious, and effective civil, administrative, and criminal enforcement mechanisms;

(B) to secure fair, equitable, and non-discriminatory market access opportunities for United States persons that rely upon intellectual property protection; and

(C) to respect the Declaration on the TRIPS Agreement and Public Health, adopted by the World Trade Organization at the Fourth Ministerial Conference at Doha, Qatar on November 14, 2001.

SA 3395. Mr. KENNEDY (for himself and Mr. DEWINE) submitted an amendment intended to be proposed by him to the bill H.R. 3009, to extend the Andean Trade Preference Act, to grant additional trade benefits under that Act, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following new title:

TITLE —BUSINESS INCUBATION

SEC. 01. SHORT TITLE; FINDINGS.

(a) SHORT TITLE.—This title may be cited as the "Linking Educators and Developing Entrepreneurs for Reaching Success Act of 2002".

(b) FINDINGS.—Congress makes the following findings:

(1) Business incubators housed in academic settings provide unique educational opportunities for students, provide entrepreneurs with enhanced access to a skilled workforce, and bring a wealth of resources to business, academia, and communities.

(2) Academic affiliated incubators bridge the missions of academic institutions by bringing together education, economic development, and technology commercialization efforts.

(3) Studies have shown that incubator tenant companies have an average success rate of 87 percent, and 90 percent for technology-based incubator tenant companies. These success rates are dramatically higher than the success rates for companies in the general economy.

(4) Incubator companies are also more likely to remain in the same communities as they grow and to provide high paying jobs and benefits to their employees.

(5) Business incubators help academic institutions contribute to local goals of sustaining economic development in their surrounding communities.

(6) Education in entrepreneurship and other business formation skills is essential to business success and sustainable economic development.

(7) Studies have shown that every 50 jobs created by a business in an incubator generate another 25 jobs in that incubator's community.

(8) Business incubators are of particular value in communities that have seen significant job displacement due to overwhelming competition from exports.

SEC. 02. PURPOSE.

The purpose of this title is to encourage entrepreneurship by increasing the role for academia in entrepreneurship by providing space and expertise in an academic setting to house and support new and emerging small businesses.

SEC. 03. DEFINITIONS.

In this title:

(1) DEGREE-GRANTING INSTITUTION.—The term "degree-granting institution" means an institution of higher education, as defined in section 101 of the Higher Education Act of 1965 (20 U.S.C. 1001), that awards an associate or baccalaureate degree.

(2) INCUBATOR.—The term "incubator" means an entity affiliated with or housed in a degree-granting institution that provides space and coordinated and specialized services to entrepreneurial businesses which meet selected criteria during the businesses' startup phase, including providing services such as shared office space and services, access to equipment, access to telecommunications and technology services, flexible leases, specialized management assistance, access to financing, and other coordinated business or technical support services.

(3) SECRETARY.—The term "Secretary" means the Secretary of Education.

SEC. 04. PROGRAM AUTHORIZED.

(a) IN GENERAL.—The Secretary is authorized to support the establishment and development of incubators.

(b) ALLOCATION OF FUNDS.—From the amount appropriated under section 09, the Secretary—

(1) shall reserve 80 percent of the amount to—

(A) make awards, on a competitive basis, in amounts of $500,000 to $750,000, to help acquire or renovate space for incubators; and

(B) make awards, on a competitive basis, in amounts of $50,000 to $150,000, for—

(i) developing curricula;

(ii) providing services, including—

(I) preparing corporate charters, partnership agreements, and basic contracts;

(II) assisting with patents, trademarks, and copyrights; and

(III) providing technology acquisition services; or

(iii) providing programming for entrepreneurs housed in an incubator;

(2) shall reserve 10 percent of the amount to make awards, on a competitive basis, in amounts of $50,000 to $150,000, for feasibility studies for determining the need for or siting of incubators; and

(3) shall reserve 10 percent for research regarding best practices for incubator programs, including the development of a benchmarking system based on uniform measures, and for dissemination of information regarding such practices.

(c) CONTRACTS.—The Secretary is authorized to contract with organizations with expertise in business incubation practices for the purposes of carrying out subsection (b)(3).

(d) RECIPIENTS.—The Secretary shall make an award—

(1) described in subsection (b)(1) to a nonprofit entity that has a strong affiliation with a degree-granting institution and manages or provides technical assistance to the degree-granting institution's affiliated incubator, or if no nonprofit entity manages or provides technical assistance to the incubator, to the degree-granting institution managing the incubator; or

(2) described in subsection (b)(2) to a degree-granting institution, or a nonprofit municipality, city, township, or community development organization.

SEC. 05. USES OF FUNDS.

Funds awarded under section 04(b)(1)(B) may be used for—

(1) curriculum, training, or technical assistance developed by academic faculty with participation from entrepreneurship experts and local government leaders;

(2) programming that contributes to a coordinated set of business assistance tools, such as developing management teams, providing workforce development, forming strategic alliances, developing capital formation networks, and developing customized plans to help entrepreneurs meet the challenges of doing business in their specific communities; or

(3) hiring staff to coordinate the activities described in paragraph (1) or (2) or for curriculum development.

SEC. 06. APPLICATIONS.

(a) IN GENERAL.—Each entity desiring assistance under this title shall submit an application to the Secretary at such time, in such manner, and accompanied by such information as the Secretary may require.

(b) CONTENTS.—Each application shall contain an assurance that the activities to be assisted—

(1) have the support of the municipality, city, or township in which the incubator is housed or proposed to be housed; and

(2) are consistent with the local economic development or strategic master plan.

(c) PRIORITY.—The Secretary shall give priority to funding applications under this title that provide strong educational opportunities to students in entrepreneurship, and that require significant collaboration between businesses, academia, and local government and economic development leaders.

(d) CONSIDERATION.—

(1) IN GENERAL.—The Secretary may give consideration to funding applications under this title that support—

(A) the building of new incubators;

(B) incubators located in economically distressed areas;

(C) incubators with successful graduation rates for tenant companies;

(D) incubators that have shown demonstrable economic benefits in their surrounding communities;

(E) incubators that work with faculty entrepreneurs or university-based research; or

(F) incubators located in rural areas, inner city areas, Indian reservations or pueblos, where the presence of an incubator may enhance and diversify the area's economy through expanded technology commercialization.

(2) DEFINITION OF CONSIDERATION.—In this subsection the term "consideration" means thought and does not mean priority.

SEC. 07. MATCHING FUNDS.

Each entity receiving Federal assistance under section 04(b)(1) shall contribute matching funds, in an amount equal to the amount of Federal assistance received under this title, toward the costs of the activities assisted under this title. The non-Federal share required under this section may be provided in the form of in-kind contributions.

SEC. 08. REPORT.

The Secretary, at the end of the third year for which assistance is provided under this title, shall prepare and submit to Congress a report that—

(1) describes the most effective or innovative additions to curricula developed under this title;

(2) contains a comparison of small business survival rates for small businesses that started up in incubators versus small businesses that did not so start;

(3) describes factors leading to the success of incubator businesses (if any);

(4) describes the best role for degree-granting institutions in business incubation; and

(5) contains a comparison of academic-affiliated incubators of specific missions and ages supported under this title with incubators with similar missions and ages that are not supported under this title.

SEC. 09. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated to carry out this title $20,000,000 for each of the fiscal years 2003, 2004, and 2005.

SA 3396. Mr. DAYTON (for himself, Mr. CRAIG, Mr. DURBIN, Mr. SHELBY, Mr. KERRY, Mr. HELMS, Mr. WELLSTONE, Ms. COLLINS, Ms. MIKULSKI, Mr. SMITH of New Hampshire, Mr. DORGAN, Mr. ALLEN, Mr. HOLLINGS, Mr. WARNER, Mr. LEVIN, Mr. CRAPO, Mr. ROCKEFELLER, Mr. ENZI, Mr. FEINGOLD, Mr. SPECTER, Mr. JOHNSON, Mr. CAMPBELL, Ms. STABENOW, Mr. SESSIONS, Mrs. CLINTON, and Mr. BURNS) submitted an amendment to be proposed to amendment SA 3386 proposed by Mr. DASCHLE to the bill (H.R. 3009) to extend the Andean Trade Preference Act, to grant additional trade benefits under that Act, and for other purposes; which was ordered to lie on the table; as follows:

At the end of section 2103(b), add the following:

(4) LIMITATIONS ON TRADE AUTHORITIES PROCEDURES.—

(A) IN GENERAL.—Notwithstanding any other provision of law, the provisions of section 151 of the Trade Act of 1974 (trade authorities procedures) shall not apply to any provision in an implementing bill being considered by the Senate that modifies or amends, or requires a modification of, or an amendment to, any law of the United States that provides safeguards from unfair foreign trade practices to United States businesses or workers, including—

(i) imposition of countervailing and antidumping duties (title VII of the Tariff Act of 1930; 19 U.S.C. 1671 et seq.);

(ii) protection from unfair methods of competition and unfair acts in the importation of articles (section 337 of the Tariff Act of 1930; 19 U.S.C. 1337);

(iii) relief from injury caused by import competition (title II of the Trade Act of 1974; 19 U.S.C. 2251 et seq.);

(iv) relief from unfair trade practices (title III of the Trade Act of 1974; 19 U.S.C. 2411 et seq.); or

(v) national security import restrictions (section 232 of the Trade Expansion Act of 1962; 19 U.S.C. 1862).

(B) POINT OF ORDER IN SENATE.—

(i) IN GENERAL.—When the Senate is considering an implementing bill, upon a point of order being made by any Senator against any part of the implementing bill that contains material in violation of subparagraph (A), and the point of order is sustained by the Presiding Officer, the part of the implementing bill against which the point of order is sustained shall be stricken from the bill.

(ii) WAIVERS AND APPEALS.—

(I) WAIVERS.—Before the Presiding Officer rules on a point of order described in clause (i), any Senator may move to waive the point of order and the motion to waive shall not be subject to amendment. A point of order described in clause (i) is waived only by the affirmative vote of at least three-fifths of the Members of the Senate, duly chosen and sworn.

(II) APPEALS.—After the Presiding Officer rules on a point of order under this subparagraph, any Senator may appeal the ruling of the Presiding Officer on the point of order as it applies to some or all of the provisions on which the Presiding Officer ruled. A ruling of the Presiding Officer on a point of order described in clause (i) is sustained unless at least three-fifths of the Members of the Senate, duly chosen and sworn, vote not to sustain the ruling.

(III) DEBATE.—Debate on a motion to waive under subclause (I) or on an appeal of the ruling of the Presiding Officer under subclause (II) shall be limited to 1 hour. The time shall be equally divided between, and controlled by, the majority leader and the minority leader, or their designees.

SA 3397. Mr. BAYH (for himself, Mr. DURBIN, and Mrs. CARNAHAN) submitted an amendment intended to be proposed to amendment SA 3386 proposed by Mr. DASCHLE to the bill (H.R. 3009) to extend the Andean Trade Preference Act, to grant additional trade benefits under that Act, and for other purposes; which was ordered to lie on the table; as follows:

At the end of title III, add the following:

SEC. 303. COMMUNITY WORKFORCE PARTNERSHIPS.

(a) SHORT TITLE.—This section may be cited as the "Community Workforce Development and Modernization Partnership Act".

(b) GENERAL AUTHORITY.—Title II of the Trade Act of 1974 (19 U.S.C. 2251 et seq.) (as amended by sections 401 and 501) is further amended by inserting after chapter 7 the following:

"CHAPTER 8—COMMUNITY WORKFORCE PARTNERSHIPS

"SEC. 299K. AUTHORIZATION.

"(a) IN GENERAL.—From amounts made available to carry out this chapter, the Secretary of Labor (referred to in this chapter as the 'Secretary'), in consultation with the Secretary of Commerce and the Secretary of Education, shall award grants on a competitive basis to eligible entities described in subsection (b) to assist each entity to—

"(1) help workers improve those job skills that are necessary for employment by businesses in the industry with respect to which the entity was established;

"(2) help dislocated workers find employment; and

"(3) upgrade the operating and competitive capacities of businesses that are members of the entity.

"(b) ELIGIBLE ENTITIES.—An eligible entity described in this subsection is a consortium (either established prior to the date of enactment of the Community Workforce Development and Modernization Partnership Act or established specifically to carry out programs under this chapter) that—

"(1) shall include—

"(A) 2 or more businesses (or nonprofit organizations representing businesses) that are facing similar workforce development or business modernization challenges;

"(B) labor organizations, if the businesses described in subparagraph (A) employ workers who are covered by collective bargaining agreements; and

"(C) 1 or more businesses (or nonprofit organizations that represent businesses) with resources or expertise that can be brought to bear on the workforce development and business modernization challenges referred to in subparagraph (A); and

"(2) may include—

"(A) State governments and units of local government;

"(B) educational institutions;

"(C) labor organizations; or

"(D) nonprofit organizations.

"(c) COMMON GEOGRAPHIC REGION.—To the maximum extent practicable, the organizations that are members of an eligible entity described in subsection (b) shall be located within a single geographic region of the United States.

"(d) PRIORITY CONSIDERATION.—In awarding grants under subsection (a), the Secretary shall give priority consideration to—

"(1) eligible entities that serve dislocated workers or workers who are threatened with becoming totally or partially separated from employment;

"(2) eligible entities that include businesses with fewer than 250 employees; or

"(3) eligible entities from a geographic region in the United States that has been adversely impacted by the movement of manufacturing operations or businesses to other regions or countries, due to corporate restructuring, technological advances, Federal law, international trade, or another factor, as determined by the Secretary.

"(e) APPLICATION.—To be eligible to receive a grant under this section, an entity shall submit an application to the Secretary at such time, in such manner, and containing such information as the Secretary may reasonably require.

"SEC. 299L. PARTNERSHIP ACTIVITIES.

"(a) USE OF GRANT AMOUNTS.—Each eligible entity that receives a grant under section 299K shall use the amount made available through the grant to carry out a program that provides—

"(1) workforce development activities to improve the job skills of individuals who have, are seeking, or have been dislocated from, employment with a business that is a member of that eligible entity, or with a business that is in the industry of a business that is a member of that eligible entity;

"(2) business modernization activities; or

"(3) activities that are—

"(A) workforce investment activities (including such activities carried out through one-stop delivery systems) carried out under subtitle B of title I of the Workforce Investment Act of 1998 (42 U.S.C. 2811 et seq.); or

"(B) activities described in section 25 of the National Institute of Standards and Technology Act (15 U.S.C. 278k).

"(b) ACTIVITIES INCLUDED.—

"(1) WORKFORCE DEVELOPMENT ACTIVITIES.—The workforce development activities referred to in subsection (a)(1) may include activities that—

"(A) develop skill standards and provide training, including—

"(i) assessing the training and job skill needs of the industry involved;

"(ii) developing a sequence of skill standards that are benchmarked to advanced industry practices;

"(iii) developing curricula and training methods;

"(iv) purchasing, leasing, or receiving donations of training equipment;

"(v) identifying and developing the skills of training providers;

"(vi) developing apprenticeship programs; and

"(vii) developing training programs for dislocated workers;

"(B) assist workers in finding new employment; or

"(C) provide supportive services to workers who—

"(i) are participating in a program carried out by the entity under this chapter; and

"(ii) are unable to obtain the supportive services through another program providing the services.

"(2) BUSINESS MODERNIZATION ACTIVITIES.—The business modernization activities referred to in subsection (a)(2) may include activities that upgrade technical or organizational capabilities in conjunction with improving the job skills of workers in a business that is a member of that entity.

"SEC. 299M. SEED GRANTS AND OUTREACH ACTIVITIES.

"(a) SEED GRANTS.—The Secretary may provide technical assistance and award financial assistance (not to exceed $150,000 per award) on such terms and conditions as the Secretary determines to be appropriate—

"(1) to businesses, nonprofit organizations representing businesses, and labor organizations, for the purpose of establishing an eligible entity; and

"(2) to entities described in paragraph (1) and established eligible entities, for the purpose of preparing such application materials as may be required under section 299K(e).

"(b) OUTREACH AND PROMOTIONAL ACTIVITIES.—The Secretary may undertake such outreach and promotional activities as the Secretary determines will best carry out the objectives of this chapter.

"(c) LIMITATIONS ON EXPENDITURES.—The Secretary may not use more than 10 percent of the amount authorized to be appropriated under section 299P to carry out this section.

"SEC. 299N. LIMITATIONS ON FUNDING.

"(a) REQUIREMENT OF MATCHING FUNDS.—The Secretary may not award a grant under this chapter to an eligible entity unless such entity agrees that the entity will make available non-Federal contributions toward the costs of carrying out activities funded by that grant in an amount that is not less than $2 for each $1 of Federal funds made available through the grant.

"(b) IN-KIND CONTRIBUTIONS.—The Secretary—

"(1) shall, in awarding grants under this chapter, give priority consideration to those entities whose members offer in-kind contributions; and

"(2) may not consider any in-kind contribution in lieu of or as any part of the contributions required under subsection (a).

"(c) SENIOR MANAGEMENT TRAINING AND DEVELOPMENT.—An eligible entity may not use any amount made available through a grant awarded under this chapter for training and development activities for senior management, unless that entity certifies to the Secretary that expenditures for the activities are—

"(1) an integral part of a comprehensive modernization plan; or

"(2) dedicated to team building or employee involvement programs.

"(d) PERFORMANCE MEASURES.—Each eligible entity shall, in carrying out the activities referred to in section 299L, provide for development of, and tracking of performance according to, performance outcome measures.

"(e) ADMINISTRATIVE COSTS.—Each eligible entity may use not more than 20 percent of the amount made available to that entity through a grant awarded under this chapter to pay for administrative costs.

"(f) MAXIMUM AMOUNT OF GRANT.—No eligible entity may receive—

"(1) a grant under this chapter in an amount of more than $1,000,000 for any fiscal year; or

"(2) grants under this chapter in any amount for more than 3 fiscal years.

"(g) SUPPORT FOR EXISTING OPERATIONS.—

"(1) IN GENERAL.—In making grants under this chapter, the Secretary may use a portion equal to not more than 50 percent of the funds appropriated to carry out this chapter for a fiscal year, to support the existing training and modernization operations of existing eligible entities.

"(2) ENTITIES.—The Secretary may award a grant to an existing eligible entity for existing training and modernization operations only if the entity—

"(A) currently offers (as of the date of the award of the grant) a combination of training, modernization, and business assistance services;

"(B) targets industries with jobs that traditionally have low wages;

"(C) targets industries that are faced with chronic job loss; and

"(D) has demonstrated success in accomplishing the objectives of activities described in section 299L.

"(3) APPLICATION.—Paragraph (1) shall not apply to support for the expansion of training and modernization operations of existing eligible entities.

"(4) DEFINITIONS.—In this subsection:

"(A) EXISTING TRAINING AND MODERNIZATION ACTIVITY.—The term 'existing training and modernization activity' means a training and modernization activity carried out prior to the date of enactment of the Community Workforce Development and Modernization Partnership Act.

"(B) EXISTING ELIGIBLE ENTITY.—The term 'existing eligible entity' means an eligible entity that was established prior to the date of enactment of the Community Workforce Development and Modernization Partnership Act.

"SEC. 299O. EVALUATION.

"Not later than 3 years after the date of enactment of the Community Workforce Development and Modernization Partnership Act, the Secretary shall prepare and submit to Congress a report on the effectiveness of the activities carried out under this chapter.

"SEC. 299P. AUTHORIZATION OF APPROPRIATIONS.

"There are authorized to be appropriated to carry out this chapter—

"(1) $10,000,000 for fiscal year 2003;

"(2) $15,000,000 for fiscal year 2004;

"(3) $20,000,000 for fiscal year 2005;

"(4) $25,000,000 for fiscal year 2006; and

"(5) $30,000,000 for fiscal year 2007.".

(c) TABLE OF CONTENTS.—The table of contents for the Trade Act of 1974 (19 U.S.C. 2101 et seq.) (as amended in section 701(a)) is further amended by inserting after the items relating to chapter 7 of title II the following:

"CHAPTER 8—COMMUNITY WORKFORCE PARTNERSHIPS

"Sec. 299K. Authorization.
"Sec. 299L. Partnership activities.
"Sec. 299M. Seed grants and outreach activities.
"Sec. 299N. Limitations on funding.
"Sec. 299O. Evaluation.
"Sec. 299P. Authorization of appropriations.".

NOTICES OF HEARINGS/MEETINGS

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. BINGAMAN. Mr. President, I would like to announce for the information of the Senate and the public that a full committee hearing has been scheduled before the Committee on Energy and Natural Resources. The purpose of the hearing is to examine manipulation in Western energy markets during 2000–2001, as revealed recently in documents made available as a result of the ongoing investigation underway at FERC; actions that were taken to mitigate any market manipulation or failures; and further actions that should be taken now and in the future.

The hearing will be held in SD–366 on Wednesday, May 15, at 2:30 p.m.

Those wishing to submit written testimony for the hearing record should send two copies of their testimony to the Committee on Energy and Natural Resources, Attn: Majority Staff, 364 Dirksen Senate Office Building.

For further information, please contact Leon Lowery on 202–224–2209.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON ARMED SERVICES

Mr. HARKIN. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet during the session of the Senate on Wednesday, May 8, 2002, at 2:30 p.m., in closed session to mark up the Department of Defense Authorization Act for Fiscal Year 2003.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

Mr. HARKIN. Mr. President, I ask unanimous consent that the Committee on Banking, Housing, and Urban Affairs be authorized to meet during the session of the Senate on Wednesday, May 8, 2002, at 10 a.m., to conduct a hearing on the nomination of Mr. Anthony Lowe, of Washington, to be Federal Insurance and Mitigation Administrator of the Federal Emergency Management Agency.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. HARKIN. Mr. President, I ask unanimous consent that the Committee on Energy and Natural Resources be authorized to hold a hearing during the session of the Senate on Wednesday, May 8, 2002, at 9:30 a.m., in SD–366.

The purpose of the hearing is to receive testimony on the nomination of Guy F. Caruso to be Administrator of the Energy Information Administration, Department of Energy.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. HARKIN. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be authorized to meet on Wednesday, May 8, 2002, at 9:30 a.m., for the purpose of holding a hearing entitled "Securing our Infrastructure: Private/Public Information Sharing."

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON HEALTH, EDUCATION, LABOR, AND PENSIONS

Mr. HARKIN. Mr. President, I ask unanimous consent that the Committee on Health, Education, Labor, and Pensions be authorized to meet for a hearing on "Closing the Gaps in Hatch-Waxman: Assuring Greater Access to Affordable Pharmaceuticals" during the session of the Senate on Wednesday, May 8, 2002, at 2:30 p.m., in SD–430.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON INDIAN AFFAIRS

Mr. HARKIN. Mr. President, I ask unanimous consent that the Committee on Indian Affairs be authorized to meet on Wednesday, May 8, 2002, at 10 a.m., in room 485 of the Russell Senate Office Building to conduct a Hearing on S. 343, a bill to establish a demonstration project to authorize the integration and coordination of Federal funding dedicated to the community, business, and economic development of Native American communities.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. HARKIN. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet to conduct a hearing on "Reforming the FBI in the 21st Century: Reorganizing and Refocusing The Mission" on Wednesday, May 8, 2002, in Dirksen Room 106 at 2 p.m.

Witness List: The Honorable Larry Thompson, Deputy attorney General, Department of Justice, Washington, DC, and the Honorable Robert S. Mueller III, Director, Federal Bureau of Investigation, Department of Justice, Washington, DC.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INTELLIGENCE

Mr. HARKIN. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet during the session of the Senate on Wednesday, May 8, 2002, at 2:30 p.m., to hold a closed markup on the FY03 Intelligence Authorization bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON EMERGING THREATS

Mr. HARKIN. Mr. President, I ask unanimous consent that the Subcommittees Emerging threats and Capabilities of the Committee on Armed Services be authorized to meet during the session of the Senate on Wednesday, May 8, 2002, at 11:30 a.m. in closed session to mark up the emerging threats and capabilities programs and provisions contained in the Department of Defense Authorization Act for Fiscal Year 2003.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON SCIENCE, TECHNOLOGY, AND SPACE

Mr. HARKIN. Mr. President, I ask unanimous consent that the Subcommittee on Science, Technology, and Space be authorized to meet on Wednesday, May 8, 2002, at 9:30 a.m., on NASA reauthorization.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON SEAPOWER

Mr. HARKIN. Mr. President, I ask unanimous consent that the Subcommittee on Seapower of the Committee on Armed Services be authorized to meet during the session of the Senate on Wednesday, May 8, 2002, at 9 a.m., in closed session to mark up the seapower programs and provisions contained in the Department of Defense Authorization Act for Fiscal Year 2003.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON STRATEGIC

Mr. HARKIN. Mr. President, I ask unanimous consent that the Subcommittee on Strategic of the Committee on Armed Services be authorized to meet during the session of the Senate on Wednesday, May 8, 2002, at 10 a.m., in closed session to mark up the strategic programs and provisions contained in the Department of Defense Authorization Act for Fiscal Year 2003.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON SUPERFUND, TOXICS, RISK AND WASTE MANAGEMENT

Mr. HARKIN. Mr. President, I ask unanimous consent that the Subcommittee on Superfund, Toxics, Risk, and Waste Management be authorized to meet on Wednesday, May 8, 2002, at 1:30 p.m., to hold a hearing to review S. 1850, the Underground Storage Tank Compliance Act of 2001. The hearing will be held in SD–406.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORIZING USE OF CAPITOL GROUNDS FOR NATIONAL PEACE OFFICERS' MEMORIAL SERVICE

Mr. REID. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of H. Con. Res. 347 received from the House, which is at the desk.

The PRESIDING OFFICER. The clerk will report the concurrent resolution by title.

The legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 347) authorizing the use of the Capitol Grounds for the National Peace Officers' Memorial Service.

There being no objection, the Senate proceeded to consider the concurrent resolution.

Mr. REID. I ask unanimous consent that the concurrent resolution be agreed to and the motion to reconsider be laid upon the table, without any intervening action or debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

The concurrent resolution (H. Con. Res. 347) was agreed to.

REMOVAL OF INJUNCTION OF SECRECY—TREATY DOCUMENT 107–6

Mr. REID. Mr. President, as in executive session, I ask unanimous consent that the injunction of secrecy be removed from the following treaty transmitted to the Senate on May 8, 2002, by the President of the United States:

Extradition Treaty with Peru, Treaty Document No. 107–6.

I further ask unanimous consent that the treaty be considered as having been read the first time, that it be referred with accompanying papers to the Committee on Foreign Relations and ordered to be printed, and that the President's message be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The message of the President is as follows:

To the Senate of the United States:

With a view to receiving the advice and consent of the Senate to ratification, I transmit herewith the Extradition Treaty Between the United States of America and the Republic of Peru, signed at Lima on July 26, 2001.

In addition, I transmit for the information of the Senate, the report of the Department of State with respect to the Treaty. As the report explains, the Treaty will not require implementing legislation.

The provisions in this Treaty follow generally the form and content of modern extradition treaties recently concluded by the United States and will replace the outdated extradition treaty in force between the two countries signed in 1899. The Treaty will, upon entry into force, enhance cooperation between the law enforcement communities of the two countries. It will make a significant contribution to international law enforcement efforts against serious offenses, including terrorism, organized crime, and drug-trafficking.

I recommend that the Senate give early and favorable consideration to the Treaty and give its advice and consent to ratification.

GEORGE W. BUSH.
THE WHITE HOUSE, *May 8, 2002.*

UNANIMOUS CONSENT AGREEMENT—EXECUTIVE CALENDAR

Mr. REID. I ask unanimous consent that at 10:30 a.m. on Thursday, May 9, the Senate proceed to executive session to consider en bloc the following nominees: Calendar No. 811, Leonard Davis; Calendar No. 812, Andrew Hanen; Calendar No. 813, Samuel Mays; and Calendar No. 814, Thomas Rose, all four to be United States district judges; that there be 1 hour of debate on the nominations equally divided between the chairman and the ranking member of the Judiciary Committee or their designees; that upon the use or yielding back of time, the Senate vote on confirmation of each nominee; that the motion to reconsider be laid upon the table; that the President be immediately notified of the Senate's action; that any statements thereon be printed in the Record; and that the Senate return to legislative session, without any intervening action or debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. I ask unanimous consent that it be in order to request the yeas and nays on the nominees at this time, with one show of hands.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There appears to be a sufficient second.

The yeas and nays were ordered.

MEASURE READ THE FIRST TIME—S. 2485

Mr. REID. It is my belief that at the desk there is a bill that has been introduced by Senators MCCAIN and GRAMM of Texas.

The PRESIDING OFFICER. That is correct.

Mr. REID. I ask unanimous consent for its first reading.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will read the bill for the first time.

The assistant legislative clerk read as follows:

A bill (S. 2485) entitled the "Andean Trade Promotion and Drug Eradication Act."

Mr. REID. I ask now for its second reading, and I object to that request.

The PRESIDING OFFICER. The objection is heard.

The bill will be read the second time on the next legislative day.

ORDERS FOR THURSDAY, MAY 9, 2002

Mr. REID. Madam President, I ask unanimous consent when the Senate completes its business today, it adjourn until 10 a.m. on Thursday, May 9; that following the prayer and the pledge, the Journal of proceedings be approved to date, the morning hour be deemed expired, the time for the two leaders be reserved for their use later in the day, and the Senate be in a period of morning business until 10:30 a.m., with Senators permitted to speak for up to 10 minutes each, with the time under the control of Senator STABENOW or her designee; further, at 10:30 a.m. the Senate proceed to executive session under the previous order.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADJOURNMENT UNTIL 10 A.M. TOMORROW

Mr. REID. If there is no further business to come before the Senate, I ask that the Senate stand in adjournment under the previous order.

There being no objection, the Senate, at 6:05 p.m., adjourned until Thursday, May 9, at 10 a.m.

NOMINATIONS

Executive nominations received by the Senate May 8, 2002:

DEPARTMENT OF JUSTICE

ANTHONY DICHIO, OF MASSACHUSETTS, TO BE UNITED STATES MARSHAL FOR THE DISTRICT OF MASSACHUSETTS FOR THE TERM OF FOUR YEARS, VICE NANCY J. MCGILLIVRAY-SHAFFER, TERM EXPIRED.

WITHDRAWAL

EXECUTIVE MESSAGE TRANSMITTED BY THE PRESIDENT TO THE SENATE ON MAY 8, 2002, WITHDRAWING FROM FURTHER SENATE CONSIDERATION THE FOLLOWING NOMINATION:

JOSE GERARDO TRONCOSO, OF NEVADA, TO BE UNITED STATES MARSHAL FOR THE DISTRICT OF NEVADA FOR THE TERM OF FOUR YEARS. (REAPPOINTMENT), WHICH WAS SENT TO THE SENATE ON APRIL 16, 2002.

HOUSE OF REPRESENTATIVES—*Wednesday, May 8, 2002*

The House met at 10 a.m. and was called to order by the Speaker pro tempore (Mr. SIMPSON).

DESIGNATION OF THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, DC,
May 8, 2002.

I hereby appoint the Honorable MICHAEL K. SIMPSON to act as Speaker pro tempore on this day.

J. DENNIS HASTERT,
Speaker of the House of Representatives.

PRAYER

The Reverend Tom Mullins, Christ Fellowship, Palm Beach Gardens, Florida, offered the following prayer:

Our Heavenly Father, it is our prayer that You will grant us wisdom today, and You will bless the Members of Congress as they lead our Nation during these challenging times. May we not forget our dependence upon You, O Mighty God. Your hand has been with us through the history of our great Nation.

As President Lincoln declared, "It is the duty of nations, as well as men, to owe their dependence upon the overwhelming power of God, and to recognize the sublime truth announced in the Holy Scriptures and proven by all history, that those nations only are blessed whose God is the Lord."

May You continue to bless us and guide us. Be with our President and Members of Congress, our military personnel fighting in the war on terrorism. We thank You for Your strength and for Your wisdom, and we recognize today that these blessings come from You.

In Your Holy Name. Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER pro tempore. Will the gentleman from Illinois (Mr. LAHOOD) come forward and lead the House in the Pledge of Allegiance.

Mr. LAHOOD led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Monahan, one of its clerks, announced that the Senate has passed without amendment bills of the House of the following titles:

H.R. 2048. An act to require a report on the operations of the State Justice Institute.

H.R. 2305. An act to authorize certain federal officials with responsibility for the administration of the criminal justice system of the District of Columbia to serve on and participate in the activities of the District of Columbia Criminal Justice Coordinating Council, and for other purposes.

The message also announced that the Senate has passed bills and a concurrent resolution of the following titles in which the concurrence of the House is requested:

S. 410. An act to amend the Violence Against Women Act of 2000 by expanding the legal assistance for victims of violence grant program to include legal assistance for victims of dating violence.

S. 2431. An act to amend the Omnibus Crime Control and Safe Streets Act of 1968 to ensure that chaplains killed in the line of duty receive public safety officer death benefits.

S. Con. Res. 108. Concurrent resolution to designate May 4–12, 2002, as "National Tourism Week".

PASTOR TOM MULLINS

(Mr. FOLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FOLEY. Mr. Speaker, it is my great honor to introduce and welcome Senior Pastor Tom Mullins to the United States House of Representatives this morning.

Senior Pastor Mullins is the founder of Christ Fellowship, an evangelical 14,000-member church in Palm Beach Gardens, Florida. This nondenominational evangelical Christian church has grown from about 140 people to 14,000 people under Pastor Mullins' guidance.

Pastor Mullins left a successful career as a football coach and athletic director to start the church. He was a well-respected coach at Palm Beach Gardens High School in the 1970s and at Georgetown College in Kentucky before becoming athletic director at Palm Beach Community College in Lake Worth. He started the church in 1984 while still working at the college, and has been there ever since.

In addition, Pastor Mullins and his wife, Donna, who joins us today in the gallery with their daughter, Noelle, are the founders of the Place of Hope International, which sends food and clothing around the world, from Peru to India. They work locally in our County of Palm Beach distributing food baskets to the poor and sending thousands of gifts during the holiday season to people in need.

A well-respected member of our community, Pastor Mullins is an advocate for citizen involvement in the political process, for being good stewards of our Nation's heritage, and a strong supporter of President Bush's faith-based initiative.

Again, it is my great honor to welcome Pastor Mullins.

Mr. SHAW. Mr. Speaker, will the gentleman yield?

Mr. FOLEY. I yield to the gentleman from Florida.

Mr. SHAW. Mr. Speaker, I thank the gentleman for yielding.

I would like to add my welcome to Pastor Mullins. It is an honor to have him here today.

Mr. Speaker, today we welcome Pastor Tom Mullins of Christ Fellowship church in Palm Beach Gardens, Florida as House Chaplain. Pastor Mullins joins a distinguished list of clergy, who have opened our daily proceeding with prayer, including Rev. Billy Graham and the late John Cardinal O'Connor.

Also, I am pleased to welcome Pastor Mullins' wife, Donna, and daughter, Noelle.

For 18 years and counting, Pastor Mullins serves the 14,000 member Christ Fellowship church as it senior pastor. As senior pastor, Tom commits himself to his faith, family and community.

On April 29, 1984, Tom and Donna, founded Place of Hope children's home for neglected and abused children throughout the Palm Beach community. Pastor Mullins also has a desire to aid neglected children around the world through his support and work with Place of Hope International, which places children in supportive, loving homes around the world from India to Peru.

Tom's work with children even includes a successful high school and collegiate career as a head football coach.

Whether as a pastor or coach, Pastor Mullins has a strong desire in nurturing young men and women throughout the communities of Palm Beach County.

Mr. Speaker, Pastor Tom Mullins is a tremendous leader in the South Florida community, and it's my privilege to welcome him and his family to the United States House of Representatives as our guest Chaplain.

Mr. FOLEY. Again, Mr. Speaker, it is my great honor that Pastor Mullins agreed to come to Washington and deliver the morning prayer.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Members are reminded that it is inappropriate to refer to guests in the gallery.

TERRORISM MUST END, AND AMERICA MUST RECOGNIZE THAT ISRAEL FIGHTS ON THE FRONT LINE AGAINST GLOBAL TERRORISM

(Mr. LANTOS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LANTOS. Mr. Speaker, yesterday, as the President of the United States and the Prime Minister of Israel were meeting in the Oval Office, yet another homicide bombing took place in the state of Israel.

How many more innocent civilians will need to be killed by this monstrous conspiracy before the administration and all Members of Congress recognize that we are dealing with a battle between civilization and the forces of chaos and destruction? How many millions of Saudi PR money will be used to try to tell us that none of this is true?

In recent months, $135 million of Saudi money went to support terrorism, and it is high time we call facts by their proper names. The President indicated a few months ago that "You are either with the terrorists, or you are with us."

The time has come for a clear moral judgment. This terrorism must end, and we must recognize that Israel is in the forefront of the global struggle against terrorism.

CONGRATULATIONS TO LARRY J. BEHAR OF FORT LAUDERDALE AND MARIA LORTS SACHS OF BOCA RATON

(Ms. ROS-LEHTINEN asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. ROS-LEHTINEN. Mr. Speaker, I would like to congratulate Larry J. Behar of Fort Lauderdale and Maria Lorts Sachs of Boca Raton for receiving the Distinguished Humanitarian Award from B'nai B'rith and the Sons of Italy Florida Foundation. This award gives recognition to two individuals whose activities have contributed immeasurably to the advancement of our community.

Mr. Behar is a prominent attorney with a specialization in immigration and naturalization affairs, and he has traveled extensively throughout the world to bring international issues to the table.

Ms. Sachs has served as the President of Florida's Association of Women Lawyers, and she founded Women for Excellence, a nonprofit organization of professional women which provides resources and provides leadership for women.

Please join me in recognizing Larry J. Behar and Ms. Maria Lorts Sachs for their commitment to our south Florida community.

ASKING MEMBERS TO WORK TO BRING LUDWIG KOONS AND ALL OF AMERICA'S ABDUCTED CHILDREN HOME

(Mr. LAMPSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LAMPSON. Mr. Speaker, I would like to think that I have talked so long that I have become hoarse in talking about Ludwig Koons and trying to return him from Italy to the United States where he so desperately belongs and needs to be. Ludwig Koons is a child being held in a pornographic compound in Italy by his mother, who is teaching him that.

Yesterday, the gentleman from Florida (Mr. FOLEY) and I had a press conference where we announced a bill that we are going to introduce very shortly that is called the Child Modeling Exploitation Prevention Act of 2002. We intend to ban exploitive child modeling from all websites that charge fees to view models who are 16 years of age and under. They are nothing more than sites that cause titillation for pedophiles.

I will make the transition from that with my continued story about Ludwig Koons, because he is learning that that apparently is an okay life. I do not believe any of us believe that.

I am asking Members to join us on this bill, but I am also continuing my plea that we stand up as a nation and that we demand that our State Department or any other department of this government, or any Member of the House of Representatives who is willing to write a letter to make a phone call, demand that Ludwig Koons be returned to the United States. Bring all of our children home.

VOTE TODAY TO MOVE HAZARDOUS NUCLEAR WASTE TO A SECURE STORAGE FACILITY

(Mr. KIRK asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KIRK. Mr. Speaker, today the House will vote on the most important environmental and homeland defense issue of the year. Spent nuclear waste is stored at 131 locations around America: near Long Island Sound, in the Tennessee Valley, and on the shores of our precious Lake Michigan. These locations are a terrorists' shooting gallery of potential targets, and 161 million Americans live within 75 miles of a temporary nuclear storage site.

Today we will vote to move this material to a secure storage facility where the United States has already tested hundreds of nuclear weapons. The protection of the Great Lakes is my number one priority, and moving nuclear waste from our shores will protect our people from terrorism and environmental threats.

THE NATIONAL DEBT

(Mr. PASCRELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PASCRELL. Mr. Speaker, Thomas Jefferson said, "I place the economy among the first and most important virtues, and public debt as the greatest of dangers. To preserve our independence, we must not let our rulers load us with perpetual debt."

I hear the words of the Founding Fathers on the floor evoked week after week. I never hear these words from Thomas Jefferson. That is because the public debt is something we do not like to talk about. We no longer have a choice in the matter. In the minute that I will stand before Members this morning, we will accrue almost $1 million in interest to our public debt. These are wasted dollars paying interest on debt, rather than paying down the debt.

Today the national debt is $6 trillion. Since January of last year, the CBO baseline's projected net interest payments over the 2002 to 2011 period have gone up by $1 trillion, from $620 billion to $1.6 trillion, roughly $10,000 per American household and $1,000 per household per year.

If we make the tax cut permanent, like some have suggested, this number rises to almost $4,000 per household per year. This is insanity. Mr. Speaker, I ask that we remember the words of Thomas Jefferson.

OPPOSE HOUSE JOINT RESOLUTION 87 AND STOP THE YUCCA MOUNTAIN PROJECT

(Mr GIBBONS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GIBBONS. Mr. Speaker, today we will be deciding whether to ship high-level nuclear waste, one of the most dangerous and deadly substances known to man, across this great country by and through our roads and neighborhoods and schools and parkways.

Mr. Speaker, today we must reject this dangerous plan. Whatever Members believe, let us look at some of the startling facts.

According to the Department of Transportation itself, there have been over 11,000 train accidents in the past 5 years. It is estimated that at least one train accident occurs every 24 hours. Since 1998, 3,800 people have lost their lives and more than 45,000 people have been injured in train accidents in the United States alone. Just imagine how many more people would die or could have been injured had these trains been carrying high-level nuclear waste to Yucca Mountain.

Mr. Speaker, it takes only one antitank missile or one terrorist act to cause a catastrophic nuclear disaster, but today we can prevent that disaster. We can oppose House Joint Resolution 87 and stop the Yucca Mountain project now before we endanger the lives of thousands of innocent Americans.

URGING MEMBERS TO PASS STRONGEST POSSIBLE TRADE ADJUSTMENT ASSISTANCE FOR AMERICA'S WORKERS

(Mr. SMITH of Washington asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SMITH of Washington. Mr. Speaker, the Senate is considering the President's request for trade promotional authority right now, and at the same time, connected to it, trade adjustment assistance, help for workers who have lost their jobs.

I rise today to urge the Senate today to pass the strongest possible trade adjustment assistance packages. Workers desperately need help dealing with the new economy. It is a land of opportunity for all of us, but there are also challenges. Workers must continually have access to training and education to update their skills. They also need the health care benefits necessary to carry them during periods of unemployment, and they also need income assistance to help them as they move forward and try to find new jobs.

I am a strong supporter of trade. As a new Democrat, it is one of our top priority issues to open trade throughout the world and give us access to other markets.

Connected to that, however, we have to help the workers of our country deal with the challenges and opportunities that come along with that. There must be a strong health care component. There must be job training and education available.

If the Senate were to put together that type of package and pass a trade promotional assistance bill with a strong trade adjustment assistance piece, I am very confident they would be able to pass it in the House, and they would move forward on two critical policies for this country.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Members are reminded it is improper to urge action by the other body.

WESTERN SAHARA

(Mr. PITTS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PITTS. Mr. Speaker, last week the United Nations considered a new solution to the conflict over Western Sahara, a solution which basically gives Morocco control over Western Sahara.

Mr. Speaker, everyone knows the Moroccan people do not have a democracy. The country is ruled by a king. They use torture in their prisons. The former king, father of the current king, established the notorious and hideously brutal Tazmamart prison camp in which he imprisoned and tortured his own family members. So how in the world will Morocco assure that democracy is protected for the Sahrawis?

Mr. Speaker, I am deeply disturbed by reports that our U.S. Government now may be willing to throw away the rights of the people of Western Sahara to self-determination by supporting Moroccan claims of sovereignty to the land. It seems that our government is willing to bargain away fundamental human rights for cooperation with current agendas, after 10 years of advocating self-determination for Western Sahara.

When our country no longer cares about the right to self-determination, a right on which our Nation was founded, it is a sad day, indeed.

Mr. Speaker, this is a dangerous time to play with instability, particularly in North Africa.

□ 1015

PRESCRIPTION DRUG CARE BENEFIT

(Mr. RODRIGUEZ asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RODRIGUEZ. Mr. Speaker, it is shameful that our citizens are still without workable prescription drug coverage. Because of the rapid increase of prescription drug use, as we know, it is critical and needed; and at the time we established Medicare, prescriptions were not used as much, but now we understand that those senior citizens do need prescription drugs to be able to take care of their illnesses. We need to be there for them to make sure that we will get that prescription. It is unfortunate, but I keep hearing stories about our senior citizens that continue to make decisions between buying food and buying prescription that they need. I hear from the spouses where they sometimes go without prescriptions to get their husbands their prescriptions.

We as a community and as Americans need to make sure that our seniors have accessible prescription drug coverage. And as Democrats we support a prescription drug benefit coverage for all seniors that would be voluntary and be able to have access to them. No seniors should be faced with the prospects of not being able to afford medicine, regardless of income. We need to be there for our seniors. They have been there for us.

STOP TAXING MILITARY STUDENT LOAN REPAYMENTS

(Mr. GARY G. MILLER of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GARY G. MILLER of California. Mr. Speaker, our military uses students loan repayment to recruit for shortages in critical military occupational specialties such as the Medical Corps. If you are on active duty, tuition assistance is not taxed as income. If you have been honorably discharged and received education assistance through the GI bill, it is not taxed as income. However, if the military needs to recruit an individual for an occupation specialty that is needed, the student loan repayment is taxed as income.

For example, if the military pay is $24,000 per year and he or she receives $20,000 that year to pay a student loan, they are taxed at an income level of $44,000 and the tax payment has to come out of a $24,000 salary.

This is wrong. Support H.R. 4555 to correct this.

PROBLEMS OF TANF REAUTHORIZATION

(Ms. WATSON of California asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. WATSON of California. Mr. Speaker, I rise to support my Democratic colleagues in their approach to welfare reform. Voters overwhelmingly believe that expanding training opportunities that will help new people from welfare to good jobs should be a top priority of this Congress.

The voting public supports a TANF reform agenda of expanded access to training, education and flexible time limits. The polling data demonstrates that 82 percent of Americans favor increasing funding for job training and child care. Mr. Speaker, this is what the Democratic proposal presents.

The Republican proposals do not represent the voice of America or our welfare recipients. The one-size-fits-all, Washington-knows-best unfunded mandates of Republican proposals will not work. We need to build upon the success of the past by increasing funding flexibility. We need to assist TANF recipients to get living wage jobs so that they have access to upward mobility.

Mr. Speaker, the Democratic proposals will do just that.

SENIORS NEED PRESCRIPTION DRUGS

(Mr. GREEN of Texas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GREEN of Texas. Mr. Speaker, here we go again. Like Yogi Berra said, "It is deja vu all over again."

The Republican majority is trying to convince the American people that they want to do something to provide prescription drug benefit for our Nation's seniors, but it is the same proposal that went nowhere last year. It is nothing but an election year proposal that will provide very little benefit to most seniors.

This tiered proposal, leveled proposal, treats some seniors differently than others, despite the fact that all seniors have paid into the program and deserve a meaningful prescription drug benefit.

I am in favor of providing real prescription drug benefits to seniors. If this proposal is going to work, we need a benefit that is good for all seniors, not just a few. Unfortunately, the Republican plan will not help middle income seniors who have only moderate drug costs. Their plan is unworkable. Even the insurance industry says that insurance will not go for it. So what we have here is a plan that the seniors will not like, the insurance companies will not like, and the public will be able to see through. And even members of my Republican colleagues' party have mentioned that this bill is not a good proposal.

Let us stop playing games with seniors' lives. It is time to provide a meaningful, generous benefit that actually does something to address the prescription drug problem.

STICK TO THE PRESIDENT'S SUPPLEMENTAL DEFENSE REQUEST

(Mr. PENCE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PENCE. Mr. Speaker, it has been a hallmark of the Republican majority in Congress to practice fiscal restraint and to stand by a strong national defense. Today here on Capitol Hill we will be about the business of responding to the President's supplemental defense request, and there are some reports and some discussion on Capitol Hill that we may in this majority bring to the floor later this week a bill that could exceed the President's request by nearly 10 percent, adding in spending on election reform and interior agencies; nothing much to do with national defense.

I urge my colleagues to hew to their roots, Mr. Speaker. Spend not one penny more than the President has requested when we pass the defense supplemental this week. By demonstrating fiscal discipline, our majority will renew our commitment to fiscal responsibility and to national defense without compromising either.

HONORING SOUTH CAROLINA POLICY COUNCIL

(Mr. WILSON of South Carolina asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WILSON of South Carolina. Mr. Speaker, in 1986 a group of South Carolina civic leaders dedicated to improving their State joined together and created the South Carolina Policy Council. South Carolina at that time was dominated by a legislature which controlled an array of semi-autonomous boards and commissions that fostered red tape and hindered accountability. Through the visionary leadership of the late Thomas A. Roe, the Policy Council was formed to fill the void of reformist conservative philosophy.

By publishing timely reports, comprehensive white papers, and hard-hitting editorials, the Policy Council grew in stature and membership. In the beginning of the Republican Revolution, Ed McMullen was chosen as its president. The Policy Council has played a role in every major reform debate. From modernizing State government, to promoting performance audits, to reforming welfare, to cutting taxes, the Policy Council was there. It was further energized by dedicated researcher Hal Eberle and now South Carolina Senate Clerk Jeff Gossett.

Today the South Carolina Policy Council boasts a membership of over 5,000 and regularly participates in policy debates with political, religious and business leaders throughout the Palmetto State.

I am honored to take this opportunity to thank the Policy Council and to wish them well on the ongoing fight to conserve the principles of limited government and traditional values.

STRENGTHEN U.S. STEEL INDUSTRY

(Ms. KAPTUR asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. KAPTUR. Mr. Speaker, as a representative of industrial America, I am urging my colleagues today to vote both to strengthen the U.S. steel industry and to put on hold plans to ship spent nuclear material to Yucca Mountain.

In an era where our rail beds as well as human error yield major train derailments and accidents each year, why authorize Yucca Mountain? Why not improve our rail beds, improve our steel industry and make this country an industrial leader in terms of rail transportation?

In an age of terrorism, why have nuclear material moving all over this country? And, finally, in my own district, a recent nuclear mishap occurred in which boric acid ate through 80 pounds of carbon steel in the central container inside the core, I really ask the question—Why do we have such poor engineering and poor inspection in the nuclear industry? Why do we have a plant reactor that cannot be repaired in this country? Why even if we were able to repair it, do we have to send the core to Japan to cast a new head and then to France for finishing? Why is the nuclear industry exempt with no one responsible under the Price Anderson Act, for liability in the event an accident occurs? Please, I urge my colleagues today to vote to strengthen the U.S. steel industry and vote for nuclear safety.

Vote to uphold the steel decisoin on limiting imports and to table the Yucca Mountain nuclear storage proposal.

FREE MARTIN AND GRACIA BURNHAM

(Mr. TIAHRT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TIAHRT. Mr. Speaker, today marks the 347th day that Martin and Gracia Burnham have been held captive by Muslim terrorists in the Philippines.

This afternoon many members of my family, including my father and mother, will arrive in Washington to visit me and their grandchildren. As I look forward to their visit, I think of the Burnham family and the family reunion they await every day. Too often congressional schedules keep us away from our families. Many of us have had to miss Little League games, school recitals and concerts. That is the hardest part of our job. I cannot imagine missing a year's worth of my children's lives, a year of birthdays, holidays, games, concerts and those precious daily moments.

Of all the hardships that Martin and Gracia have endured in the past 11½ months, the greatest must be their separation from their family and knowing how desperately their children miss them. I always cherish my time with my parents and my family, but this week I am especially aware of how lucky I am to have time.

I encourage the Bush administration and the Philippine government to continue their efforts, all their efforts, to free Martin and Gracia so the Burnham family can enjoy a family reunion.

As always, I ask you to join me in prayer for Martin and Gracia and their loved ones that this nightmare may soon be over.

NATIONAL SMALL BUSINESS WEEK

(Mr. PHELPS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PHELPS. Mr. Speaker, I am grateful for the opportunity to speak today on behalf of National Small Business Week. Small businesses play a crucial role in the economy of our Nation, and it is important that we take this week to recognize their efforts.

As a member of the Committee on Small Business and a former small business owner, I am aware of the everyday difficulties that many of our Nation's small businesses have to face. We must work together to ensure that their needs are met and not put behind the needs of corporate America.

With approximately 25 million small businesses in the United States, we need to focus on affordable health care for the small business employer and employee. We must ensure that pension plans will be provided to employees while protecting our system's Social Security. Last year many small businesses were left out of the President's tax cut. Let us make sure that that never happens again, and provide for fair tax breaks to small businesses who may need the extra capital to survive.

Many Americans dream of owning their own business, and we need to help that dream become a reality and stay a reality for years.

PROVIDING FOR DISPOSITION OF H.J. RES. 84, DISAPPROVING THE ACTION TAKEN BY THE PRESIDENT UNDER SECTION 203 OF THE TRADE ACT OF 1974 TRANSMITTED TO THE CONGRESS ON MARCH 5, 2002

Mr. REYNOLDS. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 414 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 414

Resolved, That the joint resolution (H.J. Res. 84) disapproving the action taken by the President under section 203 of the Trade Act of 1974 transmitted to the Congress on March 5, 2002, is hereby laid on the table.

The SPEAKER pro tempore (Mr. SIMPSON). The gentleman from New York (Mr. REYNOLDS) is recognized for 1 hour.

Mr. REYNOLDS. Mr. Speaker, for the purpose of debate only, I yield the customary 30 minutes to the gentleman from Massachusetts (Mr. McGOVERN), pending which I yield myself such time as I may consume. During consideration of this resolution, all time yielded is for the purpose of debate only.

Mr. Speaker, while I am waiting for some of my remarks, first, I would like to welcome our new colleague on the Committee on Rules, the gentleman from Massachusetts (Mr. McGOVERN), who will be managing the rule for the minority.

Mr. Speaker, House Resolution 414 is a unique rule providing for the disposition of House Joint Resolution 84, a resolution of disapproval. Under the rule, the House Joint Resolution 84 would be automatically tabled. House Joint Resolution 84 disapproves the action taken by President Bush to impose temporary tariffs on some types of steel products. Under the Trade Act, Congress has the authority to disapprove of such actions within 90 days. Such approval resolution is highly privileged, not amendable, and floor debate is limited to 20 hours.

To put it simply, a vote in favor of this rule will lay on the table the disapproval resolution and conclude further deliberations.

Responding to concerns within the steel industry, President Bush instructed the International Trade Commission on June 2001 to begin an investigation under section 201 of the U.S. Trade Law. This investigation would study the effects of steel imports on the U.S. steel industry. The ITC released their findings in October of 2001, making an affirmative determination of injury on the American steel industry caused by steel imports.

The ITC further relayed recommendations to the President for relief that would prevent or remedy such injuries.

On March 5 of this year, the President put in place trade remedies based on the ITC findings. President Bush announced trade remedies for all products on which the ITC had found substantial injuries except two specialty categories.

Under present law, the President, not the ITC, makes the final decision whether to provide relief to the U.S. industry, as well as to the type and amounts of relief.

Passing the disapproval resolution as written would not undo the remedies imposed by President Bush. Rather, it would merely put in place the tariff levels suggested by the International Trade Commission.

□ 1030

While congressional disapproval is certainly allowed under this statute, this rule recognizes that the circumstances in this case simply do not warrant such action. Even the measure's sponsor noted in committee markup that the resolution was not the best solution.

Laying this resolution on the table does not hurt the steel industry. In fact, it will keep intact the President's remedy that the industry favors. The disapproval resolution could potentially be even more harmful to the industry, nor would the resolution not eliminate tariffs on steel imports. It merely replaces one set of tariffs with another.

Mr. Speaker, let me reiterate that a vote in support of this rule will table the disapproval resolution, keep intact the President's current enacted remedy, and conclude debate on this issue.

Mr. Speaker, I reserve the balance of my time.

Mr. McGOVERN. Mr. Speaker, I yield myself such time as I may consume, and I thank the gentleman from New York (Mr. REYNOLDS) for yielding me the customary 30 minutes, and I thank him for his kind words.

Mr. Speaker, I want to take just a moment to thank the gentleman from Texas (Mr. FROST), the ranking member, the gentleman from Missouri (Mr. GEPHARDT), and the rest of my colleagues for my appointment to the Rules Committee.

I am honored to take the seat held for over 25 years by my friend and mentor, Joe Moakley; and before him the seat was held by the late Speaker, Tip O'Neill. I feel so privileged to be part of that legacy, and I will try to do everything possible to live up to their examples of hard work, collegiality and dedication to this House.

Mr. Speaker, this is the first rule that I have managed on the floor; and if I did not know better, I would think that my friends on the other side of the aisle were trying to make it as difficult as possible because this rule, Mr. Speaker, is a complex and convoluted contrivance designed to protect some Members from an unambiguous vote on an issue of vital importance to America's steel industry and its workers.

This rule is self-executing, which means that a vote in favor of the rule will table the resolution, thereby killing it without a clear up or down vote. While I strongly oppose the resolution proposed by the gentleman from Louisiana (Mr. JEFFERSON), I see no reason why the committee does not simply allow this body to vote on it.

This is an issue with real consequences for hard-working Americans and their families. Quite simply, Mr. Speaker, the American steel industry is in trouble. Foreign steel imports are causing domestic prices to plunge to record lows, and the result to date is 31 steel company bankruptcies, the loss of almost 47,000 steelworker jobs, including 2,100 in the Nation's iron ore mines, and the shutdown of nearly 20 percent of the Nation's steelmaking capacity.

We cannot continue to sacrifice American jobs. We cannot continue to stand idly by as one of the oldest and most important industries in America just disappears.

In response to the ongoing crisis in American steel, the President implemented a 30 percent tariff on steel imports, an action that will help save thousands of Americans' steelmaking jobs. This tariff is a necessary response to the unfair practices of some of our trading partners and I support it.

I believe we in Congress should be doing a great deal more for America's steelworkers and their families; but until we act, the President's decision is a welcome one.

I will vote in favor of this rule which automatically tables the resolution and, therefore, allows the President's action to stand; but I believe it is extremely unfortunate that the majority has chosen to circumvent the regular order and has refused to allow a vote on the gentleman from Louisiana's (Mr. JEFFERSON) resolution, a resolution, by the way, that I oppose.

This body deserves a fair debate and an up or down vote on this issue. The Ways and Means Committee adversely reported the resolution, yet this rule denies the members on the committee and the Members of this body a genuine opportunity to debate the merits of this issue.

The American people deserve to know who supports the President's actions to protect the American steel industry and who does not. They deserve to know who supports the effort to help the working men and women in our steel-producing communities and who does not.

There is no need for procedural smokescreens that rob the Members of this House from debating and voting on this important trade issue.

Having said that, let me attempt to clarify to Members what their choice is. If my colleagues disagree with the President's decision to impose tariffs on imported steel, then they should vote against this rule. On the other hand, if my colleagues support the President's tariff decision, then they should vote for the rule.

Mr. Speaker, there are many times when the Members of this body of both parties will disagree with the President. The Republican majority should not run away when that happens. They should allow their Republican colleagues the opportunity to vote and express their support or disapproval of the President's decision.

I regret they will not be able to vote "no" on the resolution offered by the gentleman from Louisiana. I regret this deceptive rule, but I will not oppose it.

Mr. Speaker, I reserve the balance of my time.

Mr. REYNOLDS. Mr. Speaker, I am pleased to yield 3 minutes to the gentleman from Illinois (Mr. SHIMKUS).

Mr. SHIMKUS. Mr. Speaker, I want to first of all say to the gentleman from Massachusetts (Mr. MCGOVERN), I am pleased to be able to speak on his first opportunity to have debate on a rule. As neighbors in our first term, I find that a great privilege; and I would rather be lucky than good. So it is lucky.

For my friend from Louisiana, who we agree with and work hard, it is not personal, it is just public policy; and I look forward to working with him more in opportunities in the future.

Not supporting this rule would mean letting the steel workers of our country down when they need us most. Furthermore, it would be a step backward from the progress made to help industries thus far. Free and fair trade, the proponents of trade talk about free and fair trade, and the opponents of trade talk about free and fair trade; and it was this administration that finally took action against unfair trade. That is kind of hard to believe when we had a lot of this steel crisis within the past administration, also; but it was a Republican administration that said there is illegal dumping of steel and we are going to take action against it.

So that is why this resolution, I know well-intentioned, is very detrimental to getting our steel mills and our workers back into the mills and creating jobs. We have already seen some benefits from the 30 percent trade.

Granite City Steel in Madison County, which I represent half the county, it is my home county, entered Chapter 11 bankruptcy protection in early March. Their latest report is that they have more orders than they can fill. A promising future from an industry that just months ago was on the cusp of not only destroying the tax base of a small community but also people not being able to be employed and take care of their families.

Continuing the current tariffs will mean job security for 2,700 workers of this plant, as well as many plants across the Nation that have filed or were near bankruptcy.

Another company that is moving aggressively to reopen a closed steel mill in Illinois is Alton Steel, and they have a short window of opportunity to move even rapidly now because of the tariffs, and we are working very diligently with them; and the imposition of this tariff is of great help to them and the working men and women of another part of Madison County which is Alton, Illinois.

Furthermore, the 30 percent tariffs increase the likelihood of consolidation in the industry so that those who have lost their jobs may regain employment.

Mr. Speaker, it is proven: the administration's decision for a 30 percent tariff is helping. The steel industry is and will continue to benefit. So why hold it back? On behalf of the steel workers of southern Illinois, I urge my colleagues to join with me in voting for this rule.

Mr. MCGOVERN. Mr. Speaker, I yield 5 minutes to the gentleman from Louisiana (Mr. JEFFERSON), a member of the Committee on Ways and Means.

Mr. JEFFERSON. Mr. Speaker, I thank the gentleman from Massachusetts (Mr. MCGOVERN) for yielding me the time.

Mr. Speaker, I am saddened and disappointed by the action of the Committee on Rules and by the response of many of my Republican colleagues to the resolution that I have filed. Just a few months ago, I joined with many of them in open discussions about the benefits of free trade to our country and to a global economy.

Yet today, they turn their back on all those arguments that they so embraced just 2 months ago during the trade promotion authority discussion; and no matter how they cast the action on this rule today, if they vote for the rule and table the resolution and prevent us from having a debate on it, what they are doing nonetheless, no matter how they cover it up, is they are voting a protectionist line when they have taken quite the opposite position just a few months ago as I said, and routinely, throughout this Congress.

What is happening here is what has been described here by the gentleman from Massachusetts (Mr. MCGOVERN). I have a resolution which is quite clear. It purports to ratchet down the President's tariff decision to protect the steel industry from 30 percent tariffs, generally speaking, to 20 percent tariffs under the ITC recommendation. It lowers the tariffs in almost every case; and while one can argue that it still maintains a 201 result, and it does, for those who want to see 201 action, it permits that; but it simply does it at a lower level.

What I said in committee is there is no way to undo the President's decision by action on this floor. The only thing that can be done is what is being attempted here, that is, to reduce it down to what the ITC recommended. That is the only legal course that is available. One cannot go to court or to an administrative action. This is it. So when I say in committee that what we are doing here is not fixing the problem, but making a bad situation less bad, that is precisely what is available to us. That is all that we can do. That is not the ultimate outcome I would desire, but that is all that is available to us.

This decision, Mr. Speaker, in just a few short months has rankled the ire of all of our trading partners in the European community, in Australia, in Japan, in Korea and China, in Brazil. Almost every corner of the world, they are threatened and are now imposing sanctions against our products. The European Union has estimated it will cost $2.4 billion in losses to them just based on what we have done here. Added to our fish problem that is already $4.5 billion, how on God's earth can we respond to these extreme and very high costs that are being imposed by this action the President has taken?

The President is talking out of both sides of his mouth on this question. He says that he is for free trade, and yet he wants to restrict free trade when it is convenient for, as some have said, political purposes. The columnist that generally favors President Bush on all these matters, George Will, writes quite candidly it is the worst protection action taken by a President in decades. He cannot even think of one that is worse.

He also said that it is a billion dollar tax increase on those folks who buy automobiles alone and estimates an $8 billion tax increase on consumers across the country because what happens is we are raising prices on steel products across the board, whether they are cars or toasters or vacuum cleaners. Whatever is made of steel, the prices are going to rise. They are already rising.

Beyond that, Mr. Speaker, this whole issue of free trade is supposed to be about consumers in this country, and we are going to saddle them with $8 billion in new costs that they are going to have to pay; and in the end it is going to end up with a result that is worse than we ever imagined because we are now just getting out of, what some people say, getting out of a recession. We are going to drive this country right back into a deeper one because every one steel job we purport to save here, the estimates are we lose 10 in other industries.

So with the stevedores we will lose jobs up and down the line of those folks who make steel products. We will have layoffs because the business cannot afford to carry on with the price for steel so high, and so it is not a good tradeoff for this country to save one steel job for every 10 jobs we lose in some other industry. It is a very bad tradeoff.

I would like to urge this body to vote "no" on this resolution on this rule today for the simple reason we deserve a debate, as the gentleman from Massachusetts (Mr. MCGOVERN) has said. Whether my colleagues are for or against this, this matter deserves a debate on the floor today, and I would urge the Members of this body to do just that.

These steel tariffs the President has imposed are also not WTO consistent. That is pretty clear. There was a decision in a Korean case involving a line pipe that made quite the case that unless there are recent upsurges in the importation of a product that the 201 action does not apply. Here we have had steel importations going down the last 4 years, from 1998 to now. The better action here would have been to find some way to fix the number of imports that can come into the country at what was the pre-1998 levels. That would have been the sensible and supportable action.

That did not happen here, Mr. Speaker; and therefore this bill is not designed to fix any problem, but it is designed for political reasons, not supported by any economist in the country, not even supported by economists in the White House, not even supported by the Secretary of the U.S. Treasury. It is unsupportable economically, and I urge this body to vote "no" on the resolution.

Mr. REYNOLDS. Mr. Speaker, I reserve the balance of my time.

Mr. MCGOVERN. Mr. Speaker, I yield 1 minute to the gentleman from Ohio (Mr. KUCINICH).

□ 1045

Mr. KUCINICH. Mr. Speaker, I rise in support of this rule and in opposition to the resolution seeking to roll back steel import tariffs.

We in the Congressional Steel Caucus pushed a long time for the administration to initiate a section 201 steel investigation into dumping. We pushed the International Trade Commission to recognize the devastating effect of steel imports. We gathered with 25,000 steelworkers on the Ellipse to encourage the President to impose an effective remedy. We did get a remedy.

What has this tariff meant to the steel industry? It has helped us in Cleveland find a new owner to keep our steel mill running. It has helped create a climate to boost America's manufacturing output. Still, tens of thousands of steelworker retirees are losing health benefits, so we introduced the bipartisan Steel Legacy Relief Act to help obtain health benefits equivalent to what is provided by Medicare and a prescription drug benefit similar to the Blue Cross/Blue Shield program.

The United States should not stand by and watch while thousands and thousands of workers who helped build this country are suffering. We must say to our Nation's retired steelworkers, "You have worked all your life to make America strong. We have not forgotten, and we will not let you down."

I urge my colleagues to vote for this rule, oppose efforts to roll back steel tariffs, and sign on to our bill to address steel legacy costs.

Mr. REYNOLDS. Mr. Speaker, I continue to reserve the balance of my time.

Mr. MCGOVERN. Mr. Speaker, I yield 2 minutes to the gentleman from Indiana (Mr. VISCLOSKY), who has been a great leader on behalf of workers in the steel industry.

Mr. VISCLOSKY. Mr. Speaker, I thank the gentleman from Massachusetts for yielding me this time.

Mr. Speaker, I rise in strong support of the rule to table the motion of the gentleman from Louisiana. I have a great deal of respect for him, but I would point out to my colleagues that on October 22 last year, the International Trade Commission unanimously, three Republicans and three Democrats, found that illegally dumped steel caused serious injury to the United States of America and its workers. They were right.

Since 1977, we have lost 34.5 million tons of capacity. But, moreover, we lost many jobs. The gentleman from Louisiana mentioned earlier in his remarks that people in Korea and Japan and Brazil are upset over the President's implementation of the ITC decision. I would point out that some of the 72,567 Americans who have lost their job at bankrupt or closed companies in places like Dunkirk, New York, Vineyard, Utah, Gadsden, Alabama, Sterling, Illinois, and Sand Springs, Oklahoma, are even more upset, and they are our responsibility to protect.

The President acted appropriately on March 5 by imposing 30 percent tariffs. We ought not to set the President's program back.

Additionally, I am concerned, as I address the House today, that hundreds of exemptions have been asked for by our trading partners, and hundreds more have been asked for. And now we have 1,200 exemptions that have been requested, and the Secretary of the Treasury has indicated on a recent trip to Europe that a significant number of them might be approved.

I would hope that the administration does not follow through on the implication of the Secretary's remarks, that they hold firm, and that exemptions are only granted in the case where there is no other U.S. alternative for the products made.

Mr. REYNOLDS. Mr. Speaker, I continue to reserve the balance of my time.

Mr. MCGOVERN. Mr. Speaker, I yield 1 minute to the gentleman from Ohio (Mr. STRICKLAND).

Mr. STRICKLAND. Mr. Speaker, I stand here today to urge those Members who are undecided about how to vote on this rule to consider the hundreds of thousands of steelworker jobs that have been lost since the steel crisis began in 1998, all due to the flood of steel imports.

Last year alone, over 20,000 jobs were lost in America's basic steel industry, and half of the Nation's bankrupt steel companies have now been forced to cease operations completely. In addition to the job losses, the steel crisis has put the health care benefits of 600,000 industry retirees at risk. Over 100,000 retirees and their dependents have already lost or will lose their health care benefits following bankruptcy.

The President's decision to apply 30 percent tariffs to certain steel imports was a step forward in protecting our national security, protecting legacy costs for steel workers' health benefits, and, most importantly, protecting America's jobs. I urge my colleagues to vote in favor of this rule and stand up in support of rebuilding this Nation's steel industry.

Mr. REYNOLDS. Mr. Speaker, I continue to reserve the balance of my time.

Mr. McGOVERN. Mr. Speaker, I yield 2 minutes to the gentleman from Michigan (Mr. STUPAK).

Mr. STUPAK. Mr. Speaker, I thank the gentleman for yielding me this time, and I rise in support of this rule to table the resolution disapproving the President's decision on the section 201 steel investigation.

While the relief under section 201 was not everything I had hoped for, I commend the President for taking action to help our ailing iron ore and steel industries and for imposing stronger remedies than those recommended by the International Trade Commission.

If this resolution passes, the President's remedies would be overturned and the ITC recommendations then would become our law. This would weaken the tariffs that have been imposed. This would withdraw the helping hand that we have finally offered to the iron ore and steel industries.

Let me give an example. In the case of slab steel, which has been so destructive to the iron ore mines I represent, I had hoped for a straight tariff on the slab imports being dumped in the United States. The ITC recommended a tariff of 20 percent in the first year for imports over the quota. President Bush instituted a 30 percent tariff on the first year over the quota for slabs. This fell short of the relief our iron ore industry needs, but this resolution would mean, if it passes, that we would have to go back to the ITC 20 percent relief that is even more watered down. We cannot allow this to happen.

Our iron ore and steel industries depend on this relief. Without it, I am afraid our iron ore and steel industries will surely perish. I urge my colleagues to vote for this rule to table consideration of House Joint Resolution 84 and for preserving our American steel industry.

Let us stand with the President in aiding the iron ore and steel industries and look ahead to other ways we can help these industries, such as the much-needed legacy cost relief. Rather than taking a step backwards, we should now work to pass effective legacy cost legislation so that we can continue our forward momentum in bringing back our iron ore and steel industries.

Mr. REYNOLDS. Mr. Speaker, I yield 5 minutes to the gentleman from Ohio (Mr. REGULA).

Mr. REGULA. Mr. Speaker, I rise in support of tabling H.J. Res. 84. This safeguard action gives our domestic steel industry and its employees a much-needed period of readjustment to recover from the substantial damage done by the latest steel import surge that began in 1998.

Thirty-three companies have declared bankruptcy in recent years, and 17 have closed their doors completely. 46,700 steelworkers have lost their jobs and 125,000 retirees have lost their health care benefits during this crisis.

The surge of low-priced imports is the result of foreign steel companies, often subsidized by foreign governments, building huge amounts of excess steel-making capacity. With their own markets unable to absorb all of this steel, they have flooded the U.S. market with their excess capacity.

We remain the most open market in the world. We cannot have free trade unless it is also fair trade, and President Bush recognized this fact last summer when he initiated the section 201 investigation on steel imports. The International Trade Commission conducted the investigation. This is an independent body. After many days of testimony, the Commission determined that steel imports were a substantial cause of serious injury to the U.S. steel industry.

On March 5, President Bush imposed temporary steel tariffs that range from 8 percent to 30 percent for a 3-year period. It is not a permanent tariff. This type of temporary safeguard measure is specifically allowed by World Trade Organization rules. Many of our trading partners have imposed safeguard measures on a variety of other products.

U.S. steel companies and steelworkers are only asking for a level playing field. The action taken by President Bush allows time for restructuring and for talks with our trading partners to reduce the worldwide excess steel-making capacity.

A strong domestic steel industry is crucial to the economic and national security of our Nation. It is important that today we give the President's safeguard actions time to work. Vote to table H.J. Res. 84.

Mr. McGOVERN. Mr. Speaker, I yield 2 minutes to the gentleman from Pennsylvania (Mr. DOYLE).

Mr. DOYLE. Mr. Speaker, I rise today in support of H. Res. 414 and in support of the tens of thousands of steelworkers across the Nation, as we fight to rebuild an industry that has been devastated by illegal dumping of foreign steel onto American markets.

I want to say that again: Illegal dumping of steel onto American markets has devastated this industry. As a Member of Congress whose family has worked over 73 years in the steel industry, I believe it is critical that we fight to ensure that our Nation's steelworkers have a fair and level playing field to market their product. After all, this is the same industry that built America and remains its backbone.

Over the past several years, 51 steel mills have been closed, 31 steel producers have filed for bankruptcy, and over 46,000 hardworking Americans have lost their jobs. And why did they lose their jobs? Because their competitors are cheating, breaking our trade laws. And it has been a national disgrace that we have allowed it to happen this long.

Across my district in Pittsburgh, Pennsylvania, once called the steel capital of the world, thousands of hardworking men and women have lost their jobs because their competitors were cheating. Without the protections provided by the President on March 5, more workers will be left jobless by foreign producers who illegally bombard our markets with cheap foreign steel.

It is for these hardworking men and women and their families that I fight today. After all, if we are going to have free trade, we first have to have fair trade. The writing is on the wall and the call of our steelworkers must be heard.

So, Mr. Speaker, I urge my colleagues to join me in voting for this rule to table an ill-advised resolution which poses a direct threat to the same industry that built and continues to remain America's backbone.

Mr. Speaker, I rise today in support of H. Res. 414 and in support of the President and the tens of thousands of steelworkers across our nation as we fight to rebuild an industry that has been devastated by the illegal dumping of foreign steel onto American markets.

As a Member of Congress whose family has worked in the steel industry for over 73 years, I believe it is critical that we fight to ensure that our nation's steel workers have a fair and level playing field to market their product. After all, this is the same industry that built America into the world's pre-eminent superpower and it is the same industry we will continue to rely on to remain safe and strong. The very backbone of America is being threatened today.

Over the past several years, 51 steel mills have been closed, 31 steel producers have filed for bankruptcy, and over 46,000 hard working Americans have lost their jobs. The International Trade Commission ruled unanimously that this loss is directly the result of steel dumping and not the fault of the American steel industry. Across the district that I represent in Western Pennsylvania, an area once universally called the Steel Capital of the World, thousands of hard working men and women have lost their jobs due to unfair competition and through no fault of their own.

In fact, the productivity, work ethic, and technology of America's steel industry is far superior to any other nation in the world. However, without the protections provided by the President on March 5th, these workers will be left jobless by foreign producers who illegally bombard our markets with cheap, foreign steel. It is for these hard working men and women, and their families, that I fight today!

America cannot simply stand back under the banner of free trade and allow foreign nations to subsidize their steel industries, underpay their workers and dump their products on our markets with the hope of destroying the American steel industry. After all, in order to have free trade, we must first have fair trade. The writing is on the wall and the call of our steel workers must be heard.

So, Mr. Speaker, I am standing today with the President and alongside every American steel worker. I urge my colleagues to join me and vote against this ill-advised resolution which poses a direct threat to the same industry that built, and continues to remain, America's backbone.

Mr. REYNOLDS. Mr. Speaker, I yield 2 minutes to the gentleman from Pennsylvania (Mr. ENGLISH), who is the Chair of the Congressional Steel Caucus.

Mr. ENGLISH. Mr. Speaker, this is a critical issue. I came to the floor prepared to give a lengthy and detailed speech, and, instead, I will simply submit that for the record. I would like to take 2 minutes to speak from the heart on what I think is an absolutely critical issue for the American economy.

George Bush, when he took office last year, took a look at the issue facing steel, took a look at the crisis in American steel and initiated a WTO consistent process to evaluate the situation. The finding of the International Trade Commission was this: That, clearly, we were facing a surge of imports; clearly, there are unfair traders involved; and, clearly, we need to have an opportunity to give a breathing space to the U.S. industry.

The authors of the resolution today are opposed to what the President is trying to do, and I hope that this resolution will be tabled. We will be sending the wrong message to our international trading partners if we allow the Jefferson resolution to stand.

The Jefferson resolution, in effect, sends the message that it is open season on America's manufacturing sector. It simply says you do not have to play by the rules; that the global excess capacity in steel can continue to be dumped on the American market. And it will send a very clear message that notwithstanding the fact that America has some of the most productive steel mills in the world, America will not be able to defend itself when facing unfair trading practices in this critical sector.

The message that this resolution would send is that we are not prepared to defend ourselves in the critical area of trade; that we are not prepared to insist on maintaining an internationally competitive manufacturing sector in this globe.

We need to stand up for steel. We need to stand up for the President. Today, table this resolution and let our trading partners know we stand for fair trade.

Mr. Speaker, the time has come for Congress to rally behind the President and stand up for steel. The passage of H.J. Res. 84 would send a clear message to the world that it is open season on the American manufacturing base. Anything less than the Section 201 relief provided by the President is unacceptable.

The Bush Administration labored over the various options for relief under Section 201 and it represents a milestone shift toward a stronger trade policy that insists on a level playing field of trade for domestic producers. The relief provided by President Bush is balanced, allowed under U.S. Trade Law and consistent with the rules under the World Trade Organization.

A strong tariff-based remedy is the only way to prevent the loss of thousands of additional steel-related jobs and indicate to foreign producers that the United States is not a dumping ground for excess steel products. But today we find ourselves faced with H.J. Res. 84. It's a joke of a proposal that dramatically weakens the tariff remedies by up to 10 percent for certain steel products by tossing aside the President's remedy and instead using the majority view of the International Trade Commission.

Let me assure you Mr. Speaker that weak action would silence many more steel plants, destroying jobs as well as the families and communities who depend on them, all while dealing a blow to our national economy and security. Because of eight years of inaction by the previous administration on this issue, 33 steel companies have declared bankruptcy, which translates into 45,000 steelworkers who have lost their jobs because of this most recent surge in steel.

Make no mistake—I am very strongly protrade, yet when it comes to steel it is distorted trade. And keep in mind that we are already witnessing the positive effects of the relief provided by the President. Imports have slowed and the window has opened to allow the domestic steel industry to recover from the devastating import surge. We are providing the time the domestic steel industry needs to restructure to remain competitive in the tight global steel market.

President Bush labored over this decision, carefully weighing all of the options on the table. His decision was tailored to provide relief to the steel industry while minimizing the negative impact on the rest of the economy. Very simply, the ITC decision was not.

President Bush's remedy reflects thorough consideration given to developing countries, trading partners who have entered into trade agreements with the United States, and to domestic steel mills with specific needs for imported steel products while crafting the tariffs and tariff-rate quota.

Yes, Mr. Speaker, H.J. Res. 84 does reflect the majority opinion of the ITC, while the President's remedy went beyond that.

The same statute that allows the gentleman from Louisiana to bring this resolution before us is the same statute that allowed the President to go beyond the majority opinion of the ITC. According to the U.S. Trade Act of 1974 Section 203, the President has the right to take action that he determines will facilitate efforts by the domestic steel industry to rebound and provide greater economic and social benefits when compared with the costs.

Clearly, the President and I are in agreement—the majority ITC opinion would have been ineffective. It would not return steel prices to their normal pre-crisis levels, and allow American steel companies to make the necessary investments to remain viable and competitive in the future while providing good-paying jobs.

The plight of the steel industry is grim but both Congress and the administration are working hard to give employers the tools they need to be competitive in the global market. Strong relief, coupled with the Bush Administration's continued efforts to address foreign market distortions and global steel overcapacity, will allow domestic steel manufacturers to restructure and regain ground lost to the injurious imports. This will ensure the continued viability of an industry that is a cornerstone of our economy and national security.

The domestic steel industry is at a significant crossroad. By granting relief under Section 201 of the U.S. trade laws, the Bush Administration provided critical breathing space for this strategic industry. Congress must not turn around and apply a choke hold.

I urge my colleagues to vote "yes" on the rule.

□ 1100

Mr. McGOVERN. Mr. Speaker, I yield 2 minutes to the gentleman from Maryland (Mr. CARDIN), a member of the Committee on Ways and Means.

Mr. CARDIN. Mr. Speaker, I share the frustration of the gentleman from Louisiana (Mr. JEFFERSON) on the procedures that are being used here; and I do not speak to the procedures, but I am going to vote to uphold the rule of law and support the resolution.

We have laws that are WTO-consistent. They are here to protect our country from illegally imported products. In December 2001, the International Trade Commission, which is a nonpartisan body, unanimously found that the domestic steel industry had been harmed by the flood of foreign steel imports into the U.S. market since 1998. They found that our country became the dumping ground for illegally imported subsidized steel. As a result, our domestic steel producers were damaged.

In October, Bethlehem Steel Corporation filed for Chapter 11 bankruptcy protection. We now have 33 steel companies in the United States which are in some form of bankruptcy. They are there not because they cannot produce cost-effective steel. They can compete if it was fair competition, but we do not have fair competition because we have excess capacity in the world in producing steel.

The United States made it a policy to reduce its capacity in the last decade. We cannot produce enough steel to meet our domestic needs. We need to import steel. We have done what was necessary to restructure our steel industry on capacity. But it is our trading partners that still have the excess capacity that is causing U.S. steel companies to go in bankruptcy because of the dumped steel.

After we get rid of this resolution, we need to turn our attention to legacy costs because U.S. steel producers need help on the retiree costs if they are going to be able to compete on a fair, level playing field. I hope today's action will not be the last action in supporting the President. It is legacy protection for our steelworkers.

Mr. REYNOLDS. Madam Speaker, I yield 2 minutes to the gentleman from Louisiana (Mr. VITTER).

Mr. VITTER. Madam Speaker, I rise to strongly support American jobs and employment here at home, economic development; and because of those values and because of that focus, I strongly support the Jefferson resolution and active consideration and debate of it.

U.S. port authorities, port terminal operators, longshore labor unions, other U.S. port and transportation industry organizations all have opposed President Bush's decision to impose tariffs and quotas on fairly traded steel products imported into the United States, and all of those entities are home to good, viable, important, well-paying American jobs.

This is not a one-sided debate about American jobs. I am very sympathetic to U.S. steel producers and their employees, but that is not the only place jobs are impacted in terms of this action. They are impacted even more on the negative side by President Bush's decision with regard to ports and other maritime-related commerce.

I know that very well from my home, the New Orleans area. Forty percent of the revenue from the port of New Orleans is directly tied to steel imports. That supports more than 8,600 jobs just within the Greater New Orleans area, and if we look at Louisiana as a whole, there are thousands more, and if we look at the Nation, there are tens of thousands more.

There are far more good American jobs that will be cut, that will be hurt because of this decision than those jobs in the domestic steel industry that will be saved, and that is why I strongly support this resolution and believe that we should have full debate and consideration of it.

Mr. McGOVERN. Madam Speaker, I yield 2 minutes to the gentleman from Louisiana (Mr. JEFFERSON).

Mr. JEFFERSON. Madam Speaker, I thank the gentleman from Louisiana (Mr. VITTER) for his remarks in support of the resolution and in opposition to the process being used here. Many of the speakers who have preceded me have talked about the ITC decision, the merits of it, that it was a 6-member vote, 3 on the Democratic side and 3 on the Republican side supporting it.

If the resolution passes, the ITC decision is in effect. This does not undo the ITC decision because it cannot. Honestly, I wish it could; but it cannot. The ITC decision will stand if this resolution should pass.

What is most egregious this morning is not whether you disagree with the position on the merits of the resolution, but whether we are going to have a debate on this matter or not. That, it seems to me, is the undeniable wrongness that is being accomplished here. I believe it is a shameful process, and in some respects it is a very hypocritical process. I have no problem with the idea that steelworkers need relief. I think the relief ought to come from making sure that we continue our work on eliminating the overcapacity in not only our markets but the world markets.

I think it comes in making sure that the quotas are right for pre-1988 importation levels, and I think it is also important to think about the legacy cost issues which are not addressed by this resolution and the President's action, to see what we can do to make sure that the $13 billion legacy costs that are out there get taken care of. That is not the subject of any of these discussions, yet they are talked about by Members who oppose this resolution as if they were a part of what we are dealing with here.

Today on this vote the only issue is whether there will be a full debate on this question today or not. How in the world can the House oppose a full debate on a matter of such dimensions as the gentleman from Louisiana (Mr. VITTER) has described, as I have described, and as others have described? It is a matter which has put the President's economic advisers on one page opposing the President's action. Some political advisors say it is a good idea, but his economic advisers do not support it. It is not justifiable on any economic ground. Give us a chance to debate. Vote no on the resolution.

Madam Speaker, I will move for the previous question when the vote is called.

Mr. REYNOLDS. Madam Speaker, I reserve the balance of my time.

Mr. McGOVERN. Madam Speaker, I yield 2 minutes to the gentleman from Illinois (Mr. PHELPS).

Mr. PHELPS. Madam Speaker, I rise in support of the rule, and I support the President's decision to impose a 30 percent tariff as a first step in saving our American steel industry and the job and health insurance of Illinois steelworkers and retirees. The American steel industry and steelworkers are in the midst of the worst crisis in many years due to the continued illegal dumping into this country of foreign-made steel. Thousands of steelworkers have lost their jobs, and countless more are in jeopardy.

In my congressional district in central and southern Illinois, the effects have been devastating. I am troubled by foreign producers seeking additional exclusions from the tariffs for specific steel products, despite that these products are available from domestic producers. More disturbing are reported statements that a significant proportion of these exclusion requests will in fact be granted. Further exclusion will turn the section 201 tariffs into Swiss cheese where the holes will allow so much low-priced steel to enter the U.S. market that the industry will receive no meaningful relief.

The domestic steel industry has invested billions of dollars in upgrading and modernizing its facilities, and as a result is among the most productive makers of high-quality steel in the world. No industry, no matter how productive, however, can compete against the onslaught of low price and often unfairly traded steel imports. The section 201 relief that the President announced in March can provide substantial relief to the industry, but this will only occur if the tariffs stay in place without additional exclusions. It is imperative that we send the strongest possible message to deter our trading partners from further illegal dumping, and to give the domestic steel industry the time it needs to recover from its injury. Anything less would be a disservice to those working men and women who are counting on the government to stand up for them. Vote yes on the rule to table House Joint Resolution 84.

Mr. McGOVERN. Madam Speaker, I yield 1 minute to the gentleman from Louisiana (Mr. JEFFERSON).

Mr. JEFFERSON. Madam Speaker, at the end of this discussion, I will urge Members to oppose the previous question. If the previous question is defeated, I will offer an amendment to the rule. The amendment provides that the underlying resolution, H.J. Res. 84, disapproving the action taken by the President under section 203 of the Trade Act, will be considered by the House separately with a clean vote, and not simply tabled as the rule provides.

Madam Speaker, whether or not the Members agree with the President's action on this issue of considerable importance, we should all agree that this deserves to be considered under the process that was set up in section 203 of the Trade Act of 1974. That act allows the House to take an up or down vote on the President's action. This convoluted process of tabling the disapproval resolution before we even get to a vote completely short-circuits the regular process. Vote no on the previous question so we can all vote up or down on H.J. Res. 84.

Madam Speaker, I ask unanimous consent that the text of the amendment be printed in the RECORD immediately before the vote on the previous question.

The SPEAKER pro tempore (Mrs. BIGGERT). Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. McGOVERN. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, this process is not very clear. I wish it were different, but in the end I am going to support the rule because I believe in upholding the President's decision on tariffs because in the end I think it will save jobs in this country.

Madam Speaker, I yield back the balance of my time.

Mr. REYNOLDS. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, I am pleased to have worked on this rule with the gentleman from Massachusetts (Mr. McGOVERN). This is his first rule as a member of the Committee on Rules, but all remember his years of service to Joe Moakley when he was a staffer before being elected to his seat. It is an honor to serve with the gentleman from Massachusetts (Mr. McGOVERN) now as a member of the Committee on Rules.

House Resolution 414 is a unique rule providing for the disposition of House Joint Resolution 84, a resolution of disapproval. Under this rule, H.J. Res. 84 would be automatically tabled. H.J. Res. 84 disapproves the action taken by President Bush to impose temporary tariffs on some types of steel products.

Under the Trade Act, Congress has the authority to disapprove of such actions within 90 days. Such a disapproval resolution is highly privileged, not amendable, and floor debate is limited to 20 hours. To put it simply, a vote in favor of this rule will lay on the table the disapproval resolution and conclude further deliberations. While congressional disapproval is certainly allowed under the statute, this rule recognizes that the circumstances in this case simply do not warrant such action. Laying this resolution on the table does not hurt the steel industry, as we have heard from so many Members on a bipartisan basis from the Steel Caucus. In fact, it will keep intact the President's remedy that the industry favors. The disapproval resolution could potentially be even more harmful to the industry. This disapproval resolution does not eliminate tariffs on steel imports either. It merely replaces one set of tariffs with another.

Madam Speaker, let me reiterate that a vote in favor of this rule will table the disapproval resolution, keep intact the President's current remedy, and conclude debate on this issue. I urge an aye vote. I urge my colleagues to table the resolution by voting aye.

The material previously referred to by Mr. JEFFERSON is as follows:

AMENDMENT TO H. RES. 414

Strike all after the resolved clause and insert:

That upon the adoption of this resolution it shall be in order to consider in the House the joint resolution (H.J. Res. 84) disapproving the action taken by the President under section 203 of the Trade Act of 1974 transmitted to the Congress on March 5, 2002. The joint resolution shall be considered as read for amendment. The previous question shall be considered as ordered on the joint resolution to final passage without intervening motion except one hour of debate on the joint resolution equally divided and controlled by the chairman and ranking minority member of the Committee on Ways and Means.

Mr. BONIOR. Madam Speaker, if you want to know how foreign steel is affecting our communities just ask Ernie Ronn. Ernie is a retired iron ore miner from the Upper Peninsula of Michigan.

If you ask Ernie, or thousands of other iron ore and steel workers how steel dumping is affecting our community, they'll all tell you the same thing—this foreign steel is killing us.

Last July, thousands of iron ore workers in Marquette, Michigan held a rally which filled an entire indoor stadium. Later the workers, their families, children and business owners filled the streets of Marquette.

They know that when a mine shuts down in the U.P. or a steel factory closes in River Rouge you cripple an entire community, you erode the tax base, police and fire services suffer, and no one goes unaffected.

The citizens of Marquette marched because their jobs, their community, and their future was—and still is—at stake.

At that rally a year ago, Ernie Ronn told us that this was the fourth demonstration he'd been to. He said, "my grandfather and your grandfather, they came to this country—from Poland, Finland, Slovenia, Ukraine, Italy and Germany—to make better lives for you and I. That's what we want to do for our kids, make it a better world. It's a common thread for people. We've built a great community, and now we must keep it strong. We shouldn't have to keep trying to get that message across."

While Mr. Ronn said those words nearly a year ago, they couldn't be more apt today. It's time to end this debate. The President has taken action; his decision has already been implemented. It's time to move forward.

For the iron ore workers in Marquette and the steelworkers down river of Detroit this is a matter of putting food on the table, paying the mortgage or rent, and keeping their families healthy and safe. Vote for this rule to table the resolution.

Mr. BACHUS. Madam Speaker, I rise in support of the rule to table this misguided resolution.

If we pass H.J. Res. 84 we're going to be sending a message to the rest of the world. And that message is: Foreign countries, go ahead. Flood our markets. Illegally dump your products here. Because the United States is not going to enforce our trade laws. We'll be declaring "open season" on America's manufacturing base and on American workers.

We cannot let that happen. We must stop it. And I'm proud that our President, George W. Bush, took decisive action to restore fair competition for our steelworkers. If American steelworkers are allowed to compete on a level playing field, they will win. But if we do not restore that level playing field, more American steelworkers will lose their jobs.

This problem has been going on for years, and President Bush showed real leadership when he put these tariffs on. This action is absolutely necessary to defend steelworker jobs against illegally traded steel and ensure America has a steel industry five and ten years from now.

Madam Speaker, I testified before the International Trade Commission on several occasions about the illegal import crisis and its effect on our steel-producing areas like my home State of Alabama. I told them about the dangers this crisis presents to our national security. And in this time of war, what is more important than the security of our Nation and its ability to defend itself?

Vote yes on the rule. Stand with our President. And stand up for the hardworking citizens who built this country into the great and powerful Nation it is today.

Mr. COSTELLO. Madam Speaker, I rise today in opposition to H.J. Res. 84, to disapprove the President's steel tariffs.

Our domestic steel industry is currently in a crisis situation. The fundamental cause of this crisis is massive foreign overcapacity, which has caused the United States to become a dumping ground for world excess steel products. As a result of this, since 1997, 33 steel companies have filed for bankruptcy, affecting over 62,000 American steel workers. Almost 90 percent of the capacity reduction occurred in 2001.

Our domestic steel industry is vital to our national security. American Armed Forces depend on American steel for their planes, tanks and ships. A dependence on foreign steel could be catastrophic for our national defense.

Last year, I joined my colleagues on the Congressional Steel Caucus in urging the President to implement a Section 201 investigation by the International Trade Commission to determine if our domestic markets had been harmed by illegal dumping. In the fall, I testified before the ITC to express my concerns regarding the steel crisis. The ITC ruled unanimously that the steel industry had indeed been harmed.

In March of this year, the President announced his intention to impose tariff safeguards of up to 30 percent on major steel products. While the President could have imposed tariffs of up to 40 percent, I am hopeful that the 30 percent tariff will be sufficient to give the industry a chance at recovery, and am pleased that the President did decide to take action. His actions sent a strong message that we will no longer tolerate the unfair trade practices which have harmed the steel industry.

Madam Speaker, voting no on this resolution is paramount to the U.S. domestic steel industry, and I urge my colleagues to join me with a no vote.

Mr. REYNOLDS. Madam Speaker, I yield back the balance of my time, and I move the previous question on the resolution.

The SPEAKER pro tempore. The question is on ordering the previous question.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. JEFFERSON. Madam Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

Pursuant to clause 8 and 9 of rule XX, the Chair will reduce to 5 minutes the minimum time for electronic voting, if ordered, on the question of adoption of the resolution, and thereafter on the motion to suspend the rules and concur in Senate amendments to H.R. 3525 debated yesterday.

The vote was taken by electronic device, and there were—yeas 355, nays 62, not voting 17, as follows:

□ 1140

Messrs. WATT of North Carolina, PASTOR, PRICE of North Carolina, HOLT, SANDERS and WU, and Ms. WOOLSEY and Mrs. NAPOLITANO changed their vote from "yea" to "nay."

Messrs. FARR of California, BACA, POMEROY, and SCHIFF, and Ms. MILLENDER-McDONALD, Ms. SOLIS, Ms. SANCHEZ, and Mrs. MALONEY of New York changed their vote from "nay" to "yea."

So the previous question was ordered.

The result of the vote was announced as above recorded.

GENERAL LEAVE

Mr. REYNOLDS. Madam Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and include extraneous material on House Resolution 414.

The SPEAKER pro tempore (Mrs. BIGGERT). Is there objection to the request of the gentleman from New York?

There was no objection.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

RECORDED VOTE

Mr. JEFFERSON. Madam Speaker, I demand a recorded vote.

A recorded vote was ordered.

The SPEAKER pro tempore. This will be a 5-minute vote.

The vote was taken by electronic device, and there were—ayes 386, noes 30, answered "present" 1, not voting 17, as follows:

☐ 1151

Mr. HORN changed his vote from "no" to "aye."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

So House Joint Resolution 84 was laid on the table.

ENHANCED BORDER SECURITY AND VISA ENTRY REFORM ACT OF 2001

The SPEAKER pro tempore (Mrs. BIGGERT). The unfinished business is the question of suspending the rules and concurring in the Senate amendments to the bill, H.R. 3525.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Wisconsin (Mr. SENSENBRENNER) that the House suspend the rules and concur in the Senate amendments to the bill, H.R. 3525, on which the yeas and nays are ordered.

This will be a 5-minute vote.

The vote was taken by electronic device, and there were—yeas 411, nays 0, answered "present" 2, not voting 21, as follows:

☐ 1201

So (two-thirds having voted in favor thereof) the rules were suspended and the Senate amendments were concurred in.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Stated for:

Mr. TANCREDO. Mr. Speaker, during rollcall No. 131, on the motion that the House suspend the rules and agree to the Senate amendments to H.R. 3525, I inadvertently voted "present." It was my desire to have my vote recorded as "yea," and I ask that the RECORD reflect that.

Mr. COX. Mr. Speaker, on rollcall No. 131, I was absent for the five-minute rollcall vote. Had I been present I would have voted "yea."

☐ 1200

CORRECTING THE ENROLLMENT OF H.R. 3525, ENHANCED BORDER SECURITY AND VISA ENTRY REFORM ACT OF 2001

Mr. LATOURETTE. Madam Speaker, I ask unanimous consent to take from the Speaker's table the Senate concurrent resolution (S. Con. Res. 106) to correct the enrollment of H.R. 3525, and ask for its immediate consideration in the House.

The Clerk read the Senate concurrent resolution, as follows:

S. CON. RES. 106

Resolved by the Senate (the House of Representatives concurring), That, in the enrollment of the bill (H.R. 3525) to enhance the border security of the United States, and for other purposes, the Clerk of the House of Representatives shall make the following corrections:

(1) Strike section 205.

(2) In the table of contents of the bill, strike the item relating to section 205.

The SPEAKER pro tempore (Mrs. BIGGERT). Is there objection to the request of the gentleman from Ohio?

There was no objection.

The Senate concurrent resolution was concurred in.

A motion to reconsider was laid on the table.

YUCCA MOUNTAIN REPOSITORY SITE APPROVAL ACT

Mr. TAUZIN. Madam Speaker, pursuant to section 115(e)(4) of the Nuclear Waste Policy Act of 1982, I call up the joint resolution (H.J. Res. 87) approving the site at Yucca Mountain, Nevada, for the development of a repository for the disposal of high-level radioactive waste and spent nuclear fuel, pursuant to the Nuclear Waste Policy Act of 1982.

The SPEAKER pro tempore. The Clerk will report the joint resolution.

The Clerk read the joint resolution, as follows:

H.J. RES. 87

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That there hereby is approved the site at Yucca Mountain, Nevada, for a repository, with respect to which a notice of disapproval was submitted by the Governor of the State of Nevada on April 8, 2002.

UNFUNDED MANDATES POINT OF ORDER

Mr. GIBBONS. Madam Speaker, I rise to make a point of order against consideration of H.J. Res. 87.

The SPEAKER pro tempore. The gentleman will state his point of order.

Mr. GIBBONS. Madam Speaker, pursuant to section 425 of the Congressional Budget Act and Impoundment Control Act of 1974, I make a point of order against consideration of H.J. Res. 87.

Section 425 states that a point of order lies against legislation which either imposes an unfunded mandate in excess of $58 million against State and local governments or when the committee chairman does not publish, prior to floor consideration, a CBO cost mandate of any unfunded mandate in excess of $58 million against State and local entities.

H.J. Res. 87 will in effect set the Nuclear Waste Policy Act as amended in 1987 into action. The bill reads in part, "Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, that there hereby is approved the site at Yucca Mountain, Nevada for a repository."

In other words, Madam Speaker, passage of this resolution will green-light the Yucca Mountain project, thus allowing for shipment of high level nuclear waste beginning in the year 2010 and continuing for the next 38 years. Thus, passage of H.J. Res. 87 clearly places an unfunded mandate on our taxpayers.

The SPEAKER pro tempore. The gentleman from Nevada (Mr. GIBBONS) makes a point of order that the joint resolution violates section 425(a) of the Congressional Budget Act of 1974.

In accordance with section 426(b)(2) of the Act, the gentleman has met his threshold burden to identify the specific language in the joint resolution on which he predicates the point of order.

Under section 426(b)(4) of the Act, the gentleman from Nevada (Mr. GIBBONS) and a Member opposed each will control 10 minutes of debate on the question of consideration.

Pursuant to section 426(b)(3) of the Act, after that debate the Chair will put the question of consideration, to wit: "Will the House now consider the joint resolution?"

The gentleman from Nevada (Mr. GIBBONS) will be recognized for 10 minutes and the gentleman from Louisiana (Mr. TAUZIN) will be recognized for 10 minutes.

The Chair recognizes the gentleman from Nevada (Mr. GIBBONS).

Mr. GIBBONS. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, passage of H.J. Res. 87 will undoubtedly put a process in place that will exceed the $58 million threshold outlined in section 425 of the act. Instead of looking at what the CBO score tells us, let us look at what it does not tell us. What the CBO is unable to tell us is how much it will cost our local community to implement the Nuclear Waste Management Act, as far as preparing our State and local governments for the enormous cost of safety monitoring these tens of thousands of high level nuclear waste shipments that are going to occur throughout our community.

Madam Speaker, by the CBO's inability to score the total cost of this project, again a project receives a green light upon passage of the legislation currently before us, there might as well not even be a CBO score. The chairman of the committee has fulfilled his obligation to publish a cost estimate for H.J. Res. 87; however, the CBO cost only gives the House the recommended 5-year cost projection. As we know, under the Nuclear Waste Policy Act, shipments of high level nuclear waste to Nevada will not even begin until the year 2010, about 8 years from now. With the CBO unable to give a cost estimate on the Yucca Mountain project's total price tag, passage of H.J. Res. 87 provides the Federal government a blank check to proceed with this project.

In the end, the Federal Government will demand that our State and local governments spend billions of dollars over the next four decades to prepare for those shipments that will traverse their respective States and districts. Neither the Department of Energy nor Congress has anticipated or provided for the massive costs that will be incurred by States and local governments if we pass this legislation.

The paltry $17 million budgeted by the Department of Energy in its fiscal year 2003 budget will not come close to covering these costs. States and local governments will be left with billions of dollars in unfunded expenses which would not be incurred except for the Federal high level radioactive waste program. Some may counter this argument by saying that we can recommend on the Nuclear Waste Fund, established by Congress, to pay for the cost of Yucca Mountain.

Well, consider this argument: Current estimates put the Nuclear Waste Fund at about $17 billion. That balance pales in the comparison to the total construction and compliance costs at Yucca Mountain of almost $60 billion.

What is more, the nuclear power industry faces an uncertain economic future. Let me point out a few of the problems facing the industry. The industry is supposed to be responsible for paying the costs associated with the nuclear waste disposal. No nuclear power plants have been built since 1978.

More than 100 reactors have been canceled, including all ordered after 1973. The nuclear power industry's troubles include nuclear high power plant construction costs, relatively low costs for competing fuel, public concern about nuclear safety and waste disposal, as well as regulatory compliance costs.

Electric utility restructuring, which is currently under way in several States, could also increase the competition faced by existing nuclear plants.

High operating costs have resulted during the past decades in the shutdown of nearly 20 U.S. commercial reactors before the completion of their 40-year license operating period.

Madam Speaker, the viability of the Nuclear Waste Fund is directly related to the continued viability of the nuclear utility industry. Taxpayers are not supposed to fund the program. The program is supposed to be funded by the nuclear energy industry and the ratepayers who purchase and benefit from their electricity.

The price tag of this project will be tremendous. Not in the next 5 years, as outlined by the CBO score, but in 8 years, and the subsequent 4 decades beyond that.

Madam Speaker, 8 years from now the Department of Energy will begin filling your roads and highways and railways with high level nuclear waste. The cost to even begin preparing our first responders will be staggering, let alone the cost of any clean-up associated with one of 400 accidents the Department of Energy tells us that we are to prepare for when they begin these shipments.

I ask that delegates call their State governors and ask does room exist in their budget to meet these needs and these expensive costs? Ask your local county commissioners can they afford the increased costs of protecting these shipments? Ask city council members in your district will they have room to budget in their budget for these increased costs? Ask your local fire fighters, police officers, State troopers, your emergency response teams, EMTs and haz-mat crews, will they be able to afford such costs?

Again, the DOE tells us that accidents happen. This is not spilled milk. An accident involving shipments of high level nuclear waste requires more than a mop and bucket of water to clean up. Imagine the cost of the training just to prepare for a potential response to one of these accidents.

Madam Speaker, H.J. Res. 87 is an unfunded mandate. The CBO cannot tell us whether or not carrying out the Nuclear Waste Policy Act, by passing this resolution, will exceed the $58 million threshold. And because CBO cannot give us this information, we must assume that the threshold can and will be exceeded.

Now some tell us not to worry, that DOE and Congress will ensure the necessary funding will be provided at the right time. If this is the case, Madam Speaker, where are we going to get the money? What programs will have to be cut to pay for this irresponsible policy? Will we cut the Department of Defense budget as we carry out this long, protracted war against terrorism? Will we cut out Medicare or any possibility of implementing a prescription drug benefit for our seniors? Or will we allow ourselves to drive the Social Security trust fund at the same time our baby boomer generation sits on the brink of retirement?

Assuming the DOE begins shipment in 2010 as planned, Congress would have to budget $3.6 billion per year beginning with this year's budget in order to provide adequate funding for States. The fact is, Madam Speaker, as with every other issue we debate in this body, the money has to come from somewhere and somewhere always leads to the taxpayers in this great country.

Madam Speaker, I urge my colleagues to vote against this unfunded mandate and support the point of order I just made.

Madam Speaker, I reserve the balance of my time.

The SPEAKER pro tempore. Is the gentleman from Louisiana (Mr. TAUZIN) opposed to the point of order?

Mr. TAUZIN. Yes, Madam Speaker, I am.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Louisiana for 10 minutes.

Mr. TAUZIN. Madam Speaker, I yield myself such time as I may consume. I rise in strong opposition to this effort to block consideration of this very bipartisan consideration.

Madam Speaker, I know the gentleman well and he is my friend and I know his intentions are good. He is doing everything that he thinks is in the best interest of his State. And I think we all can respect that. But, very frankly, this point of order is completely without foundation and it is clearly just an effort to obstruct consideration of House Joint Resolution 87, a resolution that was reported out of the Committee on Energy and Commerce by a vote of 41 to 6, an incredibly bipartisan vote.

When my committee filed its report on House Joint Resolution 87, it included a cost estimate from the Congressional Budget Office. This is it here. And the Congressional Budget Office report literally satisfies one of the requirements under the Unfunded Mandate Reform Act. This CBO cost estimate thoroughly reviewed the budget impacts of this resolution, and it did not identify any new mandates in this resolution that would fall under the Unfunded Mandates Reform Act.

The CBO cost estimate, in fact, further clarified that even if some minor costs of State and local governments did fall under the Unfunded Mandates Reform Act, these costs would not exceed the thresholds established under UMRA.

Let me quote from the CBO estimate directly: "H.J. Res. 87 could increase the costs that Nevada and some local governments would incur to comply with certain existing Federal requirements. The Unfunded Mandate Reform Act, UMRA, is unclear about whether such costs would count as new mandates under UMRA. In any event, CBO estimates that the annual direct costs incurred by State and local governments over the next 5 years would total significantly less than the threshold established in the law ($58 million in 2002, adjusted annually for inflation)."

□ 1215

In other words, CBO is saying we are not sure we even count those costs; but if we did, they do not meet the threshold of the Unfunded Mandates Reform Act.

Finally, CBO notes that H.J. Res. 87 contains no new private sector mandates as defined in the Unfunded Mandates Reform Act. Madam Speaker, the CBO report speaks for itself. It is very, very clear.

We may hear that the real costs that should be considered are those that occur after the 5-year period that CBO has looked at. Well, for better or worse, whether we like it or not, whether we think the law ought to be different, our rules only require CBO to look at 5 years and not into the indefinite future; and what CBO has told us in this report is that there are simply no costs that cross the Unfunded Mandates Reform Act limits, the thresholds for those 5 years.

The law is satisfied. Our rules are satisfied. We ought to proceed with the consideration of this important resolution.

The Chair will put the question when this debate is over on this point of order, and the question will be whether we should proceed or not. I will ask all Members who support this resolution to vote "yes." We should proceed because this point of order is completely without foundation.

Madam Speaker, I reserve the balance of my time.

Mr. GIBBONS. Madam Speaker, I yield myself such time as I may consume.

I will remind my good friend and colleague, the chairman of the committee, that shipments will not begin until 8 years from today, not the 5 years as recommended in the CBO score.

Madam Speaker, I yield the balance of my time to the gentlewoman from Nevada (Ms. BERKLEY).

Ms. BERKLEY. Madam Speaker, I thank the gentleman from Nevada (Mr. GIBBONS) for yielding me the time.

I find it very ironic that this Congress is willing to put nuclear waste in a hole in the Nevada desert for 10,000 years, yet we are talking about a 5-year unfunded mandate.

I rise in strong support of the gentleman's point of order. It is bad enough that we are set to vote on a resolution that will approve the Yucca Mountain project that has costs ranging from $56 billion to $308 billion. Nobody knows exactly how much this project will cost. This money is supposed to come from the nuclear waste fund, but the fund only has $17 billion in it. Where is the rest of this money going to come from? Are the proponents of this foolhardy project proposing to raise taxes, dip into the Social Security trust fund? This proposal only gets worse.

If we approve Yucca Mountain, more than 108,000 shipments of deadly nuclear waste will be rolling across our Nation's highways and railroads, through 43 States for the next 38 years on its way to Yucca Mountain. As it passes through each of the 703 counties along the proposed transportation routes, local law enforcement and first responders must be prepared for the worst. And if the worst happens, where is the money going to come from to clean up the mess, the destruction, the devastation?

I see no provision in the budget to cover these enormous costs. This is an unfunded mandate to our local governments. We know from the DOE's own assessment that we can expect anywhere from 50 to over 300 accidents. Our firefighters and first responders must be specially trained to deal with these nuclear waste shipments and the accidents that will occur.

The nuclear waste fund does not have the money to pay for this, so the unknown costs are going to have to be made up by local government and the American taxpayers. We will be asking citizens who have no part in creating nuclear waste and have no benefits from nuclear energy to fund the nuclear industry so they can move dangerous nuclear waste through their own backyards.

If we approve this resolution, the American taxpayer will once again be asked to foot the bill for nuclear energy. There is not enough money in the nuclear waste fund to cover the costs. So sometime in the next 10 years we will be either cutting corners when it comes to safety, raising taxes, or raiding Social Security.

None of these alternatives are acceptable to me, and I doubt outside the nuclear industry and the nuclear industry's friends here in the United States Congress that these alternatives would not be acceptable to anyone else in our country.

Yucca Mountain is a financial boondoggle that flies in the face of fiscal responsibility. I urge my colleagues to support this point of order.

Mr. TAUZIN. Madam Speaker, I yield such time as he may consume to the gentleman from Texas (Mr. BARTON), the chairman of the Subcommittee on Energy and Air Quality.

Mr. BARTON of Texas. Madam Speaker, I thank the gentleman from Louisiana (Mr. TAUZIN) for yielding me the time.

Obviously, I rise against this point of order of my good friend from Nevada. I am shocked, shocked and amazed, that he would think that the gentleman from Virginia (Mr. BOUCHER) and I would present a bill on the floor that had an unfunded mandate.

I am one of the most conservative Members of this body, and I am joined by one of the most distinguished conservative Members, he would say moderate, progressive, Members on the other side of the aisle; and for us to bring forward an unfunded, an unfunded mandate is just beyond the pale.

I would point out that since we passed a Nuclear Waste Policy Act in 1982, we have collected over $15 billion in the nuclear waste fund. Every time a nuclear plant generates a kilowatt of electricity, one mil, which is 1/10 of a cent, goes into this fund; and we are collecting about $750 million a year as we speak into this fund. So this is far from being an unfunded mandate. This is the most overfunded, unmet, unobligated, unconstructed thing that we could have ever done in Federal Government.

I would also point out, as my good friend, the full committee chairman, has already pointed out, that when we passed this resolution on a bipartisan basis out of the committee, we sent it to the Congressional Budget Office; and they have given us the requisite report that the chairman has a copy of that says quite clearly that the costs of this for the next 5 years are well under the threshold of the Unfunded Mandate Act.

There are a number of reasons for people to be opposed to the underlying resolution. My good friend from Nevada is certainly entitled to oppose it, but there is no reason to support the point of order that it is an unfunded mandate. Nothing, Madam Speaker, could be further from the truth.

When it comes to the end of the debate, I certainly hope that the Speaker will throw out this scurrilous point of order so that we can get on with the debate, have a debate on the underlying bill and then hopefully support the underlying bill that the gentleman from Virginia (Mr. BOUCHER) and myself have put to the body.

Mr. TAUZIN. Madam Speaker, I yield myself the remaining time and ask that we put the question with the request that all Members who support this resolution vote "yes" when the Speaker puts the question.

Madam Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mrs. BIGGERT). The question is: Will the House now consider House Joint Resolution 87.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. GIBBONS. Madam Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 308, nays 105, not voting 21, as follows:

□ 1247

Messrs. McNULTY, GALLEGLY, KUCINICH, INSLEE, UDALL of Colorado, STARK, Ms. JACKSON-LEE of Texas, and Mrs. KELLY changed their vote from "yea" to "nay."

Messrs. CALVERT, HINOJOSA, and HERGER changed their vote from "nay" to "yea."

So the question of consideration was decided in the affirmative.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

REQUEST TO TABLE H.J. RES. 87

Ms. BERKLEY. Mr. Speaker, I ask unanimous consent that H.J. Res. 87, the Yucca Mountain Repository Site Approval Act, be tabled.

The SPEAKER pro tempore (Mr. HASTINGS of Washington). Is there objection to the request of the gentlewoman from Nevada?

Mr. TAUZIN. Reserving the right to object, Mr. Speaker, I yield to the gentlewoman under my reservation to explain her unanimous consent request.

Ms. BERKLEY. Mr. Speaker, the General Accounting Office, the independent investigative arm of Congress, recently recommended that the Yucca Mountain project not be approved at this time. The GAO recommended that the government solve 293 outstanding scientific problems before the project be approved. After careful examination of these scientific problems, the GAO estimated that the Department of Energy would need at least 4 more years, until 2006, to resolve these problems. The report concluded, "We question the prudence and practicality of making such a recommendation at this time given the express statutory time frames for a license application and the significant amount of work remaining to be done."

In addition, there are still enormous and serious questions regarding the transportation of nuclear waste. The casks that will transport the waste have not yet even been created, and no cask has been tested full scale. In light of 9/11, several government agencies have begun a review of the safety and security of nuclear waste transport. The result of these reviews is not yet complete. It is clear that we are moving ahead on this resolution prematurely. It is not in the best interest of the public, and it does not reflect sound public policy.

Mr. Speaker, I ask unanimous consent that the Yucca Mountain Repository Site Approval Act be tabled until 2006 when the scientific studies are completed.

Mr. TAUZIN. Mr. Speaker, I insist on my objection.

The SPEAKER pro tempore. Objection is heard.

Pursuant to section 15(e)(4) of the Nuclear Waste Policy Act of 1982, the gentleman from Louisiana (Mr. TAUZIN) and a Member opposed each will control 1 hour.

Mr. MARKEY. Mr. Speaker, I claim the time in opposition.

The SPEAKER pro tempore. Is the gentleman opposed?

Mr. MARKEY. Yes, Mr. Speaker.

The SPEAKER pro tempore. The gentleman from Massachusetts will control 1 hour.

The Chair recognizes the gentleman from Louisiana (Mr. TAUZIN) for 1 hour.

Mr. TAUZIN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, today the Chair will consider one of the most important public health and safety issues facing the Nation, the development of a centralized and permanent geologic disposal site for our country's nuclear waste, wastes that are laying around all over the country in temporary storage at nuclear facilities.

At present, high level nuclear wastes are stored in 77 sites in more than 30 States in every region of the country. Most of these waste sites are located near a nuclear power plant where spent nuclear fuel is carefully stored, and nuclear waste storage sites are also located at former DOE weapons production facilities like the Hanford site, where liquid radioactive waste is stored in tanks.

Every one of these waste sites shares one common aspect: They were all designed for temporary storage of these dangerous wastes, not for long-term storage.

The Yucca Mountain site is located 90 miles away from Las Vegas. It is isolated on remote Federal land of the Nevada test site, 14 miles away from the closest residence, and it is safe and secure. The waste will be stored more than 600 feet underground, and more than 500 feet above the water table. The waste will be held in steel containers, and the containers will be placed under a titanium shield.

Further, not only is the air space around Yucca already restricted, but an existing security force at the Nevada test site will protect the area. This is a comprehensive defense-in-depth approach.

The Committee on Energy and Commerce held an exhaustive hearing on this issue last month. We heard from witnesses representing all sides of the Yucca Mountain debate, including scientists, politicians, regulators, and public interest groups. Not a single witness identified a significant scientific or technical reason not to move forward with this important project.

They also gave me an opportunity to clarify some of the concerns frequently expressed by the opponents of the Yucca Mountain site, and the hearing was very good for that purpose. For example, opponents of Yucca Mountain want us to stop this important project because the Nuclear Regulatory Commission has identified certain unresolved technical issues. However, the NRC had testified and the DOE has agreed that the DOE is on a path toward resolving every single one of those technical issues, and the Secretary of Energy committed to answer every one before licensing is possibly complete or approved. In fact, 60 of those issues should be resolved this year.

Further, the NRC will not approve the construction license for Yucca

Mountain unless every single one of those issues are thoroughly and properly addressed. The opponents of Yucca Mountain will argue that we should stop the project because the Nuclear Waste Technical Review Board believes the science of Yucca Mountain is weak to moderate. However, at the hearing the board pointed out that no individual technical issue would automatically eliminate Yucca Mountain. The Nuclear Waste Board also testified that confidence in DOE science estimates can be increased.

I understand that this issue is of great concern to the elected leaders of Nevada, and I sympathize with their plight. I hope that the debate today can focus on a discussion of the facts rather than an effort to manufacture unrealistic and implausible fears in the minds of the public regarding this project.

A vote in favor of H.J. Res. 87 will simply move the Yucca Mountain project forward to the next stage of review; but even with congressional approval of this resolution today, construction will not proceed at Yucca Mountain unless it passes strict health and safety requirements set up by EPA and the Nuclear Regulatory Commission.

On February 15, 2002, the President recommended on the advice of DOE Secretary Spencer Abraham that Congress approve the Yucca Mountain site even if the State of Nevada disapproves. Based upon our review and understanding of DOE's extensive scientific work, I am prepared to support this important policy decision, and I hope Members do, too.

Mr. Speaker, I commend the gentleman from Texas (Mr. BARTON), the chairman of the subcommittee, for his extraordinary work on this, and the ranking member, the gentleman from Virginia (Mr. BOUCHER) for their cooperation, and the gentleman from Michigan (Mr. DINGELL) for his support for our effort. I want all Members of this House to know this bill came out of our committee by a 41–6 bipartisan vote. It is sponsored and cosponsored in a bipartisan way. It is supported in a bipartisan way.

This is the right thing for America. And we stand as Americans united to get this important resolution passed so that we can set our nuclear industry back on a current safe path; and, indeed, make room for future improvements in the nuclear industry in this country, as well as the environmental cleanup of sites that demand early rather than late attention.

Mr. Speaker, I ask unanimous consent to yield 20 minutes to the gentleman from Virginia (Mr. BOUCHER), the ranking member of the Subcommittee on Energy and Air Quality for purposes of control.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. TAUZIN. Mr. Speaker, I reserve the balance of my time.

Mr. MARKEY. Mr. Speaker, I yield myself 4 minutes.

Mr. Speaker, this is a historic occasion. Twenty years ago on this floor we passed the Nuclear Waste Policy Act. In that bill there was a decision made by Congress that there would be 5 geologic repositories that would be studied, and ultimately 2 would be selected, 1 on the east of the Mississippi and 1 to the west of the Mississippi.

But between 1982 and 1987, two factors raised their heads: One, parochialism. The States of Texas, of Washington, of Louisiana, of Tennessee, of New Hampshire, in other words, all of the States that were being considered that had powerful political delegations, said take our States off the list. And the search was begun by this body to find one State that had just two Members of Congress and two Senators because that is the way ultimately in 1987 when the Congress revisited the issue that it was resolved; not on scientific grounds, not on the basis of finding the best geologic repositories east and west of the Mississippi, but rather selecting the smallest State with the smallest number of elected representatives, and that turns out to be the State of Nevada, which was delivered the nuclear queen of spades by every other State that did not want it in their State.

Now, what happens? Well, then ultimately any Member who opposes science being trumped by politics is called anti-nuclear by the States that do not want it in their States, even though in most of those States they have nuclear power plants. We wind up in this Alice-in-Wonderland debate where the poor State of Nevada is here now raising the point that the Nuclear Regulatory Commission has identified the fact that there are still 293 unresolved environmental health and safety issues, and asking the Congress and asking the administration to wait until those issues are resolved until any movement forward is made on the issue.

But because of a second major issue, special interest, that is the nuclear power industry, the Congress, as they did in 1982, as they did in 1987, says no, we cannot wait. We must now continue forward. It is this indifference to the very legitimate concerns that are being raised by the State of Nevada which should be most troubling to Members here today.

The nuclear power industry may want this. Other States that could have been considered for the repository, and might have been better long term 10,000-year locations for the waste, may want this. States that have 6 or 8 nuclear reactors in them but do not want the nuclear repository and want the waste out of their State may want this, but it is wrong for us to move forward today when we can move forward next year or the year after if the 293 environmental health and safety questions have not been resolved, because the decision we make today creates an inexorable pressure on investments already made, decisions already made that will buy us those environmental health and safety decisions over the next 2 and 3 years, and ultimately bad decisions will be made that will compromise the environment.

□ 1300

Mr. BOUCHER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of the pending measure and urge its approval by the House. The legislation takes the next necessary step in a statutorily prescribed process for establishing a site for the permanent disposal of high level nuclear waste. I want to begin these remarks by commending Chairman TAUZIN of the full Committee on Energy and Commerce, subcommittee Chairman BARTON, and also the gentleman from Michigan (Mr. DINGELL), the ranking member of our full committee, for their diligence and their persistence in taking this necessary step. I am a cosponsor with them of the legislation which is pending that will move the process forward.

A permanent secure site for the disposal of high level waste must be established. Forty-five thousand metric tons of waste now reside on-site at nuclear reactors in 72 locations across the Nation. This temporary siting of spent fuel at reactor sites poses both a security threat and an environmental threat. In my view, arguments that previously had been made that the permanent disposal of waste in dry cask storage at these 72 reactor sites as an alternative to the establishment of a secure central repository for the waste hold far less credence today after September 11 than they did before. I think we really have no alternative to the development of a central, secure disposal site. The passage of the measure that is now before the House is essential to the development of that site.

While arguments will be made that more could be learned about the proposed Yucca Mountain site, I would note that the recommendation of the Secretary of Energy in January of this year that Yucca Mountain be chosen for permanent waste disposal is based on fully 20 years of scientific investigation. The site characterization work required under section 113 of the Nuclear Waste Policy Act has been carried out. The public hearings focusing on the Yucca Mountain site required by section 114 of the act have been held. If Congress passes the legislation now pending before the House, which overrides the disapproval of the President's site designation that was issued by Governor Guinn of Nevada on April

8, construction activities could not commence at the site until the Nuclear Regulatory Commission completes a full technical and scientific review of the site and also a review of the proposed disposal methods at the site and then issues a license for site construction.

No site will ever be found to be perfect for the disposal of high level nuclear waste, but I am persuaded that the studies which have already been conducted and the Nuclear Regulatory Commission review that is still to come provides sufficient assurances that the appropriate nature of the Yucca Mountain site has been established and will justify approval of the legislation now before us.

Mr. Speaker, I also want to take this opportunity to note that the Committee on Energy and Commerce has a long tradition of addressing many of our Nation's most important public policy challenges in a thoughtful and a bipartisan manner. With the Subcommittee on Energy and Air Quality having approved this resolution by a vote of 24–2 and the full Committee on Energy and Commerce having approved it by a majority of 41–6, nowhere has our committee's bipartisan tradition and cooperation been more in evidence than in our efforts to resolve the Nation's nuclear waste disposal problems. For that bipartisan cooperation, I again want to commend the committee's leadership on both sides of the aisle for moving expeditiously on this matter.

Mr. Speaker, I urge approval of this resolution by the House.

Mr. Speaker, I reserve the balance of my time.

Mr. MARKEY. Mr. Speaker, I yield 7 minutes to the gentlewoman from Nevada (Ms. BERKLEY).

Ms. BERKLEY. Mr. Speaker, let me begin by expressing the outrage felt throughout Nevada about this ill-advised proposal. Eighty-three percent of the people I represent vehemently oppose Yucca Mountain. Nevada does not use nuclear energy. Nevada does not produce one ounce of nuclear waste. Yet Nevada is being asked to carry the weight of a burden we have had no part in creating.

I grew up in Las Vegas. Long before I came to serve in Congress, I have been fighting against this proposal to transport 77,000 tons of toxic nuclear waste across 43 States to be stored for 10,000 years in a hole in the Nevada desert.

The original Nuclear Waste Policy Act charged the Department of Energy with the task of studying multiple potential repository sites to determine which would be the best to provide geologic containment of nuclear waste. But in 1987, without the benefit of any completed scientific study, Congress passed the so-called "Screw Nevada" bill which made the most political of decisions. It singled out Yucca Mountain, Nevada as the only site to be studied. There was no science, there was no reason, except that Nevada was a small State with a small congressional delegation.

Almost immediately, it became apparent that Yucca Mountain could not contain the waste by natural geologic barriers as required by law, so the DOE simply changed the rules. The waste would be stored in man-made canisters for 10,000 years. Then it was discovered that those canisters would quickly corrode, so they added titanium drip shields. Even with all of these man-made barriers, there still had to be gerrymandering groundwater regulations to set up contamination zones.

We have deviated so far from the original intent of the proposal. We have allowed the DOE and the EPA to set standards that endanger the environment and human health. Yet no one seems to be willing to pull the plug on this foolhardy idea.

This Nation has a serious waste problem. Every year our reactors create 2,000 tons of toxic nuclear waste. The only method of disposal this country has ever seriously studied is shipping the waste across the country and dumping it 90 miles outside of my hometown of Las Vegas, the fastest growing city in the country.

But there are major problems with this plan. A central repository would not mean, let me emphasize, not mean that reactor sites around the country would be cleaned out. That is a myth. According to the government's shipping plans, in the year 2036, when Yucca Mountain is filled to capacity, there would still be 44,000 tons of nuclear waste stored at the reactor sites. That means that after 38 years of shipping high level waste through our cities and our towns, we will have reduced on-site storage of nuclear waste by a mere 4 percent. Why would we want to risk shipping nuclear waste across 43 States for 38 years if it makes no difference in the amount of waste stored on-site throughout the country?

There are also very serious scientific concerns with the proposed dump. Yucca Mountain is located in an earthquake and volcanic eruption zone. Studies have shown that groundwater can travel through fissures in the mountain in a very short time frame, dissolve the waste and contaminate groundwater supplies, releasing deadly toxins into the environment of the Southwest. Recently an independent investigation by the General Accounting Office found that there were 293 unresolved scientific questions that the government had failed to address, and the Nuclear Waste Technical Review Board expressed limited confidence in the DOE's work, calling it "weak to moderate."

Would any of us get on an airplane if the FAA said it had only limited confidence in the pilot's ability to take off and land? Would any of us drive across a bridge if its structure was described as weak to moderate? Would any of us take medication if the FDA said there were still 293 unresolved questions about its safety? The answer is obvious. The answer is no. Yet with Yucca Mountain, that is exactly what we are going to do. The nerve of this administration to pretend that this decision is based on sound science.

If Congress approves this project, as many as 108,000 shipments of nuclear waste will travel through 43 States en route to Yucca Mountain. The government's own statistical models show that we can expect between 50 and 300 accidents involving nuclear waste. People make mistakes. Accidents happen. But an accident involving nuclear waste would be catastrophic, exposing whole communities to radiation and destroying the environment for thousands of years. The cost of evacuation and remediation would be astronomic, not to mention the unspeakable cost of human suffering.

An even more devastating scenario would be a terrorist attack. We already know that al Qaeda and other terrorist groups are looking for the material to go in a dirty bomb. These waste transports are exactly the type of target rich environment they are looking for. In the wake of 9/11, we cannot afford to be naive and believe that we are safe from people who would give up their own lives to end ours.

Yucca Mountain will do nothing to fix the nuclear waste problem in our country. It will greatly exacerbate our vulnerabilities to terrorist attacks. With every truck, rail and barge shipment, our homeland security becomes more and more difficult to defend. The Yucca Mountain project will put us all at risk by transporting "mobile Chernobyls" through our communities, small towns and cities. If we cannot move the waste safely, then we should not be moving it at all.

Many of my colleagues ask if there is an alternative. The PECO utility in Philadelphia has reached an agreement with the government in which the Department of Energy will take title to the waste, allowing the government to protect it in reinforced secure facilities without moving it around the country, and at the same time allowing the utility to lower its tax payments and its bottom line.

In the long term, our country needs to invest its resources into emerging technologies seeking solutions to reduce volume, toxicity and half-life of nuclear waste. We also need to develop alternative renewable energy sources to relieve our dependence on foreign oil and nuclear power.

Almost 50 years ago, the Department of Energy came to Nevada and asked us to bear the brunt of atomic testing. They assured Nevada test site workers and other citizens in my State that sound science demonstrated these tests were not harmful. Many of these workers are now dead, their families devastated, and this government can never clean up that legacy. Now the Department of Energy is coming to Nevada yet again and asking us to put trust in them like they did our parents and our grandparents. Well, this Congresswoman and mother of two is going to stand up to the Federal Government and say, no, I will not let my children become the cancerous legacy of the DOE's disingenuous promise of safety and sound science.

I urge Members to vote "no" on this resolution. It is a bad one. It is a bad one for our families. It is a bad one for our country.

Mr. TAUZIN. Mr. Speaker, I am honored to yield 3 minutes to the gentleman from Illinois (Mr. SHIMKUS), a distinguished member of our committee and a lieutenant colonel of the Army Reserves.

Mr. SHIMKUS. Mr. Speaker, I rise today in support of this joint resolution. I am also proud to be an original cosponsor of this legislation. The vote that Congress will be taking today says that after 20 years of exhaustive scientific analysis the government is ready to designate Yucca Mountain—a barren, windswept desert ridge 90 miles northwest of Las Vegas—a safe site and move to the licensing phase for the development of an underground disposal facility. The industry, environmental, labor, consumer and business groups have applauded the President and Secretary Abraham for making this decision on sound science.

The administration is acting responsibly to fulfill the Federal Government's longstanding obligation to the American people to safely isolate and dispose of used nuclear fuel and defense waste. Now Congress must act to affirm President Bush's decision and advance the Nation's energy, economic and environmental security.

There has been and will be a lot of discussion today on transporting of nuclear waste. Numerous Members have come before this body and have expressed concerns about the safety of transporting spent nuclear fuel. The truth is their concerns are misguided. You cannot argue with the fact that almost 3,000 safe shipments of used nuclear fuel have taken place without any release of radioactive material. That is right. On some 3,000 occasions, used fuel has traveled by truck or rail across the country, including almost 500 in my home State of Illinois. The reason you probably have not heard about this is because not one of these shipments has threatened the environment or public safety.

States like Illinois, which currently has 11 nuclear reactors and gets almost half of our electricity from nuclear power, have gone to great lengths to set up a system that will ensure safe transportation of nuclear waste through the State and across State lines.

□ 1315

They inspect the trucks and trains; they inspect the roads, the rail lines. They have set up emergency response systems with local governments. They coordinate all routes with the Federal Government; and most of all, they ensure that the citizens of Illinois remain safe.

Transporting spent nuclear material is safe. It has been proven to be safe, and there is no reason to doubt that it will remain safe.

The State of Nevada has a tremendous nuclear legacy, as identified by this recently approved Nevada State license plate. The State of Nevada can again fulfill their nuclear legacy and continue to aid this Nation and our citizens by safely storing high-level nuclear waste for our country. I ask all of my colleagues to support this legislation.

Mr. MARKEY. Mr. Speaker, I yield 2 minutes to the gentleman from Ohio (Mr. KUCINICH).

Mr. KUCINICH. Mr. Speaker, the transportation of this waste will require over 96,000 truck shipments over 4 decades. Almost every major east-west interstate highway and mainland railroad in the country will experience high-level waste shipments. More highly-radioactive waste will be shipped in the first full year of repository operations than has been transported in the entire 5-decade history of spent fuel shipments in the United States.

The Department of Energy proposes to directly impact 44 States and many of the major metropolitan areas in the Nation. At least 109 cities with populations exceeding 100,000, including my constituents in Cleveland, Ohio, will be subjected to repeated shipments with minimal safeguards. Highway shipments alone will impact at least 703 counties with a combined population of 123 million people. Nationally, 11 million people reside within one-half mile of a truck or rail route.

This never-before-attempted radioactive materials transportation effort will bring with it many risks, including potentially serious economic damage and property value losses in cities and communities along shipping routes. The poorly tested transportation casks may be vulnerable to highway accidents and security breaches.

Because of a lack of rail facilities to several reactors, the Department of Energy will use barge shipments to move this waste to a port capable of transferring the 120-ton cask to a train. Some of these shipments will occur on the Great Lakes, the world's largest source of fresh water. Over 35 million people living in the Great Lakes basin use it for drinking water.

The Federal Government must radically improve the safety and security of these shipments, and that is the purpose of the Nuclear Waste Transportation Protection Amendments Act of 2002 which I have introduced.

Mr. Speaker, this legislation would, one, require comprehensive nuclear waste transportation safety programs; two, protect populated communities; three, establish that the oldest fuel first should be shipped; four, require full-scale cask testing; five, require State and local route consultations; six, private carrier prohibitions; seven, advanced notification; and, eight, safety precautions.

Vote against this legislation.

Mr. WYNN. Mr. Speaker, I yield myself such time as I may consume.

Let me begin by recognizing the outstanding efforts the gentleman from Louisiana (Mr. TAUZIN), our committee chairman; the gentleman from Michigan (Mr. DINGELL), our ranking member; the gentleman from Texas (Mr. BARTON), our subcommittee chairman; and the gentleman from Virginia (Mr. BOUCHER), our ranking subcommittee member. They have done an excellent job on a very important piece of legislation.

As an original cosponsor, I rise to wholeheartedly support this legislation. As we discuss energy self-sufficiency and national security, we must keep in mind that nuclear energy is an important part of a balanced energy portfolio. This Nation has 103 reactors that have a unique ability to power economic growth without polluting our air. This is the only expandable, large-scale electricity source that avoids emissions. Nuclear power is reliable and affordable, with production costs lower than coal and natural gas plants.

Today, nuclear energy produces 20 percent of our electricity and is essential to our national security. However, it is important to recognize that there must be permanent disposal of nuclear waste. This is a reality which must be addressed and which we are trying to deal with here today.

Electricity consumers under the National Nuclear Waste Policy Act have committed $18 billion since 1983 to pay for the disposal and storage of nuclear waste. The Federal Government has spent $7 billion in this same period to study Yucca Mountain, and we are right now overdue in fulfilling our commitment to electricity consumers. In my own State of Maryland, consumers have paid $237 million into the Nuclear Waste Disposal Fund since 1983. We in the State of Maryland are expecting the Federal Government to reach a conclusion. I believe the rest of the country feels the same.

Yucca Mountain is a safe site for all Americans. Currently, spent nuclear fuel and high-level radioactive waste is temporarily stored in 131 above-ground facilities in 39 States. Mr. Speaker, 161 million Americans live within 75 miles of these sites. One central site provides more protection for this material than do the existing 131 sites. After 20 years of research, billions of dollars of carefully planned and reviewed scientific field work, the Department of Energy has concluded that the repository at Yucca Mountain brings together the location, the natural barriers, and the design elements most likely to protect the health and safety of the public, including those Americans living in the immediate vicinity.

Used nuclear fuel storage in current power plants is safe, but nuclear power plants are not designed for long-term disposal. Permanent disposal, permanent long-term disposal will be managed by the Federal Government under this bill. The fuel will be stored 1,000 feet underground where it will be more secure.

Now, many people today have talked about transportation issues. We have empirical experience. After 45 years of experience and 3,000 shipments of used nuclear fuel by rail and by truck, no radiation releases, no fatalities, injuries or environmental damage have occurred because of the radioactivity of the cargo. The Department of Energy will coordinate transportation routes with local and State officials so local communities will not be excluded from this process. When operational, there will only be one or two shipments per day.

This is the reality. This is the challenge that Congress has been asked to address. With 20 percent of our electricity produced by nuclear power plants, how do we dispose of it? We have studied it for 20 years. The American taxpayers have paid billions of dollars to have it disposed of. We have a site and we have sound science. I urge us to pass this resolution and dispose of nuclear waste.

Mr. Speaker, I reserve the balance of my time.

Mr. MARKEY. Mr. Speaker, I yield 2 minutes to the gentlewoman from Michigan (Ms. RIVERS).

Ms. RIVERS. Mr. Speaker, I stand in opposition to this proposal. Under this particular plan, over 100,000 train, truck, and barge shipments, each carrying deadly, high-level nuclear waste, would have to go through 45 States, over 300 congressional districts, and hundreds of cities and towns; and 77,000 tons of nuclear waste would have to be relocated, which would require up to 108,000, 108,000 truck, rail, and barge shipments over 38 years.

Based on the Department of Energy estimates, a nuclear waste shipment would have to leave a site somewhere in the United States every 4 hours for 24 years. Three thousand barge shipments may be necessary, including shipments on the world's largest fresh water source, the Great Lakes, which surround my beautiful State, to reach this plant.

So far, over 16 million Americans would be projected to live within a half mile of proposed nuclear transportation routes. The shipping containers now available cannot resist explosives or fires associated with truck and rail accidents.

Proponents speak with a confidence belied by actual experience. The entire history of nuclear shipments to date comprised less than 1 percent of the total to be shipped to Yucca Mountain. This waste is so radioactive that direct exposure quickly causes death and even a minute particle ingested or inhaled will cause cancer.

We will hear from other speakers that legitimate doubts exist as to the safety of the proposed site and that even if approved, the Yucca Mountain solution does not come close to solving the Nation's nuclear waste problem. After 30 to 40 years of continuous shipping of nuclear waste through our cities and towns, so much more waste will have been produced, but there will be hardly a dent in today's problem.

Additionally, the cost of the Yucca Mountain project is spiraling out of control. A few years ago, the Energy Department said it would cost hundreds of millions of dollars. Now they say it is $56 billion. Independent estimates of the costs soar into the hundreds of billions, some up to $309 billion. The nuclear waste trust fund has only $11 billion in it. Where is the money going to come from? More taxes? Social Security? How will we pay the cost of this proposal?

Taxpayers should not end up footing the bill for the power industry's spent fuel. "No" is the right vote.

Mr. BARTON of Texas. Mr. Speaker, I yield myself 6 minutes.

Mr. Speaker, before I begin my prepared remarks, I want to apologize to the gentleman from Nevada (Mr. GIBBONS). In the motion on the point of order, I was trying to be humorous and if I offended the gentleman in any way, I am prepared to ask that my own words be taken down, because the last thing in the world I want this body or the country to feel is that I do not have the utmost and total respect for the gentleman from Nevada and the fine work that he has done on behalf of his constituents.

Mr. GIBBONS. Mr. Speaker, will the gentleman yield?

Mr. BARTON of Texas. I yield to the gentleman from Nevada.

Mr. GIBBONS. Mr. Speaker, I want to thank the gentleman for the opportunity. Certainly I appreciate the gentleman's remarks and his words are very serious to me. I want the gentleman to know that we take this debate very seriously. I appreciate the gentleman's concern and his remarks, and certainly no offense was taken.

Mr. BARTON of Texas. Mr. Speaker, we are here today to move a resolution that would move forward the process that would ultimately result in a site being selected to store high-level nuclear waste that has been generated primarily by our civilian nuclear reactors in this country. Those reactors have been generating electricity for the American people for the last approximately 40 years. Today, 20 percent of our Nation's electricity is generated by nuclear power generators. At the time those power plants were put into operation, there was not a plan on where to store the high-level nuclear waste, because at that time it was assumed that the Congress and the industry and the various advocacy and stakeholder groups would mutually agree on a plan and a site, or sites. That has not happened for a number of reasons.

Nuclear power has become very controversial. The issue of where to store the waste has been used as a surrogate on whether one was for or against nuclear power, which brings us to today. In 1987, we passed a series of amendments in an appropriations bill that said we are going to store this waste at Yucca Mountain in Nevada. Since that time, we have spent approximately $7 billion trying to determine whether, in fact, that was a wise decision. There have been hundreds of thousands of studies, hundreds of thousands of manhours spent conducting studies, costing hundreds of millions of dollars, to determine whether it is safe to store the high-level nuclear waste out at Yucca Mountain.

The Department of Energy submitted a recommendation to the President; the recommendation to the President said that they think it is safe. The outside policy review board that has the watchdog opportunity has said that that recommendation is weak to moderate, but the technical issues that are outstanding can be resolved in the next several years.

So this resolution simply says the Governor's objection to that decision, the Governor of Nevada, the State in which the repository would be located, not withstanding that the Congress goes on record telling the Department of Energy that it can go ahead and go forward with the licensing application process to the Nuclear Regulatory Commission.

Now, I would point out that there is nothing absolutely certain in life except death. We are all going to die. In the interim, we want to make our lives as positive and as constructive as possible; and in the modern era we want energy sources that are safe and efficient and reliable to make our lives as constructive as possible. Those that oppose the repository at Yucca Mountain because it is not 100 percent certain that over the next 400,000 years there is absolutely no way that something wrong can go wrong are asking for the impossible.

□ 1330

I cannot guarantee that when I walk out of this Chamber to go back to my office, if I cross the street, that a car will not hit me. I do not think it will, but I cannot guarantee that I will not have some sort of an accident just walking from here back to the Rayburn Office Building. The probabilities are that I will not.

If we look at all the scientific evidence that has been prepared on Yucca Mountain, it shows that to the degree that men and women can provide certainty, we are certain that for the next 10,000 years the repository at Yucca Mountain will be safe.

So I would ask when it comes time to have this vote that we vote to send this resolution to the other body and we say that we believe that we need to make a decision to have a repository, and that repository should be at Yucca Mountain. Then we will work together in a bipartisan fashion to guarantee the transportation issues, to guarantee the safety and scientific issues so that the repository can be built and maintained in a safe and effective fashion.

Mr. Speaker, I reserve the balance of my time.

Mr. MARKEY. Mr. Speaker, I yield 2½ minutes to the gentleman from Texas (Mr. DOGGETT).

Mr. DOGGETT. Mr. Speaker, I have to admit, the first time I heard about the concept of placing this waste at Yucca Mountain a few years ago, I thought it was a very good idea. I thought so for one reason: Nevada is not Texas. I think that is the main reason why so many people approve of the Yucca Mountain site today, because Nevada is not South Carolina, it is not Maine, and it is not California.

But as one of my neighbors, Molly Ivins, pointed out recently in a column, "putting the nuclear waste in Yucca Mountain is Nevada's problem. Getting it there is ours." These transportation routes will affect not just Nevada, but families in most every State in the country.

Indeed, one of the routes the Energy Department had on its list until recently, consistent with some of the comments that we do not need to worry about transportation, was within sight of the United States Capitol. They were proposing to run this nuclear waste through Washington.

To the gentleman who came and said that we have never had a problem hauling nuclear waste, I submit that his statement is about as persuasive as someone who stood on this floor last year and said an airplane has never been used as a bomb. Things are different after September 11, and are we increasing the risk to the American people, increasing the exposure, by having these "mobile Chernobyls" crossing the country back and forth, affecting millions and millions of United States citizens. Or would we be better off looking for alternatives to nuclear power and looking for long-term alternatives to Yucca Mountain?

The truth of the matter is that if we really recognize how long this waste is going to be dangerous, the NIMBY approach, not in my backyard, one needs to recognize that Nevada is in the backyard of everyone in this country. It cannot be isolated from everyone else.

The other big issue is not just the length of the time, the question is whether we want to have an incentive for more and more of this waste to be generated. They say, "If you build it they will come." But this isn't a "Field of Dreams," it is a "mountain of nightmares." If this facility is established, there will be more and more nuclear waste generated.

Finally, I have to say that I particularly want to applaud the leadership of the gentlewoman from Nevada (Ms. BERKLEY). She has been unceasing in bringing to our attention all of the implications of this very serious mistake that has been proposed.

I know there is some bipartisan support for it, but it is troubling that a Republican President and a House Republican leadership would so aggressively promote this unfortunate resolution, and that we would be told by Republican leaders during debate that this is "Nevada's legacy." It is a legacy we will all be stuck with if this measure is approved.

Mr. WYNN. Mr. Speaker, I yield 2 minutes to the gentleman from Texas (Mr. STENHOLM).

Mr. STENHOLM. Mr. Speaker, few issues could be more important to the future security of the United States than passage of House Joint Resolution 87. For over two decades, scientists have subjected the suitability of Yucca Mountain to intense scrutiny, at a cost of more than $7 billion. It has been concluded that radioactive material can be safely stored deep underground in this area.

Today, this material is located at 131 different sites around the country in temporary above-ground storage. As a result, almost 162 million people live within 75 miles of one of these temporary storage facilities. Consolidating this material in one safe, secure underground location is the rational answer to the waste disposal question.

Furthermore, by moving excess waste from commercial and decommissioned plants, we will remove 131 targets from a potential terrorist attack.

Some would make an issue of transportation. The Department of Transportation, in conjunction with the Nuclear Regulatory Commission, has ensured that many precautions are taken when transporting nuclear materials relating to routing, security, tracking of progress via satellite on a 24-hour basis, and coordination with State officials. To date, we have transported more than 2,700 shipments of spent nuclear fuel over the last 30 years, traveling over 1.6 million miles without any harmful release of radiation.

Preliminary route selection and detailed planning will begin at least 5 years before the first shipment takes place.

Nothing is perfect, but I would say, as a rural electric cooperative manager, I worked to promote alternative energy sources 9 years before coming to Congress. Our membership thought it important to invest in alternative energy sources such as nuclear as a means to balance our energy budget. This was in 1970.

The 103 operating nuclear power plants in the United States are providing 20 percent of the Nation's electricity. In fact, nuclear power supplies 10 percent of the electricity generated in Texas, including that produced by TXU's Comanche Peak plant in my district.

Please join me in supporting the Federal Government's commitment to safely store nuclear fuel by voting for House Joint Resolution 87.

Mr. BARTON of Texas. Mr. Speaker, I yield 2½ minutes to the distinguished gentleman from Michigan (Mr. UPTON), chairman of the Subcommittee on Telecommunications and the Internet of the Committee on Energy and Commerce.

Mr. UPTON. Mr. Speaker, I thank the gentleman for yielding time to me.

I, too, would like to compliment my friends and colleagues, the gentleman from Nevada (Mr. GIBBONS) and the gentleman from Massachusetts (Mr. MARKEY). They have been good adversaries on this issue from the start.

Let me read the President's signing statement when he signed the Nuclear Waste Policy Act:

"The Nuclear Waste Policy Act which I am signing today provides the long overdue assurance that we now have a safe and effective solution to the nuclear waste problem. It allows the Federal Government to fulfill its responsibilities concerning nuclear waste in a timely and responsible manner." The President was Ronald Reagan. The date was January 7, 1983, nearly 20 years ago.

The other side, the opponents of this legislation, say that we have not had enough study. We have not spent enough money. Well, we have spent nearly $15 billion getting this site ready, decades in time.

Where is this site, Yucca Mountain? Well, it is on Federal land. It is close, if not contiguous, to where we have done nuclear testing for decades. It will never be a vacation spot.

Many of the detractors that have spoken today and will speak have always been against nuclear power, which, by the way, provides nearly 20 percent of our Nation's power. Mr. Speaker, I do not know where the gentleman was when the nuclear power decision was made. I do know where I was, elementary school, a long, long time ago.

When the decision was made, the Federal Government said it would take care of the long-term safety and storage of high-level nuclear waste. This was confirmed by the courts.

For my district we have two nuclear plants, both on the shores of Lake Michigan. These two are among 103 throughout the country. Every single one of these facilities is an environmentally sensitive area. Many have run out of room for the storage of high-level nuclear waste. I have seen the lead-lined cement silos in the dunes of Lake Michigan. Yes, they are safe for now, but I do not know that they are safe for 1,000 years, let alone 10,000 years, as will be certified in Nevada before it will accept nuclear waste, still more than a decade away.

The process for safe storage started nearly 40 years ago. We need to finish the job today. Safe storage and safe transportation of high-level nuclear waste in one safe place is essential, particularly with the events of 9/11. We have shipped more than 1,700 shipments of high-level nuclear waste more than 1 million miles across this country without a single release of radioactivity.

I know that that track record can continue. I would urge all of my colleagues to support this legislation and send it to the other body.

Mr. BARTON of Texas. Mr. Speaker, could I ask how much time remains controlled by the gentleman from Louisiana (Mr. TAUZIN)?

The SPEAKER pro tempore (Mr. ISAKSON). Twenty-four and one-half minutes.

Mr. MARKEY. Would it be possible, Mr. Speaker, for us to get a review of the time that each of us has at this point?

The SPEAKER pro tempore. The gentleman from Massachusetts (Mr. MARKEY) has 42½ minutes.

Mr. MARKEY. And the gentleman from Maryland (Mr. WYNN)?

The SPEAKER pro tempore. The gentleman from Maryland has 9½ minutes.

Mr. MARKEY. I think it would be appropriate, if the gentleman would not mind, for me to recognize a few of our Members right now so that the time would come down.

Mr. BARTON of Texas. Did the Speaker say that the gentleman from Massachusetts (Mr. MARKEY) had 42½ minutes?

The SPEAKER pro tempore. That is what the Chair was advised. That is correct.

PARLIAMENTARY INQUIRY

Mr. BARTON of Texas. Parliamentary inquiry, Mr. Speaker. When the total time was only 40 minutes, how does he get 42½ minutes?

The SPEAKER pro tempore. No, the time controlled originally was 1 hour on each side, 2 hours total between proponents and opponents.

There is 24½ minutes remaining for the gentleman from Texas (Mr. BARTON), 42½ minutes for the gentleman from Massachusetts (Mr. MARKEY), and 9½ minutes for the gentleman from Maryland (Mr. WYNN).

Mr. MARKEY. If I may at this point, there was an hour divided evenly between opponents and proponents, and generously, the majority has relinquished 20 of its 60 minutes to the minority that shares the same views in support of Yucca Mountain.

The SPEAKER pro tempore. Does the gentleman from Texas (Mr. BARTON) object to the gentleman from Massachusetts' suggestion to have two or three speakers in sequence due to the imbalance?

Mr. BARTON of Texas. I am sorry, I did not know that he had a pending request. What was the request?

Mr. MARKEY. The request was that I be allowed to recognize——

Mr. BARTON of Texas. I would generously allow the gentleman from Massachusetts be allowed to recognize two or three of his speakers in sequence.

Mr. MARKEY. Mr. Speaker, I yield 2 minutes to the gentleman from Utah (Mr. MATHESON).

Mr. MATHESON. Mr. Speaker, I am from the West. This is not the first time the West has been asked to shoulder the nuclear burden of our country. Dozens of atom bombs were detonated at the Nevada test site between 1951 and 1963. The West was chosen because as long as the winds were blowing east, the fallout avoided big cities and traveled over sparsely populated Nevada and Utah towns.

I remember my father telling me how people in southern Utah would watch the sky light up, and how southern Utahans supported the program because they were strong patriots who believed in their country and they trusted their government.

In the 1970s, my father, then the Governor of Utah, was puzzled over an alarming number of cancer deaths among our family and friends in southern Utah. Over and over he read "cancer" on death certificates of family members, more than 50 aunts, uncles, and cousins.

The Federal Government told us we were safe, but the Federal Government knew we were at risk. On October 7, 1990, my father died at age 61 from a cancer called multiple myeloma. Thousands of citizens throughout the West continue to get sick and die from radiation exposure-caused illnesses.

We saw a picture of a license plate talking about the nuclear legacy of Nevada. That is a legacy of which we should be ashamed.

Why are we moving this waste at this time? We are not running out of storage space at existing sites, and in the coming years, technological advancements in reprocessing and recycling may very well take care of much of the waste.

That brings us to the real fallacy of this entire exercise. If Members think a vote for Yucca Mountain gets rid of the waste in Members' backyards, they are wrong. As long as power plants are operating, new waste will need to stay put on-site for up to 10 years to cool down before it can be shipped.

I can tell the Members as son of a downwinder and a Congressman who represents thousands of sick, dying, and widowed victims of our nuclear testing that the Federal record on this issue has been appalling. Our Nation is one of shared responsibility. By opposing the transcontinental shipment of nuclear waste, we take care of all those millions of people who live along the roads and tracks to Yucca Mountain. We protect their future from what is an unfortunate legacy of my own State.

Mr. MARKEY. Mr. Speaker, I yield 2 minutes to the gentlewoman from Texas (Ms. JACKSON-LEE).

Ms. JACKSON-LEE of Texas. Mr. Speaker, I thank the gentleman from Massachusetts for his kindness in yielding me time.

I think the very passionate words of our good friend, the gentleman from Utah, should really speak to the concerns that we bring to the floor of the House today.

Let me acknowledge the leadership of the gentlewoman from Nevada (Ms. Berkeley) for the passion that she has given to this issue. But I really think that we are here today to begin a discussion on whether or not nuclear energy should be at the forefront of the policies of the United States of America, whether or not we need to begin looking at conservation and other issues, because let me tell the Members what is bad about this particular proposal: It is bad science.

As a member of the Committee on Science, let me tell the Members that we are not complying with the Nuclear Waste Policy Act passed by this Congress 20 years ago. We are not adhering to good science.

Just recently, the General Accounting Office found 293 defects in the research and advised the Bush administration to hold off on passing this resolution until 2006. If my math serves me right, I believe we are in 2002. This is the concern that those of us who live in communities who have nuclear waste and have nuclear power plants have.

I would imagine those individuals are now looking at the gentlewoman from Texas (Ms. JACKSON-LEE) on the floor of the House and asking, why are you speaking against your own neighborhood?

□ 1345

I am speaking for America and what is going to happen to the thousands of neighborhoods and schools which this waste will be traveling by and endangering the lives of those who are seeking only to live in this country with a great quality of life. My friend from Utah (Mr. MATHESON) said it all. People are dying of cancer. People are dying because they have been exposed to radiation with no good science.

Let us not make the same mistakes. Let us implement a process of good science. Let us wait until 2006. Let us get rid of 293 defects. Let us not have the children of America looking outside their window, and rather than saying hello to the choo-choo train, they are looking at a deadly disaster that may happen in their neighborhoods.

I do not mind standing up with the few and the brave, recognizing that someone has to speak out. We have to change our attitude, and I would say we have to reject $40 million in lobbying for the Yucca Mountain. I oppose H.J. Res. 87 and I ask my colleagues to do so.

Mr. MARKEY. Mr. Speaker, I yield 2½ minutes to the gentleman from California (Mr. BACA).

Mr. BACA. Mr. Speaker, I stand in opposition to H.J. Res. 87. We need a coherent national strategy dealing with nuclear waste, but this decision is about local control. It is inappropriate for us to be micromanaging Nevada on something that is so important. We should allow the governor to do his job. He has decided that the Yucca Mountain proposal is too dangerous to pursue any further and we should not intervene in what is a State and local decision.

I am also concerned about the issue, not just about the Members of Congress, but as neighbors of hundreds of thousands of people who could be harmed by the transportation of this through an accident that could occur. The Department of Energy may be way too tightlipped about the transportation routes that waste would travel across the country on its way to Yucca Mountain, but two things are certain. One, a very large percentage of the waste would travel through my district, the Inland Empire. Two, accidents will happen while transporting the spent nuclear fuel.

If you look at the map, virtually all the rails and routes would be used through San Bernardino County, California, my home. Half of the country saw Spiderman this weekend. Well, we are in the center of a nuclear transportation web. The thought of it makes me angry. The thought of it scares me, and it should scare my colleagues on both sides of the aisle from the Inland Empire. I call on all the Members from Inland Empire and Southern California to come together and oppose Yucca Mountain.

Why should our constituents be forced to face so much more of a risk of danger and other activities that may affect them?

Even the most conservative Energy Department studies say that many accidents will occur and it is more likely it will occur in transportation hubs like my district where we had recently a derailment of a train that caused a lot of the homes in the areas to start burning in the immediate area.

With this proposal, we will create thousands of moving targets for terrorists. We know what happened on September 11 with the airplanes crashing in the World Trade Center. Terrorists would not need a dirty bomb because we will have thousands of them crawling across the Nation just waiting for a fuse to ignite them, killing hundreds and thousands of people.

People are already living in fear. We do not need to put additional people in fear. I ask all Members to oppose this resolution.

The SPEAKER pro tempore. The Chair will recognize one additional speaker of the gentleman from Massachusetts (Mr. MARKEY) and then will go back to the rotation.

Mr. MARKEY. Mr. Speaker, I yield 2 minutes to the gentleman from Washington (Mr. MCDERMOTT).

Mr. McDERMOTT. Mr. Speaker, I feel a little like Yogi Berra when he said, "This is deja vu all over again."

I was in the State of Washington in 1980 when we had exactly this, they were going to put all this in Hanford. We had a governor who said, bring it all in. Bring it all in. Dixie Lee Ray. And we got an initiative. We have collected the signatures and 75 percent of the people in the State voted no, we do not want to accept all the waste from the country. And she was defeated. I knocked her out in the primary of that election.

Now, what you are looking at is this old business about NIMBY. It is not in my back yard. Throw it over the fence. Well, you cannot throw nuclear waste over the fence. And if you try, you will be putting it in trucks and railroads all over this country. And if you did not see what happened in Baltimore just a couple weeks ago where they had a train wreck in that tunnel and two Amtrak train wrecks in the last month, think about what happens in your neighborhoods if that happens.

Now, all Members who are voting yes are thinking thank God it is not going to be in my neighborhood. But the fact is it is going to be in your neighborhood. It is going to be on the roads. It is going to be on the trains. It is going to be going past schools and hospitals. And when that issue comes to you, as it did in the State of Washington, suddenly all of the county sheriffs are saying, we do not know what we are going to do with all these trucks coming by and we do not know if there is a fire. We will need more money.

You will wind up giving yourself one headache because this is being rushed through for one reason: The President has got the September 11 flag and he is waving it around and wrapping himself in it and saying, We got to have nuclear power, and if we do not get rid of the nuclear waste, we cannot have nuclear power. So he sees his chance. He wants to ram this through in spite of the fact that the GAO says there are 293 problems. How can you go home and defend to your people that you just ignored those problems? Vote no.

Mr. BOUCHER. Mr. Speaker, I yield 5 minutes to the gentleman from Michigan (Mr. DINGELL), the distinguished ranking member of the Committee on Energy and Commerce.

Mr. DINGELL. Mr. Speaker, I have heard a lot of misunderstanding today. I have heard a lot of Members making some rather terrifying speeches. I have heard a lot of important statements, and some of them have been factual. I would ask that you listen to me because I want to tell you what is going on.

First of all, this is not about putting nuclear waste anywhere.

Second of all, it is not about moving nuclear waste anywhere or moving it down any particular road. It is just about a step in a process to move forward to decide ultimately where and how we are going to put all this nuclear waste.

Are there problems with it at this stage? Of course. Somebody said 293. There may be that. There may be more. But we spent $7 billion to characterize Yucca Mountain as a site. Nothing is going to happen when we pass this bill except that about 2 years down the road the NRC is going to commence a licensing process to license a permanent storage repository to receive the nuclear waste. That will be an open process. Everybody will be permitted to have their say. Members of Congress here who are complaining, all of their constituents, any industry, you name it, can all have their say in that process. It is going to be a thoroughly open process.

Now, there are going to be environmental problems whatever course we take. We can leave this nuclear waste where it is. It is in pools. It is in neighborhoods in your districts and mine. We can leave it there, and it is going to create a lot of nuclear problems. We can set up some other alternatives such as dry cask storage, and that is going to make nuclear problems, and they are going to remain in your neighborhoods and in my neighborhood.

Now, I am not an advocate of putting this anywhere. I am not an advocate of putting it in Yucca Mountain or not putting it in Yucca Mountain. I am simply an advocate of this Congress functioning responsibly, to come to a decision on a major problem which we have, a major energy problem, a major environmental problem, a major land use problem, a major concern to the people of this country. We are producing nuclear waste at nuclear power plants and we are producing it in connection with our defense activities.

That nuclear waste is going to go somewhere. Right now it is scattered around the country in all kinds of places, and it is a hazard to your constituents and mine.

We have got to have some resolution to this problem of nuclear waste storage, and it has got to be reasonable, intelligent, and we have got to come to the best solution we can.

I mentioned we have already spent $7 billion to characterize this site, and we will have to spend a lot more. I do not know what the licensing process is going to cost, but it is going to be plenty. As I mentioned, it is going to be open. Ultimately, we have to address the problem.

Whatever we do is going to create environmental difficulties. It will be the responsibility of the Committee on Energy and Commerce and of this Congress and of NRC, of the executive department of government, of EPA and all of the other agencies, to see that the process is conducted in a way which is safe, which creates a minimum of hazard, to see that the transportation is done as safely as it can be done with as little risk as possible to the community and the people through which it passes.

It will also be our responsibility to see to it that all of the questions which remain to be answered are answered. That will be a part of the licensing process, which is going to go on for something like 4 to 6 years after we conclude this. The probabilities are that the decision will not be made until some time around 2010 or perhaps even later.

I think it makes good sense that this body should exercise ordinary responsibility. We have a duty to the people to resolve this question. We are setting about taking another step towards the conclusion of an open process to arrive at a decision, followed by the licensing process which will take place at NRC and, as I mentioned, that will be fully open. EPA will be participating in that. Every other citizen who has a concern will.

My advice to this body is proceed. We are simply taking a step forward. Let us take that step forward and make the process work in an open fashion for the benefit of all us. Let us resolve the question today. Vote aye.

Mr. BARTON of Texas. Mr. Speaker, I yield 2 minutes to the gentleman from Georgia (Mr. NORWOOD), a member of the committee, who is sartorially resplendent.

Mr. NORWOOD. Mr. Speaker, I thank the gentleman for yielding me time.

Mr. Speaker, as an original co-sponsor of this, I rise in very, very strong support of this resolution. The selection of Yucca Mountain as a permanent nuclear waste repository is probably one of the most important questions that can face this Congress and for years to come. As we all know, and it has been said over and over again, over 45,000 metric tons of spent nuclear fuel are currently scattered across the country in some 70-plus sites across our Nation. Clearly, clearly, it is in the American public's best interest to construct one permanent, highly secured repository for this waste. And, hopefully, one day a lot less of the waste as we get our mixed oxide fuel plants built and we can reduce the volume of this waste, which is where I hope we are going.

Twenty years ago the Nuclear Waste Policy Act set a policy in motion. Twenty years ago. The DOE has now spent over $6.7 billion on characterization and development activities at Yucca Mountain. Now, part of this debate really ought to be why in the world has it taken 20 years to solve this problem after spending $7 billion, not to speak of the millions of dollars that ratepayers have spent?

Having been to Yucca Mountain, I believe the dollars spent have yielded credible research and pretty sound science that justifies this Congress moving tc the next step. The vote today does not lock us in forever and we are not committed forever to Yucca Mountain, as the gentleman from Michigan (Mr. DINGELL) pointed out. Even the Washington Post and the New York Times actually agree with me that now is not the time to jump ship. Granted, that gave me some second thoughts, but they are right. Now is not the time to jump ship.

□ 1400

The development of a permanent, secure repository for spent nuclear fuel is imperative for this country. It is important to my constituents at both the Savannah River site and Plant Vogle, but it is absolutely vital to the national energy policy and to our homeland security.

I urge our Members, vote "yes" on this today.

Mr. MARKEY. Mr. Speaker, I yield 2 minutes to the gentlewoman from Colorado (Ms. DEGETTE).

Ms. DEGETTE. Mr. Speaker, I oppose authorizing Yucca Mountain as the permanent site for our Nation's nuclear waste at this point, and I will tell my colleagues why. Politics are driving this process and not science. I realize that the proponents of this site say that the nuclear industry and the Department of Energy have already studied the issue; but frankly, it is the final grade that matters, not how much we study, and at this point, Yucca Mountain still gets a failing grade for many in the scientific community.

Scientists both at the GAO and elsewhere have stated, we have heard that, that there are still issues to be addressed. There are still serious issues at the site, the seismic activity and ground water migration. The studies on those issues will not be completed till 2006. That does not mean that Yucca will never achieve a passing grade. Maybe future studies will determine this is the best and only place for America's nuclear waste, but this is supposed to be the site where we put our Nation's radioactive waste for the next 10,000 years.

I do not oppose Yucca Mountain as a potential site outright. I just do not think that the designation is timely. How about completing the scientific studies first? Seems like a no-brainer to me.

I also, frankly, have grave concerns about transporting the waste. A few years ago in Denver, Colorado, where I–70, the major east-west highway, and I–25, the major north-south highway, intersect, a truck with a big missile on it fell over, and I shudder to think what would happen if a truck containing radioactive waste fell over in the Mouse Trap in Denver, Colorado, during rush hour. I do not care how safe people say that is.

So let us make sure that we have the science. Let us make sure that we have real transportation assurances and that local governments are working with us. Let us have that in place before we do this. It only makes sense. Vote "no" on the Yucca Mountain resolution.

Mr. MARKEY. Mr. Speaker, I yield 2½ minutes to the gentleman from American Samoa (Mr. FALEOMAVAEGA).

Mr. FALEOMAVAEGA. Mr. Speaker, I want to thank the gentleman from Massachusetts (Mr. MARKEY) and the gentlewoman from Nevada (Ms. BERKLEY) for their leadership roles in this debate.

Mr. Speaker, why are we so bent on storing nuclear waste at Yucca Mountain? Is it because the U.S. has already conducted more than 1,000 underground nuclear bombs in the deserts of Nevada? How fair is it to ask the good people of Nevada to also be the sole keeper of our Nation's highly radioactive nuclear waste? How fair is it to transport nuclear waste across America's farm lands, which are easier targets for terrorists to attack?

The fact of the matter is the largest concentration of nuclear reactors lies east of the Mississippi, and the risk of transporting highly radioactive spent fuel from these nuclear plants is a risk this Nation just cannot afford to take.

Mr. Speaker, highly radioactive spent fuel or nuclear waste is one of the most toxic and dangerous substances known to mankind. For 10,000 years, highly radioactive spent fuel is dangerous to human life. Visit the Marshall Islands if my colleagues want to see the residual effects of some 66 nuclear bombs that were exploded in Micronesia. The reason why we discontinued testing in the Marshalls is because we found strontium 90 in milk products in Minnesota and Wisconsin.

Visit the islands of Moruroa and Fangataufa in the South Pacific and ask the French Government if after detonating 220 nuclear bombs, that nuclear contamination is now leaking into the ocean in the Pacific Ocean, despite assurances from the French Government officials that this process is okay and is good for 1,000 years. Give me a break, Mr. Speaker.

I fear the good people of Nevada are going to experience the same thing. If the Congress approves this project, the Department of Energy suggests there will be as many 108,500 surface shipments of nuclear waste making its way across the heartland of America. Another 3,000 shipments will make their way by barge across our waters.

Mr. Speaker, whether we spend $1 or $100 billion to clean up our Nation's nuclear waste, any amount of money can never be equal to the life of any human being.

Mr. BOUCHER. Mr. Speaker, I am pleased to yield 3 minutes to the gentleman from Texas (Mr. HALL).

Mr. HALL of Texas. Mr. Speaker, I rise today, of course, in support of H.J. Res. 87, a bill, as all of my colleagues know, that provides for the development of Yucca Mountain as a permanent repository.

I think, though, first a word to those who oppose this resolution. They have done so honorably, steadfastly, and to be Texas plain with them, they have done so doggedly and working and speaking for the care of their constituents' will. For that, I admire and respect them. To paraphrase Reverend Billy Graham, I hate sin but I love the sinner. I hate the absence of a permanent repository, but I love and respect those who oppose this bill. I simply differ with them, and I differ with them for these reasons:

I think, first, that it has an unparalleled safety record in transporting nuclear fuel. That is necessary. That is first; and, second, the long open public licensing process. More than 45 years of experience and 3,000 successful shipments of used nuclear fuel within the United States demonstrates that this material can be safely transported to Yucca Mountain by rail and/or by truck. No radiation release, no fatalities, no injuries or environmental damage has occurred because of the radioactivity of the cargo.

The containers used to ship nuclear fuel are specially designed, robust steel containers that have undergone rigorous testing and can withstand extreme conditions including long-lasting fires, high-speed crashes, even submersion in water. The maintained integrity of the containers ensures the health and safety of the public and environment during transportation of spent nuclear fuel.

Mr. Speaker, upon site approval, a three step nuclear regulatory commission licensing process will test and verify DOE's scientific work in a highly rigorous public process. The scientific work will continue throughout the licensing period and operation of the repository so that the government will always be governed by the most recent science.

Again, I admire and respect those who defend their constituents. I urge my colleagues, however though, to support H.J. Res. 87. Let us move this bill on and get it behind us.

The SPEAKER pro tempore (Mr. ISAKSON). The gentleman from Virginia (Mr. BOUCHER) has 2 minutes remaining. The gentleman from Massachusetts (Mr. MARKEY) has 30 minutes remaining. The gentleman from Louisiana (Mr. TAUZIN) has 22½ minutes remaining.

Mr. TAUZIN. Mr. Speaker, I am pleased to yield 2 minutes to the distinguished gentleman from North Carolina (Mr. BURR), the vice chairman of the Committee on Energy and Commerce.

Mr. BURR of North Carolina. Mr. Speaker, I thank the chairman of the full committee for yielding me the time.

I was struck earlier when the gentleman from Michigan (Mr. DINGELL) got up to speak because all of the sudden, after my lunch partner today who was our former colleague, ranking member on the Commerce Committee, Jim Broyhill, I began to realize that between the gentleman from Michigan (Mr. DINGELL) and Mr. Broyhill and our current chairman, they were here in 1985 when the energy policy act was, in fact, passed; and they shepherded it through, and it really did start the process rolling.

For 20 years from then we are now here today trying to make sure that a process continues to move forward, and I found it striking that Senator Broyhill looked at me and said we envisioned that this would only take 10 years. Well, it has taken 20 now; and the question, as the gentleman from Michigan (Mr. DINGELL) so appropriately raised, are we going to allow it to go to the next step?

This is not about shipping waste tomorrow. This is about allowing a process to go to the next step where in the licensing phase we may learn more. To stand up and suggest that science has not been applied to this project is only to say that under the definition in Webster's there is one area that we have not covered, whether it is applicable or not, but every study that people have suggested has been done on this site.

The gentleman from Michigan (Mr. DINGELL) strongly worded across this country today we store in our communities, in our backyards waste today, waste that eventually we are committed, as the Federal Government and as stewards of the trust fund with the rate payer money, to make sure that it has been used in a way that is effective long term.

To my colleagues today I would urge them, this has been studied and we will continue to study it; but the way to continue to study it is not to stop the process. It is to let the process go forward. It is to make sure, in fact, that we are a little further down the road in the licensing process as well as our understanding of the transportation challenges that we will be faced with.

I am confident that the 400 trillion Btus that North Carolina receives in low-cost energy from nuclear is something we have to have in the future. Do not cut this out by making sure nuclear is cut out because we have nowhere to store it. I urge passage.

Mr. MARKEY. Mr. Speaker, I yield 2 minutes to the gentlewoman from California (Mrs. CAPPS).

Mrs. CAPPS. Mr. Speaker, I rise in strong opposition to this bill. The environmental questions surrounding the Yucca Mountain site have not been adequately answered and a decision with a 1,000-year impact should not be made with questions hanging.

Our Nevada colleagues and the constituents they represent have spoken about the hundreds of questions regarding the safety of a site which is in their backyard. They deserve an answer to these questions.

Of course, Yucca's supporters claim that if the licensing process indicates that testing and environmental problems may occur, plans could be changed or reevaluated; but we all know this is Washington, and a project like Yucca takes on a life of its own, and I have grave concerns about transportation plans for all this nuclear waste.

The recent terrorist attacks raise questions about security at nuclear power plants and DOE facilities across the country. In my district, local power plant officials and the nuclear regulatory commission spent days issuing conflicting statements about how vulnerable Diablo Canyon nuclear power plant is to an attack. My constituents were understandably unsettled by the obvious lack of coordination and planning for this facility in their own backyard.

Against this backdrop we add the problem of protecting shipments of dangerous nuclear waste. This scenario of thousands of nuclear waste-laden trucks and barges careening across our roads and waterways should give us all pause. In my district, DOE wants to load tons of nuclear waste on barges and bring the barges through the Santa Barbara Channel, but I question some of the planning here. Let me cite just one example.

The dry cask storage containers that will carry this waste are tested to withstand submersion in water, but I do not believe there has been submersion tests for these casks at anything like the depths found in the Santa Barbara Channel. So what happens if there is an accident and a number of these concrete containers end up at the bottom of the channel? Will they be able to withstand the extreme depths? Can we retrieve them?

If the answer is no to either of these questions, what then happens to the fishing industry, the other ships that use the channel? How safe does this channel and the surrounding area then become?

In closing, I do not believe we should pass this bill. I do not have faith that the studies behind Yucca are safe and complete, and I do not have faith that the project can be carried out safely and effectively.

Mr. MARKEY. Mr. Speaker, I yield 2 minutes to the gentleman from West Virginia (Mr. RAHALL), the ranking member of the Committee on Resources.

Mr. RAHALL. Mr. Speaker, I thank the gentleman from Massachusetts (Mr. MARKEY) for yielding me the time.

I want to commend the leadership of two of our colleagues from the State of Nevada on this important issue, the gentleman from Nevada (Mr. GIBBONS), a member of our Committee on Resources, and the gentlewoman from Nevada (Ms. BERKLEY), who is a very valuable member of our Committee on Transportation and Infrastructure.

There are a number of reasons, Mr. Speaker, for opposing the pending resolution, but it boils down to this. There is no rock-ribbed, iron-clad, copper-riveted guarantee that the interment of high-level nuclear waste at Yucca Mountain would be the safest course of action over both the near- and long-term.

It is no secret that there is a multitude of scientific questions regarding this site, and I am sure all those questions have been gone into by previous speakers, but the GAO report noted that there are about 300 such questions and concluded that this site approval is premature.

□ 1415

There is one very important reason that I would like to mention that I do not believe has been mentioned thus far in this debate as an additional reason for opposing the pending resolution, and that is that Yucca Mountain is located within the aboriginal area of the western Shoshone Indian Nation. The mountain is sacred to them and it holds a powerful spiritual energy for two Indian tribes in particular.

In fact, the Ruby Valley Treaty of 1863 explicitly stated that this area belonged to the Shoshone. Yet in arrogance, and that is what it is, arrogance, this administration has determined that this particular sacred site is a pretty good place to put a nuclear waste repository. That is desecration, plain and simple. It is desecration to the Shoshone Indian Nation. Whether or not my colleagues understand the religion of these people, whether or not my colleagues subscribe to it, know this: Dumping nuclear waste at Yucca Mountain is akin to dumping nuclear waste at your own house of worship.

I urge the defeat of the pending resolution.

Mr. MARKEY. Mr. Speaker, I yield myself such time as I may consume to just tell the gentleman that that was a beautiful statement.

Mr. Speaker, I yield 2 minutes to the gentlewoman from the State of California (Ms. LEE).

Ms. LEE. Mr. Speaker, I thank the gentleman for yielding me this time, and I also want to commend the gentleman from Massachusetts for his leadership, as well as the gentlewoman from Nevada for really raising the very dangerous implications of what we are doing today, and I rise in strong opposition to H. J. Res. 87.

Now, this resolution, as we have heard today, would send 77 tons of nuclear waste across our Nation's highways, through our streets, and past our homes. Every hour of every day for the next three decades, trucks and railcars full of radioactive waste would be rolling past. Every mile along the way they would be exposed to the risk of both terrorists and simple accidents. This is very, very scary. This cannot be the answer.

We must seek out scientifically sound mechanisms to store and treat existing nuclear waste and we must shift to a safer energy technology. We cannot keep producing nuclear waste that we clearly cannot manage safely. Nuclear waste cannot continue to proliferate. Transporting tons of waste to Yucca Mountain will not eliminate the piles of waste sitting at reactor sites across the country. It will barely make a dent in them for years to come. Instead, it will expand our risk every mile traveled.

Finally, transportation aside, Yucca Mountain is not the solution. With threats of earthquakes and groundwater contamination, it is an environmental disaster waiting to happen. I urge my colleagues to oppose this resolution.

I want to again thank the gentleman from Massachusetts and the gentlewoman from Nevada for making sure that we are fully aware of the implications of what we are doing today.

Mr. MARKEY. Mr. Speaker, I yield 1½ minutes to the gentleman from Minnesota (Mr. OBERSTAR).

Mr. OBERSTAR. Mr. Speaker, I thank the gentleman for yielding me this time, and I rise in opposition to the Yucca Mountain Repository Site Approval Act.

Our Committee on Transportation and Infrastructure just recently had a hearing on this issue. It was clear from the hearing there are too many uncertainties, too many unresolved issues, and the risks are too high for us to support this resolution.

This is not the first time, this is the second time around on this issue of transporting nuclear waste. And our committee addressed this issue in 1982 during the consideration of the surface transportation bill when there was an amendment to prohibit the transportation of nuclear waste through major urban areas. What about the folks in the rural areas? They should be exposed because people in the urban areas should not be? We defeated the measure.

In 1987, the same group that is telling us that Yucca Mountain is a great place came to us in northern Minnesota saying it was a great place to locate nuclear waste at the headwaters of the Great Lakes. One-fifth of all the fresh water on the face of the Earth, and they wanted to deposit this most toxic substance known to mankind right there so we could poison one-fifth of the water. It was the worst possible place then, and Yucca Mountain is the second worst possible place.

The General Accounting Office submitted to our committee a report showing that there are 293 scientific issues and technical questions not yet resolved that have to be answered before the DOE could even apply for a license. This is not the time. We have plenty of time. It will not be until 2006 before they are even ready to submit an application. Let us defeat this now and give it more substantive consideration.

Mr. Speaker, I rise in opposition to H.J. Res. 84, the Yucca Mountain Repository Site Approval Act, which authorizes the development of a nuclear waste depository at Yucca Mountain, Nevada. As was made clear during a joint hearing of the Subcommittees on Railroads and Highways and Transit of the Committee on Transportation and Infrastructure, there are too many uncertainties, too many unresolved issues—and the risks are simply too high—for me to support this resolution.

At the hearing, we heard a great deal of evidence about the failures of the Yucca Mountain proposal. We learned that the Department of Energy ("DOE"), which was supposed to study the environmental effects of transporting nuclear waste from 131 sites around the country, included only 77 sites in its final environmental impact statement for Yucca Mountain. In other words, DOE omitted any evaluation of 54 nuclear waste sites—or 41 percent of the nuclear waste sites it was supposed to study—from its analysis.

In addition, the General Accounting Office issued a report just this past December that noted 293 outstanding scientific and technical questions that must be resolved before DOE can even apply for a license for the Yucca Mountain site. Bechtel, DOE's own contractor, has stated that DOE would not be in a position to submit a license application for Yucca Mountain until 2006.

Some of the most troubling aspects of the Yucca Mountain project are the uncertainties surrounding the transportation of nuclear waste across the country. The method and routes for transporting all this spent fuel from

131 sites around the country have not yet been determined. There are proposals; there are ideas about how to best ship the spent nuclear fuel, but there is no definitive plan for its transportation. What we do know is that this highly toxic material will be shipped over our Nation's highways, railways, and waterways, and will most likely travel through more than 40 states and the District of Columbia. And we know that, regardless of the specific routes ultimately chosen, this nuclear waste will be shipped through our communities in close proximity to millions of people.

Yet, we are told simply to accept the fact that by the time this fuel is ready to be shipped, the Administration will have figured out an acceptable plan for shipping it. Mr. Speaker, I submit that such important issues should be explored and decided before we chose a nuclear waste depository—before we agree to ship nuclear waste through our cities and towns and across our lakes and rivers.

Proponents of the Yucca Mountain site point to the safety record in transporting nuclear waste over the past 35 years. But what they don't say is that there have been, on average, just over 90 such shipments each year, mostly by truck. If we were to transport the 46,000 tons of materials now being stored around the Nation, as well as some of the additional nuclear waste that will be generated before the Yucca Mountain site reaches capacity, it would require approximately 2,800 cross-country truck movements each year for 38 years.

The Administration envisions that most of the shipments will be by rail. But there is currently no railroad to the Yucca Mountain site. Further, many of the nuclear sites where waste is currently stored are not directly connected to a railroad. In addition, there are no federal regulations that govern the routing of these shipments by rail.

Tellingly, the railroads disagree with DOE over the safest way to ship this spent nuclear fuel. The railroads believe that dedicated trains are the safest way to move this material. First, dedicated trains do not require any switching of the railcars. Switching increases the handling of railcars and thereby increases the risk of an accident. Second, the disparity between the weight in the railcars carrying the nuclear waste and the railcars carrying other freight in a mixed freight train may cause instabilities that could lead to a derailment. Third, dedicated trains are necessary for the train to be equipped with electronically controlled pneumatic brakes. These brakes provide greater safety through advanced braking capabilities and an advanced communications system that alerts the crew of the condition of the train's wheels.

DOE's regulations, however, call for spent fuel casks to be shipped in mixed general freight trains. Unfortunately, DOE's regulations appear to be "market driven" in that mixed freight trains are cheaper than dedicated trains. I would submit that the safe transportation of these highly toxic materials should take precedence over making a buck.

At the subcommittee hearing, many of my colleagues on the Transportation Committee voiced a great deal of concern over the possibility of a train accident similar to the one in the Baltimore rail tunnel last July that burned for three days with temperatures rising above 1,500 degrees F. That is higher than the temperature that the spent fuel casks are designed to withstand. If a single rail cask with spent nuclear fuel had been on-board that train, it could have released enough radiation to contaminate a 32 square mile area. It would have cost nearly $14 billion to clean up such a catastrophic accident if it had involved nuclear waste. What is shocking is that the Nuclear Regulatory Commission ("NRC") has not done any tests on the stability of the casks in a similar scenario. The tests they have done assumed a fire burning at 1,475 degrees F for 30 minutes. We now know first-hand that fires from such a train accident can extend far beyond the NRC's assumptions.

Terrorism also poses a significant threat to any safe transportation of spent nuclear fuel. Whether transported by truck, rail, or barge, these shipments will be slow moving and could potentially be the target of a terrorist attack. We simply cannot afford to short-change the real and pressing security concerns inherent with the transportation of this fuel. While the casks are designed to withstand a great deal of damage, some of the sophisticated weapons available today could penetrate them.

The subcommittee hearing brought to light a whole host of issues surrounding the transportation of nuclear waste material that should be addressed before we accept any plan to ship spent nuclear fuel across the country. Unfortunately, the Administration has elected to force the issue before all these concerns can be sufficiently addressed. The Nuclear Waste Policy Act states that the President's recommendation starts a process that leads ultimately to the Congress having to accept or override a veto by the Governor of the State of Nevada. I believe we should sustain Governor Guinn's veto.

It may be hard to accept the consequences of sustaining the veto, but not as hard as making the wrong decision on this critical national security and transportation safety issue.

I urge my colleagues to oppose H.J. Res. 84.

Mr. BOUCHER. Mr. Speaker, I reserve the balance of my time.

Mr. TAUZIN. Mr. Speaker, I yield 3 minutes to the gentleman from Michigan (Mr. KNOLLENBERG).

Mr. KNOLLENBERG. Mr. Speaker, I thank the gentleman for yielding me this time, and I rise in very strong support of H.J. Res. 87, a resolution to approve the site of Yucca Mountain, Nevada.

I am pleased we are finally at this step in this long process. We know that something must be done with the thousands of tons of radioactive fuel currently sitting in spent fuel pools across the country. Billions of dollars and multiple studies later, we know Yucca Mountain is the place to put it. It is safe and suitable.

It is a simple fact that to get nuclear waste to Yucca Mountain we are going to have to move it, move it from many nuclear power plants across the country. Opponents to Yucca Mountain have spun tall tales of the dangers of sending nuclear waste through our hometowns on the way to Nevada. Mr. Speaker, these arguments are nothing but a red herring.

A wise man once said everyone was entitled to their own opinion but that everyone was entitled to only one set of facts, and, Mr. Speaker, we have the facts on our side. Let me assure my colleagues that the transport of spent fuel along the Nation's highways and railways is safe. Over the last 30 years, as we have heard, more than 2,700 shipments of spent nuclear fuel have taken place, traveling more than 1.7 million miles, and they have taken place without a single release of radioactive material harmful to the public or the environment.

The Federal Government takes numerous precautions when transporting nuclear materials, such as routing, security, tracking of progress, coordination with State officials, and any emergency preparedness training that is needed for State and local responders. The details of these precautions, most of which are highly classified, are very impressive.

Certainly, shipping nuclear waste has the inherent risk of accident or attack, but that risk was there for the last 30 years as well and it will be there as long as we ship any nuclear waste. The far greater risk, in my mind, is to leave that waste in our backyards, on our lake shores, and in our communities in the 39 States where it currently is stored.

For years, I have worked with my colleagues in the House to ensure we address the issue of nuclear waste in an honest and professional way. It is honest to say we can ship the waste safely because we have done it and will continue to do it. In fact, shipments are likely taking place right now as we speak. Our record on transporting nuclear waste is not an argument against Yucca Mountain, indeed it speaks strongly in favor of it.

Mr. Speaker, the facts back it up. I strongly urge all my colleagues to vote for a permanent repository for high level radioactive waste and spent nuclear fuel. Support, I repeat, support this move.

Mr. MARKEY. Mr. Speaker, I yield myself 3½ minutes.

A congressional expert is an oxymoron. There is no such thing. Congressmen are only experts compared to other Congressmen. They are not experts compared to real experts in any field.

Here, what we have is a decision made by congressional experts, us, to pick Nevada because they have the smallest delegation. That is why it happened. And now, unsurprisingly, there are 293 unresolved environmental issues related to a group of Congressmen picking the site to bury all nuclear waste in the United States for the next 10,000 years. Now, Members of Congress are different in many ways, but one of the things they pretty much share in common is a very limited scientific background, and so it is no surprise that all of these issues remain unresolved.

Now, what do we have on our hands, then? We have a thermonuclear Ponzi game. The generation that in fact enjoyed the benefits of nuclear power, and by the way there has not been a new nuclear power plant ordered successfully in the United States since 1974, we are coming up to the 30th anniversary, wants to pass on the risks to the next generation. It's a Ponzi game. We are dumping it on the next generation. Let them figure out what the environmental health and safety problems are. We are getting it off our hands right now. We are congressional experts.

Now, what is the complication? Well, since September 11, in addition to all those environmental issues, we have the problem now of al Qaeda. Now, what have we learned in the caves and the computers of Afghanistan? What we have learned is that al Qaeda has placed nuclear at the very top of their terrorist targets. And so what we know is that the security that is going to have to be placed around the transportation of all of this nuclear waste must be much higher than anyone anticipated before September 11.

Have we had the hearings on that subject? Have we determined what the cost of that might be?

Here is what we also know. There have been two major rail accidents in the United States over the last 3 weeks. Now, what if it was a nuclear waste shipment? And what if the train was deliberately derailed by al Qaeda in some small town or city across the United States; and then, with conventional weapons attached to the nuclear waste, a dirty bomb was exploded? Is that possible? Well, post September 11, we know that they arrive in very large numbers, 20; they are very technically sophisticated; they are suicidal, and they have the technical capacity to be able to execute little drills like that.

So it seems to me before we begin the process of putting a trainload or a truckload of nuclear waste on the road every 4 hours for the next 24 years, that we have a responsibility to answer these questions. But because the nuclear industry and a pro-nuclear Bush administration just wants this issue to move so fast down the track that these questions do not get answered. We will not have that debate here in Congress. And that is as wrong as abandoning the intergenerational responsibility that we have to the next generation of Americans that did not create this nuclear waste but will run the risk of all of the dangers inherent in storing it in Nevada and transporting it on the roads and railways of this country.

Mr. Speaker, I reserve the balance of my time.

Mr. TAUZIN. Mr. Speaker, I am honored to yield 3 minutes to the gentleman from Alabama (Mr. CALLAHAN), the distinguished cardinal from the Committee on Appropriations, the chairman of the Subcommittee on Energy and Water Development, who, unfortunately for all of us, has announced his retirement from Congress this year and whom we will all sorely miss.

Mr. CALLAHAN. Mr. Speaker, I thank the gentleman for yielding me this time and for his kind words.

And to the gentleman from Massachusetts, let me tell him that we all know he is one of the most eloquent Members of this House. He always makes his points and makes them so eloquently. But I would like to remind him that the Ponzi scheme started in Massachusetts.

Mr. MARKEY. Mr. Speaker, will the gentleman yield?

Mr. CALLAHAN. I yield to the gentleman from Massachusetts.

Mr. MARKEY. Mr. Speaker, I would advise the gentleman that it started in my district, which is why I am an expert.

Mr. CALLAHAN. Reclaiming my time, Mr. Speaker, I understand that.

And the gentleman also mentioned earlier in the well of the House today that one of the reasons we are here debating this issue today is because of the ineffectiveness and the smallness of the Nevada delegation. The gentleman from Nevada (Mr. GIBBONS) and the gentlewoman from Nevada (Ms. BERKLEY) are two of the most articulate, effective Members of this body. And the very fact that they are short in numbers does not at all forgive the fact that they are very effective and outstanding Members of this body.

I would also like to remind the gentleman from Massachusetts that the last time I checked this same issue passed the Senate of the United States. And if I am not mistaken, the State of Massachusetts has two Senators and the people from Nevada have two Senators, an exact parity, at least in the Senate.

□ 1430

So the fact that this project wound up in Nevada had nothing to do with either the ineffectiveness or the smallness of the delegation, but rather out of scientific knowledge that this was the right direction to go.

The Subcommittee on Energy and Water Development has already appropriated over the last 12 years nearly $8 billion to ensure that this site is the safest site in the world in which to perform this storage. So there is no doubt in my mind, and I have visited the facility and I encourage the gentleman from Massachusetts (Mr. MARKEY) to visit and see for himself that these products are going to be stored in such a safe manner that we are not talking about any danger to the citizens of Nevada, or anywhere else.

It is going to be a safe facility because of the $8 billion we have already spent. Besides that, we are probably going to have to spend another $8 billion in the next 5 years to make further absolutely certain that it is safe with respect to the deficiency of the 293 indications that the gentleman says we have last year. And I would like to secure the gentleman's commitment this year, if the gentleman will vote for an appropriation, I will give them the money to do these 293 studies. But, instead, last year when President Bush sent the request over for the additional money to do the additional studies, when it got to the Senate, a member of the Senate from Nevada reduced the appropriation, negating the possibility that we would be able to fulfill all of the new studies.

Mr. Speaker, I encourage all Members to join with me this year in appropriating a sufficient amount of money to make absolutely sure that all of the studies are going to be fulfilled. I am certain that the studies will prove that we are right, and this resolution, in my opinion, should pass.

Mr. MARKEY. Mr. Speaker, I yield 11 minutes to the gentleman from Nevada (Mr. GIBBONS).

Mr. BARTON of Texas. Mr. Speaker, I yield 1 minute to the gentleman from Nevada (Mr. GIBBONS).

Mr. GIBBONS. Mr. Speaker, I thank the gentlemen for yielding me this time.

Mr. Speaker, I come to this body to speak on the floor to make one final plea that we consider a safer, more cost-effective solution to the disposal of our Nation's high level nuclear waste than simply burying it in a hole in the high desert mountains in the State of Nevada, my home district.

Just last year, I urged Members and the public to review a GAO report which called the Department of Energy's Yucca Mountain project "a failed scientific process." The GAO's independent, highly critical study of the Yucca Mountain project should be enough to shine the light even through the thickest nuclear industry smoke screen. And now, almost 5.5 years after I brought this issue to our attention, I implore this body and the DOE to abandon this misguided Yucca Mountain project.

Consider the following: Is Yucca Mountain suitable for storage? Just listen to the proponents of the Yucca Mountain project. Time and again they will tell us the number of years and the billions of dollars that they have spent by this government to move this process forward is suitable for making this decision. We will hear it throughout today's debate, and we have heard it throughout today's debate. But this argument is flawed, as is the DOE policy. Spend all we want, we cannot make a volcanic, seismically active mountain geologically sound. Whether it is $8 billion, $10 billion, $20 billion, $100 billion, there will be earthquakes, water will percolate through the mountain, and corrosion of these casks will occur.

Where is our sense of fiscal discipline in this body? Where is our restraint? Why are we willing to just throw our arms up in the air and conclude, well, we have already spent billions of dollars, so I guess we should just proceed? Where are my colleagues who are advocates for States' rights, local control and fiscal discipline?

Nevada is currently fighting the DOE in Federal court to protect our water rights. That may not mean much to Members east of the Mississippi, but out West, water is very hard to come by.

For local control, what are our governors going to do the first day rigs and railcars start traveling through Members' States carrying thousands of tons of high level nuclear waste? I think I have a pretty good idea. Ask the governor of the State of South Carolina.

The DOE and the nuclear industry tells us that bringing up accidents is simply a scare tactic. But wait, it was not Nevada, it was the DOE that said we should expect somewhere around 400 accidents during the 38 years of transportation that this waste must cross America. We did not bring it up. Nevada did not bring it up. We did not arbitrarily come up with those numbers; the DOE did.

What will a State trooper, an off-duty fireman, an EMT do when they are required to be the first to respond to a nuclear waste accident? Before Members vote today, perhaps they should talk to them. Ask them, and they will probably say they do not know because nobody is trained or prepared to deal with an accident on a highway dealing with this high level nuclear waste.

The DOE begs us to consider the fact that they have safely transported waste in the past without incident. Well, maybe there have been no major accidents where radioactive materials were released, at least not yet. But add up every single shipment of waste thus far, and we do not even come up to within 1 percent of the total amount of waste shipments that will be put on our streets, near our homes and communities, and probably through the communities of our constituents in the years to come.

If the waste is not coming through our population centers by truck, it will come by train. Let me remind Members of some of the recent stories involving train accidents around this country. We can see Los Angeles Times, 260 People Injured, 2 Dead; Baltimore, Toxic Cargo Shuts the City Down, Firefighters Stymied, on and on the stories continue.

I ask Members to look at page A8 in today's Los Angeles Times which indicates that storage of waste at Yucca Mountain is not safe. It will leak. What does this policy that we have before us today as a Nation say? It would lead us to believe that the world has no innovation and no technology, and that we do not have scientific and medical achievements capable of dealing with nuclear waste. We find ourselves cemented by a DOE policy that tells us the best our Nation can do or that our Nation has to offer for high level nuclear waste storage is simply to dig a hole and bury it in the ground and walk away. This, while nations across the world are advancing technologies in processing and recycling this waste.

We have the ability in this country to reduce the amount of waste, to lower its toxicity, to eliminate plutonium, and make the waste completely nonproliferative, but not with this current policy. All we want to do, according to this policy, is hollow out a mountain, fill it with waste and walk away. I am totally unimpressed.

Another question. What problem do we solve by moving forward with the Yucca Mountain project? The answer, none. As a matter of fact, we create one. If we look at this chart, there are 131 locations of nuclear waste around this country. Moving forward when we create Yucca Mountain with this policy, what are we going to have? We are going to have 132 sites in this country where nuclear waste is stored, one additional one in southern Nevada. That is right. Look at this map. There are 132 sites for nuclear waste. We do not, we will not, we cannot remove the waste from all of these States.

Mr. Speaker, spent fuel rods have by requirement to sit in a cooling pond for a minimum of 5 years before they can be shipped. The DOE myth is that we are relieving these reactors of on-site storage, and we are somehow preventing the possibility of a terrorist attack on one of these 131 sites. That logic does not fly. All we are doing is going from 131 project sites to 132.

Mr. Speaker, let us assume for a moment that there would be no accidents, no train derailments, no tracks to jackknife over a bridge or some waterway, not one accident to occur in 38 years. Not likely, but we will pretend, anyway, that it may happen. What about the terrorists? Are we not currently preparing ourselves to spend billions of dollars on homeland defense? Are we not briefed every day by Federal officials as to the potential threats we face within our borders? Americans are getting a civics lesson every day in what a credible threat means.

The chairman of the Senate Committee on Intelligence spoke out about terrorist threats within the United States. He said the terrorists are here in high numbers and ready and capable of attacking the United States. That begs the question, what next? What exactly is the al Qaeda craving next? According to CIA Director George Tenet, it is a low tech nuclear device or what has been deemed a dirty bomb. I quote from Mr. Tenet: "We believe that bin Laden was seeking to acquire or develop a nuclear device. Al Qaeda may be pursuing a radioactive dispersal device, what some call a dirty bomb."

Just last month CNN reported that Abu Zubaydah, the most senior al Qaeda leader in the United States, has told investigators that terrorists were producing a radiological weapon, a dirty bomb, and know how to use it.

Mr. Speaker, what we are talking about today is placing tens of thousands of dirty bombs on our roads and railways through 703 counties in 44 States. This map shows where the routes are going to go through the various States. If a Member's State is not one of the three, Montana, North Dakota and South Dakota, then that Member's State is going to be affected by the transportation of nuclear waste.

There are terrorists in this country; and tragically, we have witnessed the amount of destruction they are willing to bring. Yet we are to believe that every one of these nuclear shipments will be safe for the next 4 decades, that they will be completely safe from any potential foreign or domestic terrorist attack.

Mr. Speaker, I certainly hope so. After all, one does not have to be a trained terrorist to jump a train carrying high level nuclear waste. Just a few weeks ago a train carrying high level nuclear waste was boarded by one or two escaped inmates from a North Carolina prison who were trying to escape from an inmate work program. Well, imagine if these train jumpers happen to be more than common day criminals trying to evade their captors. What if they were terrorists and had explosives with them? Yet even though this did occur and it can and will occur again, we are charged with this bill's proponents of presenting nothing but scare tactics.

Just as the DOE cannot spend Yucca Mountain into making it geologically sound, the nuclear energy industry cannot spin the facts into a myth. The nuclear power industry has contributed $13.8 million to Federal candidates during the 2000 election cycle. They have spent $25 million in just 1 year lobbying Congress on this issue, although many minds may not change, nor will the facts. According to DOE, on-site dry cask storage can continue for the next 100 years.

The Nuclear Waste Policy Act demands that the Yucca Mountain be deemed geologically suitable. As someone who holds a master's degree in geology, let me say that it is not, it cannot, and it never will be geologically suitable as required by the act, no matter how many billions we try to put into it.

If Members do not take my word for it or Nevada's word for it, take their word for it and consider what the other side has said. The DOE, the NRC, the Nuclear Regulatory Commission and the Congressional Nuclear Waste Technical Review Board have all said that the technical basis for projecting the long-term performance and the project's base case repository design has critical weaknesses.

□ 1445

They further said that the DOE has not presented a clear and persuasive rationale for going forward with the site recommendation.

We have numerous statements that support this concept about the weakness of their case. Mr. Speaker, we can and we could do much better than this. We can and we should offer a more viable and safe and cost efficient solution to this problem. We can and we should continue to support nuclear power as an alternative to fossil fuels. But you do not need one just to have the other. Yucca Mountain is not safe.

I, Mr. Speaker, in conclusion would say that many of my colleagues have never looked their constituents in the eye on this issue. But I represent the dairy farmer in the Armagosa Valley that is near Yucca Mountain, and I represent the alfalfa farmers that are there as well. They are watching today. I want them to know that we are fighting for them against this Yucca Mountain project.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. ISAKSON). The Chair must remind Members to avoid improper references to the Senate, such as quotations of Members of the Senate other than in actual legislative history on the pending measure.

Mr. BOUCHER. Mr. Speaker, I reserve the balance of my time.

Mr. BARTON of Texas. Mr. Speaker, I include for the RECORD a letter from Edward C. Sullivan, the President of the Building and Construction Trades Department of the AFL-CIO, in support of H.J. Res. 87.

BUILDING AND CONSTRUCTION TRADES DEPARTMENT, AMERICAN FEDERATION OF LABOR-CONGRESS OF INDUSTRIAL ORGANIZATIONS,
Washington, DC, May 6, 2002.

DEAR REPRESENTATIVE: On behalf of the Building and Construction Trades Department and our affiliated unions, I am writing to ask you to support House Joint Resolution 87, the Yucca Mountain Resolution, because it is in the best interest of our nation, our citizens and our workers.

Our Nation needs a safe, stable and scientifically feasible program for storing used nuclear fuel. The Yucca Mountain location has been thoroughly examined for over 20 years at a cost of $7 billion and has met or exceeded all environmental and scientific standards for storage. It is located on federal land in a remote, secure area.

Nuclear energy has proven to be a clean, safe and reliable source of electricity for nearly half a century. Today, one of every five homes, businesses and farms receives electricity generated by a nuclear plant.

Since the 1970's growth in the use of nuclear energy has reduced the need for foreign oil in the electricity sector and saved consumers $81 billion in payments for imported oil. But, unless we can begin the process of safe storage of spent nuclear fuel, the future of nuclear energy is uncertain. Yucca Mountain provides a unique public-private partnership with the federal government appropriately shouldering the obligation to manage used material while electricity consumers have provided the $18 billion cost to pay for this program.

Finally, this issue is a very important jobs issue. Many highly skilled Building Trades members in your state will benefit from passage of this resolution. If the process set forward by the passage of this resolution was to stop, many good family wage jobs would disappear and a great number of jobs would never be created.

I urge you to support this resolution and permit this process to go forward.

Sincerely,

EDWARD C. SULLIVAN,
President.

Mr. BARTON of Texas. Mr. Speaker, I yield 2 minutes to the distinguished gentleman from Illinois (Mr. KIRK).

Mr. KIRK. Mr. Speaker, as chair of the Nuclear Fuel Safety Caucus here in the Congress, I would remind everyone that in the shuttered Zion nuclear power plant just 100 yards from Lake Michigan lies a thousand tons of highly radioactive nuclear waste stored next to Lake Michigan. This is not unique to my district. The Great Lakes have another 31 coastline sites where nuclear waste is stored.

Twenty percent of the world's fresh water is found in the Great Lakes. Thirty million Americans depend on the Great Lakes for fresh water. Not one scientist or scientific study claims that storing nuclear waste next to the world's largest supply of fresh water is environmentally sound. Moving nuclear waste from 131 temporary storage sites around the Nation to one secure location where America has already tested dozens of nuclear weapons is the goal of the Nuclear Fuel Safety Caucus. We must move nuclear waste from the Great Lakes.

Why Yucca Mountain? Because without Yucca Mountain, we would have to construct 131 permanent storage facilities for nuclear waste in 39 different States. These storage facilities are close to groundwater, earthquake zones and in close proximity to major cities, including San Francisco, Boston, New York and Chicago. Without Yucca Mountain, 161 million Americans would have to live their entire lives within 75 miles of a nuclear waste site.

And then there is the cost. According to the government's own study, the cost of building 131 permanent storage sites would be over $61 billion. To cover this, the Federal Government would have to borrow from Social Security or raise taxes. Perhaps we could reinstitute the death tax, but we would have to double it to pay for the cost. And that would not cover the lawsuits which would total over $56 billion for reneging on the promise to provide a nuclear waste storage site.

A vote for this resolution is a vote to protect our Nation from further terrorist attacks. Removing nuclear waste from 131 sites to a single repository buried deep inside a mountain range 100 miles from a population center is much safer from sabotage or terrorism.

I urge the adoption of this resolution. Let us wipe clean the terrorist shooting gallery of 131 sites located around the country and vote for this resolution for a secure environmental future.

Mr. MARKEY. Mr. Speaker, I yield 5 minutes to the gentlewoman from Nevada (Ms. BERKLEY).

Ms. BERKLEY. I thank the gentleman for yielding me this time.

Mr. Speaker, I have listened very carefully to the debate and I have to say that I was appalled when one of the speakers said that if we passed this resolution, Nevada will be able to continue its nuclear legacy. Nuclear legacy? Nevada does not have a nuclear legacy.

Let me tell you what transpired in the 1950s in the State of Nevada when there were less than 100,000 people in the entire State. The Federal Government came to us and said that it was going to do above ground atomic testing of atomic bombs but that it would be perfectly safe and that you could watch it, bring your families there, work there safely. All you had to do was go home and take a shower. So thousands of people went to work at the Nevada test site. I must say I have friends that share with me the times that their parents took them up to the Nevada test site with a picnic lunch and they watched the atomic bombs going off in the Nevada atmosphere.

Let me tell you what has happened to those Nevada test site workers, those brave souls who thought that they were doing their duty for their country, but safely, at the promises and assurances of the Federal Government. Those Nevada test site workers, if they are not dead, they are dying. Those people that observed those tests and watched as they ate their bologna sandwiches, they are dying, too. They are all dying of unexplained cancers. Those downwinders in Utah and in Nevada who happened to be caught living downwind of these atomic tests, they are all dead, too.

It is very difficult for me, after having lived through those experiences, to believe the Federal Government now when they tell us that the transportation and storage of 77,000 tons of toxic nuclear waste in a hole in the Nevada desert is safe. It was not safe then and it is not safe now.

In addition, we keep hearing about the $7 billion that has already been spent on site characterization. But if you spend 7 cents or $70 billion, it does not make that site any safer. We are talking about an area of our country that has seismic activity, volcanic activity. It has groundwater problems.

If I could direct your attention to a Los Angeles Times article that appeared today, this is the headline: "Nuclear Dump Site Will Leak, Scientists Say." The little message underneath the picture says, "Despite the dry appearance of the proposed Yucca Mountain nuclear dump in the Nevada desert, there is water in its environment. Scientists say that that vulnerability will eventually allow radioactive material to leak. At issue is only how long."

Then they point out paragraph after paragraph. The government officials point out, and I am quoting, two other nuclear sites that officials—these are government officials—once said would be leak-free for hundreds or thousands of years: In Pocatello, Idaho and the Hanford site in eastern Washington. Quote, both are leaking already, and radioactive material could make its way into groundwater in just 10 years. That is according to a report by the National Research Council.

You are telling me this is sound science? This is what appeared today in the L.A. Times. It talks about Yucca Mountain.

"About 12.3 million gallons of water flow through the disposal area per year. Traces of chlorine 36, which is produced only by nuclear bombs, was recently discovered inside Yucca Mountain." That means that through the groundwater, radioactive material gets into the rocks and into the groundwater in as little as 40 years. And you are telling me there is sound science? I do not think so.

I have also heard some of my colleagues say this is really not a Yucca Mountain vote, this is not a transportation vote, that this is not really a vote on shipping nuclear waste. Let me beg to differ. This is the only time we will have to vote on this issue. So do not tell me this is not a vote on the transportation of nuclear waste across our country. It is the vote.

I have listened to this debate. There is no doubt, on both sides of the aisle, we have huge problems. We have a huge problem with nuclear waste. We have an energy source in this country, nuclear energy, that produces a dangerous by-product, nuclear waste. This Nation has never figured out what to do with it. Not any alternative that I have heard is good enough for the people that I represent and good enough for the people you represent, too. If we go ahead with this foolhardy plan, we will never, ever figure out what to do with nuclear waste, because once Yucca Mountain is filled up, we will still have the exact same problem. It is time that we take care of that problem and let us take care of it today.

Mr. Speaker, I include the L.A. Times article for the RECORD.

The material referred to is as follows:

[From the Los Angeles Times, Wed., May 8, 2002]

NUCLEAR DUMP SITE WILL LEAK, SCIENTISTS SAY

(By Gary Polankovic)

YUCCA MOUNTAIN, NEV.—As the Bush administration prepares its push to win congressional approval for the Yucca Mountain nuclear waste burial site, scientists agree on one key conclusion: Yucca Mountain will leak. The question is how long it will take.

Rising one mile from the desert floor, the mountain looks as plain and parched as much of the rest of southern Nevada's ranges.

Despite the arid appearance there is water here, and even the scientists who have designed the repository concede that the mountain's vulnerability to moisture will allow radioactive material to eventually leak into the environment.

Time is the key. Highly radioactive nuclear waste remains dangerous for hundreds of thousands of years. Half of the plutonium stored in the mountain, for example, will still be radioactive 380 million years from now.

Just one-millionth of an ounce of plutonium is enough to virtually assure cancer in someone who comes in contact with it.

As Congress considers whether to override Nevada's opposition to housing nuclear waste here, opponents of the waste site argue that the Bush administration is pushing through a flawed solution that will create radioactivity risks for thousands of years.

Government officials say they have designed a burial site that will be free of leaks for at least 10,000 years. Critics, armed with a raft of scientific studies, say that can't be guaranteed. They point to two other nuclear sites that officials once had said would be leak-free for hundreds or thousands of years: the Idaho National Engineering and Environmental Laboratory near Pocatello and the Hanford Site in eastern Washington. Both are leaking already, and radioactive material could make its way into groundwater in just 10 years, according to a report by the National Research Council, an arm of the National Academy of Sciences.

Even if a 10,000-year leak-free promise could be guaranteed, critics of Yucca Mountain say society has a responsibility to civilizations far in the future not to expose them to lethal waste that we generate.

But the alternative to putting nuclear waste here is to leave it accumulating in 131 different places in 39 states, much closer to people and potentially vulnerable to terrorist attack, the Department of Energy warns.

The waste piled up around the country comes from nuclear aircraft carriers and electrical plants, bomb factories and university labs. Over time, it will emit thousands of times more radioactivity than was released at Chernobyl and millions of times more than the Hiroshima bomb.

"There is no more [storage] space, there are deteriorating storage conditions, and you have the challenge that so much of it is located near population centers and waterways," said Secretary of Energy Spencer Abraham. "No one believes you can bring in David Copperfield, wave a wand and it all goes away."

"We've tried to take into account as many uncertainties of the future as can be assessed," Abraham said. "I am convinced that the site is scientifically suitable—in a word, safe."

Yucca Mountain is not a done deal yet, but converting this forlorn peak into the world's first high-level nuclear waste dump is closer to happening than ever.

President Bush has chosen the site, but Nevada challenged that decision. Congress is considering whether to overturn Nevada's veto, and opponents of the dump acknowledge they probably do not have the votes to stop it. (A House vote might occur as early as today.) If the Yucca Mountain plan survives Congress, the Nuclear Regulatory Commission will consider issuing a license, and the dump could open by 2012.

Experts long ago recognized the need for deep, geological disposal of radioactive waste, yet it is unknown whether any system can be devised that could keep highly radioactive waste isolated for such an immensely long period.

"We nuclear people have made a Faustian bargain with society," said Alvin Weinberg, former director of the Oak Ridge National Laboratory in Tennessee, where plutonium was tested for one of the nuclear bombs dropped on Japan. "We offer an inexhaustible and nonpolluting source of energy, but we require a level of detail and discipline that we're unaccustomed to in handling the waste.

"Nobody really knows if we can do this. Trying to project what's going to happen in thousands of years, tens of thousands of years, is quite ridiculous," Weinberg said.

Today, Yucca Mountain is an island in a desert. It is surrounded by the Nevada Test Site, where the government once tested nuclear bombs.

"If you can't put it here, then where can you put it?" asked Michael D. Voegele, chief scientist for Bechtel-SAIC Co., the Energy Department's contractor for building the repository at Yucca Mountain.

But who can say what will be here millions of years from now when plutonium and other deadly wastes still pack a wallop? Will it still be a desert? Glaciers advanced and receded across the planet a dozen times in the last 2 million years. An inland sea called Lake Bonneville covered much of Nevada and Utah 12,000 years ago, when humans first arrived.

These technologies are forcing us to address the issue of how they will affect future generations. This is not an issue we've faced on this scale before," said Lester R. Brown, president of the Earth Policy Institute. "We're doing things with consequences we don't understand."

Government engineers and scientists have been studying Yucca Mountain for over 20 years—twice as long as it took to plan and complete the moon landing—at a cost of $7 billion. During that time, government officials have changed their arguments about Yucca Mountain's safety.

Problems began to emerge years ago when tunnels bored deep into the rock revealed conditions inside were wetter, and the geology more complex, than initially thought. Those discoveries are at the center of the controversy today.

Originally, the volcanic ash where the waste would be entombed was believed to be so tightly compressed that rainfall could not penetrate. Secretary Abraham said in February that rainfall would take 1,000 years to make the 800-foot journey through rock to the disposal zone and longer still before radioactivity could be carried to groundwater. He does not believe leaks are a significant concern.

Yet inside the mountain, government studies have found that the rock is laced with fissures, some that move water the way capillaries carry blood, some that flow like a garden hose. About 12.3 million gallons of water flow through the 2,500-acre disposal area per year, government studies show.

Traces of chlorine 36, which is produced only by nuclear bombs, were recently discovered inside Yucca Mountain. Since the last nuclear bombs were detonated above ground at the Nevada Test Site in 1962, the finding indicates rainfall can carry radioactive material deep into the rock in as little as 40 years.

Once the presence of water was established, the government changed plans. The plans now call for double-layer disposal containers of stainless steel and a nickel-based material called Alloy 22 to keep the waste isolated. The canisters will be covered with titanium "drip shields" to keep waste dry. Canisters could be packed close together too, so heat would boil water and drive away steam.

But engineers do not know yet how to build a container that outlasts radioactive waste.

Materials like Alloy 22 haven't been around long enough for experts to be able to assess how they will perform over centuries.

Given all of the uncertainties, some of the nation's leading experts say President Bush's decision to proceed with Yucca Mountain is premature.

"There are a lot of issues that remain unresolved that could affect the safety of humans and the environment," said Allison Macfarlane, a geologist and the director of the Yucca Mountain project at MIT. "We should not be in a rush."

Carnegie Mellon University President Jared L. Cohon said he is concerned about the integrity of disposal canisters and how water moves inside the mountain. Cohon chairs the Nuclear Waste Technical Review Board, an 11-member panel of independent experts appointed by Congress to review the Energy Department's work at Yucca Mountain.

That panel concluded in January that the government's technical case for Yucca Mountain is "weak to moderate."

Mr. BARTON of Texas. Mr. Speaker, I yield myself 30 seconds.

Mr. Speaker, I want to point out that the gentlewoman from Nevada's statement about people dying of cancers because of exposure to tests in Nevada, above ground testing in the fifties and the sixties, there is not one scientific study that shows that there is any greater incidence of cancer in Nevada than anywhere else in this country. That may be an anecdotal tale, but there is no scientific validity to it.

Mr. Speaker, I yield 1 minute to the gentleman from New Jersey (Mr. FRELINGHUYSEN).

Mr. FRELINGHUYSEN. I thank the gentleman for yielding me this time.

Today, Mr. Speaker, I rise in strong support of this joint resolution which endorses the Department of Energy and the President's finding that Yucca Mountain is the best choice for a national nuclear waste depository. As we know, Yucca Mountain is on a Federal nuclear test site in the Nevada desert that encompasses almost 1,300 square miles, or an area bigger than the State of Rhode Island. Like Chairman CALLAHAN and other Members in this House, I have visited this site. I have been inside the mountain, five miles into it. I have seen it firsthand.

From a New Jersey perspective, this siting decision is long overdue. We live in the most densely populated State in the Nation with 49 percent of our power generated by nuclear energy. For many years now, those wastes have been stored on the grounds of our two nuclear reactor sites, supposedly on a temporary basis. The time has come for the waste to be sent to a single national repository as was promised in the Nuclear Waste Policy Act of 1982 and for which New Jersey taxpayers have contributed millions of dollars in their energy bills.

Mr. Speaker, I strongly support this resolution. I urge my colleagues to do so as well.

Mr. TAUZIN. Mr. Speaker, I am pleased to yield 2 minutes to the distinguished gentleman from Tennessee (Mr. WAMP).

Mr. WAMP. Mr. Speaker, I thank the distinguished chairman for yielding me this time, and I want to bring a little bit of common sense from the South to this issue. We heard from New Jersey. In the southeastern United States in the Tennessee Valley region, we are heavily dependent on coal-fired plants. I share the environmentalists' goal of trying to reduce the emissions of these fossil-fired plants. We also have in the Tennessee Valley Authority region five nuclear reactors on-line. They happen to be the most economically efficient generators of electricity in the TVA system. They are the most environmentally responsible and clean sources of electricity in the region. There is only one hurdle in our way of having a clean, safe alternative to the fossil-fired problem, and that is this waste issue.

This administration, to its credit, has the guts to step up and do what is necessary to provide the alternative. I would say to my friends who protest dirty air and then protest Yucca Mountain, you cannot have it both ways. You cannot eliminate the alternative and then complain about fossil emissions. You cannot do it unless you want our country to be totally dependent on the rest of the world for our energy sources, and we know that sacrifices our freedom.

Mr. Speaker, we have got to do the right thing. I appreciate the parochial eloquence, defending your own turf, but for the good of our Nation we have got to place this nuclear waste in a safe repository. My master's is in common sense. Common sense says you have got to do this in order to have clean air and clean water into the future and energy independence for the United States of America. National security hangs on this decision. This is an important decision and one that is not easy to make because we respect our friends in Nevada.

☐ 1500

We respect our friends in opposition. But this is the right thing to do for the United States of America for many years to come.

The SPEAKER pro tempore (Mr. ISAKSON). The gentleman from Louisiana (Mr. TAUZIN) has 8 minutes remaining and the right to close; the gentleman from Massachusetts (Mr. MARKEY) has 3 minutes remaining; and the gentleman from Virginia (Mr. BOUCHER) has 2 minutes remaining.

Mr. TAUZIN. Mr. Speaker, I am pleased to yield 1 minute to the distinguished gentleman from the great State of California (Mr. ISSA).

Mr. ISSA. Mr. Speaker, there has been a lot of discussion here today on a lot of science and a lot of what-ifs, and I am not going to try to address what has already been said. Rather, what I would like to do is take what has been said by many of the Members from Nevada and clarify it.

They say they are putting it here because we have very little population. Well, for a moment I will agree with that, because over one-half of all Americans live within 75 miles of high-level nuclear waste, most of it above ground, none of it ever tested to take a 757 crashing into it. I rise in strong support of the basic concept that we will get these wastes into an area that will survive that attack and more. I rise because every day in my district over 200,000 men and women drive within a few hundred yards of San Onofre Nuclear Power Plant, not designed as a permanent-storage facility. I ask my colleagues to consider whether the 10 million people who live within the downwind hazard of that nuclear facility should be granted some final relief.

Mr. MARKEY. Mr. Speaker, I yield myself 1 minute.

Mr. Speaker, just so we get the record straight here, this facility which is being contemplated will only hold 60 percent of all of the nuclear waste in the United States, military or civilian. It does not solve the problem.

In addition, all nuclear waste generated at all nuclear power plants has to sit next to the plant for 5 years anyway in each one of the States to cool down, so it does not solve that problem either.

In addition, we also have the question of the casks into which they are going to place the waste. The Department of Energy only has 2 years of corrosion data to extrapolate out for 10,000 years.

Mr. Speaker, Neil Young used to have a song, "Rust Never Sleeps." And again, we are pushing the envelope, with congressional experts deciding that we have the answer to where all of this nuclear waste is going to be stored, in corrodible material and could ultimately leach out into the mountain, out into the aquifers. Finally, the Mobile Chernobyl issue, with terrorism now rearing its head, we have not answered those questions yet. How much will it cost? How safe can we make the railways, the highways, the byways of our country?

Mr. TAUZIN. Mr. Speaker, I am pleased to yield 2 minutes to the gentleman from Texas (Mr. BARTON), the distinguished chairman of the Subcommittee on Energy and Air Quality of the Committee on Energy and Commerce.

Mr. BARTON of Texas. Mr. Speaker, in 1981 and 1982, I was a White House Fellow in the Department of Energy and served at a very low level on the task force that developed the recommendations that later became the Nuclear Waste Policy Act of 1982.

Today, I stand on the floor as one of the chief sponsors of this resolution, along with the gentleman from Virginia (Mr. BOUCHER), my good friend. If the Lord shines upon me, I may be fortunate enough to live long enough to be alive the day we ship the first shipment of high-level nuclear waste to the repository, which will probably be sometime in the year 2015 to 2022. If that happens, I will have spent almost 40 years of my adult life in some way or the other addressing this issue.

I think it is time to send this resolution to the floor of the other body for a vote so that we can let the Nuclear Regulatory Commission receive an application from the Department of Energy in the next 2 years about this license application.

The money has been put into the trust fund. The resolution does not deal with any of the transportation issues; we will deal with those later. There is absolutely tremendous bipartisan support. The time has come to stop talking about this and to vote on it. I hope that we vote in the affirmative at the appropriate time.

Mr. MARKEY. Mr. Speaker, I yield 1 minute to the gentleman from Missouri (Mr. GEPHARDT), the leader of the Democratic Party of the House.

Mr. GEPHARDT. Mr. Speaker, I rise to urge a vote against the Yucca Mountain approval resolution. I hope this resolution will be turned down.

I commend the courageous people fighting against it led by the gentlewoman from Nevada (Ms. BERKLEY) and Dario Herrera. I am sorry that the Bush administration went back on its word approving this untested, dangerous measure.

Whether or not to allow storage and transportation of waste is a decision with important consequences for people in my district and across America. It is a fact that scientists are still debating whether Yucca Mountain is safe. The General Accounting Office a few months ago said that storing waste at Yucca could infect water supplies and release deadly toxins into the surrounding air. It cited 293 scientific questions for which the Federal Government has no answers. Even if we begin shipping this waste today, we will still have nuclear waste stored all over this country decades from now.

But my biggest concern is that it makes no sense to have all of this material traveling across the country by truck and rail. We have seen just in the last month a number of tragic rail accidents. Even the Energy Department says that inevitably there will be derailments of trains headed to Yucca Mountain. I had a train derailment in my district a year ago in Webster Groves, Missouri, where a whole train turned over. Luckily, it was only coal; but it was coal that was spilled a few feet from homes and schools in Webster Groves, Missouri. The people in Webster Groves in the days since then have said to me, what if it had not been coal, but nuclear waste? We have no plan, we have no resources, we have no training for dealing with such a derailment in St. Louis. We have only one hospital bed in the entire metropolitan area to treat severe radiation exposure.

This is not a question about isolating the risks. Yucca Mountain, in reality, simply spreads it around.

I know there is no perfect solution, but we can begin now to invest in better ways to store waste at the sites we currently use. Authorities in Pennsylvania have an approach that puts an emphasis on technology and innovation, an approach that avoids having to cart and haul this waste all the way across the United States. It puts the waste in reinforced facilities. It benefits people in Pennsylvania, and it benefits all Americans.

I simply think, in conclusion, that science and logic is on the side of leaving this hazardous material on site until we find a better solution. I hope Yucca Mountain will be rejected.

The SPEAKER pro tempore. The gentleman from Louisiana (Mr. TAUZIN) has 5½ minutes remaining; the gentleman from Massachusetts (Mr. MARKEY) has 1 minute remaining; and the gentleman from Virginia (Mr. BOUCHER) has 2 minutes remaining.

Mr. BOUCHER. Mr. Speaker, for the purpose of closing on our side, I yield myself the 2 remaining minutes.

Mr. Speaker, the measure before us moves the process forward and enables the taking of the next step in evaluating the Yucca Mountain site. We have no realistic alternative to a secure, central repository for the permanent storage of high-level nuclear waste. The waste is now stored at 72 dispersed reactor sites around the Nation. Leaving the waste in its current storage poses threats, both to the environment and to national security. Permanent dry-cask storage at these 72 sites is not a realistic alternative to a central storage facility.

The resolution before the House enables the taking of the next essential step in achieving the secure central storage, which is the best option before the country at this time. After the resolution passes, construction at the site could not begin until the Nuclear Regulatory Commission conducts a thorough scientific and technical analysis and issues a construction license.

I urge that the resolution before the House be approved so that the NRC can begin its work, so that the scientific and technical studies can go forward, and so that the Nation's best option, a secure, central repository for high-level nuclear waste, can be pursued.

Mr. Speaker, I yield back the balance of my time.

Mr. MARKEY. Mr. Speaker, I yield myself the balance of the time to once again state that we are at a historic juncture, that we should not be making this decision with 293 unresolved environmental issues. We owe the American public, we owe the next generation a higher standard of care than rushing to this decision today.

Mr. Speaker, I yield the final time remaining to the gentlewoman from Nevada (Ms. BERKLEY), the heroine who has been championing this issue to protect her people.

Ms. BERKLEY. Mr. Speaker, I would like to thank the gentleman from Massachusetts (Mr. MARKEY) for having done a stellar job over the last 20 years to protect the people, not only in my own home State, but in the entire United States of America.

I have been profoundly involved with this issue for the last 20 years, ever since it was passed in 1982. This is a horrible piece of legislation. It is a horrible idea. Even if Yucca Mountain is passed, we still will not have solved a very serious problem in our Nation, and that is what we will do with the nuclear waste for generations to come.

Mr. Speaker, I urge us, before we spend billions of dollars more, to take this money, put it into research and development for renewable energy sources. Let us harness the sun, let us harness the wind, hydrocells, geothermal; and let us truly become energy independent, away from foreign oil sources and away from an energy source that produces a by-product that is so deadly that none of us, none of us want it in our backyard.

Mr. TAUZIN. Mr. Speaker, with the consent of my colleagues, I would like to do what I think is the fair thing to do at this point, and that is to yield 1½ minutes to the gentleman from Nevada (Mr. GIBBONS), our friend, for an opportunity to close his arguments on behalf of the State that he loves so dearly and represents here in the Congress.

Mr. GIBBONS. Mr. Speaker, I thank the chairman for his generous use of time and for allowing me to make a few final remarks as we close this debate on one of the most important issues that the State of Nevada has faced over 20 years.

Mr. Speaker, there are no nuclear generating facilities in Nevada. If we looked at all of the debris as a result of the nuclear testing that Nevada contributed as its share of obligation to this country, the national security of this country for 20 years or decades, it is less than 4 tons. We are going to be sending 77,000 tons of the most deadly, toxic substance known to man to be stored in the State of Nevada for thousands of years, and we have yet to approve the science that says that Yucca Mountain is either qualified or suitable to store this nuclear waste in Yucca Mountain.

We have talked about the science. We have talked about the dangers. We have talked about the continual expenditure of billions of dollars trying to make that square peg fit a round hole. Mr. Speaker, it is not going to happen. There is no way that the geology of Yucca Mountain will ever meet the requirements of the law that was passed in 1982 and amended in 1987.

□ 1515

We have taken our science and shown that Yucca Mountain is not suitable. They are required now to have engineered barriers just so they can make the excuse, well, if the geology does not work, we will engineer it to be safe. If that is the case, they can engineer it to be safe in any place in this country.

Mr. Speaker, I rise in strong opposition to this resolution, and urge all of my colleagues to oppose it.

Mr. TAUZIN. Mr. Speaker, I yield myself the balance of my time.

Mr. Speaker, I respect my friends, the gentleman from Nevada (Mr. GIBBONS) and the gentlewoman from Nevada (Ms. BERKLEY), and I appreciate the fight they are making on the floor today. I understand their concerns for their home State and for this decision. Outside of that, the opposition to this resolution basically comes from those who oppose nuclear energy.

When we ask those Members what other energy would they support, we get some strange answers. If we suggest coal, they say, oh, coal can be pretty dirty, you know. You have to scrub it. Even if you scrub it, it produces CO_2 and that may contribute to global warming, and golly, we had better not burn coal in America, even though 40 percent of our electricity comes from coal.

Or we might say, would you support oil and gas development? And they say, no, wait a minute, the land is too pristine, and certainly not off my coast. Go do it in Louisiana, maybe, but do not do it anywhere else, please. Certainly do not do it in my State, off my coast or in my national wildlife preserve, even though you are willing to do it in your national wildlife preserves in Louisiana with no consequences, and, in fact, with good consequences. They do not like that. They do not like oil and gas.

We ask, what about refineries for gasoline, for electric generation facilities? The answer is, not in my backyard. If you are ready to do it in somebody else's backyard, hopefully out of this country somewhere else and ship it in over here, but for heaven's sake do not build a plant in America, not where I live. We would rather run out. We would rather go through a California crisis than authorize another refinery or another electric generation plant in our backyard.

So we ask them about nuclear. We say, well, nuclear is pretty clean. Nuclear plants produce 20 percent of the Nation's electricity, a critical component of the Nation's energy supplies. It is pretty clean, you know. It does not produce all the emissions we are concerned about with global warming, or the emissions we have to regulate with coal-fired plants, or gas, or even oil-fired plants. What about nuclear?

They say, oh, but wait, you do not have a plan to deal with the waste, so do not build any more nuclear plants until you settle that waste issue. That is the tail wagging the dog. Unless you settle that waste issue, do not dare license another nuclear plant, and certainly not in my backyard, by the way.

So we wonder what kind of energy supplies do these Members support. I think the answer is pretty clear. They would like us to get it all from the sun, I suppose, or they would like us to get it from winds, provided we do not hurt any birds in the context of getting wind power going.

And they certainly would like us to get it from somebody else, because that is what is happening in America. Sixty percent, 60 percent now of every gallon of gasoline we burn in this country comes from some other country. And check the countries, check where it is coming from.

Forty percent of the reformulated gas comes from Venezuela right now, where there is a pretty bad problem going on; Venezuela, which rescued us from the last oil embargo, where there are some pretty bad problems going on.

Check where else it is coming from, countries like Iran, Iraq, countries which are teaching their children to hate us and to come to this country and take our planes and crash them into our buildings in suicide attempts. Those are reliable friends. Those are reliable sources for energy in America. Boy, that is real national security.

So after 20 years, after 20 years of an effort that started in 1982, after billions of dollars of expenditure, after scientific research that even tested the effects of a glaciated age in Nevada to make sure that this was the proper site to bring those nuclear wastes to permanent storage, we come to this point where we are about near the end.

If we can push this process one more step, if the scientists can answer the last questions that remain, we can settle the waste issue. Guess what, all these folks say, for heaven's sakes, do not settle the waste issue. Mr. Speaker, today is a chance to move it one inch closer to the final line where we settle the waste issue and we help secure America. It is time to vote yes for this country for a change.

Ms. SCHAKOWSKY. Mr. Speaker, I rise in opposition to House Joint Resolution 87. President Bush's decision to ship 77,000 tons of nuclear waste to Yucca Mountain in Nevada is wrong. This attempt to force Congress to adopt an ill-conceived, premature proposal is irresponsible and dangerous. It is our duty to protect those we serve from a proposal that will surely threaten our national security and the lives of American families in their own homes and communities.

At a time of heightened security and terrorist threats, this Administration is proposing to ship tens and thousands of highly radioactive and deadly materials through our towns and neighborhood. And as fast as they get the waste out of the plants, nuclear facilities will ramp up production, create more waste and start shipping it to Nevada—right through our towns once again. If Congress passes this resolution and overrides the authority of Nevada's governor, millions of American lives will be in danger. The President's Yucca Mountain proposal would ship radioactive waste to Yucca Mountain from nuclear power plants through 43 states. Nearly 161 million people live within 75 miles of those routes. I find it unconscionable that the Bush Administration would hastily force us to accept this proposed solution. The fact is that we need more time, not only to find a safe place to store the waste, but time to figure out ways to treat it and make it less dangerous.

I believe we should implement a plan that would remove fuel from reactors without the safety and security risks of thousands of nuclear transports traveling on our highways, railways, and waterways. There are currently plans that would increase security and safety at current sites, provide storage for up to 100 years, and provide time to find better alternatives. Widely implementing these kinds of plans would eliminate the security concerns surrounding the potential 108,500 shipments of spent nuclear fuel across the country.

The Yucca Mountain proposal is deceitful from its core because it promises to remove above-ground nuclear waste storage facilities. The truth is that, although the proposal will fill our highways and railways with nuclear HAZMATS, nuclear power plants will be enabled to produce a greater amount of waste, which will be stored above ground until it is scheduled for shipment. The Yucca Mountain repository will not be capable of receiving waste until, at the earliest, 2010. At a rate of 2,000 tons per year, there will be 62,000 tons of waste by 2010 still sitting in storage facilities in the nuclear power plants around the country. The Yucca repository will reach its capacity of 77,000 tons in the middle of this century; the amount remaining in storage at nuclear plants will be almost exactly what it is today. The proposal will fail to meet its intended purpose.

Congress should reject this proposal. It is an unfunded mandate—Congress has not worked out the transportation funding, cost of security measures, and other logistical issues to make this a realistic project. The time, effort, money and energy required for this project could be better spent investing in securing nuclear energy plants and implementing contingency plans for surrounding communities in the event of an emergency.

Congress should recognize the dangers that will be posed to all Americans as a result of nuclear HAZMAT trucks and trains streaking across our highways/rails and through the neighborhoods of my constituents and millions of people across the country. With the horror of September 11th still fresh in our minds, we have pledged to the American people that we will secure their safety—that our way of life will not be altered by the evil deeds of a hateful few. But this proposal threatens that promise.

We know that the threat of terror on American soil is real. We should take time to ensure that those who want to harm this nation would not have an opportunity. Today, the President is proposing to litter American highways and railways with slow moving targets. We are setting the stage for potential disasters. Congress is faced with a choice between supporting a hastily conceived proposal, or protecting our constituents. I urge my colleagues to vote no on this resolution and vote to guarantee the safety and security of the American people.

Mr. GEKAS. Mr. Speaker, I rise today in strong support of H.J. Res. 87 and urge my colleagues to support this important piece of legislation as well.

While I understand the concern and the opposition from the Nevada delegation I do believe that the nuclear waste repository at Yucca Mountain will be a safe and effective means for the management of nuclear waste for many years to come, in compliance with the Nuclear Waste Policy Act of 1982. The work of the United States since the dawn of the nuclear age has assured that the very best site for the disposal of nuclear waste would be chosen. As early as 1957 the National Academy of Sciences suggested burying radioactive waste in geologic formations to the Atomic Energy Commission. Beginning in the 1970's the world began to contemplate how best to dispose of and manage nuclear waste. Indeed, many proposals were put forward, like deep seabed disposal, disposal on polar ice sheets, transmutation, and even rocketing the material to the surface of the sun. After analyzing and giving credence to all options, disposal in a mined geologic repository emerged as the preferred long-term environmental solution for the management of these wastes.

Almost 25 years ago the United States began to study Yucca Mountain. Even before the passage of the Nuclear Waste Policy Act of 1982 the Department of Energy recognized the importance of finding a site to deposit nuclear waste and began to study areas that might have potential for holding such waste. When the Nuclear Waste Policy Act of 1982 was eventually passed, the Department of Energy was already studying 25 sites around the country as potential repositories. The Act provided for the siting and development of two; Yucca Mountain was one of nine sites under consideration for the first repository program.

In 1986, Secretary of Energy John S. Herrington found three of these sites suitable for site characterization, and recommended these three, including Yucca Mountain, to President Reagan for detailed site characterization. The very next year Congress then amended the Nuclear Waste Policy Act of 1982 making Yucca Mountain the single site to be characterized. Since this time Yucca Mountain has been developed and tested in accordance with both the provisions of the Nuclear Waste Policy Act of 1982 and in accordance with sound scientific principles.

Mr. Speaker, as a Member of Congress who represents an area with the Three Mile Island nuclear facility in my district, I have followed the development of Yucca Mountain closely for quite some time. Pennsylvanians get 36 percent of their electricity from nuclear power from five sites around the state. I believe that nuclear power is a reliable source of clean energy and has served the Commonwealth of Pennsylvania and the United States well over the years. However, consumers of this electricity have been paying for the development of a nuclear waste depository every time they flip the switch. We now have to assure them that the nuclear waste produced while generating needed power is put somewhere it will be safe and out of harms way for thousands of years to come. Mr. Speaker, Yucca Mountain is this site. Currently 162 million Americans live within 75 miles of nuclear waste, many of them in Pennsylvania and in my district. This is completely unnecessary. With the technical and scientific genius possessed by the United States, the United States Congress should not disallow science from doing the necessary work of finding a safe depository for nuclear waste.

Mr. Speaker, I support H.J. Res. 87 and wish the dedicated scientists and workers at Yucca Mountain and the Department of Energy all the best in their pursuit of a safe and effective nuclear waste repository. I ask my colleagues to join me in support of H.J. Res. 87.

Mr. NETHERCUTT. Mr. Speaker, I rise today to offer my support for H.J. Res. 87, the Yucca Mountain Repository Site Approval Act.

This is an important vote for Washington State. If we do not relocate our nuclear waste to the Yucca Mountain repository, the Department of Energy will be forced to reconsider other sites previously discussed. One of those previously considered sites is Hanford, Washington. Without passage of H.J. Res. 87, 42,000 metric tons of spent nuclear fuel will remain stored at Hanford. This is unacceptable, and would be disastrous for the environmental health of my state of Washington.

If we fail to move high-level nuclear waste to Yucca Mountain, we will have 161 million people in this country living within 75 miles of one or more nuclear waste sites—all of which were intended to be temporary. Without Yucca Mountain we will continue the current system of storing nuclear waste on the shores of the Great Lakes, Pacific Ocean, and the Gulf of Mexico. Without Yucca Mountain, we will continue to store nuclear waste near 20 major waterways that supply household water for more than 30 million Americans.

Opponents of H.J. Res. 87 have tried to scare the American people into believing that transporting nuclear waste is not safe. The facts paint a different picture. Since 1967, there have been 3,000 safe shipments of spent nuclear fuel. Those shipments have covered 1.7 million miles without one single accident occurring. For those who say safety is their top concern, let them consider this: Our nuclear sites are safe, but it would be safer yet to consolidate this waste from widely dispersed, above-ground sites into a remote, deep underground location that can be better protected for thousands of years.

So I urge my colleagues, put safety first. Put the safety of our environment first. Put the safety of our nuclear sites first. Put the safety of the people living near nuclear sites first. It is time to act to provide for safe, permanent storage of our nuclear waste at Yucca Mountain, Nevada. This is best for our country and best for the people of Washington state.

Mr. COSTELLO. Mr. Speaker, I rise today in support of H.J. Res. 87, the Yucca Mountain Repository Site Approval Act. Currently, 45,000 metric tons of spent nuclear fuel is stored in 131 sites in 39 states. Most of these storage sites are temporary and near large population centers and water supplies. There is a risk that leaks and damages from current storage facilities could impact up to 161 million Americans. Scientists agree that it is unsafe to permanently store nuclear waste on the shores of the Great Lakes, the Long Island Sound, the Atlantic Ocean, the Pacific Ocean, the Gulf of Mexico, or any other body of water. The Yucca Mountain site will minimize these risks. I believe that creating a permanent repository for spent nuclear fuel is the right thing to do, and that is why I will vote yes today.

The vote today is another step in what has been a 20-year process. Supporting this resolution allows the Department of Energy to file an application for a license at the Nuclear Regulatory Commission (NRC). It is up to the NRC to determine that the site will adequately protect public health and safety, and to make a decision to grant an operating license for the facility. The licensing process will take many years, will require many additional scientific studies, and will continue to provide for public input at every step along the way. Transportation plans will continue to be updated during this process and the earliest shipments would not start for Yucca Mountain until 2010.

I understand that the transportation of spent nuclear fuel is a concern, and we must address this issue thoroughly. There is no question we will need to ensure that there is a well-trained and certified workforce to handle and transport waste. For decades now, spent nuclear waste has been shipped in small quantities with no obvious harm to the public. If it becomes apparent that the waste cannot be transported safety and effectively, I would support revising the status of the Yucca Mountain repository.

Mr. Speaker, by voting yes today we are taking a prudent step for the future of this country. For all of these reasons, I support H.J. Res. 87.

Mr. KOLBE. Mr. Speaker, I rise in strong support of the Yucca Mountain Repository Site Approval Act (H.J. Res. 87).

I believe that Americans must come to grips with their obsessive fear of nuclear energy. Nuclear power supplies 20 percent of our nation's electricity, but no nuclear power plant has been built in the U.S. in approximately 30 years. That means our generation of electricity is increasingly dependent on fossil fuels. By contrast, France uses nuclear power for most of its electricity requirements. Even Japan, the only nation to be attacked with nuclear weapons, uses nuclear power for more of its energy needs than the United States. Greater reliance on nuclear power—and I believe it is safe—would free us from our dependence on OPEC products.

However, we must also address the safe transportation and disposal of nuclear waste. The Yucca Mountain Repository Site Approval Act approves the site at Yucca Mountain, Nevada, for the development of a repository for the disposal of high-level radioactive waste and spent nuclear fuel. We need to have a single, consolidated site that can be appropriately secured.

Currently, temporary nuclear waste sites are scattered all over the country. More than 161 million people currently live within 75 miles of a temporary nuclear waste site, and these sites are near major waterway. In addition, 40 percent of the U.S. Navy's ships and submarines are nuclear powered. We simply need to bring all this nuclear waste into one repository that is designed to permanently store this material safely for thousands of years. The site at Yucca Mountain is designed to do just that.

I urge Members to support this joint resolution.

Mr. LEVIN. Mr. Speaker, I rise in support of the resolution.

Today the House is confronted with the unpalatable choice of whether to take the next step in a process that could ultimately ship tons of hazardous nuclear waste across the country and bury it at the Yucca Mountain repository, or leave the waste where it is at more than 130 sites around the country. In truth, the question of what to do with the nuclear waste is an issue we've been avoiding since the dawn of the nuclear era more than half a century ago. We can't keep putting off this decision.

In justice to those who oppose this resolution, moving 70,000 tons of nuclear waste across the length and breadth of the United States and burying it in Nevada is by no means a perfect solution. Yucca Mountain has a number of desirable attributes. It is isolated in an arid location, far from population centers, and the proposed repository is protected by natural geological barriers. All that said, claims that the natural and engineered barriers in place at Yucca Mountain guarantee that the waste will remain isolated from the environment for more than 10,000 years have to be viewed with skepticism. In addition, the issues surrounding the transportation of so much hazardous waste require additional work.

At the same time, leaving the waste where it is at more than 130 locations in 39 states is not a viable option. None of these sites were intended or designed for long-term storage of high-level radioactive waste, and most are located near population centers adjacent to rivers, lakes and seacoasts. The nuclear waste doesn't go away or become any less of a problem if we ignore it.

My understanding is that the repository at Yucca Mountain can be kept open for as long as 300 years, allowing the Department of Energy to monitor the underground storage areas and even retrieve the waste packages. When one considers the amazing scientific breakthroughs of the last three centuries, there are good grounds for optimism that over the next 300 years we will develop the technological means to engineer a better solution to this problem. In the meantime, we shouldn't put off the decision on whether to move forward with the process of consolidating the waste at Yucca Mountain. Even if we start today, and all the remaining technical issues are resolved during the licensing process, it will still be at least ten year before the repository is ready.

Yogi Berra once observed, "When you come to a fork in the road, take it." For more than 50 years, the United States has put off making a decision about what to do about the nuclear waste. At long last, it's time to face up to this problem and move forward.

Mr. BLUMENAUER. Mr. Speaker, this debate has become far more political than technical. The bottom line is that the Federal Government made yet another commitment it cannot keep. Following decades of rosy predictions and assurances to the public, we explicitly promised to properly dispose of the nation's nuclear waste. Twenty years and $8 billion dollars later, we are still not prepared to do so. This is not acceptable. We need to keep our promise to communities across the country that are temporarily storing waste in sites that are vulnerable to terrorist attacks and natural disasters.

We are not ready to open the Yucca Mountain nuclear waste repository. There are too many unresolved questions, even as the Administration agrees that the current storage system can reasonably remain for many years. The low standards and inadequate science that the Department of Energy has shown at Hanford in the Pacific Northwest for decades are apparent at Yucca Mountain as well.

Even if we do go forward with this proposal, by the time that the Yucca Mountain site is ready to actually accept waste underground, we will have already exceeded its capacity. By the year 2035, the waste from just commercial power plants currently in operation is expected to be at least 90,000 tons. Yucca Mountain can only hold 77,000 tons. By law, in order to expand the capacity at Yucca, a second site must be named. Since Hanford, Washington was examined as one of the potential sites up until 1987, we have every reason to believe that the Department of Energy will look to Hanford as a second site once Yucca is full.

The approval of Yucca Mountain will set a dangerous precedent for other potential sites such as Hanford. When Yucca Mountain failed to meet repository guidelines, the Department of Energy rewrote those guidelines to avoid disqualifying the site. I don't want this same low standard to be applied to Hanford or any of the other potential sites.

The Bush Administration is pushing approval of Yucca Mountain now because nuclear energy is a large part of its national energy policy. Yucca is not now a viable long-term solution. It may never be. It makes no sense to rely on an energy source that produces a deadly waste for which we have no safe or long-term solution for clean up or storage. As long as we continue to produce at least a fifth of our energy from nuclear power plants, we are going to have a nuclear waste problem. Yucca will not solve that.

I don't pretend to know the answers to our nuclear waste problem. I'm convinced that transporting the waste across the country in casks that have not been properly tested and burying it under a mountain whose geological features are not what we once thought they were is not the answer.

While some may sound confident, I'm not sure anyone has a good roadmap in hand. This is precisely why we should not implement a policy that is going to make the situation worse. Approving Yucca Mountain as a repository site will be giving the nuclear industry a green light to produce more waste, despite the industry's inability to clean up after itself or even pay for its own insurance. Until we find a real solution to the nuclear waste problem, we should not encourage more of it.

Ms. MINK of Hawaii. Mr. Speaker, I rise in strong opposition to H.J. Res. 87 and am shocked that it is even on the calendar. The people of Nevada have spoken! Governor Guinn of Nevada has vetoed the site as allowed under the Omnibus Budget Reconciliation Act of 1987 (PL 100–203). This should be the end of it. Congress put this veto provision into law to respect the State of Nevada's rights.

Mr. Speaker, every Member of the Nevada delegation is opposed to this Resolution and opposed to the Yucca Mountain site. They do not believe that the Department of Energy's recommendation was based on sound science and neither do I. The Congress created the Nuclear Waste Technical Review Board to provide oversight to the Department of Energy (DOE) to ensure that the Yucca site would be based on sound science. This Board is made up of nationally recognized scientists. A recent review of the DOE's scientific review was graded an "F" by the Board.

There has not been enough scientific research on issues relating to the storage of nuclear waste. The Congress acted hastily in 1987 by limiting the consideration of potential sites to only Yucca Mountain. This way, no matter what science said or what potential health risks should arise, Yucca Mountain was going to be the site of the repository. This is a State's Rights issue. The people of Nevada do not want the nuclear waste and the Congress should not force the waste upon them. I urge my colleague to vote "no" on H.J. Res. 87.

Mr. SIMMONS. Mr. Speaker, since coming to Congress in January 2001, protecting the environment has been one of my top priorities. I am proud to have authored the law granting federal "wild and scenic" status to Connecticut's Eightmile River; proud of my pro-environment votes, including voting against weakening our nation's arsenic standards; and proud of my appointment as Co-Chair of the Long Island Sound Caucus.

Out of all of my efforts to protect Connecticut's environment, nothing is more important than today's vote to establish a permanent high-level nuclear waste storage facility at Yucca Mountain, in the Nevada desert.

Eastern Connecticut is home to four nuclear power plants—Millstone 1, 2 and 3 and Connecticut Yankee. The Millstone nuclear power plant in Waterford sits on Long Island Sound. On Millstone's 500 acres sits tons radioactive waste. Just north of Millstone, on the banks of the Connecticut River, is the Connecticut Yankee nuclear power plant on Haddam Neck. There, 22 years of spent nuclear fuel sits in a cooling pool waiting to be removed. All told, there is more than 1,500 metric tons of spent nuclear fuel at those two sites.

Establishing Yucca Mountain will begin the process of removing nuclear waste from these two facilities. Why is that important? Imagine an accident involving the spent fuel pools at Millstone in Waterford. Imagine nuclear water seeping into the Long Island Sound. What would happen? Connecticut's shellfish industry—decimated; Water skiing and recreation in the Sound—forget about it. The entire Long Island Sound ecosystem would be destroyed for generations. This is why a vote for Yucca Mountain is a vote to protect Connecticut's environment.

What about an accident at Connecticut Yankee? what would happen to the Connecticut River if spent fuel spilled into it? Connecticut's largest fresh water river—contaminated; Salmon and shad, which are just beginning to replenish the river waters—gone and never coming back. And all of this flowing south past Interstate 95 and the Amtrak Northeast Corridor into Long Island Sound.

Nuclear waste dumped into the Connecticut River would destroy New England's largest river ecosystem and one of the Nation's first American Heritage Rivers. This is why a vote for Yucca Mountain is a vote to protect Connecticut's environment.

Mr. Speaker, clearly, establishing Yucca Mountain is critical to Connecticut's environmental needs. But if you have another reason to support H.J. Res. 87, let's look at the issue from a national security perspective.

Make no mistake—spent fuel in a permanent repository for storage is less susceptible to terrorist attacks than spent fuel in temporary sites, especially when the Yucca site is isolated and the temporary storage facilities are often close to population centers and waterways.

In fact, today more than 161 million people currently live within 75 miles of one or more nuclear waste sites, all of which were intended to be temporary. These sites are also located near 20 major waterways that supply water to more than 30 million Americans. Highly radioactive nuclear waste is currently stored in more than 131 sites in 39 states. A coordinated attack, similar to those on September 11, on two or more of these sites would be catastrophic.

There is no question that keeping this hazardous waste in miles of tunnels beneath solid rock in the arid desert provides better security for storage and monitoring than leaving it along our undefended rivers and watercourses.

Access to the Yucca site is already restricted due to its proximity to the Nevada Test Site and Nellis Air Force Range surrounds the site on three sides, providing an effective rapid-response security force.

Establishing one spent fuel site will protect our environment and strengthen our national security. Yucca Mountain is one of the few issues that brings together environmentalists and defense hawks. Any issue that can do that is worthy of this body's support. I urge my colleagues to join me in support of H.J. Res. 87.

Mr. UDALL of New Mexico. Mr. Speaker, nuclear utilities intend to keep producing nuclear waste, and with talk about creating new reactors this would only add to the growing waste problem.

The Bush Energy Plan calls for doubling the number of nuclear reactors in the U.S. by 2040. Yucca Mountain is only designed to contain the waste from existing reactors.

The GAO report concludes it would be premature for the Secretary of Energy to recommend Yucca Mountain as the nation's nuclear waste repository for 77,000 metric tons of radioactive waste because many technical issues remain unresolved. Energy Secretary Abraham recommended the site anyway.

The report said the Department of Energy (DOE) is unlikely to achieve its goal of opening a repository at Yucca Mountain by 2010 and currently does not have a reliable estimate of when, and at what cost, such a repository can be opened.

Two hundred ninety-three unfinished scientific and technical issues have yet to be resolved before the site can be opened. For example, additional study is needed on how water would flow through the repository area to the underlying groundwater and on the durability of waste containers which are needed to last tens of thousands of years.

We should use sound science to solve these unresolved issues to determine if Yucca Mountain is really ready to receive nuclear waste.

Ms. PELOSI. Mr. Speaker, I rise today to speak in strong opposition to this resolution.

But first, I must thank our colleague, the gentlelady from Nevada, for her outstanding leadership on Yucca Mountain.

She is a champion for her state. She has said she would lay herself down on the railroad tracks to prevent nuclear waste from coming into her state, and I know she would do it.

Mr. Speaker, every day, the President and the Republican leadership claim that they want to keep the federal government out of people's lives and empower states with the flexibility to govern themselves.

Yet today we are going to override the veto of a governor and go against the express wishes of the people of Nevada.

The President has broken his promise to the people of Nevada. Before his election, he promised that the decision whether to store nuclear waste at Yucca Mountain would be based on sound science.

The science is not sound.

The GAO has identified more than 250 significant technical issues that still need to be resolved before going ahead with Yucca Mountain.

Mr. Speaker, many Yucca Mountain supporters say: "We have to put this waste somewhere. Get it out of my neighborhood and put it somewhere else."

I want to remind my colleagues that moving it out of your neighborhood won't solve the problem.

As long as your local nuclear power plant is running, there will always be nuclear waste in your neighborhood—the hottest and most dangerous waste, the waste that just came out of the reactor core.

And transporting the waste puts many more communities at risk of accidents and terrorist attacks.

Nor does Yucca Mountain solve our long-term waste storage problem. By the time the repository opens, we will have enough waste to fill it up, and we'll have to start over again, looking for another site.

We need to choose a different path. We need to develop clean, renewable energy sources that do not produce lethal waste that will endure for hundreds of thousands of years.

Mr. Speaker, when we make this decision today, we should associate ourselves with the aspirations of a state, protect the environment of our country, and do the right thing, and vote against this resolution.

Mr. ISSA. Mr. Speaker, I rise today in support of H. J. Res. 87, the Yucca Mountain Repository Site Approval Act. I am happy to join my colleagues as we approach the end of this 20 year journey to find an appropriate repository for spent nuclear fuel.

Common sense dictates that nuclear waste belongs in a secure and remote location, not the coast of Southern California. Today, this House will vote to support one of President Bush's national security objectives: the construction of the Yucca Mountain nuclear waste storage facility.

Congressional approval for the President's plan to build the Yucca Mountain facility will be a step toward resolving California's power crisis and will protect our communities from the unnecessary risk to storing nuclear waste. Centralizing the storage of hazardous nuclear waste at the remote Yucca Mountain facility clearly makes more sense than the current system of storing nuclear waste at 131 different storage sites including San Onofre, a nuclear power plant located in my district.

Today 161 million Americans live within 75 miles of at least one of these 131 storage facilities. The future security, efficiency and environmental advantages of storing spent nuclear fuel at the completed Yucca Mountain facility surpass those of any other viable alternative, including the continuation of the current system.

Consider the advantages of the proposed Yucca Mountain facility. Located on remote federal land, it would be more than 90 miles away from any major population center. In terms of security, the facility would be buried 1,000 feet below the desert surface, the site is surrounded on three sides by the Nellis Air Force Range, the airspace above Yucca Mountain is restricted and the facility would have its own elite rapid-response security force.

Scientific studies conducted by the Department of Energy have, since 1982, evaluated the risks to the site posed by volcanoes, earthquakes, underground water, human intrusion and many other potential threats; after carefully considering these factors scientists have concluded that the risk to the Yucca Mountain site over the next 10,000 years are minimal.

The centralization of spent nuclear fuel at the Yucca Mountain facility will allow a more efficient allocation of resources to manage and safeguard nuclear waste than is possible under the current system or any other current proposal for the future. When the technology that recycles spent nuclear fuel becomes a reality, the concentration of resource at Yucca Mountain will speed efforts to reduce or eliminate nuclear waste.

Environmentally, even if no additional nuclear power plants are built, the need to securely store existing spent nuclear fuel will continue. Nuclear power is environmentally friendly, economical and safe. Yucca Mountain will open the door to the possibility of building new nuclear power plants, instead of more coal and oil plants, to meet California's energy needs and to avert a future power crisis like the one experienced last summer. Storing spent nuclear fuel in a central, secure and remote location that minimizes the threat of contaminating water sources, the atmosphere and our nation's wildlife is the most environmentally responsible policy possible under given conditions. The proposal to build a single storage site at Yucca Mountain will protect the environment and public safety better than building and maintaining several smaller storage facilities throughout the United States.

The arguments of those who oppose the Yucca Mountain project revolve around the fear of uncertainty. These arguments point to the possibility that the scientific assessments of the Yucca Mountain site could be flawed. They note that despite all planned precautions and the extensive experience our nation already has in transporting spent nuclear fuel, an accident could occur in transport. Finally, they hold out the hope that American ingenuity will develop new technologies that can easily recycle spent nuclear fuel or even eliminate the need for nuclear power through advances in solar, wind and other energies—thus eliminating the need for new spent nuclear fuel storage facilities. While these points cannot and should not be ignored, they are themselves uncertainties.

Uncertainty, in fact, is a major reason why the Yucca Mountain facility should be built. Secretary of Energy Spencer Abraham has noted that existing nuclear waste storage facilities, like the one at San Onofre, "should be able to withstand current terrorist threats, but that may not remain the case in the future."

Any uncertainty involving spent nuclear fuel is better addressed 1,000 feet below the surface of the desert and 90 miles away from any major population center than in the middle of highly populated places like Southern California. The construction of the Yucca Mountain facility is a national security issue. I intend to support President Bush's decision to build the facility and hope that my colleagues in Congress also will back the President.

Mr. Speaker, our journey is about to be completed regarding Yucca Mountain. I ask that my colleagues support passage of the resolution.

The SPEAKER pro tempore (Mr. ISAKSON). All time has expired.

Pursuant to section 115(e)(4) of the Nuclear Waste Policy Act of 1982, the previous question is ordered.

The question is on the engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the joint resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Ms. BERKLEY. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 306, nays 117, not voting 12, as follows:

□ 1545

Mrs. KELLY changed her vote from "yea" to "nay."

So the joint resolution was passed.

The result of the vote was announced as above recorded.

GENERAL LEAVE

Mr. TAUZIN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous material on H.J. Res. 87, just passed.

The SPEAKER pro tempore (Mr. ISAKSON). Is there objection to the request of the gentleman from Louisiana?

There was no objection.

STOP THE SPREAD OF GAMBLING

(Mr. WOLF asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous material.)

Mr. WOLF. Mr. Speaker, I would like to call the attention of the House to an open letter from 220 religious leaders to the President of the United States and Congress on the spread of gambling.

They said, "We, the undersigned, represent a variety of faith perspectives and religious beliefs. We hold different convictions regarding many of the most prominent issues of the day, yet we are united in our opposition to legalized gambling and we respectfully urge Congress to begin to address the devastation that gambling has wrought on our children and families and communities as a Nation."

And then they go on to talk about the faith community can provide countless stories of families shattered by gambling addiction.

It was a full page ad in Roll Call. I urge Members to look at it and see. This Congress ought to begin to deal with this issue of the spread of gambling.

AN OPEN LETTER FROM 220 RELIGIOUS LEADERS TO THE PRESIDENT AND CONGRESS ON THE SPREAD OF GAMBLING

DEAR MEMBER OF CONGRESS: We, the undersigned, represent a variety of faith perspectives and religious beliefs. We hold differing convictions regarding many of the most prominent issues of our day. Yet we are united in our opposition to legalized gambling. We believe it to be a moral and cultural cancer. Therefore, we respectfully urge Congress to begin to address the devastation that gambling has wrought on our children, families, communities and nation. Consider just the following sampling of gambling's toll on America's citizenry:

Gambling exploits those with the fewest financial resources, as both a multitude of studies and our own experiences in our individual communities readily confirm. A few months ago we were inundated with glowing press accounts of the Powerball winner from Kentucky who gambled part of his unemployment check to attain the jackpot. How many tens of thousands of others in similar circumstances squandered their meager income chasing this state-sponsored fantasy and wound up without enough money to pay the rent or put food on the table? According to the National Gambling Impact Study Commission (NGISC), individuals earning less than $10,000 per year spend more on lottery tickets every year than any other income group.

Each of us—and the faith communities we represent—could provide countless stories of families shattered by gambling addiction. We are often the ones forced to pick up the pieces of lives ripped apart by divorce and domestic violence. According to a survey by the NGISC, gambling has been responsible, in whole or in part, for more than 2 million divorces in recent years. Child abuse and neglect are other effluents of gambling's explosive growth. In addition, research indicates that children of gambling addicts do more poorly in school, experience more behavioral problems, and are more susceptible to gambling addiction themselves.

The gambling boom has made our communities more dangerous places to live. Gambling operations attract crime, and they create new criminals out of otherwise law-abiding citizens. Studies confirm that more than half of gambling addicts will engage in illegal activities—everything from embezzlement to armed robbery—to fund their compulsion to gamble.

Gambling has subverted the rightful role of government as protectorate of the people. Casinos in particular have bought favors with politicians at all levels, thus enabling them to spread their poison product into even more communities. In the most recent election, gambling interests lavished $10.9 million on candidates and parties at the federal level alone. That does not include the multi-millions spent on lobbying, nor does it take into account that gambling interests have become the single most powerful force in a number of state governments. All of this influence comes at a terrible price that is paid for by the gambling industry's multitude of victims.

The rapid increase in legal gambling opportunities has created a concomitant boom in the number of gambling addicts. According to the NGISC, more than 15 million Americans struggle with a significant gambling problem—and the repercussions are often profound. Perhaps no single statistic better reveals the depth of despair associated with gambling addiction than this: One in five of those who become addicted to gambling will attempt to take his or her own life.

Legal gambling operations entice teenagers to delve into this dangerous activity. Many become trapped. Studies show that the rate of gambling problems among adolescents is dramatically higher than that for adults. Hundreds of thousands of teens regularly access casinos, lotteries, and other legal betting venues despite age regulations to the contrary. Further, aggressive and omnipresent gambling advertising campaigns disparage the ethic of work, diligence and study while bombarding teens with the idea that gambling is the means to get rich quick.

Gambling has become a blight on our nation's cultural landscape. As religious leaders, we see the gambling-induced pain and devastation among many of those who look to us for spiritual guidance. Thus, we stand together not only in our concern, but in our commitment to oppose this predatory and destructive industry. We call on members of Congress to place America's citizens and families ahead of the false promises and hefty political contributions of the gambling industry, and to begin to address this rapidly growing menace to our national welfare.

Sincerely,

Dr. Mark Bailey, President, Dallas Theological Seminary.

SPECIAL ORDERS

The SPEAKER pro tempore (Mr. BROWN of South Carolina). Under the Speaker's announced policy of January 3, 2001, and under a previous order of the House, the following Members will be recognized for 5 minutes each.

CELEBRATING MOTHER'S DAY

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Indiana (Ms. CARSON) is recognized for 5 minutes.

Ms. CARSON of Indiana. Mr. Speaker, I really appreciate the Chair recognizing me as a young lady.

Mr. Speaker, I rise today in celebration of Mother's Day this Sunday, May 12, a day celebrated in the United States and many countries around the world to celebrate motherhood and express appreciation of our mothers.

Our Founding Father, George Washington, once said: "My mother was the most beautiful woman I ever saw. All I am I owe to my mother. I attribute all my success in life to the moral, intellectual and physical education that I received from her."

The first celebration honoring mothers dates back to ancient Greece where spring celebrations were held in honor of Rhea, the mother of the gods. During the 1600s, England honored mothers by celebrating the day called Mothering Sunday on the fourth Sunday of Lent, and it was in 1872 that the United States was introduced to the idea of Mother's Day by Julia Ward Howe, a lyricist of the "Battle Hymn of the Republic," with the intention of Mother's Day being dedicated to peace.

Thirty-five years later, in 1907, a campaign led by Anna Jarvis of Philadelphia led to the establishment of Mother's Day as a national holiday in the United States. On May 8, 1914, President Woodrow Wilson signed a joint resolution which dedicated the second Sunday in May as Mother's Day to express our appreciation of the love and devotion of our mothers.

My own mother, Velma Porter, who is no longer with us in the presence but certainly in my life, in the spirit, has always been my inspiration. She was my teacher, my defender and a continual source of strength and wisdom; and although my mother and I were not blessed with material wealth, I attribute the happiness of my childhood to the enormous strength of my mother and the strength of the community where we live.

Today, there are an estimated 35 million mothers in the United States. In today's world, mothers are faced with the challenge of not only raising children alone, but participating as successful equals of their male counterparts in all walks of life.

We often hear politicians especially bemoan the fact that there are too many single female heads of household, mothers, who are attempting to raise their children in the proper manner while they provide an economic and educational opportunity for their offspring. We often criticize women, mothers, who have been left to raise their families alone, not through any fault of their own, but through the premature demise of their husbands or through the total abandonment of their husbands and their children's father.

According to the AFL-CIO, 72 percent of the women with children younger than 18, 78 percent of women with children between the ages of 6 and 17, and 65 percent of women with children younger than 6 were in the labor force in 1997.

Those of us who are affiliated with Christianity, the Protestant religion, recall very vividly how Jesus revered his mother when he was in the middle of dying and had all of the opportunity to concentrate on his dying. He stopped in the middle of it and told John to behold his mother, and from the cross we are reminded of the importance and the love and the strength of our mothers and the kind of moral character that they have conveyed on to us.

I would trust that as we go forward with the congressional agenda that we will not invoke pain through policy and through measures on mothers who attempt in every way that they know how to care for their families, both spiritually and economically.

DOMESTIC VIOLENCE FOR MOTHER'S DAY

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from California (Mrs. CAPPS) is recognized for 5 minutes.

Mrs. CAPPS. Mr. Speaker, I rise in honor of recognition of Mother's Day 2002 to honor mothers across the world and to honor the profession and the calling of mothering.

I make these remarks today in memory of my own daughter, a wonderful mother to two little boys before she died 2 years ago, and in honor of their father, her husband, who is doing a fabulous job of parenting and mothering them.

The second Sunday in May is an opportunity for each of us to reflect upon our own upbringing and to offer gratitude to the one who has nurtured us the most. and many of us know firsthand being a mother is much more than a biological process. Every day women who have never given birth become mothers to abandoned, separated or orphaned children.

Last week, Save the Children unveiled their "State of the World's Mother 2002" report. The report was assembled to assess the state of mothers and children in the volatile regions of war and conflict. The findings of this report are particularly pertinent given our Nation's war on terrorism.

After 23 years of conflict, Afghanistan is slowly recovering with assistance from governments and humanitarian agencies such as Save the Children. Specifically, the report tells us that investing in mothers is one of the most effective ways to help post-conflict societies achieve reconciliation and move forward.

Often after enduring years of destruction and chaos, women step up to play highly constructive roles as peacemakers and rebuilders. In Afghanistan, we know that reconstruction largely depends upon the reintegration of women in that society. For this reason, in December Congress passed the Afghan Women and Children Relief Act into law. This law will provide vital educational and health care assistance to women and to children in that region.

The need for increased aid to war-torn Nations, the majority of which are in the developing world, is clear. Mothers and children in these regions are indeed at great risk of death, disease, displacement and exploitation; and because of those factors, the cycle of difficulty goes from one generation to the next.

The United States does not fare as badly as the developing world in terms of maternal health; but our country has its own set of problems, which includes high rates of violence against women. This epidemic, perpetrated against 31 percent of American women, is undeniably a serious concern; and while domestic violence is a criminal justice issue, it is really at its core a matter of public health.

Women experience 85 percent of violent victimizations; and each year at least 6 percent of all pregnant women, about 240,000, are battered by the men in their lives. This battering leads to complications of pregnancy, including low weight gain, anemia, infections, first and second trimester bleeding. So domestic violence poses a considerable threat to maternal health.

To combat this problem, I have introduced the Domestic Violence Vaccining and Treatment Act, which would dramatically increase the scale of intervention and prevention efforts. My legislation would urge every health care provider to screen women over age 18 for domestic violence. In the confidential environment of a doctor's office, health care professionals would serve as a bridge between the patient and the criminal justice system.

Specifically, my bill would provide health care professionals with the training needed to assess women for signs and symptoms of abuse and then to supply her with adequate treatment and referrals. This routine verbal screening for domestic violence, fairly straightforward and simple procedure, would unlock options a woman may not otherwise pursue and allow her to see that shelter and advocacy services may be useful to her.

We know that battered women comprise up to 30 percent of ambulatory care patients, but only one in 20 is correctly identified as such, and I hope my legislation will help in clearly identifying victims of violence in order to pinpoint the perpetrator and to end the cycle of abuse.

Another goal of the legislation is to identify problems before they escalate to prevent in the long term this cycle of domestic violence from repeating itself from one generation to the next. As we well know, a child's survival is largely dependent upon the health and well-being of his or her mother or caretaker.

So this Mother's Day, let us bear in mind the vital role that women play in creating a peaceful and prosperous world for all children. As I have pointed out, this statement rings true not only for mothers in our country but for mothers living in developing countries around this world.

Women hold families together. Therefore, women hold communities and whole Nations together; and thus, mothers are a crucial link in the livelihood and survival of our Nation's future as well as the future of the world as a whole.

□ 1600

RELIGIOUS LEADERS OPPOSE THE SPREAD OF GAMBLING

The SPEAKER pro tempore (Mr. BROWN of South Carolina). Under a previous order of the House, the gentleman from Virginia (Mr. WOLF) is recognized for 5 minutes.

Mr. WOLF. Mr. Speaker, this week 220 religious leaders across the spectrum signed an open letter to this Congress and to the Bush administration calling on the Nation's leaders to oppose the further spread of gambling.

The signers are across the spectrum of the religious views in this country. It is time, Mr. Speaker, for the country to address the devastation that gambling has wrought on our children, our families, communities and Nation, is what they wrote.

Mr. Speaker, I want to emphasize the significance of this letter. This is not a message from political leaders, this is not a message from business or labor, this is not a message from many of the usual interest groups that express their views here every day. Rather, it is a message from our Nation's moral and spiritual leaders. Not often do so many religious leaders from such broad perspectives speak out on any issue. But when they do, it is noteworthy.

Recall the issues of slavery, the civil rights movement, elderly and child poverty, the dangers of communism, South African apartheid, famine and humanitarian issues throughout the world. All these issues commanded the attention of the Nation's spiritual leaders. The incredible spread of gambling is also a call to arms for our Nation's faith communities.

Why are so many in the religious community so alarmed? Legalized gambling, once relegated to a few areas of the country, continues to spread at an alarming rate, so quickly that soon almost every American will be within driving distance of a casino. Gambling expansion has swept the Nation, with revenues jumping from about $1 billion in 1980 to well over $50 billion today. That means Americans lose on average of $137 million every day of the year from gambling. Let me say that again: Americans lose on the average $137 million every day of the year from gambling.

In short, while the explosion of various forms of gambling across America has generated revenue for States and for the gambling industry, it has left in its wake human misery that is only now beginning to be understood. This misery ends up costing the States more than they receive and creates a vicious cycle as the need for social services dramatically increases. Whether a State lottery, a casino or a "cruise to nowhere," gambling is a losing bet for funding legitimate social needs.

Yet in State after State the gambling industry pours money into the coffers of political campaigns from both political parties in hopes of advancing their interests. The fact that gambling has not spread further is a tribute to the tireless efforts of a few grass roots activists in the States. These citizen advocacy efforts, often outspent by rates of 20 to 1, have held a levy against an even greater encroachment by the gambling industry into every community in America.

But the gambling industry has another card up its sleeve and has used it very effectively in the last decade. Instead of going through the normal legislative channels, they have ever increasingly circumvented State grass roots resistance by going through our Nation's Native Americans. Indian casinos are the fastest growing form of gambling today. Our Federal policy toward our Nation's first citizens is in a terrible state. A few tribes have done very well, and yet nearly 80 percent of all Native Americans receive nothing from gambling. Let me repeat: 80 percent receive nothing from gambling. The vast majority live in areas where casinos are simply not viable.

What kind of Federal policy rewards a few people living in population centers while the rest languish? There is a casino that operates in California that actually has one adult member of the tribe, one member, and thousands of Native Americans live in our Great Plains States and receive nothing. Defenders of Indian gambling never seem to talk about this disparity.

What has the spread of gambling meant for the country? Some 15.4 million Americans are already suffering from problem and pathological gambling, also called gambling addiction, which is devastating to the individuals and his or her family. The effects of this addiction are wide ranging and often impact many who are not at all involved with gambling. It is not unusual for a gambling addict to end up in bankruptcy, with a broken family, and facing criminal charges from his or her employer. Youth introduced early to gambling are particularly at a high risk for gambling addiction. Of the over 15 million Americans suffering from problem gambling disorders, over half, 7.9 million, are adolescents. There is a tremendous need for prevention. Unfortunately, there is no money really for prevention.

Soon, gambling will be in every home in America with the Internet connection. More than 850 Internet gambling sites worldwide had revenues in 1999 of $1.67 billion, up more than 80 percent from 1998, according to Christiansen Capital Advisors, who track the industry. Revenues are expected to top $3 billion by 2002, and the Congress and the administration have done nothing.

I would hope this Congress and this administration would reflect on the seriousness of this issue. This is not about a person making a choice to travel to Las Vegas or Atlantic City and gamble for recreation. The reality is that such a choice takes planning and some time. As gambling spreads throughout the Nation, there is less planning, less time, and much more availability for potential addicts to gamble.

With all this hard evidence, our Nation's religious leaders have been moved to forcibly speak out. They have demanded that we "place American citizens and families ahead of false promises and hefty political contributions of the gambling industry and begin to address this rapidly growing menace to our national welfare."

Who will speak out against the spread of gambling, the crime, the corruption, the family breakdown, the suicide the bankruptcy, the exploitation of the poor? Our Nation's religious leaders have spoken out. I would hope that Congress would speak out. And I would say to the Bush administration, your silence on this issue is becoming deafening. So the Bush administration should also speak out.

For the poor, the young, the elderly, the addicts, the families of America, hopefully, maybe just someone, someone will listen and speak out.

Mr. Speaker, I provide for the Record a copy of the letter signed by these 220 religious leaders and all their names.

An Open Letter From 220 Religious Leaders to the President and Congress on the Spread of Gambling

Dear Member of Congress: We, the undersigned, represent a variety of faith perspectives and religious beliefs. We hold differing convictions regarding many of the most prominent issues of our day. Yet we are united in our opposition to legalized gambling. We believe it to be a moral and cultural cancer. Therefore, we respectfully urge Congress to begin to address the devastation that gambling has wrought on our children, families, communities and nation. Consider just the following sampling of gambling's toll on America's citizenry:

Gambling exploits those with the fewest financial resources, as both a multitude of studies and our own experiences in our individual communities readily confirm. A few months ago we were inundated with glowing press accounts of the Powerball winner from Kentucky who gambled part of his unemployment check to attain the jackpot. How many tens of thousands of others in similar circumstances squandered their meager income chasing this state-sponsored fantasy and wound up without enough money to pay the rent or put food on the table? According to the National Gambling Impact Study Commission (NGISC), individuals earning less than $10,000 per year spend more on lottery tickets every year than any other income group.

Each of us—and the faith communities we represent—could provide countless stories of families shattered by gambling addiction. We are often the ones forced to pick up the pieces of lives ripped apart by divorce and domestic violence. According to a survey by the NGISC, gambling has been responsible, in whole or in part, for more than 2 million divorces in recent years. Child abuse and neglect are other effluents of gambling's explosive growth. In addition, research indicates that children of gambling addicts do more poorly in school, experience more behavioral problems, and are more susceptible to gambling addiction themselves.

The gambling boom has made our communities more dangerous places to live. Gambling operations attract crime, and they create new criminals out of otherwise law-abiding citizens. Studies confirm that more than half of gambling addicts will engage in illegal activities—everything from embezzlement to armed robbery—to fund their compulsion to gamble.

Gambling has subverted the rightful role of government as protectorate of the people. Casinos in particular have bought favors with politicians at all levels, thus enabling them to spread their poison product into even more communities. In the most recent election, gambling interests lavished $10.9 million on candidates and parties at the federal level alone. That does not include the multi-millions spent on lobbying, nor does it take into account that gambling interests have become the single most powerful force in a number of state governments. All of this influence comes at a terrible price that is paid for by the gambling industry's multitude of victims.

The rapid increase in legal gambling opportunities has created a concomitant boom in the number of gambling addicts. According to the NGISC, more than 15 million Americans struggle with a significant gambling problem—and the repercussions are often profound. Perhaps no single statistic better reveals the depth of despair associated with gambling addiction than this: One in five of those who become addicted to gambling will attempt to take his or her own life.

Legal gambling operations entice teenagers to delve into this dangerous activity. Many become trapped. Studies show that the rate of gambling problems among adolescents is dramatically higher than that for adults. Hundreds of thousands of teens regularly access casinos, lotteries, and other legal betting venues despite age regulations to the contrary. Further, aggressive and omnipresent gambling advertising campaigns disparage the ethic of work, diligence and study while bombarding teens with the idea that gambling is the means to get rich quick.

Gambling has become a blight on our nation's cultural landscape. As religious leaders, we see the gambling-induced pain and devastation among many of those who look to us for spiritual guidance. Thus, we stand together not only in our concern, but in our commitment to oppose this predatory and destructive industry. We call on members of Congress to place America's citizens and families ahead of the false promises and hefty political contributions of the gambling industry, and to begin to address this rapidly growing menace to our national welfare.

Sincerely,

Dr. Mark Bailey, President, Dallas Theological Seminary.

The Rt. Rev. Charles E. Bennison, Jr., Episcopal Diocese of Pennsylvania.

Dr. Ron Black, Executive Director, General Association of General Baptists.

Dr. Bill Bright, Founder and Chairman, Campus Crusade for Christ.

NATIONAL SMALL BUSINESS WEEK

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. DAVIS) is recognized for 5 minutes.

Mr. DAVIS of Illinois. Mr. Speaker, I wish to associate myself with the remarks made by the gentlewoman from Indiana (Ms. CARSON) and the gentlewoman from California (Mrs. CAPPS) relative to Mother's Day and the role that mothers play in this country. And I also take the moment to pay tribute to both my maternal and paternal grandmothers, as well as my own dear mother and my wife for the outstanding roles that they have all played in giving to the institution of motherhood.

Mr. Speaker, for the past 39 years, the President of the United States has issued a proclamation calling for the celebration of Small Business Week. I rise in support of the Small Business

Administration and the designation of the week of May 5 through 11, 2002 as National Small Business Week. This celebration will honor the estimated 25 million small businesses in America who have created three out of every four new jobs and generate the vast majority of American business innovations.

Small Business Week recognizes outstanding small business owners for their personal achievements and contributions to our Nation's economy. One outstanding entrepreneur is named to represent each State as the State's Small Business Person of the Year, and from this group the national Small Business Person of the Year is chosen. I am very proud and pleased to be able to congratulate Ms. Diane MacWilliams, from my 7th Congressional District of Illinois, who is President of Quicksilver Associates, Incorporated, in Chicago, for being our State's Small Business Person of the Year.

Armed with a brand new degree in fine and applied arts from the University of Illinois, Diane MacWilliams dove head first into a new career in graphic arts as a new hire in the audiovisual department with Arthur Anderson & Company. Over time, she perfected her skills in photography and graphic arts and began taking on more special assignments, including a promotional slide presentation for the Reading Is Fundamental campaign. The acclaim for that production convinced her to take the plunge and in 1976 start her own business, along with a close friend, who later would become her husband. Thus was born Quicksilver Associates, Incorporated.

Diane's work experience taught her that there was a real need for creative outsource corporate audiovisual support. With this in mind, she started calling on corporate 500 companies, such as Quaker Oats, CBS, and International Harvester. As a pioneer of smears, zooms, starbursts, and other new and innovative graphic techniques, Quicksilver provided corporate customers with the creativity needed to customize their own business presentations. In 1978, Quicksilver won an International CLIO Finalist Award for its promotional piece on International Harvester's Scout, a sports utility vehicle apparently ahead of its time.

As a premier audiovisual production studio, Quicksilver employs approximately 30 people within its four divisions, New Media, Video Production, Meeting Production, and Planning and Creative Services, generates sales of approximately $4.5 million annually, and hosts a "who's who" of corporate clients that include ABN/AMRO, Blue Cross/Blue Shield, Household International, and United Airlines.

As a founding member and former President of the Make a Wish Foundation of northern Illinois, Diane received the first Fountain of Hope Award and currently serves on the Board of Directors of the Make a Wish Foundation of America. Diane and Quicksilver also have offered their talents and resources to help other nonprofit organizations throughout the year.

So, Mr. Speaker, I am indeed proud to bring to the attention of America Diane's achievements, for it is an example of how small businesses can achieve in America. Small businesses account for 99.7 percent of America's employers. They played a vital role in helping to bring America out of this economic downturn. To help create and ensure America's small businesses continue to survive, we must engage all available resources in facilitating entrepreneurship development, providing low or no interest loans and more technical assistance to programs for small businesses.

So, again, I congratulate Ms. Diane MacWilliams, President of Quicksilver Associates in Chicago, for being our State's Small Business Person of the Year.

PERSONAL EXPLANATION

Mr. VISCLOSKY. Mr. Speaker, on May 7, 2002, I was unavoidably absent due to the primary election in my district. Had I been present I would have voted "yea" on rollcall votes 127 and 128.

WELFARE REFORM

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from the Virgin Islands (Mrs. CHRISTENSEN) is recognized for 5 minutes

Mrs. CHRISTENSEN. Mr. Speaker, I rise to bring to the attention of my colleagues the plight of the U.S. offshore Territories as it relates to welfare reform and the reauthorization process currently being undertaken in the House.

Mr. Speaker, although the U.S. Territories, Guam, Puerto Rico, and my district, the U.S. Virgin Islands, are required to meet all the TANF requirements, they do not have access to all of the tools that other jurisdictions have to successfully move people from welfare to work.

Mr. Speaker, the Territories are island jurisdictions, where the ability to move from one jurisdiction to another in search of work is just impossible. As a consequence, in the Virgin Islands, while our welfare rolls have been lowered, we have failed to meet the work participation rates. Despite the fact there was no work to send the many willing participants to, we have been penalized by fines.

This in itself is unfair, given our special circumstances, but also consider the fact that we do not receive several other sources of funds that States have at their disposal to overcome similar obstacles. We get no supplemental grant funds, even though our average dollars per person are extremely low; and we do not receive contingency funds, even though we have experienced economic downturns and high unemployment.

That is why the gentleman from Guam (Mr. UNDERWOOD) and I have joined the gentleman from Puerto Rico (Mr. ACEVEDO-VILÁ) in sponsoring H.R. 4236 to bring parity to the U.S. Territories as they seek to move their citizens from welfare to work.

□ 1615

We will be seeking to have this included in a substitute bill. H.R. 4236 would include Puerto Rico, Guam and the Virgin Islands in the TANF supplemental grants for population increases and exclude this funding from the section 1108 cap.

TANF supplemental grants are specifically intended to assist States, and it should be territories also, with higher than average growth rates and/or lower than average welfare funding per poor person. The latter characterizes my district.

It would also include Puerto Rico, Guam and the U.S. Virgin Islands in the TANF contingency fund, and also exclude this funding from the section 1108 cap. The TANF contingency fund was intended to assist localities in times of economic downturns when the need for family assistance is greater, evidenced either by significantly higher unemployment rates, or significant increases in the utilization of food stamps. Both are operative in the U.S. Virgin Islands, and currently the TANF contingency fund excludes the Territories.

H.R. 4236 would also provide Puerto Rico, Guam, and the U.S. Virgin Islands access to all of the funding streams under the Child Care Development Block Grant and the matching grant, while excluding this from the section 1108 cap. These Territories receive CCDF funding under the general block grant discretionary funds. However, they are not authorized to receive funding under 2 subprograms under entitlement grants, the mandatory and matching funds. Provisions to authorize these two funds could provide up to $70 million for child care if matching funds requirements were met.

Another area, title IV–E foster care, we would like to take that out of the section 1108 cap as well. Title IV–E foster care is included in the section 1108 cap. As a result, abused and neglected children in foster care services compete for Federal funds with needy families on TANF, poor seniors, and blind and disabled individuals. This is compounded by the fact that Medicaid is also under a cap.

We would ask in this bill that the Territories be reimbursed for providing transitional medical assistance to TANF leavers outside of the current Medicaid cap. States receive reimbursement for the medical cost of TANF recipients while they move into work. Currently the Territories are not authorized to participate in this element of Medicaid, and even if they were, because of the Medicaid cap, the Territories would not be allowed to receive any reimbursement for these costs.

If the Territories are expected to meet the same work requirements as the States, it is essential that they be authorized access to receiving similar Medicaid reimbursements for their TANF recipients.

Mr. Speaker, I come before this body because it is important that all of our colleagues understand the unique plight of the Territories. We want to help our constituents make the step from welfare to work. More than that, we want to give them a hand up and out of poverty. I hope that when these issues are before this body, we will have the support of our colleagues to give the Territories parity in the effort to reauthorize welfare reform and to give us the tools to make welfare reform a real success in our districts.

GUN AMNESTY ON MOTHER'S DAY

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from the District of Columbia (Ms. NORTON) is recognized for 5 minutes.

Ms. NORTON. Mr. Speaker, Members are coming to the floor as we approach Mother's Day. I am coming as well. Many mark Mother's Day in their own ways, very diverse ways. But if we ask the mothers of the Nation what would they most want for Mother's Day, the choice of many would be gun safety legislation to protect their children. The proof, of course, is that 2 years ago on Mother's Day, almost a million mothers and their families used Mother's Day to come to their Nation's capital to work productively for just such legislation. We do not yet have the gun safety legislation for our children these mothers so desperately wanted, but in recognition of Mother's Day this year, I thought that it would behoove me to introduce a realistic piece of gun safety legislation, recognizing that in many ways this issue has been off the radar screen, to find a way to put it back on the national agenda. And so I have introduced the Nationwide Gun Back Act of 2002.

Mr. Speaker, hopefully this is the kind of gun safety legislation everyone can join in, whether pro or anti so-called gun control, because this is simply about how to help people voluntarily get illegal guns out of their own homes, and jurisdictions would, of course, participate only voluntarily.

My bill would provide $100 million in Federal funds, a real pittance in our budget, to allow cities across the United States, small towns, counties, to do gun buy-backs of the kind that were done so successfully just a few years ago in the District of Columbia and in other parts of the country.

The Bureau of Alcohol, Tobacco and Firearms would evaluate the proposals and distribute the funds. A jurisdiction would have to certify that it was capable of destroying the guns within 30 days of running an amnesty program, and of being fully capable of conducting such a buy-back program.

Let me tell Members why I think all Members would want to be for this. There are throughout this Nation millions of people who know there are illegal guns in their homes who cannot come forward to get rid of them without implicating a relative. They fear if they came forward and said take this gun out of my house before some relative uses it on another relative, or somebody commits suicide, they cannot come forward without implicating a son, a daughter, a grandson, and so they sit there knowing that gun is in the house and unable to get rid of it.

I want to say to those folks who want to get that gun out of the home, a gun illegally there, a gun for which there is no license, we will buy back the gun, usually for $50 or $100 to encourage people to come out.

We did this in the District of Columbia; enormous success. Long lines. More than 6,000 firearms were turned in in three buy-backs. Not only did we do this in the District of Columbia, a number of other cities across the United States did the same thing. We did a kind of pilot program that showed that it could work. The notion that there would be hundreds of people standing in line waiting to give a gun to the cops is, I think, what all of America would like to see when it comes to gun safety for our children.

It is children, as we see, who get hold of these guns, who want these guns, who use these guns because that is a child-like thing to do. We need to get these guns out of our homes. After using almost $400,000 in forfeiture money, some HUD money, we had to stop collecting the guns because we no longer had funds to buy back the guns, for goodness sake, on Mother's Day.

If we want to do something to keep youngsters from getting hold of guns, going into the classroom and shooting at teachers and students, doing God knows what with guns, let us find a noncontroversial way of reducing gun violence. This, it seems to me, is just that way. It simply says wherever Members stand on guns, they are for guns being only in the hands of those people authorized to carry them. If a mother or father sees a gun brought into their home by a kid, allow that family member to get rid of that gun. This is the way that I would celebrate Mother's Day.

HONORING MOTHER ON MOTHER'S DAY

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Ohio (Mrs. JONES) is recognized for 5 minutes.

Mrs. JONES of Ohio. Mr. Speaker, I rise this afternoon to join with my colleagues in celebration of Mother's Day. I particularly want to celebrate my mother. Yesterday was election day in the State of Ohio; and my mother, and she is going to be angry when I do this, who will be 81 years old on April 19, ran for State Central Committee, unopposed, won overwhelmingly.

Mom, here is the campaign literature right here that was sent out on your behalf.

I want to say that I have a wonderful mother and I am so pleased to have the opportunity to celebrate Mother's Day with her this coming weekend. She has been a guiding light and beacon in the lives of me and my family, not only my two sisters, one who lives in California and one who lives in Cleveland, but my husband's family as well.

I want to say to Mary Elizabeth Tubbs, my mom, happy Mother's Day. I am counting on you to stand up on behalf of all of the 21st Senate District as the Democrat Central Committee woman in the State of Ohio.

After learning all of these wonderful things from my mother, I have to take a moment and say I am pleased to be a mother as well. Yesterday my man child, Mervyn LeRoy Jones, II, 18 years old, and a senior at Shaker Heights High School said, "Mom, I have a great Mother's Day present for you, but it will be early."

I said, "What is it?"

He said, "I am going to take you to school."

I said, "That is good. What are we going to do in school?"

He said, "You and I are going to recite poetry together."

He knew that I liked poetry a whole lot. We go to the class, which is poetry writing, and I have a favorite woman poet whose name is Mona Lake Jones. Mona Lake Jones has written a lot of culturally sensitive poetry, and one piece is called "Being the Mother of a Black Child: It Ain't No Easy Thing."

So my son and I recited this piece of poetry together. It goes on to say being the mother of a black child, it ain't no easy thing, it makes you call on Jesus, and listen to the angels sing.

Mervyn and I alternated these versus together. The topping on my Sunday was at the end Mervyn said to his class, I brought my mother to school today. And he said, "You know, Mom, I am not going to have any money on Sunday, but I knew how much you liked poetry so this is your Mother's Day present; I recited poetry with you in poetry class."

Mr. Speaker, I want to celebrate and trust that other mothers around this country have wonderful opportunities to celebrate Mother's Day this weekend. Those whose mothers have passed on, or whose children have passed on, step back and remember some of the great memories and times you had together, and think about how blessed you are to have been a mother or a daughter or son, or to have someone who cared as much as mothers care for you.

PAYING TRIBUTE ON MOTHER'S DAY

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Ohio (Ms. KAPTUR) is recognized for 5 minutes.

Ms. KAPTUR. Mr. Speaker, I too rise on this occasion of Mother's Day weekend to pay tribute to those who bring to life and nurture and educate the children, the families of our communities and our world, and as my dear colleague, the gentlewoman from Ohio (Mrs. JONES) so eloquently stated in the prior Special Order, when we think about it, mothers have the most important role in the world because they create the love that holds, the center that holds their families together. I think that their idealism helps inspire the world every day, not in big measures always, but in smaller signs of love and affection.

There is no more important person in a child's life than the mother and father. But as this is Mother's Day weekend, I think it is important to point out that for children learning in schools, the most important factor in their success is their mother reading to them at home.

□ 1630

As we think about education, which is on the minds of all the people in our country, because education is so important to the preservation and the advancement of our democratic way of life, having an enlightened republic, it is important to think about the role of women and education and the role of this Federal Government in helping our families educate their children.

We have heard a lot from this administration about compassionate conservatism. I have really tried to understand what that term means. But in speaking about education, maybe it is important to put on the record, it is important to have individuals going to schools and reading to children. I do it myself. It is important to have mothers reading to children. It is the most important act that they can perform for that child in the home other than feeding them.

But if you look at this Federal Government and this particular Bush administration, though the compassionate side comes out when we see pictures in the paper of the President coming to Michigan, which he just did this week just north of where I live in Ohio, or wherever he might go, and then you look at the bills that come on this floor such as the Elementary and Secondary Education Act this year, it provides no additional assistance for education of our children around the country. In fact, the bill that passed here authorized an expenditure of over $24 billion for education at the elementary and secondary levels, but 2 weeks later when the President's budget arrived, it was $4 billion short. In other words, they might be compassionate, but the conservative side actually does not allow them to fulfill their promises.

Broken promises, that is what compassionate conservatism is all about. Frankly, it is all about nothing. Ask any of our college students across this country. They graduate on average today with a debt of nearly $17,000. Our physicians, when our medical school students graduate from college, on average we force them to have a debt load of over $100,000. How can a young physician going into practice manage to have a practice that is profitable while he or she has to pay that debt at the same time as they have to buy all this medical liability insurance, pay for the building, pay for all of their instruments and the medicines, and so forth. Think about the burden that we continue to place on the future of this country, on our young people.

So as a woman of our country, as a Congresswoman, as someone who I think has some mothering instincts of her own, let me just say probably the most important thing I can do is to support the future, and that is to support our young people at the elementary and secondary level and at the college level and to say to the Bush administration, compassion is not enough. Conservatism is not enough. You have to do something with the power you have to help nurture and grow the next generation. And burdening them with debt that they do not get out from under until they are 40 years old is not the way to build this country.

Frankly, we ought to have a program that allows any student, any young adult in this country that has that kind of debt to work it off through national service on the military side or the civilian side at a rate of $20,000 a year. We ought to get them out from under that debt and take care of some of the needs of this country, whether it is in our nursing homes, whether it is in our forests, whether it is in our inner city schools, whether it is in our medical clinics, wherever it might be, that we take this burden off the next generation so that they can move into this 21st century and new millennium in a way that helps advance America's cause.

Happy Mother's Day.

NATIONAL CORRECTIONAL OFFICERS AND EMPLOYEES WEEK

The SPEAKER pro tempore (Mr. GRUCCI). Under a previous order of the House, the gentleman from Ohio (Mr. STRICKLAND) is recognized for 5 minutes.

Mr. STRICKLAND. Mr. Speaker, I rise today to honor correctional officers and employees of correctional facilities across this country. This past weekend, correctional officers came here to Washington to celebrate National Correctional Officers and Employees Week. Awards were presented to officers whose exceptional service merited special recognition and wreaths were laid in memory of fallen comrades who made the ultimate sacrifice while on duty.

Corrections facilities are a critical component of our criminal justice system. We rely on correctional facilities to do just that, correct the errant behavior of certain members of our society. But a facility comprises more than just a building. It is also made up of correctional officers and other correctional personnel who are all highly trained to work in a challenging and often dangerous environment. I worked for many years as a psychologist at a maximum security prison in Ohio, and the respect that I gained from my coworkers during that time is enormous.

Correctional officers are public servants. Most of the officers I know give back to their communities in countless ways. Most recently I was struck by the sense of community exhibited by correctional officers in New York City. While that city was undergoing untold turmoil in those first 2 weeks following September 11, correctional officers worked 20-hour days lending their aid in the makeshift morgue and helping to coordinate the massive logistical effort of keeping the lines of communication open in Lower Manhattan. What we saw in New York is typical of all correctional officers, and I would urge all of my colleagues to recognize correctional officers and employees by joining me in cosponsoring H. Con. Res. 390, a bill that was introduced by the cochairmen of the Congressional Correctional Officers Caucus to urge the President to establish a National Correctional Officers and Employees Week so that all Americans can join us in honoring these very worthy individuals who contribute so much to our society.

RESULTS OF CODEL TO ISRAEL

The SPEAKER pro tempore. Under the Speaker's announced policy of January 3, 2001, the gentleman from Florida (Mr. DEUTSCH) is recognized for 60 minutes as the designee of the minority leader.

Mr. DEUTSCH. Mr. Speaker, this weekend three of my colleagues and I traveled to the State of Israel. We had several purposes for the visit. One was a show of solidarity with the Israeli people in terms of what has been going on. We visited a number of victims of terrorist acts, including American citizens, spent time with some families who had lost loved ones, children, 5-year-olds, 12-year-olds, 15-year-olds, again a number of them American citizens. We met with the Prime Minister, the Foreign Minister, terrorism experts, the head of intelligence for the Israeli Army, but I think probably the most dramatic part of our visit was a review of a very small collection of arms that was captured during the recent Israeli incursion.

One thing that American television press has not given, I think, the American people any sense of is the amount and the type of weapons that the Israelis have seized over the last several weeks during their incursion. It is a staggering amount. It was an amount that if it were placed in this Chamber from floor to ceiling would more than fill this Chamber. The weapons are extensive, mortars, sniper rifles, night vision glasses, machine guns, weapons totally outlawed by the Oslo agreements.

But I have a picture here which in some ways is the most disturbing of any of the weapons, if they can be called weapons, that we saw and that have been captured in the incursion. This is a suicide or a murder belt, one of several that we saw and touched and examined. The belt itself is not a makeshift belt. It is a manufactured item. It is clearly manufactured with a certain degree of technology in the sense that it is well-sewn and PVC piping, as you can see, that is stuck inside of a vest. That was one version. There are other versions. But I think the point of looking at them and the impact is this belt and the weapons that I described, and I will show some pictures of some of the other weapons that we saw, this belt was clearly not made to be put in a museum. This belt had one purpose, and that purpose was to kill innocent people.

In fact, of the belts that we saw, had those belts not been captured, I think what is clear is that their intended use would have occurred. And if for no other reason than stopping the use of one of those murder weapons, the Israeli incursion is justified.

I mentioned the belt again because I think one of the things that the American press has not done enough of is tell this story. These are mortars found, again weapons outlawed under Oslo, weapons that have no use but offensive weapons against Israelis, found in a number of different locations throughout the West Bank, in Ramallah and Jenin, Bethlehem.

Again I am just going to go through some of these because these are pictures that have not been on American television up to this point.

Besides the weapons themselves, the ammunition, just a small sample of the ammunition from M–16s, from machine guns. In fact, one of the sickest things that we saw was a number of buckshot bullets that we were told the purpose of them, and there is evidence because of the forensic evidence of suicide or murder bombings, is that the buckshot is actually taken out and the little pellets, the ball bearings are then implanted in C–4 to make the weapons more dangerous.

Again, these are assault rifles, which also are illegal under the Oslo agreement.

These are machine guns and mortars.

These are rifles that have been modified for the most horrific use.

Mr. Speaker, I yield to the gentleman from Pennsylvania (Mr. HOEFFEL), who has taken a leadership role on this issue and shared the experience of a witness in terms of the weapons.

Mr. HOEFFEL. I thank the gentleman for yielding and want to compliment the gentleman from Florida for his leadership in standing up for Israel and the people of Israel and for helping to organize and really being the guiding light beyond the trip that four Members of Congress took to Israel this past weekend. I was pleased to join that trip led by the gentleman from New Jersey (Mr. SAXTON) and the gentleman from Florida (Mr. DEUTSCH) and honored to be here tonight to share some of the findings that we had.

We designed this trip, Mr. Speaker, to express our solidarity with the people of Israel and the government of Israel in the face of the war of terror that has faced the people of Israel over these last few months and even over these last few decades.

□ 1645

What has happened recently has been horrible and is unacceptable, and the act of terror yesterday is a reminder of how difficult the situation is and how the people of Israel face the uncertainty every day, whether they will face this kind of terror, whether they will be able to go shopping, whether they will be able to stand at a bus stop, whether they will be able to socialize with friends and family in safety. Too many times recently the answer has been that they cannot do that safely.

We feel very strongly that the terror that has faced Israel must be firmly opposed. We heard on our trip from Prime Minister Sharon that there can be no compromise with terror. President Bush has said that there should be zero tolerance for terror. All four of us, and I am sure that the whole Congress, agrees with both of those statements from those two leaders.

I know those of us on the trip feel that there cannot be a Yasar Arafat exemption to the "no tolerance for terror" rule. We need to determine what we can do as a Nation to help Israel deal with this challenge and help her in her undeniable right to defend herself against acts of terror and to make sure that we do not set artificial limits or restraints upon her legitimate right of self-defense.

Mr. Speaker, let me yield back to the gentleman from Florida (Mr. DEUTSCH). I know that he has other photographs of some of the illegal weapons that we inspected, all of which were in violation of the Oslo Agreements.

Mr. DEUTSCH. Mr. Speaker, before the gentleman yields back, I know the gentleman has some very strong words, and the first picture I had up was the murder belts that we reviewed. If the gentleman could just describe them in his own words, I think that is helpful to people.

Mr. HOEFFEL. Mr. Speaker, I would be happy to do so. I must say that I have never seen a more evil thing than the suicide bombing vest that we inspected as part of the seized weapons and munitions that the Palestinians have stored illegally in the West Bank. The vest that we inspected from a distance looks innocuous. It is a plain gray, down-filled vest. Close inspection indicated that it was manufactured in China with a Western logo. It is called the Masters Company and the Masters name is on the vest, obviously intended for a Western audience. But inside the vest, a webbing has been sown and straps that are designed to hold small pieces of PCV piping, tubing; and the experts informed us that inside of those tubes, the suicide bombers place their C–4 explosives and a collection of ball bearings. So when the explosion occurs, it kills the suicide bomber, the explosive force kills and maims people around the bomber, and the ball bearings just shred the people that are in the vicinity of the bomber.

Our delegation met with a former constituent of mine who is now a resident of Israel who was the victim of one of these bombings. Her name is Gila Weiss. She was stepping onto a bus at the Jewish market in Jerusalem when a suicide bomber stepped off and the vest detonated, killing six people, wounding 40, including Gila Weiss. Now, her devastating injuries are just appalling; but the doctors are confident that she will have a recovery and hopefully regain all of her eyesight that has been threatened by this explosive blast. She is pockmarked with shrapnel marks, but they have all been removed and the doctors believe she will heal well.

The most encouraging thing about this was her spirit, Mr. Speaker. Her father, my constituent, flew over when they learned, her parents learned of her injuries and asked her in the hospital, "Honey, do you think now it is time for you to come home?" And this brave woman responded "Daddy, I am home." And that is the spirit of confidence and resolve that our delegation found throughout Israel. It is because of that spirit that I am confident that the

State of Israel will continue to exist and to thrive, and I look forward to giving my full support to that.

Mr. DEUTSCH. Mr. Speaker, I appreciate the gentleman's comments.

Before I yield to our next speaker, what I would like to do is show a couple of other pictures that have not been in the American press. I talked about the weapons seized in the incursions over the last couple of weeks. There is a very dramatic incident which, unfortunately, the incident was reported, but not the scope I think accurately, and that is the ship *Karine A*, which Israeli commandos seized. We have read about it, but to view it and really spend at least an hour and a half looking at the weapons and understanding what they were and the actual operation was very significant.

These weapons were about $20 million worth of weapons from Iran. They were basically off the factory, off the factory, literally off the factory, bated with serial numbers and dates. First of all, 90 percent of the weapons were outside of the Oslo Agreement, maybe 95. They were weapons not for a police force, but for an army. Beyond mortars. In fact, they included rockets with explosive charges tied to those rockets. The equivalent of American TOW missiles, which are devices used to attack tanks, to be able to steer the tanks after they have been shot, sophisticated tank mines that were made out of plastic so they could not be detected by metal detectors. This is a picture of just some of the mortars. Again, if one was to fill, it would be about half of this room, the amount of weapons that were on that ship. One of the most disturbing things, and again, the *Karine A* incident, our Secretary of State, Colin Powell, has publicly talked about the direct connection with Chairman Arafat in terms of purchasing those weapons and being involved in the shipping of those weapons. Effectively at this point, Chairman Arafat does not deny that he tried to get the weapons in. At this point it is not a debatable point about his personal involvement in bringing in just these extensive, very extensive weapons from Iran.

But one of the other pictures which just gives us a sense of what this whole operation, the Karine A, was about, this is one of the containers that all of the weapons were in. All of the weapons on the ship were placed in some very sophisticated water-tight containers. In fact, some of the weapons were modified, some of the larger mortars, or mortar launchers were actually modified so that they could actually fit inside of those containers which are very sophisticated containers. Just a part of the sophistication, which we can see sort of on top, is there was a part of the container that actually had a balance between air pressure and water to literally place the containers at a certain depth in the Mediterranean Sea.

I mean, this is a well thought-out military action. In fact, there were buoys with each of the containers so that they could be picked up by Palestinian Authority operatives in the Mediterranean Sea. It is a sense of the scope of what the Israelis are facing.

Mr. Speaker, I yield now to the gentleman from Indiana (Mr. PENCE), who I have listened to his words and I do not believe there is a Member, of the 435 Members in this Chamber, who has spoken more passionately and more effectively about the issues that America and Israel are facing in the Middle East, or who has been stronger and more forceful with his words.

Mr. PENCE. Mr. Speaker, I thank the gentleman for yielding, and I am very humbled by his words; and I am confident that they are overly generous. If anyone that might be looking in, Mr. Speaker, is paying attention at all, one would observe that Democrats and Republicans, liberals and conservatives, as we did in the resolution last week, are truly united in this institution in our belief in the preservation of the dream of Israel and our prayer for peace in the region.

I pray, Mr. Speaker, for the peace of Jerusalem almost every day. I pray for the peace not just of the Jewish people of Jerusalem, but for the Christians and the Muslims and the people who profess no particular religious beliefs. It is against that backdrop that I grieve with my colleagues today over the most recent loss of human life.

I think of the time of hope out of which we come to this place, Mr. Speaker. We come from several weeks where suicide bombings had come to an end, the efforts on the part of the Israeli military to rend asunder those who would use terrorist violence, who would use teenagers with bombs strapped around their chests as walking human weapons, targeting young families on the streets of Israel. We had seen them on the run, Mr. Speaker. We had seen evidence of the success of the Israeli military in their war on terrorism in the region.

Then we moved, with some U.S. pressure and encouragement, into a posture where the head of the Palestinian Authority was allowed to leave his compound in Ramallah just a matter of days ago, the Prime Minister of Israel comes to the United States, and against this backdrop of hope, virtually as Prime Minister Sharon sits in the Oval Office, more innocent lives are lost. Over a dozen dead, dozens injured in two separate terrorist attacks.

Appropriately, the Prime Minister of Israel ended all discussions of the peace plan that he brought to our shores and has returned to see to it that his people might not be made the subject of blackmail.

So we rise today in the latest of a series of Special Orders on this floor, Mr. Speaker, to state facts for what they truly are. Let us bring a few facts, if we can, into the record.

First and foremost, with regard to the role of the United Nations, let us understand, as Americans, as people who are committed since the inception of Israel's return to her historic homeland in 1948, that we are a nation committed to the territorial integrity and preservation of the Jewish State of Israel, that the United Nations is not similarly motivated, Mr. Speaker. That in fact, there is extraordinary evidence of a double standard by the United Nations. Why, Mr. Speaker, I would ask rhetorically do we have no fact-finding missions investigating massacres performed by Palestinian extremists? Yet, there is talk in the United Nations of an investigation into the so-called Jenin massacre, which, according to the Boston Globe, has already been determined to have virtually been a hoax. According to the Boston Globe, the Palestinian Authority's allegations are crumbling under the weight of eye witness accounts from Palestinian fighters who participated in the battle and camp residents who remained in their homes until the final hours of fighting, all told journalists that they were allowed to surrender and evacuate.

□ 1700

Mr. Speaker, there has been no massacre in Jenin, and yet the United Nations continues to pursue its one-sided policies.

Fact number one: The solution lies not in the United States.

Fact number two: Let us make no mistake about it, as there are those even in our own country who would call on concessions with regard to the 13 Palestinian militants currently held within the Church of the Nativity, let us have a fact on the table, Mr. Speaker. No other country will accept these 13 Palestinian militants. Yet many in our own State Department would have Israel sit down at the table of negotiating and trust with them.

Lastly, Mr. Speaker, I truly believe that the recent attacks demonstrate that Israel's efforts in the war on terrorism are incomplete; that, sadly, because of pressure from the United States of America, it appears as though, based on the two suicide attacks of recent days, that we have asked our ally to stop a war before it was over.

So I rise today with my colleague, the gentleman from Florida (Mr. DEUTSCH), and others who we will hear from to say that America must allow Israel to complete this operation. We must allow Israel to remove the terrorist elements from their proximity. We are in the same position. We are taking our war against terrorism to the terrorists, and Israel must be allowed to pursue the terrorists in her midst.

As I said in the beginning, Mr. Speaker, I pray for the peace of Jerusalem. I ask, as did the Psalmist, that those who love God would be secure, that there would be peace within her walls, security within her citadels. As the Psalmist goes on to write, "For the sake of my brothers and friends, I will say, peace be within you."

I rise today as a Christian conservative Member of this institution. I rise to speak humbly on behalf of, Mr. Speaker, millions of my brothers in the Christian faith, and sisters, who share the passion that my colleague associated with me does.

They are people who on Sunday morning and Sunday night and Wednesday night fill the pews of little buckboard churches that dot the landscape of districts just like mine in the heartland of America, and they are people who have a passion for the dream that is Israel.

So let there be no mistake to those who would observe among our colleagues and to the wider world that this is a Congress that is united across the lines of geography, across the lines of partisanship, and even across the lines of faith to come alongside our partner, our ally, and our friend in her darkest hour.

Mr. DEUTSCH. Again, Mr. Speaker, I appreciate the comments of the gentleman from Indiana. I really have learned a lot from the several statements he has made over the last couple of weeks.

Those of us who left to go on this trip literally left as soon as we took the vote last Thursday in support of Israel, in solidarity with Israel, but also specifically in understanding what the Israeli government is doing in terms of its military operation.

As the gentleman will recall, and as people watching might very well recall, it was a debate in this Chamber. It was an overwhelming support. Over 90 percent or about 90 percent of the Members that voted, voted in support of that effort.

I can tell the Members a couple of things. First off, we delivered copies of that resolution to victims in hospitals, to the Prime Minister, to families who had lost loved ones. I can tell Members that it meant a great deal to them that they are not alone, that there is a connection between the United States and the people of the United States and the people of Israel; that we should do as much as we can do to make that real, because unfortunately, they do feel alone.

I sat through really the entire debate last Thursday, and again, generally we do not sit through entire debates, but I wanted to hear my colleagues who were speaking against the resolution. It was a disturbing afternoon.

One of the things that we have talked about is I would welcome any of my colleagues in a discourse, because as the gentleman knows, our debates are not really debates, they are statements. They are very difficult. In this setting we can have discourse. I would hope that any of those colleagues would join us this evening and enter into a discourse about some of the statements that they made.

I would also offer to those colleagues, and we have done it before in this Chamber, an Oxford-style debate for them in a discourse way to try to defend some of those positions. Some of those positions, again, I found disturbing, shocking, and ignorant.

I will mention one, and there is no reason to mention a Member's name. One of the Members in this Chamber actually stood at this podium and put up two pictures of two young girls, a young girl who was a suicide bomber about 19 years old and a young girl who was killed by that suicide bomber.

We saw the supermarket where that incident occurred. I cannot think of many sicker, more immoral comparisons than was delivered right at this podium less than a week ago. I would ask my colleague just to share thoughts that he had during that debate, as well.

Mr. PENCE. If the gentleman will continue to yield, Mr. Speaker, I want to congratulate the gentleman and my other colleagues who were able to make the trip over the weekend to Israel. I am very moved, as I am sure anyone is that is watching, to hear that the pronouncements of this institution were a comfort to people who are suffering the loss of family members.

I share the gentleman's frustration with what we can only describe as the moral equivalency that many in this country and some in this institution ascribe to this conflict, to either side in this conflict. It is born, in fairness to our colleague who posted the pictures, that juxtaposition first appeared to me on the cover of a prominent American magazine. Who would ever have conceived that a sympathetic display of the photograph of a murderer and the girl she murdered would be presented on the cover of an American magazine as two victims of the conflict in the Middle East? It was an outrage to me. I have no doubt that our colleague who used that display was prompted by that same national magazine.

But it does, it seems to me, belie some of the moral confusion in the national media which has infected some in this institution. But I must tell the Members, as a friend and colleague, I was deeply heartened by what I heard in that debate, taking it in here and over the television air waves as I did in my office that day, by the way that so many of our colleagues seemed, against an avalanche of seemingly one-sided international media, to be still understanding how the hearts of the American people resonate for Israel; and, as the gentleman has said many times on this floor, about the one-to-one comparison between what Israel is doing in the West bank and what the United States is doing in the mountains of southeastern Afghanistan, and perhaps, as we speak, in northern Pakistan, that it is a one-to-one comparison. We are doing the same thing.

As our President stood at this podium days after September 11 and pronounced, "You are either with the terrorists or you are with us," Israel is the one Nation on Earth, it seems to me, that has taken up the mantle and joined us in the battle against terrorism.

So I share the gentleman's frustration with many of our colleagues. I hope those that are with us listening in in their offices on this late afternoon who have a different view will join us for a colloquy of sorts.

I also want to extol the Members in both parties in this institution who were willing to rise against media criticism and distortions and stand and add their names to that resolution that the gentleman so movingly says was a comfort to families.

Mr. DEUTSCH. I would also mention, Mr. Speaker, just in terms of the discourse that occurred, on more than one occasion last Thursday people mentioned the Israeli occupation, almost inferring that it was a justification for acts of violence. Obviously, it could never be a justification for the killing of innocents. The last incident before this one that occurred was literally a 5-year-old girl was shot, murdered, hiding underneath her bed.

I think one of the facts that are important, that people should understand, is that the Israeli government offered to end the occupation. That is what the Camp David Accord was about, where the Israeli government effectively offered to give back 98 percent of the West Bank and Gaza, offered to end the occupation. So it is this demented sort of perspective that if the occupation causes frustration and violence, well, the Israeli government was willing to end the occupation, so then why did they not accept it? It ends up bringing some of those issues in.

I know the gentleman from New York (Mr. WEINER) has some very important statements, but I wanted to give the gentleman from Philadelphia, Pennsylvania (Mr. HOEFFEL) an opportunity to talk, because he was with some of those people who we passed on that resolution to. If he could just describe the interaction, knowing that the United States Congress had passed that resolution, and literally giving it to people, if he can share in his own words.

Mr. Speaker, I yield to the gentleman from Pennsylvania (Mr. HOEFFEL).

Mr. HOEFFEL. Mr. Speaker, I would be happy to. I thank the gentleman for yielding to me.

The people we met in Israel on the trip this past weekend all knew about the resolution that the House had passed the day before. It was a remarkable demonstration to me of how much our actions here in the House are followed by the citizens and the government of Israel.

Everyone we met with, from Prime Minister Sharon, Foreign Minister Peres, Security Minister Landau, to the Mayor of Jerusalem, to Mikeli the taxicab driver, all knew and all appreciated the work that was done here last Thursday on a bipartisan basis by passing that resolution expressing solidarity with Israel and denouncing the terror.

So I thank the gentleman for the opportunity just to once more say that what happens here is followed in Israel. They appreciated the solidarity that we expressed, and there was a strong feeling of appreciation for what we did.

Mr. DEUTSCH. I thank the gentleman.

Mr. Speaker, I yield to the gentleman from New York (Mr. WEINER), who I know over the weekend wanted to join us, but in fact had activities in his own community showing solidarity and support for the State of Israel, and has worked as hard as any Member in this Chamber for peace in the Middle East.

Mr. WEINER. Mr. Speaker, I thank the gentleman from Florida for his statements today and for that kind compliment, and also for organizing these opportunities. We frequently in the House of Representatives are reduced to sometimes 2- or 3- or 5-minute debates on large global issues. This is now an opportunity, and it is the third or fourth time we have gathered to have kind of a reasonable discussion and back and forth about what are essentially very complex issues.

I want to also offer my thanks to the gentleman from Indiana who spoke earlier. We also have a tendency sometimes in politics, particularly in this age of conflict debate, to be overly morally certain about our position on things. Sometimes we have debates about obscure tax policy or telecommunications policy, and sometimes we go at it on the floor of this Congress as if there is no doubt in our mind with absolute certainty that our position is correct.

One thing that I would hope we would be able to agree upon is there is no moral underpinning for sending one's child out to go to a pool hall and then have them blown to bits by a suicide bomber. Those 16 young people who were killed in the latest homicide bombing, what crime did they commit? What political role did they occupy? What was it that their killing accomplished? What form of political debate is it that was being engaged in when they were blown to bits while Prime Minister Sharon was visiting here in the United States?

There is no moral justification for it. There are no political ends that they seek to get that justifies that type of horror. I would agree with what the gentleman said, the gentleman from Florida. The idea that some have embraced or even rationalized that type of activity, saying it is a function of a political discussion or a political debate, however feverishly pitched it might be, over who controls a given piece of real estate in the Middle East, these are 16 families that are going to be sitting down to dinner tonight with their young child missing from the table, blown to bits by a suicide bomber.

In that context that 350 of our colleagues, Democrats and Republicans from all parts of the country rallying last week to the cause of the U.S.'s support for Israel, and it was led, frankly, by the gentleman from Pennsylvania (Mr. HOEFFEL), there are very few things we agree upon in those large numbers. But among those who argued against, there were certain myths that seem to have been repeated on this floor again and again, and in some cases they were responded to eloquently, and sometimes they were kind of left out there in the air.

One of them is the myth that somehow Israel has to just give peace a chance, that they have not sufficiently offered opportunities for peace to take hold in the area. I think, and I have said before here, we can argue that Israel has tried every strategy. They tried the couple of yards at a time, trying to get to the first down marker. They tried the Oslo process, started in 1993, step-by-step, giving and conceding more to the Palestinians in terms of control of territory.

At this time, 97 percent of the territories are under Palestinian control as a result of the Oslo process. Border checkpoints had been eased as a result of the Oslo process.

□ 1715

Well, that three yards and a cloud of dust strategy was tried. What was the result? More violence; no concessions when it came to things like not teaching young people in the Palestine territories to hate Israel; to removing reference in their textbooks referring to Israel and Jews as evil entities. So the Oslo process was tried by the Israelis and rejected in large measure by the Palestinians.

Then Camp David, as the gentleman from Florida (Mr. DEUTSCH) mentions. That to me was kind of like the Hail Mary pass. Well, let us see what will happen if we try giving them everything they ask for. Well, that was not only rejected, but it was met with no counteroffer on the part of the Palestinians and the largest outburst of violence called the Second Intifada.

Well, what do we have left? Now we have plans to get to plans to get to plans. And those, too, Israel has embraced and the Palestinians have not. We had the Mitchell Plan, very tough for Israel, telling them to withdraw from settlements of areas that many people believe in their heart of hearts are part of Israel proper. Israel accepted the Mitchell Plan; the Palestinians refused.

Then you have the Tennant Plan to get you to the Mitchell Plan. Again, it requires very tough things of Israel. Israel said okay, we accept it. It was CIA Director Tennant here from the United States, sent on behalf of our government, who negotiated this plan. The Palestinians said no to that. We even had the Chaney Plan to get you to the Tennant Plan to get you to the Mitchell Plan. Even this level of incrementalism Israel chose to accept. The Palestinians said no because they refused to do thing one, which was to stop the violence, stop it for a period of time, allow negotiations to take place.

So the first myth that came up in the debate on the floor was that Israel needs to just give peace a chance and we in the United States need to step back, not be as supportive of Israel, because she has not. Clearly a myth.

The second myth that has emerged again and again in this debate and it has seeped into the mainstream media is that the problems there are a product of Prime Minister Sharon's intractability; that if it only was not Sharon and the way he behaves in his bellicose manner, maybe we would not have all of these problems.

Well, I would make two points about that. One is the Intifada that has started this violence, that has led to 76 suicide attacks since October of 2000, started under Prime Minister Barak. Frankly, he was in for 4 months while this violence was ratcheted up and ratcheted up and ratcheted up. No one could argue that Prime Minister Barak was so anti-Palestinian, bellicose and confrontational. He actually lost his prime ministership because he was too generous in what he was offering the Palestinians. Yet that is conveniently ignored by opponents of Israel today who want to lay this all at the feet of Ariel Sharon, with the simplistic explanation of what is going on.

Let us not forget something else. Virtually every corner of Israeli political life today has articulated support for Prime Minister Sharon's efforts to weed out terrorism wherever it can be found, essentially has articulated support for the Bush doctrine, Israeli style. So the myth that this is a Sharon-created problem is just that, a myth.

A third myth that was repeated again and again, and I heard it last night on the news again, is that the Israelis have used excessive force on the face of the onslaught of terrorism.

We have as of this morning dropped one bomb for every member of the Taliban in Tora Bora. We have unleashed a record number of armaments in that area. We do so because we know how important it is to do whatever is necessary to root out the Taliban, to root out bin Laden and to root out his henchmen.

The Israelis have made a different decision. They are not flying over the Palestinian territories, going to Ramallah and saying there is 44 of these suicide bombers coming from Ramallah, we are going to level Ramallah. They are going house to house, down dark alleys, and making a conscious decision to increase the number of casualties.

Excessive force? If the Israelis really wanted to root this out in a way that we have done it in Tora Bora, they would do it from afar. But they will not do that. It is not the way they are as a people and it is not the way they choose to deal with the Palestinians as a people either.

So what has happened? Israelis going door to door with pictures of wanted terrorists, knocking on the door, trying to find them, and they are getting killed as a result. Far from excessive force. The exact opposite. Probably the most moral execution of a war you can possibly imagine.

And the standoff that goes on today at the Church of the Nativity. Can you imagine, just imagine for a moment, first of all, the utter contempt of the terrorists to seek refuge in such a holy place. But can you imagine any other country with 13 assassins, suicide bombers, people who have done harm, can you imagine for a moment one of the evil men that attacked my city of New York, imagine if we knew one of them was in a local church? Would we encircle it and wait and wait and wait until they came out, out of respect for that church? Probably not. No country would do that perhaps except for Israel. Why? Because Israel has been the caretaker of the religious crossroads of the world for its entire 44 years with the utmost respect. Anyone who visits Israel can attest to that.

If you look at the various places, an entire government commission was created, a government agency was created just for the purposes of protecting and ensuring the health and security of non-Jewish holy sites in the Holy Land because that is the way Israel chooses to do it. So this idea that excessive force has been used is another myth.

And the final myth, and this is the one that perhaps is a favorite of those in the media, and the gentleman from Florida (Mr. DEUTSCH) referenced it earlier, is the notion that we have to create an environment that the moderate Arab states can help us forge. Where is this moderate Arab state? Is it Iran, who tried to export 50 tons, I believe is the number, of armaments that cannot only be used against Israeli citizens, ships and planes, but just as easily against a United States ship or plane or people? Is that our moderate friend?

How about the Saudis? The Jerry Lewis of fundraising for suicide bombers. Are they the moderates that produced 15 of the 19 suicide bombers? Are these the people that came to the United States to meet with our President of the United States and engage in a front page New York Times lecture about our moral responsibility? This is the country, this totalitarian regime that is run by a few hundred princes and potentates?

Who are these moderates? Maybe it is Syria, Hafez Assad, the new head of Syria? He is an ophthalmologist or an orthopedist or an orthodontist. I do not know what he is. He was educated at the Sorbonne so we start to say maybe he is going to be the moderate face of the Middle East. What does he do? He turns over his government in whole, in toto, to Hezbollah which continues on the other front that Israel has, their northern front, continues to use Lebanon as a launching place for more terrorism.

This is another myth that the moderate Arab states will rise up. I will tell you who is going to rise up. The people of the Palestinian territories will rise up and say what the Egyptians said, what the Jordanians have said, and what other people who have sought to make peace have said.

In every case where someone said to Israel, here is our hand of peace, there has been peace. The Egyptians decided through the heroism of Anwar Sadat, maybe we should learn to get along, live together. Peace did not take that long to do.

King Hussein of Jordan made the same decision. The moment that it comes that the Palestinian peoples choose through a nonviolent, through negotiations that they want a homeland, that they want an economy that is not in rubbles, that they want to peacefully co-exist with Israel, I can tell you that it will happen in weeks.

The gentleman from Florida (Mr. DEUTSCH) correctly points out the occupation is hardly even an issue any more. The Israeli people, the Israeli government say we will negotiate an end to the occupation in exchange for peaceful co-existence.

Let us not forget that in the final analysis, Israel is ringed by Arab nations who fundamentally like the idea that the Palestinian people are waging a war against Israel. They are a surrogate army. It is the Palestinian people themselves that have to make the decision. They say we no longer want leadership that turns over our faith to Hamas to go blow up children at a pool hall. We no longer want to turn over our faith to Yasir Arafat who says no to an offer of everything simply because he wants to continue to negotiate or because he does not want Israel's right to exist.

When the Palestinian people rise up and say, you know, my little 5-year-old girl should not be seeing cartoons on Palestinian terrorism saying put down your books, put down your toys and pick up your guns, when the Palestinian people decide they are not going to go to protests, holding their 5, 6-year-old boys and girls on their shoulder with mock suicide bombs around their waists, there will be peace. Until then it is the United States supporting a peaceful country of Israel who is trying desperately to do what we have been doing since September 11; desperately trying to survive, trying to have an environment where they are not afraid to send their kids to school, not afraid to send them out for a slice of pizza, not afraid to send them out to a pool hall.

I would ask my colleagues how they would feel in their town and neighborhoods and cities all across this country if they did not feel comfortable that they could send their child out for a slice of pizza without knowing whether they would be blown up by some person wearing dynamite laced with nails, ball bearings and hexagonal nuts. That is what Israel confronts.

We in this Congress in a magnitude that is rarely seen around here, 350-some-odd votes, said we in the United States understand what Israel confronts, and we stand shoulder to shoulder with them.

Mr. DEUTSCH. The gentleman had so many incredible insights in that statement. I would like to really follow up on a couple of them.

One, the difference between Anwar Sadat and Yasser Arafat. Anwar Sadat not only came to Jerusalem as a peacemaker, but got on Egyptian television and told his people why it was in their interest to have peace with Israel, and basically led them and educated them about that.

Yasser Arafat, I am going to read this quote that he basically said today, right now. This is the quote. "But we ask Allah to grant us martyrdom. To Jerusalem we march, martyrs by the million."

This is the English translation from al Jazeera, but the word martyr is shaheed. And the true translation that every Palestinian understands by that word is suicide bomber. Literally suicide bomber. It is the equivalent of what we would say kamikaze, and we know what a kamikaze means. Shaheed, the Palestinians know what it means. So he said to Jerusalem we march. Suicide bombers by the millions. To Jerusalem we march. Suicide bombers by the millions.

When Yasser Arafat left his compound on May 3, it really is not martyrs in the millions, the true translation as Palestinians said the words and understand the words, suicide bombers in the millions.

This is just another comment. Let me see if I can find it.

Mr. WEINER. Mr. Speaker, while the gentleman is looking for that, if I could ask the gentleman to yield for a moment. One of the things that is important is we frequently listen to what Mr. Arafat says to Western television in English, and then you go read what he says to his own people in Arabic, and it is a world of difference. You can hold a press conference in the United States for CNN saying this is a terrible thing that has happened, and then, as you pointed out, he turns and says in Arabic something entirely different.

Mr. DEUTSCH. This is from the New York Times, April 15. This is from Chairman Arafat's wife. And I think it is so strange to us that a mother could say this, but this is what Yasser Arafat and his wife are teaching.

"If she had a son, there would be no greater honor than to sacrifice him for the Palestinian cause. 'Would you expect me or my children to be less patriotic and more eager to live than my countrymen and their father, we who are seeking martyrdom?' " And, again, martyrdom means being a suicide bomber, a mother of a leader of a group. And I question whether or not he is a leader because one of the things that is interesting in your comments and one of the things of visiting and talking to people in Israel, is that as evil and as awful and as horrific as Yasser Arafat has been to Israelis, he has been as bad to his own people. They have indiscriminately killed Palestinians. They have destroyed an economy. There is no freedom. There is fear. The demolishment. And it is a people that does have a future. But it does not have a future with Yasser Arafat.

One of the other things, and again, the gentleman went through a number of points that I hopefully will be able to find all the corresponding charts. I think I have it.

This is our friends, the Saudis. One of the things about the Israeli incursion was that not only did they find this incredible stash of weapons, but an incredible sort of stash of documents, some of which have been released publicly at this point in time. And unfortunately, again, it is an issue where the press really has not, I think, talked about them specifically. And I welcome people trying to understand and literally read the documents.

Here is the ad that was put in a Palestinian newspaper asking for people because the Saudi committee for support of the Intifada was giving the equivalent of 5,000 American dollars per family, per suicide bomber. And literally an ad in the Palestinian newspaper, Alhayat Al Jadideh, and literally just asking them to come to a certain location for information and a number of beneficiaries and to come and sign up, prove that you are a suicide bomber and you will get $5,000 from the Saudis.

☐ 1730

Saudi Committee for the Support of the Intifada, which the interior minister of the Saudi government is the head of that committee.

Now, the Saudi government then sent a letter to that particular organization and the letter says, "I remind you that the house rules of the Saudi Committee for the Support of the Intifada prohibits publication of the name of the committee." So they are not allowed to publicize the fact that the Saudis are paying for it.

Included in the documents are a list of suicide bombers, literally a list which people at this point is not on the Internet, but is available in the public domain, that the Saudi government pay the $5,000 American literally to people who were suicide bombers.

So I agree with the gentleman completely. Is that moderates? Is that who we can expect? The one mistake I think in terms of the war on terrorism that the administration is making is this attempt to make something that is not. I think the proofs are the facts that the Saudis unfortunately are really not our allies in this war against global terrorism by their actions and by their specific deeds.

What I would like to do quickly in the last minutes is really just put up on the easel again some of the extensive evidence tying Chairman Arafat specifically to the terrorist actions. There has been an attempt by the President to also make a Yasar Arafat exemption to the war on terrorism, and it is a sad and, I think, tragic mistake of the administration.

The facts are the facts. The truth is the truth. These are one of several documents. At this point the Palestinian authorities are no longer inferring, as originally they did, that the documents are hoaxes. These were found by soldiers in the hard drives of Arafat's compound; and in fact, I spoke with the parents of a soldier who, in fact, was one of the soldiers that did, that was killed, and in the interim, the parents before, because it was in a different incursion, he was in Ramallah, he ended up being killed in Jenin, actually called his parents and explained to them what he did and by his own words told me what their son told him. In fact, he actually got these specific documents and the young man, 20-year-old young man, that died.

This particular document, which at this point again, there is no question about its authenticity. It is signed by Chairman Arafat, his signature, and specifically, it is a request by a senior Fatah activist in the West Bank for $2,500 for three known terrorists, terrorists that were on the Israeli's most wanted list. In fact, the Israelis were assassinated because of specific direct involvement with terrorism, and Chairman Arafat signs and approves those payments.

He does the same in this chart for a list of 12 known terrorists and again his signature, which at this point is no longer refuted in terms of his direct involvement in terms of terrorist acts.

In some ways this is one of the most disturbing documents found. It is a list of expenditures by Al Aqsa Martyrs Brigade, a martyr group, a list of their specific needs; and as incredible as it is, we meet every week five to nine, explosive targets. The squads in the various areas, five to nine explosive charges for suicide bombs, for murder bombers, written by Al Aqsa, to the Palestinian Authority, in their office was found and the calculation of how much they were going to pay them.

It is just not credible that they were not involved in direct bombings, suicide bombings.

Here is a copy of minutes of a meeting from March 24, 2002, of the Palestinian Authority. Hamas members were there at the time. So again it is not credible to say that Chairman Arafat obviously was at this meeting, but specifically talking about minutes from the meeting, talking about the decisions of where to bomb and why it was not a good time to bomb because or where outside the green line or inside the green line. General Zinni was there.

I am going to close because our hour is just about up, and there are more things that I can mention or show, but I think that in closing Israel's war is America's war. Israel does not want to be in Bethlehem or Nablus or Jenin anymore than America wants to be in Afghanistan. They are there because they have to be there. They have no choice.

I will not show a chart of it, but Israel is about 1/60th the size of the United States in population. When 50 Israelis are killed, it is the equivalent of 9–11. So just yesterday it was almost the equivalent of one-third of 9–11. We know how America responded on 9–11, as we should and as we did and as we are doing. We cannot ask anything less of the Israelis.

EDUCATION TAX CREDITS

The SPEAKER pro tempore (Mr. OTTER). Under the Speaker's announced policy of January 3, 2001, the gentleman from Colorado (Mr. SCHAFFER) is recognized for 60 minutes as the designee of the majority leader.

Mr. SCHAFFER. Mr. Speaker, I want to spend this leadership hour discussing in the context of Special Orders the important issue of education and specifically of education tax credits. There is legislation that I am working on, preparing for introduction within the next few weeks and have been working on that legislation for some time.

That legislation is supported and enjoys the assistance of a great number of our colleagues, growing coalition, large coalition of Representatives here in the House and even some over in the Senate who are firmly convinced that an education tax credit bill should be introduced; and to all those who may be monitoring today's proceedings and this discussion on tax credits, I want to extend an invitation to our colleagues to join me here on the floor if they would like to participate in a discussion on this important initiative.

It is an important initiative and one that really extends beyond the walls of this House in terms of its appeal and its scope. There are a great number of outside organizations, family groups, taxpayer groups, educational organizations that are supportive of an effort to try to get more cash into the American education system and to do so in a way that does not discriminate based on the kind of institution that is providing an education service or certainly does not discriminate based on the children and the choices they have made on where they might want to attend school.

This is an effort to try to get a massive cash infusion of funds available to all children in America, regardless of the academic setting that they have chosen in which to learn; and it does so by essentially cutting government out of the picture, which is attractive for some, which is a problem for others, I understand; but my goal is not to worry about the comfort of those who are comfortably employed in the halls of bureaucracy, dispensing education cash to children. My goal is quite the opposite and that is to make children the primary objective of our education initiatives in Washington and throughout the country.

Here is how a tax credit works. It essentially reduces the tax burden on an American who makes a direct cash contribution to a child who is attempting to receive a better education. In some cases, that might be through an organization which we have referred to in legislation as an education investment organization. These groups exist in all 50 States today. Some of them provide scholarships to low-income children so that they can attend the school of their choice.

The other component of the bill would allow direct cash contributions to government-owned institution organization public schools for specific projects or enrichment programs that exist at these schools; and once again, a contribution to an effort of that sort would result in a reduction in Federal income tax obligations to the extent of 50 percent in the case of the bill that has been proposed.

It might be instructive, Mr. Speaker, to kind of run through how money gets to children today, and I will refer to the chart here to my right. At the top, we have a taxpayer. This represents any ordinary hardworking American who is working hard today, having a portion of his wages confiscated by our government at the time he received the paycheck, and of course, in April we try to get a portion of that back by filing our tax returns. Americans throughout the country today are getting a portion of those dollars returned to them, and these are essentially payments that they have sent to the government or money that the government has taken from them over and above their actual obligation to pay.

So I want to start there with taxpayers because nobody likes paying tax. I do not know too many people who have ever told me that they enjoy paying taxes, but as Americans we understand our obligation to do it. There are some legitimate functions of government that are worthwhile and important and, in fact, essential to maintain a sovereign Republic as our country is, and so we are all consigned to pay a portion of our earnings to the Federal Government to maintain those legitimate functions of government.

Education is certainly an important function of government, providing an education system for our children. This is a function that has been traditionally a State responsibility, but over the years we see that more and more education authority has been moved out of the States and toward Washington. We saw that take place just last year with the massive education reform bill that was passed here in Congress and signed by the President, and that was done to try to accomplish the need of more accountability in education across America so that we have this whole strategy now of national testing and national accountability and national rules that try to dictate more precisely how these dollars will be spent.

I want to start there because for many in government that is a perfectly fine system, this system I am about to describe; and it works well for some. I do not believe, however, it works well for all, and that really is the motivating factor behind tax credit legislation.

Most Americans are like this guy right up here. They work hard and they are willing to send their cash to Washington and trust us here in government, politicians, to divvy up these funds and establish priorities; and to the extent that we do a good job of spreading these dollars across the priorities that tend to coincide with the attitudes, opinions and beliefs of the taxpayer, this works perfectly well.

Most Americans are like me; they tend to think that they are overtaxed. They tend to think that the government wastes too much of their money, and they tend to think that by the time a hard-earned dollar paid reaches the intended purpose of a particular government program, there is so much lost in the middle here that there is not much left at the end; and that is again what I intend to describe here.

If a taxpayer knew, however, that the dollars they send for an important purpose, education, for example, really reached a child, I think people would be a little less resentful of this system that exists here; and we might describe this as kind of a spending funnel, as dollars come from the taxpayer to government.

They are confiscated, as I mentioned at the time, right out of Americans' paychecks. Those dollars are taken in by the U.S. Treasury. This is where we find the Internal Revenue Service that we are all familiar with, especially as it relates to paying taxes. Then it is subject to a number of political decisions. This is us here as Members of Congress, all of us here, politicians. We come to this floor and decide how to divvy up taxpayers' cash.

□ 1745

A portion of these hard-earned dollars are spent on the U.S. Department of Education. The Department takes money and distributes those dollars to States, primarily. Some of those dollars go directly to local school districts, but most of them are distributed down to the State level. Once those dollars get to the State level, you have more politicians, State legislators in this case, and Governors, who redistribute those funds on a Statewide basis to programs that they believe to be important in their States. Once those politicians are done, a certain portion of those dollars are spent on the State Departments of Education. From the State Department of Education, the taxpayers' money then goes to school districts throughout the country.

Most school districts, if not all, are managed by an elected board of politicians, school board members, and these politicians then redistribute the taxpayers' dollars even further, down to the various schools that are managed within a school district. And then once those dollars are at the school, why then the principals and the administrators who run the individual schools distribute those dollars to the student, way down there at the bottom, who is pretty happy to receive any attention and resources with respect to his academic future.

That is how American education dollars get to students today, within the context of Federal spending. Again, hardworking taxpayers send cash to Washington, on an involuntary basis, I might add, and those dollars are then filtered through this entire process of government agencies, politicians, government agencies, different levels of government, other politicians, other agencies in the States, smaller jurisdictions, being school districts, more politicians who run school districts, down to the schools, and finally to the child.

Now, what is unfortunate about this picture is that every one of these levels of bureaucracy and political decisionmaking, they actually cost money too. You see, it costs money to run the Department of the Treasury and the IRS. So they take their cut and they get their portion. We here in the Congress, we have other priorities, and of course we have to pay for this building, too, and pay ourselves handsomely for the hard work we do here. So some of that money is lost here.

Over at the Department of Education, as we have known through the audits that have been very difficult to accomplish over the years, some of that money has just been stolen. Some of it has been lost over the years. Things are getting turned around slowly over at the Department, but even still that is a big agency. They have a number of very large office buildings here in Washington and there is a lot of people who work there, so we have to pay them, too. And then we have to account for a certain percentage of those dollars that are lost due to waste, fraud and abuse. So the Department takes its cut, and that is a pretty big one, by the way.

Then at the State level of course you have this State process where the States, in order to administer these Federal funds, they need a portion of those dollars, too, because those employees who exist to redistribute Federal funds through the States, they have to be paid, after all. And the politicians at the State level, they have priorities of their own also, and so they skim off a little portion of the money.

The State deputies of education work very similar to our departments. They are really embroiled in a lot of recordkeeping and accountability, filing of reports, and just dealing with all the red tape of education. That costs money. So we have to pay for that, and that comes out of these dollars, too.

Then you find the same at the school district, because what you have here is a bunch of people who communicate with each other. Since these dollars are distributed through this process up above, they want to make sure that the school districts down here at the bottom are spending the dollars the way these bureaucrats want them to be spent. So they require all kinds of reports to be filed and accountability requirements and strings and red tape as well just to make sure the dollars are being spent the way these people in these agencies believe it should be spent. And so you have a lot of people who fill out a lot of paperwork at the school district level, and of course they need to be paid. So there is an expense associated with that.

So paying for all of that nonsense comes out of this taxpayer dollar, too. Same with managing the schools. There is an accountability chain here that is pretty intense, with every principal filling out reams of paperwork in order to satisfy the Treasury Department, the politicians, the Department of Education, the State, State politicians, State Department of Education, school districts and school board members that the principal is spending the dollars correctly. And so you have just got all this paper running back and forth, with site inspections too, I might add.

In order for the Department of Education, way up here, to be able to persuade us here in the Congress that they are doing a good job, they send auditors down here to the schools. And when they show up, the school has to stop teaching for a while and the administrators need to answer all the questions of the interrogators who come from the Department of Education to make sure the money is being spent well. And by the time you get your dollar through this whole process, all of these agencies have skimmed off quite a sizable portion, so that the dollar amount that actually reaches the child is very small.

Once again, this process obviously makes sense to somebody, because it did not occur by accident. It occurred over many, many years, through a series of successive votes here on the House floor. And we here in the House and over in the Senate and down at the White House over the years deliberately built this system the way we have it today.

So when we talk about trying to improve it, do not get me wrong, it does disrupt the comfort level of some people who understand this process. There are people who like this. The kids probably do not, but there are people who work in all these agencies, a number of politicians, our colleagues, who get to make important decisions on how these dollars are spent. They like this process just fine because it suits them well.

And at the end of the day they believe in their hearts they are doing something worthwhile for kids. I cannot deny that. And I think these are probably good people who we can find throughout this process. It is just that, in my estimation, it is probably not the best way to get money from the hardworking taxpayer down to the needy child who deserves a good education.

So in constructing a process by which we can get more dollars to the child, and bypass this whole process, just from a political standpoint we have come to the conclusion that changing this very dramatically is not all that practical. These people all have lobbyists. They have people who represent them that stand just outside the halls of the Congress here, and they strike up friendships with our colleagues here in the House and over on the Senate side. And when you talk about changing the way the Department works or the way the States work or the way these school boards work or the State departments, or even the way we manage schools, you are in for a political fight that leaves the child down there behind and leaves the taxpayer behind. You get caught up in this whole mess of bureaucracy. And those who care about the taxpayer and care about the child usually lose these battles.

So I have fought them for years at the State level and I have fought them here in Washington, and they are fun battles to be a part of. They make you feel good and warm inside, because you care about the kids, but at the end of the day this bureaucracy always wins and it always gets bigger. So my point being that changing this is a good idea, something that needs to happen, but focusing all our attention on this process is probably not going to result in measurable meaningful help to the child down there. The politics of this are just too big.

So we have something different in mind, and that is this tax credit proposal. We did not invent it here in Washington. I certainly did not, although I am very impressed by the efforts that are taking place throughout the country in a number of States, because the States are frustrated with this, too. So what we have seen in a handful of States around America is an effort to bypass this bureaucratic process, too, by trying to get these dollars around this bureaucratic system down to the child.

That model looks more like this. Here we have the same taxpayer, way over there to my right, and those dollars that he is earning come directly to the child. Now, the way this works is for every dollar donated to an organization that benefits students, or donated directly to the child's school, that taxpayer will be able to reduce by a certain degree the amount of money he sends to Washington through that other process that I just mentioned. And that is really all that is behind a tax credit.

In that other system that I described, this one here, over the last 25 years, we have spent $125 billion just this way. This is how we have done it. And when taxpayers get frustrated by the huge amounts of money they have spent and the less than impressive results they have received for those expenditures, this really explains why: $125 billion spent through this process over the last 25 years.

And in America children still languish far behind their international peers in the areas of math and science. The racial achievement gap in America on test scores is actually widening, not getting smaller. The test scores, according to the Nation's report card, the National Assessment of Education

Progress, have remained largely stagnant over the past 20 years.

So once again, I will acknowledge and concede that there are many people who like this system, who are appreciative of the $125 billion that have been spent through this process, and some people are actually satisfied with the results. I am just a little different, I guess, and maybe the people that I represent in my district in Colorado are as well.

And we are not alone there. I have traveled all around the country with our Committee on Education and the Workforce, as a member of a particular subcommittee that does research on education issues. We have traveled to cities all across America, and I have heard at stop after stop after stop, in all of these field hearings, from droves of parents who are tired of seeing their tax dollars squandered and having their children grow up with something less than an excellent education system available for them. What they want are choices. They want choices to be able to act like customers in an education marketplace.

Now, for many people, choosing the government-owned school in the neighborhood, the traditional public school, is all they want. They are content to move into a neighborhood, call the school district, the government agency that runs schools in their area, and ask them, what school do I send my child to. And what usually happens is the school district will say, what is your address. You give them the address and they look at a chart of some sort or a register of addresses and they compare those addresses to the nearest school and they say, well, since you live at 123 Smith Street, for example, then you go to school A. And that is the choice you get. Many people are content to do that. They are fine with the notion of their government dictating their school for their child based on their address.

And for parents who like that sort of thing and feel comfortable with that and believe the results are good, I say great for them. That is a good choice for them and for their child. And more power to the parents who want to let other people make decisions for their children about what schools they attend. That is great for them. There ought to be schools for them. Others would like to choose a different public school, a different government-owned institution. Instead of school A in the neighborhood, they might want another school A in a different neighborhood that is run by the same organization but maybe has some different flavor about it, some different emphasis, perhaps on math or science, or maybe discipline, maybe sports. It all depends. If a parent believes that product is in the best interest of their child, well, by all means they ought to be able to choose to send their child to that different academic setting.

And then there are still other parents who believe that the government-owned monopoly structure of education is not for them; that they might want to send their child to a privately owned institution, a school that maybe excels in one area or another; again, maybe math or science, or maybe it is a school that has some character quality about it that defines it. Maybe it is a religious school, maybe it is a school that focuses on a foreign language, or whatever the case may be.

But for them, they are really out in the cold, to a large extent, because the money they are paying to this large government structure is not available to them when they want to take their child to a different school that is not part of the government monopoly. And that kind of discrimination plays disproportionately on the poor. Because wealthy people in America can choose to forego the cash they are sending to the government and pay even more on top of that to pay the tuition to send their child to a nongovernment school, a private school, or even maybe provide tutoring or some other academic services. But if you are poor, you are pretty much stuck with the option that is handed to you.

And, again, if it is a good school, that is a great thing, and I would not want to tamper with that. But if it is a school that is failing, then that is a child that needs to be rescued, frankly. That is a child that deserves our compassion, deserves our support, and deserves our attention. And that is what this discussion is all about and why so many people, including our President, have indicated their unyielding support for education tax credits.

☐ 1800

Mr. Speaker, let me give an example of the way tax credits are working in a number of States. First, six States have enacted some form of tax credit at the State level, and these are generally for elementary and secondary education services. Arizona is one, Minnesota, Iowa, Illinois, Florida, and Pennsylvania are probably the best examples. There are several other States, probably over 30 right now, that are considering in their legislative sessions enacting similar legislation.

This is the case in my home State of Colorado. It is a vigorous debate that is exciting because it is finally beginning to focus on children as the most important element of education debate, not as the chart here on the right illustrates, all of the education constituencies that tend to be a part of education discussions in America today. This is really true.

When we talk about empowering States, that threatens the Federal Government and their Department of Education. When we talk about moving authority to Washington as Congress did last year, it threatens States and local school districts. So we have some of these conflicts that exist between various levels of government; and too often the education debate here in Washington centers on the relationship between these institutions and these bureaucracies.

We need to get away from that. I think we need to get to a point where we start measuring fairness by the relationship between children throughout the country and making sure that all children are treated fairly. We can care about the bureaucracy, too. My point is that should come second. The children should actually come first. I know there are Members that believe that bureaucracies should come first, and with them I always enjoy having the debates on the floor. They are even better when those who want to put the bureaucracies first are honest and willing to engage in a debate on whether some union wins or some school building wins or some administration happens to win.

But in the end what I have heard from Americans across the country is they want to see us begin to talk about children for a change and what we need to do to make children become the victors in an education debate. That is what these States are accomplishing. The tax credit initiatives that we have seen in the States went through these vigorous debates to begin with. There were people in government at the State level that said if you give parents choice, if you empower children and give them the ability to shop and choose the kind of academic setting that they want to be a part of, that threatens these government decisionmakers that have made the decisions for them. These debates have been vigorous and public and spectacular at the State level. Even as some of these tax credit initiatives were enacted by States, there was some doubt about whether or not they would work.

In those States where tax credits exist, we are beginning to see public support for what they are achieving as being quite remarkable. They are winning over public confidence at a pretty dramatic rate, and they are bringing people together across partisan lines. One would think that this is a proposal that appeals to conservatives as opposed to liberals, and throughout the States we are seeing education tax credits are appealing to groups that really do not care about the politics. They do not care whether these are proposed by Republicans, which is what I am, or Democrats, or liberals or conservatives. They just want to see Congress finally talking about children for a change and not the bureaucracy, not the politics of it.

Here again, once these tax credit proposals are up and running, and we see these massive cash infusions taking place into the education systems of these various States, all of a sudden people get it because now the poor child who has been trapped in a bad school finally has a little bit of liberty and freedom. They get to attend better schools, and the schools they leave get better as well. Just the force of the marketplace that we see in every other important industry in America has been denied, for all intents and purposes where the most important industry is concerned, that being education; but in these States that I mentioned, we are starting to see children benefiting and schools benefiting as a result of just a small introduction of a tiny representation of a market-based economy, and a market-based approach to public schooling.

There is a corporate tax credit component that we find in some States as well that allows businesses to target some of the most needy schools within a State. When a corporation helps to replace the leaky roof, for example, at an inner city school in the city, that corporation also receives a commensurate reduction or related reduction in their tax obligation to the Federal Government.

The way we have structured this bill, we actually get a two for one benefit as a result of these kinds of investments. In fact, our bill calls for a 50 percent tax credit, which means for every dollar donated to the school, the donor's tax liability to the Federal Government is reduced by half of that amount. From our standpoint, from the government's standpoint, for every dollar that does not come to Washington to be spent on education by the bureaucracy, $2 are spent on a child. When we couple the Federal proposal with what we see taking place in the six States that I mentioned, well, the benefit to children becomes rather dramatic and exciting.

Just a few weeks ago the Committee on Education and the Workforce held a hearing on this topic, and we heard from at least one child that represents several throughout the country, I am convinced, give his opinions about the benefit that he has received and realized as a result of receiving a scholarship. Here is his testimony. His name is Joshua Holloway. He says, "I was born in Denver. My favorite subject is football. I am 10 years old. My mother passed away last year. I have a brother who is 6. His name is Jeremiah. We go to church every Sunday. Before I go to school, I read the Bible. I live with my grandfather. Sometimes my cousins come over and we play outside and play video games. Before my mom passed away, she told my grandfather to bring us to Watch Care."

I might inject here, Watch Care is a school in Denver, Colorado, that is a private school and Joshua was only able to attend because he received a scholarship from a private education investment organization.

"We were at Watch Care before we moved to New York. My grandpa could not afford to pay for me and my brother." Mrs. Perry, who is the principal at Watch Care Academy, told him about a particular scholarship that exists in Colorado. The testimony goes on: "My grandpa applied and we received an ACE scholarship. Jeremiah and I say thank you. It is with your help that my grandpa is able to bring us to this fantastic school. I know my mom is happy and thanks you also. When I grow up, I want to be a lawyer, and then a football player. Thank you for helping all of the children who are getting such an education through your program. I want to win. This will help my grandpa with money for Jeremiah and I."

He thanks us for considering these tax credits. Joshua came and testified before the Committee on Education and the Workforce on April 16. His testimony was moving. I think it held most committee members spellbound, and it spoke clearly about who benefits. It is contributions to this kind of scholarship program which will be eligible for the tax credit that we are proposing in the legislation.

The gentleman from Michigan (Mr. HOEKSTRA) was at that hearing and is one who has been devoting a great amount of time over the years to perfecting this tax credit proposal.

Mr. Speaker, I yield to the gentleman from Michigan (Mr. HOEKSTRA).

Mr. HOEKSTRA. Mr. Speaker, as we try to help young people like Joshua, last week I had an opportunity to go through a public charter school in my hometown and explain to some of the parents and some of the teachers and the principal exactly what we were looking at with the tax credit proposal.

There was a tremendous amount of enthusiasm because they recognize that not only would it help Joshua in this case, but it would also help the students at that school, a public charter school, to get some additional resources for some things that they felt that they desperately needed; and it would not require them to go to the taxpayers and raise the tax. It allows them to go directly to the people who have a vested interest in that school. Whether it is a public charter school, whether it is a traditional public school, or whether it is the kind of school that Joshua goes to, these tax credits, number one, will provide for a significant infusion of new money into our local schools for all of our kids and will get everybody vested in improving education for every one of our kids.

The gentleman and I go through this process each and every year where we have the opportunity to nominate kids to the military academies. We know that there are some tremendous kids coming out of our public schools. We know that there are some tremendous kids at the school I went to, the charter school; there was someone leaving there on June 27 to go to the Naval Academy. They are doing a good job. There are kids coming out of our private and parochial schools that are going to our academies.

When I speak with students as to why they are in private school, they will often say that this one just kind of fits me better or fits what we need to get done and what my parents thought that I needed. I think that these different kinds of educational alternatives are tremendous, and then allowing parents and others in the community to invest in these schools, to increase the amount of money that is going into education, without the red tape, without the great sucking sound which is a dollar coming into Washington, us taking our cut and feeding it back. Actually it is a two for one. They invest $2, and it costs Washington $1 because that is the ratio. It is a $500 donation, but it is only a $250 tax credit. It is a real win/win for the school, for the child, for the parent, and for the taxpayers because what we are doing is moving more money into education, which we have identified as one of the most important priorities that we have in the Nation today.

Mr. SCHAFFER. Mr. Speaker, some Members have tried to demonize tax credit proposals that we have seen in the States, and even our proposal in Washington, as a voucher. The voucher, as we say, is the "V" word here in Washington that has such a connotation about it because there are many organizations that exist to prevent that kind of a school choice mechanism from taking place.

One of the ways that they have tried to characterize the tax credit provision proposal that we have is by referring to it as a voucher, but it is nothing like that. A voucher would essentially be effectively a taxpayer giving their cash to the people here in Washington, and the government here giving those dollars back through a voucher, kind of a check, that could only be spent the way that the government says it can be spent. We are not proposing that at all.

Mr. HOEKSTRA. Mr. Speaker, the difference between what we are trying to do and how Members characterize vouchers, vouchers are typically viewed as taking the educational pie, the amount of money that we are investing in education and redistributing it so that means that there are some people that are going to get less money; and since there are new people getting money, they are going to be getting more money, so somebody is going to be left out or they are going to go home with a smaller check than they got before.

That is not at all what we are doing here. We are saying that there is the money coming into Washington, about 7 percent of all the education dollars come into Washington, and what we are doing is saying that money is going to stay there. We are going to keep increasing that. That money has been going up, but now we are going to create a new educational investment fund that is going to be driven at the local level and not at the Washington level. Basically, this is new money where people are saying I am willing to contribute extra money to education if I can determine where it goes and what it is going to be used for, and if I can build that relationship with my local public or private or local charter school; and if they can come to me and make a compelling case as to how this is going to benefit the community and the children in our community, I will write that check. The states are finding that they are doing it.

Mr. SCHAFFER. What we are trying to accomplish through this legislation is a mechanism that reflects what we have been hearing throughout the country as we have held field hearings and listened to parents.

□ 1815

That is, number one, they want to be able to make the choices necessary to advance the academic goals of their child, but even more is this important point. That is, that Americans are willing to spend more money if the dollars they spend really help a child. They just do not have the faith and confidence that this system I described earlier, and illustrated through this chart, that spending money through the Treasury Department, politicians in Congress, the Department of Education, State politicians in the State legislature, State Departments of Education, school board members, more politicians, schools and principals and ultimately the child, Americans inherently know that funneling cash through this bureaucratic process means that you have these agencies take their cut and that the dollars that get to a child are small.

If this process worked and these dollars really did get to a child, I suppose more Americans would feel very good about this and comfortable with it, but as it is now, the children do not feel good about this, the taxpayers do not feel good about it, some of these people in the middle, they certainly feel good about it because they get some of the money, but what we have tried to do is take this sentiment that has been expressed by taxpayers when they tell us, if they know the money is really going to help a child, especially a poor child, I will spend more, I am willing to spend more, I will make the investment in the child so that we can improve America and improve the education system.

I would like the gentleman to address, if he would, the reality that although I described this in kind of a negative way, since we are talking about new money being invested in the child down there, we can do this without really threatening the people who like this kind of nonsense here, who like this kind of system. We can do this without touching this.

Mr. HOEKSTRA. That is exactly the point that I was going to make. That system, with the tax credit, is going to stay in place. We are not going to take money out of that system, although that system takes out about a quarter to a third of every dollar that we commit to spending on education. When the dollar starts here in Washington, before it ever gets into a classroom, we think we lose a third. We are not going to get into that argument as to whether that system is effective, efficient, and whether it is working or not because the other thing that comes along with that is when that 67 cents get into that local classroom, the local teacher, the local principal, the local superintendent, they have been told pretty much how to spend this money and what they can spend it on.

We are not threatening that system. We are leaving that system intact. We have tried that before, saying we do not think that system works and all of that. We are just saying that, hey, there appear to be a lot of people in Washington and maybe even at the State level and a lot of people in this Chamber would like that process that says, "We are willing to have 33 percent of every dollar bleed off just so that we can use that money here in Washington to tell people what to do in their classroom at home, we think that is a good deal." We are not going to argue with them on that, although we probably at times have, but that is not what this is about.

This is saying you can keep that sacred cow, you can keep that system intact. What we want to do is we want to have a system that is not going to even come nearly as big as that one, but one where the relationship and the linkage is directly between the people in the community and the school and the children, where the local carpenter, the local contractor, the local plumber when they go out and do their work, get paid, pay their taxes to Washington, if they have a little bit of extra left, they can write a check directly to their school and we know that they are doing that in the six States that have passed tax credits. They are willing to put more money into their kids.

Mr. SCHAFFER. It is an important distinction to make, an important point that I think the House needs to keep in mind as this debate moves forward and the legislation eventually comes to the floor, that the bureaucratic model that exists today, it is a problem and it ought to be fixed, I think maybe someday it ought to be replaced, but that is not what this tax credit proposal does. It instead sets up a different mechanism to fund education and to provide this massive cash infusion in schools in addition to that bureaucratic model. It does so not by changing the education laws or dealing with redistributing the education money that is spent currently or even disrupting the scheduled increases in funding for the bureaucratic model. That is going to continue on unimpeded, unimpaired because, as you mentioned, there are so many people here in Washington who like that and support it.

But what we are suggesting is that we can, in tandem through the Tax Code, make the necessary changes so that it becomes advantageous for Americans to work hard, to donate their cash to America's schoolchildren, to do it directly and bypass the bureaucratic model altogether.

If you need a visual of how tax credits work, this is it right here.

Mr. HOEKSTRA. If my colleague will yield, because the other thing that we know is we know what the difference is. In your model, it goes directly from the taxpayer, it can go directly down to the school district. We eliminate all this and we save that 33 percent. Actually what we do is we double it. We take the dollar, and rather than taking the dollar in this model where it shrinks it down to 67 cents, what we do in that model is we take the dollar and we multiply it to two, so it is a great contrast.

If the gentleman will leave the chart up for just a second because the other contrast is, you and I have worked pretty hard over the last 4 or 5 years, I think we have finally made some progress now that we have a new administration, but for a number of years the money going into this system could not be tracked. We did not know where it went. This organization right here, the Department of Education, could not get a clean audit. They could not tell us where the money went. There were all kinds of cases of waste, fraud and abuse, well documented. I think at last court, 18, 21 people are pleading guilty and have been sentenced for the crimes that they have committed but the accountability system really was not here.

With Secretary Paige and all that, we are very optimistic that they are going to get a clean audit so they can tell us exactly where that 33 percent goes and we will be able to determine whether we have value or not. But we are not threatening this system. The accountability model over there is very simple. If the principal or the superintendent or the local school board cannot convince the local taxpayer that the purpose that they need the money for is an appropriate purpose, they do not get the money. And if at some time in the future they get the money and they waste it, they will have broken trust with their constituencies and they will not get another check; whereas, if they spend it wisely and the people say, wow, what a great investment, they will get more.

Mr. SCHAFFER. This model that you are displaying here, it is just impersonal. Because if a school district does a bad job and children suffer in a particular school, under this system the schools just keep getting cash. It just keeps coming. In some cases they actually get more. We reward failure oftentimes through this process and it is too impersonal. The people making decisions up at the top end of that funnel, or that tornado there, they are so far removed, those of us here in Washington, you are from the State of Michigan, I do not know your constituents in Michigan, I do not know the names of these kids and you do not know the names of the kids in my district.

Mr. HOEKSTRA. Yes, I know Joshua.

Mr. SCHAFFER. That is right. He came and testified. But that is indicative of a Federal system where we try to make laws and establish policy to help children in different neighborhoods throughout America. It is too impersonal. By the time those dollars get to kids, there is no human connection between the people who are calling the shots and establishing the policy and the poor child who is either languishing or succeeding in a school. But this model is very different because the person who contributes the money understands the value of the donation. And if that donation strikes them as a good idea, a good investment, something that is yielding appreciable benefits for the community and elevating the hope and future of children, that taxpayer is going to feel good about that donation and they are going to continue to make the donation. In fact, they might even make more as time goes by.

That is just what we have seen in the several States that have tax credits, is as time goes on this tax credit strategy becomes favored over the bureaucratic model and more taxpayers like this system in a way that makes them feel better, makes them more generous with their dollars and in the end they are getting massive quantities of cash to the neediest children.

Mr. HOEKSTRA. The other thing that happens and like we said earlier, we do not threaten this system. We are not taking money. We are not shrinking this funnel. This funnel is going to continue to grow and expand. This funnel will be there for people who like the guarantee of, yes, this money is coming in and some of it is going to filter its way down here and when it gets here, they are going to tell us how to spend it. If they like that kind of model, this model is going to stay around. What we want to do is we want to complement this model which you and I have questions about, but this model stays in place. But we are going to complement this model with the local control model, the parental and local involvement as an additional infusion of money so you will have money flowing into this model and then you will have that other chart with this person. This is confiscation. This guy has no choice. He has got to put the money into here. He or she will also have the opportunity whether they want to send some money directly through here, bypassing that system.

And, like I said, what we have found in the States that have introduced the tax credit proposal, this person when they have got the direct ability to make a decision as to how that money is going to be spent and when they know the children, they know the schools, they know the people who are running those schools and when those people have built up their confidence with their constituents, this person will write them a check to make their school better and to make their kids better educated.

Mr. SCHAFFER. It is a great model. Again I really commend the leadership of these various States that I mentioned that have initiated the tax credit philosophy and are seeing it work in their States. They have done so on a bipartisan basis. Once again, this is not a partisan sort of thing at all. These kids do not care whether Republicans or Democrats introduce these bills. What they want is they just want them to pass.

If I can use my State as a good example, we have got this debate taking place in the State Legislature of Colorado today. Right now it is taking place. What we have there is a Republican in our State House of Representatives who introduced this legislation and the same bill is being carried in our State Senate by a Democrat and a pretty liberal one at that. So you have both ends of the political spectrum that are rallying around children for a change.

That is the kind of political unity that I think we need to see more of in this Congress and hopefully it does not have to only take place around tragedies and terrorist attacks, and we can finally have this kind of unanimous consent around something that is positive and something that provides hope for the Nation, and that is our country's children.

Mr. HOEKSTRA. What this is not about is about process. It is not a debate about process. What this is about is making sure that we put our children at the forefront and their education. That is what the whole debate always should be about. It should not be about all these other things. It should be how we are making sure that every child gets a good education, that they can all do reading, writing and math. How do we make sure that we do not leave a single child behind. That is one of the things, and that is why in the States that they are moving to the tax credit as a complement to the bureaucratic model is that they recognize that in too many areas we are leaving too many kids behind.

Republicans, Democrats, liberals, conservatives, African Americans, Caucasians are coming to the conclusion together that, just like testing in and of itself is not the total answer, just like more money through the bureaucratic model is not the total answer, tax credits, you and I, I do not think, believe that tax credits in and of themselves are going to revolutionize education. More parental involvement is not by itself going to do it. But if you take each of these, if you allow for more local control, if you put in some accountability measures so that parents get a better indication as to exactly how a school is performing and how their school is performing versus their neighboring schools, that you put more money into the bureaucratic model and that you put money into the tax credit model which builds the relationship between a community and their schools, all of these things together should move us forward more rapidly than what we have.

The disappointing thing, and I do not have the statistics, but is it not like during the last 20 years, we have really not improved at all in our test scores and maybe in a number of areas we have actually decreased? We have got all this technology, we have got all of these new capabilities and understanding how kids learn, and the end result is that after learning everything about how kids learn, you would think we would have developed methods that you would have seen our test scores skyrocket.

□ 1830

But they have basically stagnated or, in some cases, they have decreased, and that is unacceptable. There is no reason why they should be stagnating or decreasing. So there is not a single silver bullet that will fix this. But what it is, it is taking a mixture of these things; and in Colorado, a certain mixture may work, or maybe in Denver a certain mixture will work, and in other parts of Colorado, something else will work, depending on exactly what is in the community, the state of the schools and those types of things; and that is what we are trying to do, is to allow people at the local level to tailor their educational system to meet the needs of their students. It is not like this is a free-for-all. They are going to have the State regulations and the new Federal mandates and those types of things, but it is going to give them more opportunity to reach for and achieve high standards.

Mr. SCHAFFER. Absolutely. This element of choice is really key to the whole proposal. The reality that our standing, when compared to our international peers, is being diminished over time in math and science in particular, is a real problem. Not all schools in America are culpable in that regard. Some schools do, in fact, a very, very good job. It is a big country. We have lots of schools, lots of approaches, lots of managers. Most of them are competent and, in some cases, we find that they are not. They tend to be isolated in urban inner city areas, these schools that are failing to give children a decent education. In those cases, Americans really, the rest of us in America need to be quite concerned. We need to find ways to reach out to these kids.

In every single State in the Union, these scholarship organizations have popped up that provide, that collect private money by way of donations to try to provide scholarships to some of these kids trapped in the worst schools. In fact, I have a map that was produced by just one of the organizations. It is called the Children's Scholarship Fund, and the Children's Scholarship Fund, again, it is just one organization that provides scholarships. They raise private money to provide scholarships. This blue area, everywhere we see blue on here tells us where they have received applications for scholarships. It is basically all across the country. These red areas is where we have high concentrations of applicants who have applied to try to get some of these scholarships. As my colleagues can see, the greatest amount of interest is in inner city areas, in Atlanta, in New York, in Washington, in Detroit, in Chicago, in Los Angeles, and so on. This is where we see the greatest level of interest is from inner city areas where children and their parents are applying for these scholarships so that they can afford to go to schools of their choice like other Americans can do.

Mr. HOEKSTRA. Mr. Speaker, I think we have to be a little careful about calling them failing schools. I think what we have identified is that in those areas and other areas there are kids, for whatever reasons, that are falling through the cracks. It could be a problem with the schools, or it could be other issues that are affecting it; but in each of those areas, there are people that are saying, man, what I need and what I need for my kids just is not matching what I am getting.

Mr. SCHAFFER. Exactly.

Mr. HOEKSTRA. What we are finding then in each of these areas is we are finding people who are going out and embracing these kids and trying to give them an answer to make sure that they will enter adulthood well prepared for high-quality, high-paying jobs.

The other thing that we will find is that in Detroit and these types of places, if they have identified that the schools are part of the problem, many of these people are also passionate about improving their local public schools.

Mr. SCHAFFER. Right.

Mr. HOEKSTRA. They are not giving up on their local public schools. They are passionately involved in fixing their local public schools. They are passionate about helping the kids out that are falling through the cracks right now. So there are a number of different ways that they are approaching it, but in no way has this become public versus charter versus other forms of education, versus home schoolers. This is really a national movement of people saying, I want to improve education and I want to make sure that we do not leave a single child behind, and there is a whole range of strategies that we need to embrace and take a look at for making sure that that is what happens.

Mr. SCHAFFER. Mr. Speaker, this chart on my right is an illustration of just one scholarship fund that exists in America, the Children's Scholarship Fund. This is where the interest is and where people have applied.

What we want to do is take a look at how widespread this interest is and actually enhance it and improve it. Because the reality is, the scholarship fund does not have enough money to give to all of the children who wanted the kind of choice that that scholarship allows. This is a chart that shows the distribution of where those scholarships went; and as my colleague can see, although it is impressive, it is in far fewer areas than the interest indicates. And by providing a tax credit, we cannot only help this particular fund, this is just one of them; we will help them get more money, certainly, so that they can make more loans; but just imagine that there are these kinds of organizations that exist in every single State.

Mr. HOEKSTRA. Remember, Mr. Speaker, this is for a very narrow purpose. This is for scholarship funds to assist kids to go to a private school, a private or parochial school. Just imagine what happens now when we expand this to a tax credit and they get a tax benefit. These are all people who are willing to pay more money into education than what they do today; and if we expand it, think of all of the people that would be willing to pay into their local public schools, to their private, to the scholarship funds, for tutoring, and those are all people who are willingly today paying more to improve education.

That chart would be fully red if we would allow tax credits to go to public education, because there are strong constituencies and supporters of public education around the country that, with a tax credit, would be really motivated to say, I am going to help my local school, and this is going to be the thing that is going to push me over.

Mr. SCHAFFER. Mr. Speaker, that is our goal, to change the Tax Code in a way that makes it easier for Americans to contribute to these kinds of organizations so that they can help more children, not just these kinds of organizations, but also contribute directly to schools. As shown on this map, this is an impressive distribution of private funds to America's children, but it is possible that this entire map can be colored solidly red with every child in America having access to additional funds generated through an education tax credit, and it will benefit all children.

Mr. HOEKSTRA. Mr. Speaker, this is what we are talking about, bringing a massive infusion of new money into education. This is nontax credit money going into education for a very specific purpose. If we do a tax credit, we will see an entire map being red and dollars going to help all of our kids at the local level to make sure that we do not leave a single child behind.

Mr. SCHAFFER. Mr. Speaker, it is an exciting proposal and it is one that is just a few weeks away from being introduced. We expect it on the floor sometime in June. We are very appreciative of the President's commitment, personal commitment and obligation to help us see this legislation passed; and we will talk about it more over the coming weeks.

Mr. Speaker, I appreciate the opportunity to be here this evening, and I thank the gentleman from Michigan (Mr. HOEKSTRA) for joining me.

COMMUNICATION FROM THE HONORABLE PORTER J. GOSS, MEMBER OF CONGRESS

The SPEAKER pro tempore (Mr. GRUCCI) laid before the House the following communication from the Honorable PORTER J. GOSS, Member of Congress:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, DC, May 6, 2002.

Hon. DENNIS J. HASTERT,
Speaker, U.S. House of Representatives, Washington, DC.

DEAR MR. SPEAKER: This is to formally notify you, pursuant to Rule VIII of the Rules of the House of Representatives, that I have been served with a civil subpoena for documents and testimony issued by the United States District Court for the District of Columbia.

After consulting with the Office of General Counsel, I will make the determinations required by Rule VIII.

Sincerely,

PORTER J. GOSS,
Member of Congress.

COMMUNICATION FROM THE HONORABLE DAVID L. HOBSON, MEMBER OF CONGRESS

The SPEAKER pro tempore laid before the House the following communication from the Honorable DAVID L. HOBSON, Member of Congress:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, DC, May 6, 2002.

Hon. DENNIS J. HASTERT,
Speaker, U.S. House of Representatives, Washington, DC.

DEAR MR. SPEAKER: This is to formally notify you, pursuant to Rule VIII of the Rules of the House of Representatives, that I have been served with a civil subpoena for documents and testimony issued by the United States District Court for the District of Columbia.

After consulting with the Office of General Counsel, I will make the determinations required by Rule VIII.

Sincerely,

DAVID L. HOBSON,
Member of Congress.

COMMUNICATION FROM THE HONORABLE NANCY L. JOHNSON, MEMBER OF CONGRESS

The SPEAKER pro tempore laid before the House the following communication from the Honorable NANCY L. JOHNSON, Member of Congress:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, DC, May 6, 2002.

Hon. DENNIS J. HASTERT,
Speaker, U.S. House of Representatives, Washington, DC.

DEAR MR. SPEAKER: This is to formally notify you, pursuant to Rule VIII of the Rules of the House of Representatives, that I have been served with a civil subpoena for documents and testimony issued by the United States District Court for the District of Columbia.

After consulting with the Office of General Counsel, I will make the determinations required by Rule VIII.

Sincerely,

NANCY L. JOHNSON,
Member of Congress.

MEDICARE PRESCRIPTION DRUG BENEFIT

The SPEAKER pro tempore. Under the Speaker's announced policy of January 3, 2001, the gentleman from New Jersey (Mr. PALLONE) is recognized for 60 minutes as the designee of the minority leader.

Mr. PALLONE. Mr. Speaker, this evening I plan to spend most of the time discussing the need for a Medicare prescription drug benefit. I come to the well, to the floor this evening primarily because of my concern that the House Republican leadership is talking about, certainly presenting itself to the media, that they intend to bring up a prescription drug proposal at some point over the next couple of weeks. I am very concerned that their proposal is really nothing more than a sham and not something that is actually going to benefit any significant portion of the senior population.

I thought what I would do this evening is that I would start out by sort of outlining what I believe, and what Democrats as a whole in the House of Representatives feel we should be doing about prescription drugs.

First of all, I should say that the Democrats feel very strongly that the biggest problem with prescription drugs is the cost. The fact of the matter is that whether one is a senior, whether one is over 65 or whether one is under 65, it is getting to be more and more difficult to pay for one's medicine, because of the fact that the prices keep going up every year. Double-digit inflation, essentially, we have had with regard to prescription drug prices for the last 6 years. Every year, the cost goes up by a double digit percentage point. Democrats are determined to address the cost issue and to say that whatever benefit package we arrive at has to address the issue of cost and try to bring prices down.

The other major issue for Democrats is that this plan, this prescription drug plan or legislative proposal has to be a Medicare proposal. In other words, right now we have a great program called Medicare that all seniors over 65 know that they are guaranteed certain benefits, whether it is a hospital stay or, if they are participating in part B of Medicare on a voluntary basis, their doctor bills are paid, and there is no question about what is covered essentially and is not covered, because there is a guaranteed benefit package for every senior, for everyone who is over 65 who is eligible for Medicare.

We insist that that be the case for the prescription drug proposal as well. This has to be a benefit that is added to the Medicare program and that every senior, just like with part B when seniors pay so much a month at a very minimum premium to cover their doctor bills, that they would pay so much per month at a very low premium to cover prescription drugs, and they would know that they would be able to guarantee that prescription drugs were paid for pursuant to Medicare as part of their program.

The other thing that we insist on is that this program be generous enough, in other words, that the Federal Government be paying enough of the cost of their prescription drugs so that it makes sense for one to voluntarily pay the monthly premium, like they do in part B for doctor bills. In other words, the benefit has to be significant. We have talked about as much as 80 percent of the cost. If we analogize what we have now for part B for doctor bills, what the Democrats are essentially saying is that we want a prescription drug benefit that is very similar to the Medicare structure for doctor bills, in other words, that there be a fairly low premium per month, that the deductible be as low as possible, something like what we have for part B to pay for doctor bills; that the amount that the Federal Government pays is significant, probably something like 80 percent with regard to part B to cover doctor bills; we pay a premium and when the bill comes in, the Federal Government pays 80 percent of the cost.

Well, that is the kind of generous benefit that we want to provide for prescription drugs, and that there be some point, we call it a catastrophic level, at which point if one paid so much out-of-pocket over the course of the year, that the Federal Government would cover the entire cost.

Now, let me contrast what I just said and what the Democrats would like to see with what we are hearing from the Republican leadership in the House. I want to stress that what we are hearing is not very good on any of these points. About a week ago, the House Republicans rolled out some general principles about what their prescription drug program might be when they finally introduce it; and they said, they are trying to give the impression that it is going to be a Medicare benefit. They are trying to give the impression that it is going to lower costs. They are trying to give the impression that we are going to have the choice of basically all drugs that would be covered and that one can go to any pharmacy and it is just going to operate in a way that provides all kinds of choice. But the reality is very different.

Let me talk about some of those principles.

☐ 1845

First of all, they talk about lowering cost, but they do not have any mechanism in their proposal that addresses cost. In other words, they are not saying that the Secretary, for example, is supposed to negotiate prices, or the Secretary of Health and Human Services is supposed to negotiate prices. They are simply talking about a discount drug card.

President Bush about a year ago said that he wanted the Federal Government and the Medicare program to promote the discount drug cards that some of the drug companies are now making available to seniors. Well, that is very nice. It is very nice that some of the drug companies are providing a discount drug card. I question how much savings there really are in those cards, but the reality is that that is not a Medicare program, that is not a Federal government drug benefit, to talk about someone going out and purchasing a discount card from the drug companies, when that is already available.

The Republicans cannot kid everyone and suggest to the American people that somehow that is going to address the cost issue. This is already available. They need to address the cost issue in the context of their legislation.

The other thing they are saying is that they are talking about this as if somehow it is going to cover everyone under Medicare, but if we look at what the Republican leadership in the House is proposing, it is not a Medicare benefit at all. In fact, what it is is giving money sort of like a voucher system to insurance companies, hoping that they will sell drug-only policies to a select group of senior citizens, probably only very low-income seniors, maybe less than 10 percent of the senior population.

So the Republican leadership in the House is not talking about what I mentioned before, an addition to the Medicare program that everyone is guaranteed that if they sign up and pay their premium they are going to get a guaranteed prescription drug benefit.

They are talking about something like a voucher, essentially a private program where some money would go to insurance companies and people would go around and try to find an insurance company that would cover the prescription drugs, or perhaps an HMO. Because it is clear they are continuing to push HMOs and trying to get seniors to sign up for an HMO, and they hope that the HMO, with a little more money from the Federal Government, is going to provide prescription drugs.

That is not what Medicare is all about. Medicare is a guaranteed benefit. Medicare says that everyone is covered. What the Republican leadership in the House is suggesting is that this is only going to be available to very low-income seniors, those seniors who are not eligible for Medicaid but are maybe just above the Medicaid guidelines, maybe 6, 7, 8, 10 percent of the senior population that is not eligible for Medicaid and does not have any kind of drug coverage.

So I just want to debunk this myth, if you will, about what the Republicans are really about. They are saying that their program is going to strengthen Medicare, but it is not going to strengthen Medicare if now essentially what we are talking about is privatizing Medicare. It is not going to strengthen Medicare if only less than 10 percent of the senior population are going to be able to take advantage of this program.

I want to stop my comments now because I see some of my colleagues have joined me on the Democratic side. I would like to have them address this issue, and we will hopefully have a little debate back and forth, as well.

Mr. Speaker, I yield to the gentlewoman from the Virgin Islands (Mrs. CHRISTENSEN), who is part of our Health Care Task Force and is a physician, and is probably more qualified as a physician to talk about this issue than anyone else.

Mrs. CHRISTENSEN. Mr. Speaker, I thank the gentleman for yielding to me. I think our seniors are probably the most qualified to speak, and they have been speaking very loudly about this issue.

I want to thank the gentleman for tonight and all of the time laying out the issue so clearly, showing the difference between what the Democrats are offering and what the Republican plan does not offer. The vouchers that Republicans are proposing for education will not help our children any more than vouchers for prescription benefits will help our seniors.

I wanted to join the gentleman here tonight because I cannot understand, and I am sure that people out across America just have difficulty understanding, why we still have not passed the Medicare prescription drug benefit. I think maybe it could be just that I have not been a legislator long enough, I have just been one for 5½ years, having practiced up until my primary in 1996, and on a limited basis for maybe a year after that, and I am assuming it is because of that background why I do not understand why it is taking us so long, why it is taking this body so long to respond to people who need help to buy the medication that they need, and who have been asking for this benefit for such a long time now.

Let me tell the Members about how we are trained as physicians. As physicians, we are trained in medical diagnoses. We are told to listen to our patients, to examine them, and then use our medical knowledge to make a diagnosis, and then to again call on that training to prescribe the most specific and targeted treatment to the problem.

That is the model I used for 21 years or more, really. I suspect that is why I just do not understand why we are having this problem here on Capitol Hill, because Congress would do well, I think, to apply some of those very same principles to every problem that we face in terms of legislating.

First, we should listen to our elderly constituents, as on every other issue. What we would hear is that they cannot afford to buy a full month's supply of medication that they need to control their blood pressure, their diabetes, any of the other diseases that need to be treated, or to ease pain, that would then allow them to live full lives and to attend to even some of the most basic activities of daily living. Without those medications, they might not be able to do that. That is listening to the patient.

Then we would examine. When we examine the issue, we would find that most Medicare patients are on fixed incomes, and therefore, they have to make untenable choices between food and other necessities and medication.

Just to use one example, a widow living on $12,525 a year, and that is above the poverty level, I think it is about 150 percent of poverty level, a widow at that income level who has acid reflux, which causes acid and burning in the esophagus, discomfort, to treat that she would have to spend about $1,455 a year. That is 12 percent of that widow's income on just one medication alone to treat one illness.

In making a diagnosis, then, we would conclude that the patient obviously needs help to pay for medications so she can stay healthy, free of symptoms, and to prevent complications.

Then, finally, in seeking a remedy, we would choose one easily accessible and widely available. We would also weigh the pros and cons of that remedy, as in the case of medicine we weigh the benefit and need and side effects. To me, that would lead us to concluding that the best way to address the issue of helping our seniors pay for their medication is through a Medicare drug benefit that is available to every beneficiary. It cannot be through an insurance company.

I know that is what the Republicans want to do is to have the vouchers, as the gentleman says, go to the HMO to provide the benefit. They do not want to provide a stand-alone benefit for prescriptions. It goes completely against their business model, and it would result in lower profits. They just will not do it. It would be like sending my patient to a drugstore that I know does not carry the medication. They just would not get it there, like America's seniors will not get the benefit from the Republican prescription drug plan.

Now I know that there is a big battle also over the cost of the benefit provided by Medicare, but I think it is important for all of us to recognize that it is too costly for us not to do this, and in the not too far distant future. The cost of not providing this benefit, helping our seniors to be able to treat these very important illnesses that can cause damage to them in the future is just something that we just cannot afford to do.

When seniors, or any patient for that matter, cannot get the medications they need for some of the common diseases, they suffer amputations, they suffer heart disease, heart attacks, they suffer strokes, kidney failure, and become disabled. That costs far more than providing a Medicare drug benefit.

We need to do prevention. We need to put the investment up front to save money in the long run, but more importantly, I think we owe our seniors as they approach this time in their lives the ability to have a healthy, secure quality of life. We need to make sure that they are cared for. They have worked hard all of their lives and they have paid into a system that was to make health achievable, sustainable, and affordable.

We cannot forget about the disabled, who also need to benefit from this, because they also have multiple issues and needs for multiple medications that they would not be able to afford.

The system of Medicare began in a time when we did not have the medication we have now, and people did not live as long or as well. We know that we have to modernize all other systems. As times change, needs change. The ways we meet those needs are going to change. So why, then, are we balking at modernizing a Medicare system which is so vital to the well-being of our parents, our grandparents, and not too long from now for many of us. At least I can speak for myself.

So I wanted to say, Mr. Speaker, to our colleagues, that we need to pass a prescription drug benefit that is available to every Medicare beneficiary. That is the very least that we can do. It is certainly more important than providing tax cuts, and for this body to pit the chance for a better quality of life in what should be the golden years in the lives of elderly Americans against tax breaks that really help no one should not even be an issue.

So I would urge us all not to do the political thing but to do the right thing, and to give our senior citizens a full prescription benefit, the kind that they need and they deserve.

Mr. PALLONE. Mr. Speaker, I thank the gentlewoman. I just have to remark, when she talked about how Members of Congress might have to worry about prescription drugs or the Medicare program and she said it was only herself, she did not look around at the rest of her colleagues, but we also need to be concerned about it, because it will impact us as well.

I just wanted to mention one thing before I yield to the gentlewoman from Florida. I appreciate the fact that the gentlewoman from the Virgin Islands brought up the preventative aspect, because many times we forget that prescription drugs or medication is really a preventative measure and that there are huge cost savings, as with any preventative type of program.

I think in general when we look at Medicare as a whole, we have paid too little attention to prevention, and whether it is home health care as opposed to having to be in a nursing home, or prescription drugs.

Mrs. CHRISTENSEN. Just take hypertension and diabetes. This is something that affects all Americans, but it affects African Americans more so because we have more difficulty accessing care and medication.

If we just take hypertension or diabetes, either one, and the complication of end-stage renal disease, and having to then go on dialysis or having a kidney transplant, the cost of providing that benefit and controlling the blood pressure or controlling the diabetes, and at the very least, forestalling that complication, but probably avoiding that complication altogether is really important, we just cannot compare not only the cost of the two, but we cannot compare the quality of life of the two.

Mr. PALLONE. And the bottom line is, I guess being a little crass talking about the money aspect, is that the Federal Government is paying. With the way the system is set up, the Federal Government is paying for hospital care and paying for a lot of the things.

Mrs. CHRISTENSEN. They have to pay for dialysis three times a week.

Mr. PALLONE. And instead, overall, the cost of paying for the prescription drugs is actually going to save the Federal Government a lot of money. Our problem is that when we make that case, we are not necessarily able to give an exact dollar figure. That makes it more difficult to make the case.

But there is no question in my mind that there are tremendous cost savings to the Federal Government if we include a prescription drug benefit.

Mrs. CHRISTENSEN. I think it is common sense. I do not think we really have to provide specific numbers. I guess someone could probably do that for us, but it is just common sense, with years of dialysis and many hospitalizations in between, because dialysis is not easy to go through, versus providing medication that can control the problem.

Those of us who practice know how hard it is to make sure your patient has a month's supply of all of the medication they need. We try to piece samples together and do all kinds of creative things, even with medicines that are not extremely expensive, but it is just not possible to do that in the long run.

Mr. PALLONE. It is just so important in the course of the debate on this, if we get to it in the next week or two, that we stress that, that the preventative aspect of prescription drugs means cost savings. There will be some people who will say that the guaranteed benefit under Medicare that covers all seniors is going to be too expensive, and we need to come back and say you are going to save money.

Mrs. CHRISTENSEN. The HMOs are not going to provide that type of benefit. They have pretty much said that. So as the gentleman has pointed out and others have pointed out, to provide it as sort of a program that has to be accessible, like access to HMOs, one has to shop around and get it. Many seniors cannot even do that. Some can, thank God, but not everyone can. But to have to go and search, and then an HMO does not offer it, or does not provide that many benefits. So the only way to do it is the way the Democrats want to do it, and that is through a full Medicare benefit. It is voluntary, but it is universal. It is available to everyone on Medicare.

□ 1900

Mr. PALLONE. Mr. Speaker, I yield to the gentlewoman from Florida (Mrs. THURMAN) who is, of course, on the Committee on Ways and Means and has been a leading spokesman on the needs for prescription drugs benefit.

Mrs. THURMAN. Mr. Speaker, I thank the gentleman from New Jersey (Mr. PALLONE) for taking the time to organize this and bringing us together. His commitment to this is very important. I just want to give you some of those numbers that we were just talking about, particularly with end stage renal disease, because I know those numbers, and I can tell you that for somebody to be on dialysis, it is about $45,000 a year that Medicare generally pays for. And then at some point, hopefully, there would be the possibility of having a transplant.

First of all, being on a list probably is anywhere between 3 to 5 years, so we have now spent several hundreds of thousands of dollars doing the dialysis part of it. Probably another $100,000 to $150,000 for the transplant. And then after that, because we passed something in the Congress a couple of years ago that actually extended some drug benefits for immuno-suppressant drugs, which is something you have to have once you have had a transplant or your body will reject it. So the fact of the matter is, and that is about $1,500 a month, so you start off with the $45,000 in dialysis, you potentially go to $100,000 to $150,000 a year and probably 3, 4, 5 years, and then once you are through that, you are probably about $1,500 a month for maintenance of the organ so that your body does not reject it, and that is only $11,000.

So once again we continue to go back to the idea of, first of all, if they had the medicine available to them for the blood pressure, that would probably help them or at least extend the lifetime of their kidneys. You would not be looking at the long time for dialysis. But once you have to go through that, even on the other side of it, it is still better in the final analysis to look at the $1,500 that you would be using for immuno-suppressant drugs.

I guess, the gentleman from New Jersey (Mr. PALLONE), one of the things that has me concerned is that we understand that there potentially will be a bill brought to the floor of the House, which is a good thing, that might give us the opportunity to debate the issue on prescription drugs. I have some concerns because we are hearing rumors up here that the legislation may never even come through committee, that it is going to be a major Medicare reform bill with a prescription drug benefit that will have had no ability to look at the consequence with the committee process which, when we are talking about this as to which is better, what could be better offering amendments, giving that opportunity, making sure that it either goes through the Committee on Ways and Means and/or through the Committee on Commerce is a very important part of this process. Because the other part that will happen is that what we have seen in the past with the Medicare bills, we have not even had an opportunity to offer amendments. And if I remember correctly, and the gentleman may help me, I do not even know that we were offered a substitute.

Mr. PALLONE. Reclaiming my time to respond, I think the gentlewoman makes a very good point. I started out this evening by saying that the Republicans are talking about bringing a bill which they have not really outlined.

They have just given vague ideas of what it might be.

Mrs. THURMAN. They have a bill.

Mr. PALLONE. But they are not sure they want to move it or what to do with it.

Mrs. THURMAN. Right.

Mr. PALLONE. What I think is happening and what we were hearing last week, they had a press conference last week and they outlined these broad principles which I pointed out earlier are all essentially a sham. They talked about that this will be a Medicare benefit, but it is not guaranteed to all Medicare beneficiaries, so how is it a Medicare benefit? But what we are hearing is they were supposed to bring it directly to markup in the two committees, the Committee on Energy and Commerce and the Committee on Ways and Means next week, and then to the floor before the Memorial Day recess.

And what you are pointing out, and this is absolutely right, this is probably the most important piece of legislation to deal with in this Congress. The normal process is to have one day of hearings, usually like months of hearing, and then have a markup and allow amendments and then go to the floor. I think what you are saying is they may not do any of that, they may bring it directly to the floor.

I think just a couple of days ago, I think Monday in the Congress Daily, they pointed out that the headline said "GOP Drug Plan Faces Intra-Party Critics." The problem is that a lot of Republicans who are more reasonable and are really concerned about what this is going to mean have been suggesting to them that, A, that this prescription drug plan is not going to help that many seniors or that, B, the Medicare reform is really cutting back on payments for hospitals or others that have a great need.

Mrs. THURMAN. Nurses.

Mr. PALLONE. The gentlewoman is right. They may not be able to muster the votes in committee and they may just take it directly to the floor, which is a huge travesty because there will be no debate other than on the floor, which is not the way it is supposed to be.

Mrs. THURMAN. And that is a concern because there needs to be a debate. We need to understand the cost. We need to understand the consequence of whatever we bring to the floor. We need to understand if there is a market product out there for us. I mean, one of the problems that we have heard over and over again is if you turn this over to private insurance that there may not even be a tier. It may be, oh, well, here we go. We have got a prescription drug plan, but it is probably not going to start until a little bit later. And by the time people figure it out, the fact of the matter is there may not be an insurance company that is willing to provide that service without having other areas.

They talk about the Federal health plan. Well, the difference is that is a whole package. We get young, we get middle, and we get older. We get new Federal employees. We get retired Federal employees. And the idea is that you spread it. You have a spread over this and that is not what is going to happen in a Medicare or what may be considered in a private insurance. You are going to have one group of folks who are, by the way, in most cases, the seniors with the least ability to pay, which is a fine goal, but they are also sometimes the sickest because they have not had the advantages, as the doctor was pointing out, of being able to have taken care of health care. So their medicines, probably because they have more complicated cases, are going to be more expensive. And so when you start trying to use a voucher in a system where you have very sick and not a cross risk, it is going to be very expensive for an insurance company or anybody to go in and try to negotiate for this particular group of seniors.

Mr. PALLONE. Reclaiming my time, I think the gentlewoman is absolutely right. If you remember, two years ago, again, close to the election when the Republican leadership tried to bring up a bill, and that is what it basically was, that we are going to give money to insurance companies and hope that they will cover prescription drugs and you can shop around and see if they will cover you. That only passed the House and it died. But it was based at the time on a model that was used in the State of Nevada, and Nevada, which had a Republican legislature and I think a Republican governor, decided to go this route. And for 6 months after the governor signed it, they could not find any insurance company that would cover anybody. So 6 months from the day it was in effect, there was nothing out there for people to buy. And then they think what they did is they tried to get one company to cover it and even then they could not get anybody. So the whole thing is a huge mess and not working.

Mrs. THURMAN. And we could say the gentlewoman from Nevada (Ms. BERKLEY) has given us a wonderful opportunity to understand what happened in Nevada. And it would seem to me that it would be something this Congress ought to be looking at where the pitfalls were what happened. I mean, correcting and not trying to pass a model that has already failed in one State.

Mr. PALLONE. Mr. Speaker, I think they have made certain changes, and I do not know what the status is now. But the one thing I was going to say is that part of this is just sort of an ideological problem that the Republican leadership has. In other words, they did not like Medicare. Most of the Republicans voted against Medicare in the 1960s or whenever it started. And it was for ideological reasons because it was a government-run program. And I think that is what you are getting.

The Republican leadership just cannot accept the fact that Medicare works and we should add this benefit. They think it is too much government interference, so they are trying to send it out to the private sector from an ideological perspective.

The gentlewoman was pointing out, and everybody is pointing out, let us look at this practically. Let us not say this is left wing or right wing or whatever it is. Medicare works. This is not going to work, what they are proposing.

Mr. Speaker, I yield to the gentlewoman.

Mrs. THURMAN. And I think there were some issues out here also that are very alarming and very concerning and certainly ones that, I think, based on the constituency in the Fifth District in talking with them, that they were seeing high increases in their prescription drugs today. I mean, we know for a fact that they grew almost by 17 percent this year. We are not seeing anything in this piece of legislation that speaks to the high cost of prescription drugs. And so they understand that because they have constantly, and it is not just in the Fifth District of Florida. I mean, they get this. They understand that they are paying way more than other countries, Canada, the borders of Canada, we know what is happening over there. We know the busloads of people that are going to Canada to pick up their prescription drugs. We know they are out on the Internet to the Canadian Drug Store I think is the name of the sites. Mexico, people are sending overseas for these medicines, not because they do not want to be able to purchase them here, but when they are taking two or three medicines and they are costing $300 to $400 with one supply being $150 and another being $200 and another maybe $50, they cannot afford it. And they understand that they feel better on an everyday basis when they have that medicine being taken as the doctor has prescribed it, and they understand that they are not having complications with their health when they are able to take this. But at some point they just say I cannot do this. I cannot afford to continue to do this.

The gentleman and I have talked about this a thousand times, the amount of people that come into our offices, and they talk about cutting their pills in half, they talk about taking them one every three days or one every two days as versus every day, or they may take one a day instead of three a day just for that. But then you also hear, because it is sometimes just not one person in that family that is on medications, it is two.

I actually get stories, I had a daughter write to me about her parents, telling me how important having a Medicare prescription drug benefit was. She was watching her mother not get her medicines to make sure that her husband, the daughter's father, who had more complications, had his medicines so she could keep him alive. I mean, that was the sacrifice that she was making in her mind that was important. To the daughter it was a travesty. She was watching her parents literally have to choose, one being just able to sustain their lives because of medicines because they could not afford it all, or to choose that one could not have that same advantage. And I am not seeing anything in any of these pieces of legislation. In fact, quite the contrary in some ways. We are not seeing the ability for any concerns about the rising cost.

Now, in saying that, let me also suggest for a moment that this is not just Medicare at this point. The rising cost issue is a family issue. It is a business issue. We have corporate citizens in this country that are trying their level best to provide health care benefits to their employees. They want to do it. They think it is the right thing.

□ 1915

Two things are happening. GM came in the other day to testify before the committee. They said that their Medicare or their prescription drug bill went up $508 million last year. How do they continue to offer good benefits with a prescription drug without cutting other benefits in their plan so that they can continue to offer a prescription drug?

Well, one of the pharmaceutical companies was there and said, well, there are ways to do that. They can negotiate, they can look at utilization, they can provide copayments, they can do different things. And when we asked GM what they were doing, they said, We are already doing those things. We are doing the things that we feel are what they have told us would be good business practices.

Well, there really was not an answer to the question then to the company when we said, so, if they are doing all of these things, then what is the answer? They had no answer, and so there are issues out there.

AARP just did an article a couple of months ago talking about the costs, what was included in this cost. It was the advertising, and I would maybe not even call it advertising, but a marketing tool, that they called research. It is called research but it is research marketing, marketing research. So they know what they can sell to, what they can do; and so they use that as kind of their shield.

What were the numbers we heard? I do not know if my colleague heard, it is about, what, Pepsi-Cola versus, I guess I do not know if I can talk about brand names, but the idea is that there are companies that are spending 10, $20 million less in a year than one company maybe on a couple of different medicines.

Mr. PALLONE. Mr. Speaker, reclaiming my time, this came up in the other body, I cannot mention the name of the other body, other side of the Capitol and the point was, as my colleague knows, is the drug companies, the brand-name drug companies always say that they need to charge more because of research and development, when in reality what we know is a lot of the extra cost is just for advertising so that they can advertise the name-brand drug rather than the generic drug; and one of the ways that they could reduce costs is if they tried to encourage more use of generics, obviously; or I think in the Senate there was a proposal, which I think is a great idea, to say that that someone cannot take a tax deduction for advertising. In other words, someone can take a tax deduction for money they expend on research and development, but not for advertising.

We, essentially, through the Tax Code, I am talking to a Ways and Means member now so I want to be careful here, but essentially encourage through the Tax Code that they advertise as much as they like because they get some sort of credit or deduction for it. I do not know exactly how it works.

I wanted to say, if I could, to comment on what the gentlewoman talked about when she talked about the costs and the pricing because I started out tonight saying that the biggest sort of sham out here is that when the President about a year ago talked about promoting the discount card, which a lot of the drug companies are now offering, he talked about that as sort of an interim measure. In other words, we have not got a prescription drug program now, so until we do, until Congress passes it, let us promote this discount card because at least there will be some savings, which I questioned, but in case it is not the government helping in any way, this is what the drug companies are doing.

Now, when the Republicans unveiled their sort of principles last week, the card became their cost-containment mechanism, which is ridiculous because the government is not doing anything; and then as my colleague says, the Republicans act as if there is no way they can influence the price. That is nonsense.

If we set up the guaranteed benefit under Medicare, we now have 40 million seniors, and the Secretary of Health and Human Services has an incredible bargaining, negotiating ability because he represents those 40 million seniors, and he can certainly take actions that would result in lower prices.

Mrs. THURMAN. That is exactly right, and this is not a model that quite frankly is obscure in this government. It is going on.

We are seeing it within the VA system. The VA system, in fact, does just that. They negotiate for military retirees and veterans for the purposes of buying medicines. We do it. We already do it, and it works; and because of it, we have been able to really expand. And for military retirees, they now have a prescription drug benefit that costs them $3 for a generic, $9 for a brand name a month or they can do a mail order, which would be for a 3-month period, $3 for generic and $9 for brand name over a 3-month period.

So there are very good things going on and standards that have already been set by the Federal Government for some parts. Then if we thought about it, if then we are negotiating for, I think it is, something like 22, 25 million veterans, plus 40 million Medicare, we now have a very good possibility of looking at some things that could happen or we can do, I think, what the gentleman from Maine (Mr. ALLEN) has talked about, certainly looking at what the costs are in other countries, and at least making it so those costs were no different here than they were there, whether it be Canada, Mexico, UK, whatever, having that a possibility out there.

There are just things, but it kind of goes back to what we talked about. We are not having a debate. I think what is so frustrating about this is everyone in this House, to my knowledge, probably went home and talked about a prescription drug benefit in the last campaign. They said this is something that was needed. So we can have the debate with our constituents at home as to what is good and right and the kinds of ideas.

Our constituents have so much to offer us in this debate. Then why can we not we have a real debate in the Congress?

It may not be that we are so far apart in some of these ideas. The first premise is we agree that there should be a prescription drug benefit. It is how we get into the details of it.

So why can we not sit down and get out ideas of how things should be one way or another? Throw everything on the table, set it down, come in, see what is working, looking at what is happening in other parts of government, where we are successful; where we are successful in the private sector; where we are successful with Federal employees; where are we doing the right things; where are the areas that are not successful. Look at those. What is happening? Go in and talk to some of these corporations that are trying to negotiate and are trying to do the right things to make sure that they have a prescription drug benefit for their employees.

They are experiencing right now what we need to be addressing, and I am just very frustrated that we may not even have the opportunity to have this debate, that it may be we come out here, no work in the committee. We come down to the floor, we have an hour debate on the rule and an hour debate on the bill, maybe 2 hours, that is a Medicare bill, that quite frankly will probably talk about prescription drugs. We will not even get the opportunity to really talk about what potentially happens at nursing homes, what kind of cuts are happening with hospitals, if there is going to be some kind of a copayment for home health care. We are going to hear prescription drugs, and we are not even going to give a full debate and disclosure of what is going to be in other parts of this piece of legislation.

These are critical issues that are devastating and potentially could be devastating to the infrastructure of our seniors in this country. They deserve a strong and lively debate and being able to point out where we think there are pitfalls, where the issues are; and we ought to be able to have that opportunity.

Mr. PALLONE. I agree, and I am very fearful about what the gentlewoman says, which is that essentially with what the Republican leadership is doing here, they just want to bring up a bill so they can say they passed something, send it over to the other body and have it die.

Mrs. THURMAN. Just to say that the Senate has it.

Mr. PALLONE. I think that is what we are headed for. Hopefully, we are wrong and maybe we are too cynical and we can be optimistic. I have the same fear my colleague does.

Mrs. THURMAN. Mr. Speaker, the only thing I would say then is maybe us being here tonight and talking about this issue, maybe it will give some pause; and maybe we will have the opportunity to have that debate.

Mr. PALLONE. I hope so. I am eternally the optimist, as I know my colleague is, too.

Let me yield to the gentleman from Illinois (Mr. PHELPS).

Mr. PHELPS. Mr. Speaker, I first thank both of my colleagues for giving me the opportunity to speak on what I believe is one of the most important issues facing our Nation today. The time has certainly come for us to implement a real prescription drug plan for seniors.

Let me talk a little bit about, on a personal note, a couple I know and their experience. John and Ann Craig are residents of a little town called Muddy, Illinois, just a neighboring town out of my hometown in southern Illinois, Eldorado. The Craigs suffer from a combination of diseases, including diabetes, heart disease, and high blood pressure. His medication runs around $450 each month. They pay a total of $1,300 a month for prescription drugs and receive a mere $700 in Social Security.

The Craigs own a small farm where they have worked hard most of their lives. However, their overwhelming pharmacy bills have effectively ruined any chance of worry-free retirement because most of their savings has already been used on medication. This is just one example of the unnecessary hardships our citizens are facing due to overpriced prescription drugs.

There are many examples of other senior citizens I can give my colleague.

The issue of an affordable prescription drug plan for seniors is not just going to go away, and folks like John and Ann Craig are going to continue to spend their life savings on medication. Our citizens are depending on us to work together to come up with a plan that will bring them prescription drugs at a price they can afford and a price that does not take a large chunk out of their monthly budget that would normally be spent on food and other necessities.

So we need a plan that is fairly easy and will benefit all seniors. Our Nation's seniors have enough to worry about without having to figure out where they fit into a complicated prescription drug plan.

We have a moral and ethical responsibility to look out for our seniors, and we must implement a plan that will benefit each and every senior that is paying ridiculous prices for their necessary medications. It is time that we get together and work on a plan that is reasonable and a bipartisan approach. Stop pointing fingers and let us try to get it down to what is real for Americans like John and Ann Craig.

Mr. PALLONE. Mr. Speaker, I want to thank my colleague from Illinois for joining us. I know we only have a few minutes left.

I just wanted to, in ending this Special Order tonight, if I could just develop a little bit one of the points that he made.

Part of the reason why the Democratic proposal and what the Democrats have been talking about tonight is so much better than what the Republicans have been proposing is because of its simplicity. We know that right now under the existing Medicare program it is very easy for the average senior to sign up, be part of the program and benefit from the program.

All seniors and even the disabled who are under 65 that are eligible for Medicare know that their hospitalization is covered. They know that if they pay a premium, I think it is about $40 a month for part B to cover their doctor bills, that they will have a guaranteed benefit and that the Federal Government will pay 80 percent of the cost of their doctor bills, and that if they are in a traditional fee-for-service plan, rather than an HMO, which most seniors are still in the traditional Medicare fee-for-service program, that they can go to any doctor, they can go to any hospital and Medicare is going to cover it.

What we are saying as Democrats is we want to build on that very successful Medicare model which is very easy for seniors to understand and take advantage of and say if someone pays a premium of say 25, $30 a month for their prescription drugs, then they will be guaranteed a generous portion of that; say, maybe 80 percent or so is going to be covered by the Federal Government.

□ 1930

And that after your first $100 deductible you can be guaranteed that your prescription drugs are going to be paid for in that way. Very simple model. It is the existing Medicare program; builds on it. Forget the ideology, just do it. That is what the Democrats are saying. Do it for every senior; everyone who is eligible for Medicare.

Now, my colleague from Illinois said, well, the seniors are concerned about not wanting to have to do some complicated plan. Well, that is what the Republicans are saying. They are saying forget the Medicare model, we are going to throw some money somehow to some insurance companies and we are hoping that the insurance companies will provide some sort of benefit, but we are not guaranteeing they are going to cover all drugs or any particular kinds of drugs. We are not guaranteeing there will be any kind of particular premium structure or what the level of the Federal Government's contribution is going to be.

And the seniors are supposed to shop around. These seniors, who are now 70, 80 years old, and they are supposed to shop around to see if there is some kind of insurance program that they can get. Now, I know some seniors are going to be able to do that, but I would say there are a lot that are not going to be able to, and are going to find when they are shopping that they do not find a plan that is even available.

I know my Republican colleagues will say, well, they can always go to an HMO. But remember that HMOs increasingly are not available in a lot of parts of the country, and more and more HMOs are dropping seniors and do not want to offer to senior citizens. So the complication that my colleague from Illinois talks about for seniors, that complication is multiplied so much by what the Republicans seem to be proposing.

And the real answer is to go back to the very simple program, the model that we have now that has worked so successfully for the last 30 years, and that is Medicare. That is all that the Democrats are asking for. And, hopefully, if this does come up in the next week or two, we can make that point about why a guaranteed Medicare plan is so superior to whatever proposal the Republican leadership is bringing up.

I guess I would just conclude by saying as much as I do not like to be cynical, I believe that the Republican proposal really is nothing more than an effort to show that they are doing something and that they fully understand that their proposal is not going to go anywhere and will never be enacted into law. So that is a shame, too, to think they are being very cynical and bringing this up as we get close to the election, rather than trying to put something together on a bipartisan basis that actually can be signed into law.

RECESS

The SPEAKER pro tempore (Mr. GRUCCI). Pursuant to clause 12 of rule I, the Chair declares the House in recess subject to the call of the Chair.

Accordingly (at 7 o'clock and 33 minutes p.m.), the House stood in recess subject to the call of the Chair.

□ 1133

AFTER RECESS

The recess having expired, the House was called to order by the Speaker pro tempore (Mr. HASTINGS of Washington) at 11 o'clock and 33 minutes p.m.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 4546, BOB STUMP NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 2003

Mrs. MYRICK, from the Committee on Rules, submitted a privileged report (Rept. No. 107-450) on the resolution (H. Res. 415) providing for consideration of the bill (H.R. 4546) to authorize appropriations for fiscal year 2003 for military activities of the Department of Defense, and for military construction, to prescribe military personnel strengths for fiscal year 2003, and for other purposes, which was referred to the House Calendar and ordered to be printed.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Ms. CARSON of Indiana (at the request of Mr. GEPHARDT) for today before 1:30 p.m. on account of official business in the district.

Mr. HALL of Ohio (at the request of Mr. GEPHARDT) for today on account of attending ambassador school.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

The following Members (at the request of Mr. MCNULTY) to revise and extend their remarks and include extraneous material:

Ms. NORTON, for 5 minutes, today.

Ms. CARSON of Indiana, for 5 minutes, today.

Mrs. CAPPS, for 5 minutes, today.

Mr. DAVIS of Illinois, for 5 minutes, today.

Mr. HOYER, for 5 minutes, today.

Mrs. CHRISTENSEN, for 5 minutes, today.

Mr. CUMMINGS, for 5 minutes, today.

The following Members (at the request of Mr. SCHAFFER) to revise and extend their remarks and include extraneous material:

Mr. WOLF, for 5 minutes, today.

(The following Members (at their own request) to revise and extend their remarks and include extraneous material:)

Mrs. JONES of Ohio, for 5 minutes, today.

Ms. KAPTUR, for 5 minutes, today.

Mr. STRICKLAND, for 5 minutes, today.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 410. An act to amend the Violence Against Women Act of 2000 by expanding the legal assistance for victims of violence grant program to include legal assistance for victims of dating violence; to the Committee on the Judiciary.

ENROLLED BILLS SIGNED

Mr. Trandahl, Clerk of the House, reported and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 2048. An act to require a report on the operations of the State Justice Institute.

H.R. 2305. An act to authorize certain federal officials with responsibility for the administration of the criminal justice system of the District of Columbia to serve on and participate in the activities of the District of Columbia Criminal Justice Coordinating Council, and for other purposes.

H.R. 3525. An act to enhance the border security of the United States, and for other purposes.

BILLS PRESENTED TO THE PRESIDENT

Jeff Trandahl, Clerk of the House reports that on May 7, 2002 he presented to the President of the United States, for his approval, the following bills.

H.R. 169. To require that Federal agencies be accountable for violations of antidiscrimination and whistleblower protection laws; to require that each Federal agency post quarterly on its public Web site, certain statistical data relating to Federal sector equal employment opportunity complaints filed with such agency; and for other purposes.

H.R. 495. To designate the Federal building located in Charlotte Amalie, St. Thomas, United States Virgin Islands, as the "Ron de Lugo Federal Building".

H.R. 819. To designate the Federal building located at 143 West Liberty Street, Medina, Ohio, as the "Donald J. Pease Federal Building".

H.R. 3093. To designate the Federal building and United States courthouse located at 501 Bell Street in Alton, Illinois, as the "William L. Beatty Federal Building and United States Courthouse".

H.R. 3282. To designate the Federal building and United States courthouse located at 400 North Main Street in Butte, Montana, as the "Mike Mansfield Federal Building and United States Courthouse".

ADJOURNMENT

Mrs. MYRICK. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 11 o'clock and 34 minutes p.m.), under its previous order, the House adjourned until tomorrow, Thursday, May 9, 2002, at 9 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 8 of rule XII, executive communications were taken from the Speaker's table and referred as follows:

6676. A letter from the Director, Defense Procurement, Department of Defense, transmitting the Department's final rule—Defense Federal Acquisition Regulation Supplement; Acquisition of Commercial Items [DFARS Case 95-D712] received April 22, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Armed Services.

6677. A letter from the Counsel for Regulations, Department of Housing and Urban Development, transmitting the Department's final rule—Strengthening the Title I Property Improvement and Manufactured Home Loan Insurance Programs and Title I Lender/Title II Mortgagee Approval Requirements [Docket No. FR-4246-F-02] (RIN: 2502-AG95) received April 22, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Financial Services.

6678. A letter from the Counsel for Regulations, Department of Housing and Urban Development, transmitting the Department's final rule—Real Estate Settlement Procedure Act Statement of Policy 2001-1: Clarification of Statement of Policy 1999-1 Regarding Lender Payments to Mortgage Brokers, and Guidance Concerning Unearned Fees Under Section 8(b) [Docket No. FR-4714-N-01] (RIN: 2502-AH74) received April 22, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Financial Services.

6679. A letter from the Director, Corporate Policy and Research Department, Pension Benefit Guaranty Corporation, transmitting the Corporation's final rule — Benefits Payable in Terminated Single-Employer Plans; Allocation of Assets in Single-Employer Plans; Interest Assumptions for Valuing and Paying Benefits — received April 22, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Education and the Workforce.

6680. A letter from the Director, Regulations Policy and Management Staff, Department of Health and Human Services, transmitting the Department's final rule — Medical Devices; Gastroenterology-Urology Devices; Classification of the Ingestible Telemetic Gastrointestinal Capsule Imaging System [Docket No. 01P-0304] received April

22, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

6681. A letter from the Director, Defense Security Cooperation Agency, transmitting notification concerning the Department of the Air Force's Proposed Letter(s) of Offer and Acceptance (LOA) to Oman for defense articles and services (Transmittal No. 02-16), pursuant to 22 U.S.C. 2776(b); to the Committee on International Relations.

6682. A letter from the Director, International Cooperation, Department of Defense, transmitting a copy of Transmittal No. 17-02 informing of an intention to sign Amendment Number One to the Memorandum of Understanding between the United States, Australia, and the United Kingdom concerning Cooperation in Navigation Warfare Technology Demonstrator and System Prototype Projects, pursuant to 22 U.S.C. 2767(f); to the Committee on International Relations.

6683. A letter from the Director, International Cooperation, Department of Defense, transmitting a copy of Transmittal No. 13-02 informing of an intention to sign an Amendment to the Memorandum of Understanding between the United States, the United Kingdom, Canada and Turkey concerning the Cooperative Framework for the System Development and Demonstration (SDD) Phase of the Joint Strike Fighter (JSF) Program and the Netherlands Supplement between the United States and The Netherlands, pursuant to 22 U.S.C. 2767(f); to the Committee on International Relations.

6684. A letter from the Assistant Secretary for Legislative Affairs, Department of State, transmitting certification of a proposed license for the export of defense articles or defense services sold commercially under a contract to Russia, Ukraine, Norway and the Cayman Islands [Transmittal No. DTC 23-02], pursuant to 22 U.S.C. 2776(c); to the Committee on International Relations.

6685. A letter from the Assistant Secretary for Legislative Affairs, Department of State, transmitting certification of a proposed license for the export of defense articles or defense services sold commercially under a contract to Russia [Transmittal No. DTC 22-02], pursuant to 22 U.S.C. 2776(c); to the Committee on International Relations.

6686. A letter from the Assistant Secretary for Legislative Affairs, Department of State, transmitting certification of a proposed license for the export of defense articles or defense services sold commercially under a contract to Spain [Transmittal No. DTC 014-02], pursuant to 22 U.S.C. 2776(c); to the Committee on International Relations.

6687. A letter from the Comptroller General, General Accounting Office, transmitting the Month in Review: January 2002 Reports, Testimony, Correspondance, and Other Publications; to the Committee on Government Reform.

6688. A letter from the Executive Secretary and Chief of Staff, Agency For International Development, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Government Reform.

6689. A letter from the Director, Office of White House Liaison, Department of Commerce, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Government Reform.

6690. A letter from the Assistant Director, Executive and Political Personnel, Department of Defense, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Government Reform.

6691. A letter from the Chair, Equal Employment Opportunity Commission, transmitting the Fiscal Year 2001 Annual Program Performance Report; to the Committee on Government Reform.

6692. A letter from the Chairman, Federal Communications Commission, transmitting the Commission's FY 2001 Annual Program Performance Report; to the Committee on Government Reform.

6693. A letter from the Comptroller General, General Accounting Office, transmitting the Month in Review: October 2001 Reports, Testimony, Correspondence, and Other Publications; to the Committee on Government Reform.

6694. A letter from the Director, Office of Personnel Management, transmitting the Office's final rule — Prevailing Rate Systems; Definition of San Joaquin County, California, as a Nonappropriated Fund Wage Area (RIN: 3206-AJ35) received April 9, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Government Reform.

6695. A letter from the General Counsel, Peace Corps, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Government Reform.

6696. A letter from the General Counsel, Peace Corps, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Government Reform.

6697. A letter from the Acting Director, Office of Sustainable Fisheries, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Fisheries of the Exclusive Economic Zone Off Alaska; Pollock in Statistical Area 630 of the Gulf of Alaska [Docket No. 011218304-1304-01; I.D. 030102B] received April 22, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Resources.

6698. A letter from the Director, Policy Directives and Instructions Branch, Department of Justice, transmitting the Department's final rule — Requiring Change of Status from B to F-1 or M-1 Nonimmigrant Prior to Pursuing a Course of Study [INS No. 2195-02] (RIN: 1115-AG60) received April 9, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on the Judiciary.

6699. A letter from the Assistant Secretary for Legislative Affairs, Department of State, transmitting the Department's final rule — VISAS: Passports and Visas Not Required for Certain Nonimmigrants--Visa Waiver Program — received April 10, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on the Judiciary.

6700. A letter from the Program Analyst, Department of Transportation, transmitting the Department's final rule — Airworthiness Directives; BAE Systems (Operations) Limited Model BAe 146 Series Airplanes and Model Avro 146-RJ Series Airplanes [Docket No. 2001-NM-186-AD; Amendment 39-12666; AD 2002-04-09] (RIN: 2120-AA64) received April 16, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

6701. A letter from the Acting Deputy General Counsel, Office of Disaster Assistance, Small Business Administration, transmitting the Administration's final rule — Disaster Loan Program (RIN: 3245-AE82) received April 22, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Small Business.

6702. A letter from the Acting Director Office of Regulatory Law, Department of Veterans' Affairs, transmitting the Department's final rule — Policy Regarding Participation in National Practitioner Data Bank (RIN: 2900-AJ76) received April 22, 2002, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Veterans' Affairs.

6703. A letter from the Assistant Attorney General, Department of Justice, transmitting the Department's legislative proposal entitled "The Child Obscenity and Pornography Prevention Act of 2002"; jointly to the Committees on the Judiciary and Education and the Workforce.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. OXLEY: Committee on Financial Services. H.R. 2941. A bill to facilitate the provision of assistance by the Department of Housing and Urban Development for the cleanup and economic redevelopment of brownfields; with an amendment (Rept. 107–448). Referred to the Committee of the Whole House on the State of the Union.

Mr. TAUZIN: Committee on Energy and Commerce. H.R. 3833. A bill to facilitate the creation of a new, second-level Internet domain within the United States country code domain that will be a haven for material that promotes positive experiences for children and families using the Internet, provides a safe online environment for children, and helps to prevent children from being exposed to harmful material on the Internet, and for other purposes; with an amendment (Rept. 107–449). Referred to the Committee of the Whole House on the State of the Union.

Mrs. MYRICK: Committee on Rules. House Resolution 415. Resolution providing for consideration of the bill (H.R. 4546) to authorize appropriations for fiscal year 2003 for military activities of the Department of Defense, and for military construction, to prescribe military personnel strengths for fiscal year 2003, and for other purposes (Rept. 107–450). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XII, public bills and resolutions of the following titles were introduced and severally referred, as follows:

By Mr. STEARNS (for himself, Mr. Boucher, Mr. Tauzin, Mr. Towns, Mr. Bass, Mr. Bilirakis, Mrs. Bono, Mr. Deal of Georgia, Ms. Eshoo, Mr. Gillmor, Mr. Gordon, Mr. Greenwood, Mr. Kingston, Mr. Moran of Virginia, Mr. Sawyer, Mr. Terry, Mr. Upton, Mr. Walden of Oregon, Mr. Weldon of Florida, Mr. Weller, and Mr. Dan Miller of Florida):

H.R. 4678. A bill to protect and enhance consumer privacy, and for other purposes; to the Committee on Energy and Commerce, and in addition to the Committee on International Relations, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. GEKAS:

H.R. 4679. A bill to amend title 18, United States Code, to provide a maximum term of supervised release of life for child sex offenders; to the Committee on the Judiciary.

By Mr. BAIRD (for himself and Mr. Price of North Carolina):

H.R. 4680. A bill to authorize appropriations for the Advanced Technological Education Program, to amend the Scientific and

Advanced-Technology Act of 1992 to further strengthen science, mathematics, and technology education at the Nation's associate-degree-granting colleges, to establish an advisory committee to help guide implementation of the Advanced Technological Education Program, and for other purposes; to the Committee on Science, and in addition to the Committee on Education and the Workforce, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. ENGLISH (for himself, Mr. BORSKI, Mr. BRADY of Pennsylvania, Mr. COYNE, Mr. DOYLE, Mr. FATTAH, Mr. GEKAS, Mr. GREENWOOD, Ms. HART, Mr. HOEFFEL, Mr. HOLDEN, Mr. KANJORSKI, Mr. MASCARA, Mr. MURTHA, Mr. PETERSON of Pennsylvania, Mr. PITTS, Mr. PLATTS, Mr. SHERWOOD, Mr. SHUSTER, Mr. TOOMEY, Mr. WELDON of Pennsylvania, Mr. SOUDER, and Mr. TRAFICANT):

H.R. 4681. A bill to establish the Fort Presque Isle National Historic Site in the Commonwealth of Pennsylvania; to the Committee on Resources.

By Mr. MURTHA:

H.R. 4682. A bill to revise the boundary of the Allegheny Portage Railroad National Historic Site, and for other purposes; to the Committee on Resources.

By Mr. PALLONE (for himself and Mr. SHAYS):

H.R. 4683. A bill to amend the Federal Water Pollution Control Act to clarify that fill material cannot be comprised of waste; to the Committee on Transportation and Infrastructure.

By Mr. PALLONE:

H.R. 4684. A bill to amend title XVIII of the Social Security Act and the Employee Retirement Income Security Act of 1974 to improve access to health insurance and Medicare benefits for individuals ages 55 to 65 to be fully funded through premiums and antifraud provisions, to amend title XIX of the Social Security Act to provide financial assistance for those individuals who are too poor to afford the premiums, and for other purposes; to the Committee on Ways and Means, and in addition to the Committees on Energy and Commerce, and Education and the Workforce, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. TOOMEY (for himself, Mr. KANJORSKI, Mr. SOUDER, Mr. KERNS, Mrs. CUBIN, Mr. TANCREDO, Mr. SCHAFFER, and Mr. CANTOR):

H.R. 4685. A bill to amend title 31, United States Code, to expand the types of Federal agencies that are required to prepare audited financial statements; to the Committee on Government Reform.

By Mr. WATKINS:

H.R. 4686. A bill to direct the Secretary of Energy to convey a parcel of land at the facility of the Southwestern Power Administration in Tupelo, Oklahoma; to the Committee on Resources.

By Mr. BACA (for himself, Mr. ORTIZ, Mr. SERRANO, Mr. ACEVEDO-VILÁ, and Mr. HINOJOSA):

H. Con. Res. 398. Concurrent resolution recognizing the historical significance of the Mexican holiday of Cinco de Mayo; to the Committee on International Relations.

By Mrs. KELLY:

H. Con. Res. 399. Concurrent resolution recognizing and supporting the efforts of the State of New York to develop the National Purple Heart Hall of Honor in New Windsor, New York, and for other purposes; to the Committee on Armed Services.

By Mr. SHOWS:

H. Con. Res. 400. Concurrent resolution expressing the sense of Congress regarding the unfair Russian Federation ban on the importation of United States poultry; to the Committee on Ways and Means.

ADDITIONAL SPONSORS

Under clause 7 of rule XII, sponsors were added to public bills and resolutions as follows:

H.R. 123: Mr. CANNON.

H.R. 459: Mr. KENNEDY of Rhode Island.

H.R. 510: Mr. COSTELLO and Mrs. CLAYTON.

H.R. 730: Mr. LYNCH.

H.R. 902: Mr. HALL of Ohio, Mr. NUSSLE, Mr. GOODE, and Mr. PETERSON of Minnesota.

H.R. 945: Ms. WOOLSEY, Mr. RODRIGUEZ, and Mr. BERMAN.

H.R. 975: Mr. BARRETT.

H.R. 1011: Mr. FRANK.

H.R. 1073: Mr. SHIMKUS.

H.R. 1094: Mr. BARTLETT of Maryland.

H.R. 1106: Mr. FOLEY.

H.R. 1172: Mr. NORWOOD and Mr. GONZALEZ.

H.R. 1202: Mr. HEFLEY, Mr. FLETCHER, Mr. KILDEE, and Mr. MALONEY of Connecticut.

H.R. 1212: Mr. PICKERING.

H.R. 1382: Mrs. DAVIS of California.

H.R. 1400: Mr. HOLDEN and Mr. CRAMER.

H.R. 1452: Mr. OSE.

H.R. 1515: Mr. FOLEY.

H.R. 1520: Mr. HOBSON.

H.R. 1556: Ms. EDDIE BERNICE JOHNSON of Texas and Mrs. CAPITO.

H.R. 1581: Mr. DEAL of Georgia and Mr. SNYDER.

H.R. 1650: Mr. SERRANO.

H.R. 1723: Mr. LUTHER, Mr. PETERSON of Minnesota, Mr. RANGEL, Mr. COSTELLO, Mr. SWEENEY, Ms. EDDIE BERNICE JOHNSON of Texas, Mr. PASTOR, Mr. PAYNE, Mr. LARSEN of Washington, and Ms. ROYBAL-ALLARD.

H.R. 1724: Mr. FOLEY.

H.R. 1822: Mr. DOYLE.

H.R. 1887: Mr. FRANK.

H.R. 1904: Mr. DELAHUNT.

H.R. 1931: Mr. TIAHRT.

H.R. 1983: Mr. ENGLISH.

H.R. 1987: Mr. POMEROY.

H.R. 2012: Mr. ACKERMAN.

H.R. 2037: Mr. WELLER, Mr. SMITH of Michigan, and Mr. FOLEY.

H.R. 2063: Mr. DINGELL.

H.R. 2466: Mr. HAYES.

H.R. 2484: Mr. HOLDEN, Mr. WEINER, Mrs. CLAYTON, and Mr. JEFFERSON.

H.R. 2573. Ms. BROWN of Florida.

H.R. 2662: Mr. CLAY.

H.R. 2714: Mrs. JO ANN DAVIS of Virginia and Mr. WALDEN of Oregon.

H.R. 2820: Mr. DELAHUNT and Ms. LEE.

H.R. 2901: Mr. BEREUTER.

H.R. 3238: Mr. SHAYS and Mr. KENNEDY of Rhode Island.

H.R. 3320: Mr. GOODE and Mr. SESSIONS.

H.R. 3333: Mr. PITTS.

H.R. 3335: Mrs. CHRISTENSEN.

H.R. 3414: Ms. MCCOLLUM.

H.R. 3534: Mr. FILNER.

H.R. 3704: Mr. DAVIS of Illinois.

H.R. 3713: Mr. VITTER.

H.R. 3717: Mr. GUTKNECHT.

H.R. 3752: Mr. COSTELLO, Mr. PAYNE, Mr. GREEN of Wisconsin, Mr. BARRETT, Mr. HOLDEN, Mr. SHERMAN, Ms. HARMAN, and Mr. GONZALEZ.

H.R. 3828: Mr. BERMAN, Mr. ABERCROMBIE, Mr. GEORGE MILLER of California, Mr. MCGOVERN, Mr. FILNER, Mr. GREEN of Texas, Mr. LANTOS, Mr. DAVIS of Illinois, Mr. BACA, Mrs. CLAYTON, Ms. MCKINNEY, Mr. PASTOR, Ms. SOLIS, Mr. FALEOMAVAEGA, Ms. LEE, and Mrs. CHRISTENSEN.

H.R. 3831: Mr. KING.

H.R. 3834: Mr. ABERCROMBIE, Mr. KILDEE, Mr. HOEFFEL, Mr. PASTOR, and Mr. BALDACCI.

H.R. 3884: Mr. FROST.

H.R. 3887: Mr. MOORE, Mr. LEVIN, Ms. DELAURO, Ms. MCCOLLUM, Mr. PAYNE, Mrs. KELLY, and Mr. HINCHEY.

H.R. 3917: Mr. RAMSTAD.

H.R. 3940: Mr. WILSON of South Carolina.

H.R. 3957: Mr. KOLBE.

H.R. 3989: Mrs. MINK of Hawaii.

H.R. 3995: Mr. SAXTON, Mr. SUNUNU, and Mr. BURR of North Carolina.

H.R. 4012: Mr. DEAL of Georgia.

H.R. 4027: Mr. TIAHRT.

H.R. 4046: Mr. FILNER.

H.R. 4061: Mr. PLATTS, Mr. GILLMOR, and Mrs. LOWEY.

H.R. 4076: Mr. HAYWORTH.

H.R. 4078: Mr. STARK and Mr. SANDERS.

H.R. 4098: Mr. KUCINICH.

H.R. 4104: Mr. SMITH of Washington.

H.R. 4123: Mr. MCDERMOTT, Mrs. CHRISTENSEN, Mr. OWENS, Mr. BALDACCI, and Mr. FROST.

H.R. 4169: Mr. PITTS.

H.R. 4187: Ms. VELÁZQUEZ, Mr. BARRETT, and Mr. PAUL.

H.R. 4260: Mr. TERRY.

H.R. 4374: Mrs. CLAYTON, Mr. COSTELLO, Mr. ISAKSON, and Mr. PAYNE.

H.R. 4479: Mr. BALDACCI.

H.R. 4481: Mr. STUMP and Mr. FROST.

H.R. 4575: Mr. LANTOS, Mr. GREEN of Texas, Mr. MCNULTY, Ms. SANCHEZ, Mr. EVANS, Mr. FARR of California, Mr. PENCE, and Mr. CROWLEY.

H.R. 4585: Mr. KENNEDY of Minnesota.

H.R. 4594: Ms. SANCHEZ.

H.R. 4604: Mr. NORWOOD.

H.R. 4635: Mr. HAYES, Mr. BARTLETT of Maryland, and Mr. TANCREDO.

H.R. 4642: Mr. SESSIONS, Mr. GOODE, and Mr. BARTLETT of Maryland.

H.R. 4643: Mr. MCGOVERN.

H.R. 4646: Mr. LAMPSON, Mr. KANJORSKI, Mr. FRANK, Mrs. MALONEY of New York, Mr. LANGEVIN, Mr. SMITH of New Jersey, and Ms. SCHAKOWSKY.

H.R. 4665: Mr. MCNULTY.

H.R. 4667: Mr. FORBES and Mrs. JOHNSON of Connecticut.

H.R. 4669: Mr. FROST, Mr. KUCINICH, Ms. NORTON, Ms. BALDWIN, Mr. BROWN of Ohio, and Mr. BONIOR.

H. Con. Res. 315: Mr. SESSIONS.

H. Con. Res. 345: Mrs. CHRISTENSEN.

H. Con. Res. 359: Mr. GORDON.

H. Con. Res. 368: Mr. DUNCAN.

H. Con. Res. 375: Ms. JACKSON-LEE of Texas, Mr. ROYCE, and Mr. SCHROCK.

H. Con. Res. 385: Mrs. THURMAN, Mr. KILDEE, Mrs. MORELLA, and Mr. SMITH of New Jersey.

H. Con. Res. 390: Mr. LAMPSON.

H. Con. Res. 394: Mr. TIAHRT.

H. Res. 398. Mrs. MORELLA, Mr. OSBORNE, and Mrs. MALONEY of New York.

EXTENSIONS OF REMARKS

2002 AAA STARS OF LIFE STATEMENT

HON. BILL LUTHER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 7, 2002

Mr. LUTHER. Mr. Speaker, I rise today to honor the men and women of the emergency medical and ambulance services profession who dedicate their lives to helping individuals in need.

Every year, the dispatch of an ambulance is the first response to millions of medical emergencies. Often, the survival of a patient is significantly improved by the prompt medical attention provided before arrival at an emergency room. As a result of the selfless acts of these courageous and devoted men and women, the lives of thousands of Americans are saved each year. While these professionals do not expect to receive recognition for their work, they deserve our sincere gratitude.

I consider myself fortunate to have met with a number of medics from Minnesota and around the country and have heard firsthand accounts of the tireless efforts that they perform on a daily basis for the communities they serve. They are truly America's health care safety net.

For the past nine years, the American Ambulance Association (AAA) has recognized those emergency, medical and ambulance service professionals who exemplify what is best about their field, and bestow upon them the Stars of Life award. These appropriately designated Stars of Life have been selected by their peers to represent them in Washington, DC as part of pre-National EMS Week activities. The highlights of their visits to our nation's capital are an awards banquet this evening where they are presented with this prestigious award and meetings today and tomorrow with their Members of Congress. The American Ambulance Association is honoring 113 Stars of Life this year.

Mr. Speaker, I ask that the names of the 2002 American Ambulance Association Stars of Life honorees be printed in the RECORD.

State	Name of Star of Life	Company or organization	Town
Alabama	James "Pete" Norris	American Medical Response	Birmingham.
Arizona	Jim Hayden	Rural/Metro	Mesa.
Arkansas	Chuck Creed	Columbia County Ambulance Service	Magnolia.
California	Lon Adams	American Medical Response	Burlingame.
	Tanya Banks	American Medical Response	Concord.
	Sajee DeReauxchette	American Medical Response	Hemet.
	Susan King	American Medical Response	Lancaster.
	Kelly Taddeo	American Medical Response	Los Angeles.
	Jonathan Graves	American Medical Response	Moorpark.
	Brian Mullins	American Medical Response	Palm Springs.
	Jim Sachs	American Medical Response	Roseville.
	Keith Fournier	American Medical Response	San Diego.
	James Bauck (Posthumous)	American Medical Response	San Leandro.
	David Tovar	Medix Ambulance Service	Mission Viejo.
Colorado	Randy Ermer	American Medical Response	Aurora.
	Liz Dienst	American Medical Response	Colorado Springs.
	Wescott "Wes" Hyde	Summit County Ambulance Service	Frisco.
	Charles "Chaz" Gross	Summit County Ambulance Service	Frisco.
Connecticut	Louis Formica	Hunter's Ambulance Service	Meriden.
	Jennifer Giordano	Hunter's Ambulance Service	Meriden.
	Joseph DeAngelis	American Medical Response	New Haven.
Florida	David Twiss	American Medical Response	Fort Lauderdale.
	Kevin Hull	American Medical Response	Largo.
	Jon. C. Thompson	Rural/Metro	Orlando.
Georgia	Misty Hall	Mid Georgia Ambulance Service	Macon.
	Richard Thompson	Mid Georgia Ambulance Service	Macon.
Hawaii	William "Lin" Watkins	American Medical Response	Makawao.
Illinois	Carol Swank	Advanced Medical Transport of Illinois	Peoria.
	Lisa Newell	Advanced Medical Transport of Illinois	Peoria.
Iowa	Thomas Sheetz	Medic EMS	Davenport.
	Jerry Weismann	American Medical Response	Iowa Falls.
	Karla Anderson	Iowa EMS Association	West Des Moines.

	Alison Burkholder	American Medical Response	Richmond.
Washington	Bill Munson	American Medical Response	Yakima.
Wyoming	Ivan Maxfield	American Medical Response	Cheyenne.

IN HONOR OF POLISH CONSTITUTION DAY

HON. DENNIS J. KUCINICH

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 8, 2002

Mr. KUCINICH. Mr. Speaker, I rise today in celebration of the anniversary of the Polish Constitution. The Polish Constitution of May 3, 1791 established a tradition of democracy and human rights in Poland that continues today.

The Polish Constitution has the honor of being the first Constitution in Europe to guarantee inalienable human and economic rights for all. This historic document was modeled after the Constitution of the United States of America.

During the turbulent 1790's of classical Europe, Poland emerged as a light of hope for the future of democracy in Poland, and across the European landscape. While other nations surrounding its sovereign borders engaged in revolution and civil war, Poland maintained its integrity for many years under this Constitution.

The rise of Soviet communism in the post-World War II era stemmed the Polish democratic principle for forty years, but under the capable leadership of Lech Walesa, democracy embodied in this Constitution returned to the Eastern European "cradle of democracy." The human and economic rights that were abandoned by years of communist rule have triumphantly flourished in recent years.

Mr. Speaker, please join me in honoring the people of Poland, the Polish American community, and their timeless Polish Constitution—on the occasion of the anniversary of its creation—two hundred and eleven years ago.

NATIONAL SMALL BUSINESS WEEK

HON. JANICE D. SCHAKOWSKY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 8, 2002

Ms. SCHAKOWSKY. Mr. Speaker, I rise today to celebrate National Small Business Week. Small businesses have contributed and continue to contribute to our nation's economy. They are anchors in our neighborhoods, and employ and train millions of workers every year. Small businesses account for half of our gross domestic product, and I am committed to ensuring that small business owners and workers have the resources and protections necessary to grow and thrive.

There are approximately 25 million small businesses in the United States and they account for 75 percent of all new jobs added to the economy and represent 99.7 percent of all employers. There are over 280,000 employer businesses in the state of Illinois, and over 97 percent of them are small businesses, with fewer than 500 employees. Currently, there are an estimated 6.2 million women-owned businesses, accounting for 28 percent of all privately held firms. These firms generate $1.15 trillion in sales and employ 9.2 million workers. Also, minority-owned businesses have quadrupled over the last decade. Minorities now own 15 percent of American businesses and 99 percent of these firms are small businesses. But the sad truth is that not enough is being done to provide these businesses with the opportunities needed to survive and compete in today's market.

I recently toured several business areas in my district and met with business owners in Morton Grove, Illinois. I also met with several business groups, such as the Gladstone Park Chamber of Commerce. I was proud to see small businesses thriving in the community. The main source of help for these businesses is the Small Business Administration. The SBA has a portfolio of business loans, loan guarantees, disaster loans and venture capital worth more than $58 billion, and I will work hard to provide the necessary financial and technological support that will allow the SBA to do its job in an efficient and effective manner. I am working in Congress to improve a number of programs and services that the Small Business Administration provides which will give important resources to small businesses in my district and across this nation.

PRESCRIPTION DRUGS

HON. CAROLYN McCARTHY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 8, 2002

Mrs. McCARTHY of New York. Mr. Speaker, I rise today in support of a prescription drug benefit for all seniors.

As a nurse, I am very familiar with the role of prescription drugs in medical treatment programs. In recent years, more and more drugs have become available to manage medical problems that formerly were left untreated or required periods of hospitalization. These drugs have allowed Americans to live longer, more productive lives.

I also know the importance of taking the correct dosage of drugs, at the prescribed times. Today, too many seniors cut back on the dosage, or alternate the days they take the drugs. By altering the dosage, they do not receive the full benefit of the prescription drug therapy. Some seniors are forced into choosing between buying food or paying for their prescription drugs. Why have they been faced with these decisions? Because they cannot afford to pay for their prescriptions.

It is time for Congress to establish a Medicare prescription drug plan. We need to make prescription drugs affordable for all our seniors, regardless of where they live, what drugs they take, or their income level. We need a plan that provides a meaningful reduction in the cost of prescription drugs.

But more importantly, we must also look at the continuing increase in the cost of prescription drugs. The rising cost of drugs is certainly a consideration in a Medicare prescription drug plan. The problem of increasing prescription drug costs is not limited to our seniors. Individuals enrolled in HMOs, employer sponsored insurance plans, or private insurance plans are seeing their coverage of prescription drugs diminish and/or their co-payments rise as the insurer tries to keep pace with the rising cost of prescription drugs. Hospitals and state Medicaid programs are struggling with the cost of prescription drugs. We must look at ways to ensure prescription drugs are available at reasonable prices for all Americans.

30TH ANNIVERSARY OF THE NATIONAL COMMITTEE FOR EMPLOYER SUPPORT OF THE GUARD AND RESERVE

HON. JOHN COOKSEY

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 8, 2002

Mr. COOKSEY. Mr. Speaker, today I wish to congratulate the National Committee for Employer Support of the Guard and Reserve (ESGR)—its 4,200 volunteers and Department of Defense (DOD) staff—in celebrating 30 years of service to this Nation.

The National Committee for Employer Support of the Guard and Reserve (ESGR) was established in 1972, the year the United States ended the Selective Service System and established an all-volunteer military force. DOD realized that support from employers and communities would be instrumental in maintaining Reserve component membership. ESGR was created to obtain employer and community support for the National Guard and Reserve and to promote the role of Reserve forces in the national defense.

ESGR has lived up to the task and accomplished much more. Since 1972, with the help of the Advertising Council, Inc., ESGR has benefited from nearly $1 billion in pro bono advertising reaching the six million employers with one or more employees in the United States.

Employers have, in turn, signed ESGR Statements of Support, publicly committing to support the National Guard and Reserve. The former Chairman of the Board and CEO of General Motors, Mr. James H. Roche signed the first Statement of Support in the Office of the Secretary of Defense on December 13, 1972. The next day, President Richard Nixon signed a Statement of Support covering all Federal civilian employees. Since the inception of this program, Presidents Ford, Carter, Reagan, Bush, Clinton and President George W. Bush have all signed Statements of Support, along with hundreds of thousands of employers, including Dell Computer Corporation, Xerox, the Society for Human Resource Management and the U.S. Chamber of Commerce. To date, over 300,000 employers have signed statements of support. Additionally, the strategic alliance formed in 1998 between ESGR and the U.S. Chamber of Commerce resulted in more than 1,200 chambers of commerce nationwide signing a Statement of Support for the Guard and Reserve.

ESGR offers Ombudsman services designed to provide information to employers and Reservists regarding their rights and responsibilities under the law, and to resolve conflicts through informal mediation. These services operate in cooperation with the Department of Labor. ESGR volunteers in 54 U.S. states and territories contribute thousands of hours of effort representing millions of dollars of volunteer service in support of ESGR programs, its services, and the men and women of our nation's Reserve forces.

Mr. Speaker, the National Committee for Employer Support of the Guard and Reserve is smart government in action. The small ESGR staff in Arlington, VA, under the direction of the Assistant Secretary of Defense for Reserve Affairs provides guidance and support to a network of 4,200 volunteer business, civic, and community leaders.

ESGR educates employers on their rights and obligations under the law and recognize employers who actively support employee participation in the Guard and Reserve. ESGR also educates members of the National Guard and Reserve in regards to their rights and responsibilities to the value of their employers support. Committees can be found in all 50 states, the District of Columbia, Puerto Rico, the Virgin Islands, and Guam.

With the end of the cold war, the Reserve components have been called with increasing frequency. During the Gulf War in 1990–1991, more than 250,000 Reserve component members were called to active duty to support military operations in the Persian Gulf. Since the start of Operation Noble Eagle and Enduring Freedom, more than 80,000 National Guard and Reserve troops have been activated and are playing a critical role.

Mr. Speaker, thousands of employers, local and state government officials, Active and Reserve component leaders, and military members from across the nation and around the world request ESGR's employer support expertise on a daily basis. When Guardsmen and Reservists return home following mobilization, ESGR committee members are there to provide information and support services to those in need.

The U.S. Congress passed the Uniformed Services Employment and Reemployment Rights Act, (USERRA) of 1994, and updated it in 1996. This law completely revised the Veterans Reemployment Rights Act of 1940. USERRA articulates the rights and responsibilities of Guard and Reserve members with regard to job protection and explains employer rights under federal law. ESGR helps employers and Reservists understand this law and helps them informally resolve any employment conflicts that may arise.

Mr. Speaker, again, I want to congratulate ESGR and its 54 ESGR committees on their 30 years of service and commend this network of over 4,200 volunteers' patriots for their time and talent. They are serving their country and maintaining the much needed support of our employers and communities for the Guard and Reserve. Through the efforts of agencies like ESGR, we can call on our Reserve forces to answer our nation's call without the fear of job loss.

Thank you Mr. Speaker, and thank you ESGR.

VOLUNTEERS OF THE CHAPLAINCY COMMITTEE OF THE JEWISH FEDERATION OF CENTRAL NEW JERSEY

HON. MICHAEL FERGUSON

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 8, 2002

Mr. FERGUSON. Mr. Speaker, I rise today to thank and recognize the volunteers of the Chaplaincy Committee of the Jewish Federation of Central New Jersey.

The Chaplaincy program provides services to Jewish residents in nursing homes and patients hospitals in central New Jersey. The committee also works with the nearly 100 volunteers doing either Bikur Holim (visiting the sick) or Kabbalat Shabbat (a service to welcome the Sabbath) for residents in area nursing homes. The volunteers range from all over central New Jersey.

On May 8th, the Chaplaincy Committee plans to recognize and thank the volunteers for their hard work, as I am here to do the same today.

I commend the Jewish Federation of Central New Jersey for the good works they have helped to provide to central New Jersey, and to the volunteers themselves—they have my deepest gratitude. There is no greater gift to the community than your time and service.

TRIBUTE TO MS. FARAH M. WALTERS

HON. DENNIS J. KUCINICH

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 8, 2002

Mr. KUCINICH. Mr. Speaker, I rise today to honor Ms. Farah M. Walters for her masterful leadership of University Hospitals Health System and University Hospitals of Cleveland. As President and Chief Executive Officer of University Hospitals Ms. Walters has presided over UH's expansion from a $400 million-hospital to a nearly $2 billion health-care system which serves patients at more than 150 locations in Northeast Ohio and is the region's largest private sector employer.

Ms. Walters graduated from the executive MBA program at Case Western Reserve University Weatherhead School of Management and holds a Masters of Science in Nutrition from Case Western Reserve University. She has consulted and lectured for major health organizations such as the Pan American Health Organization, American Hospital Association, National Institutes of Health, the U.S.

Army, and various hospitals and universities. Ms. Walters has received numerous prestigious awards for her work. For example, in May 2001 she was awarded the Ellis Island Medal of Honor by the National Ethnic Coalition of Organizations Foundation; in February 1999 she became the first woman to receive the Business Executive of the Year award from the Sales & Marketing Executives of Cleveland; and in May 1998 she became the first woman to receive Business Statesmanship Award from the Harvard Business School Club. In January 1993, Mrs. Walters was appointed to Hillary Rodham Clinton's National Health Care Reform Task Force, and in 1993 Modern Healthcare selected her one of the 50 individuals in the USA to shape the future of health care in the country. In addition, University Hospitals of Cleveland has been the recipient of many awards under her leadership, including, the North Coast 99 Diversity Award from the Employer Resource Council and Enterprise Development and the Exemplary Voluntary Effort Award from the U.S. Department of Labor.

Ms. Walters serves on a variety of national and local boards and is active in civic affairs. She has served on a number of key committees of the Association of American Medical Colleges in Washington, DC. She also serves on the board of Cleveland Tomorrow, Greater Cleveland Roundtable and Ohio Business Roundtable. In 1994 Ms. Walters was appointed by Governor Voinovich to serve on the 15 member Commission to Study the Ohio Economy and Tax Structure. Within the community, she has served as Chairman for the 1997 United Way Campaign, the first woman and first CEO of a non-profit organization to be selected for the position.

My fellow colleagues, I ask you to Join me in rising to honor this truly remarkable woman who has dedicated her life to the betterment of health care, and is one of Cleveland's finest citizens.

PAUL SIMON CHICAGO JOB CORPS CENTER

SPEECH OF

HON. JANICE D. SCHAKOWSKY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 7, 2002

Ms. SCHAKOWSKY. Madam Speaker, I rise in support of Senate Bill 378, which will rename the Chicago Job Corps Center, located at 3348 South Kedzie Avenue, in Chicago, Illinois, as the Paul Simon Chicago Job Corps Center after former U.S. Senator Paul Simon of Illinois. Senator Simon was not only a great U.S. Senator for the state of Illinois, but he is a champion for working people across the nation.

Senator Simon has dedicated his life to helping the people of this country. As a scholar, writer, and public servant, Senator Simon has worked hard to battle against the social injustices that haunt our nation. During his congressional service, Senator Simon was a strong supporter of the federal Jobs Corps program and was instrumental in the chartering of a Jobs Corps center in Chicago. The Center provides opportunities in a campus environment to gain a valuable education with advanced career training, to learn a skilled trade, so that individuals may reach their full potential. Job Corps provides up to two years of hands-on work-based training and internships, in areas ranging from bricklaying to computer repair. The Center also provides academic training in remedial math and reading, GED preparation, and English as a second language, and outreach to those in the community that may not have the opportunity to attend college. It is these things that define the goals Senator Simon has set to achieve for the millions of Americans looking for skilled employment in the workplace.

Senator Simon has been a dear friend of mine for many, many years. His contributions and dedication as a public servant have always inspired me. He has not only made great contributions to this country and the state of Illinois, but he continues to play a vital role as Director of the Public Policy Institute at Southern Illinois University. He is a leader in strengthening democracy and in addressing key global issues such as the looming water shortage crisis. I feel that renaming the Chicago Job Corps Center as the Paul Simon Chicago Job Corps Center is an appropriate recognition of what he has done for the Chicago area and all of us. Thank you Paul, for everything.

WORLD ASTHMA DAY

HON. DIANE E. WATSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 8, 2002

Ms. WATSON of California. Mr. Speaker, asthma has become epidemic. Over 2.3 million Californians have asthma, a chronic illness that makes breathing difficult and causes symptoms such as shortness of breath, coughing, wheezing and chest tightness. Nationwide, the number of asthma sufferers has increased 50 percent since 1980.

Nearly one in thirteen children in the U.S. have asthma and this percentage is growing more rapidly in preschool age children than in any other group. Between 1982 and 1995, incidents of childhood asthma increased by 87 percent and is now the most common chronic illness among children. Asthma accounts for approximately 17 percent of children's emergency room visits and is the major cause of school absences.

Asthma can be fatal. Rates of death from asthma, hospitalizations and visits to emergency rooms have been increasing for more than 20 years, particularly among children and African Americans. During 1979 to 1982, the death rate from asthma for all blacks has increased 71 percent while for whites it has increased 41 percent.

Asthma episodes can be triggered by dust, pets, mold, air pollution, tobacco smoke, some insects, certain chemicals, cold air and stress. Managing asthma includes proper diagnosis, access to high quality medical care and monitoring the condition and avoiding the things that trigger attacks.

In Los Angeles, the Asthma and Allergy Foundation of America—Southern California chapter, working in conjunction with the California Department of Health Services—Childhood Asthma Initiative and the Los Angeles County Department of Health Services, is sponsoring a community-based initiative to identify ways to control inhalation exposures that trigger children's asthma attacks. The Healthy African American Families has established an asthma intervention program called "Breathe Free" that is targeted for African American children in South Los Angeles communities.

I applaud the efforts of these organizations to identify the asthma risk factors, educate the public, provide intervention measures in homes and child care centers and make progress in reversing the terrible trend of childhood asthma.

TRIBUTE TO RETIRING CHAIRMAN ROBERT W. GIARRUSSO

HON. JAMES T. WALSH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 8, 2002

Mr. WALSH. Mr. Speaker, I rise today to highlight the public service of a longtime local business leader in my Central New York district. From 1988 until just recently, Mr. Bob Giarrusso served as Chairman of the Onondaga County Republican Committee. I write to congratulate him on his retirement and to thank him for his fourteen years of service to our community. He is the longest serving chairman in the committee's history.

During Bob's tenure, the Onondaga County Republican Committee flourished. He made the committee more democratic and more inclusive and expanded committee members' involvement and influence. His efforts supported Republican candidates at all levels of government, and his leadership encouraged some of our community's best and brightest individuals to run for public office.

Most importantly, Bob Giarrusso led local Republicans with an unique style all his own that was both endearing and dignified. Through Bob's longtime political service, our community certainly has been enhanced.

Many new challenges await Central New York Republicans as we enter a new year. I applaud Bob for his strong leadership and believe that his decision to step aside will only infuse the local Republican Party with new energy and new life.

It's my pleasure to thank Mr. Giarrusso for his service to the Central New York community and to congratulate him on a job well done.

HONORING CITRUS HEIGHTS, CALIFORNIA CITY COUNCILMAN TIM RANEY

HON. DOUG OSE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 8, 2002

Mr. OSE. Mr. Speaker, tonight, Tim Raney will be recognized for his service as a councilman in my hometown of Citrus Heights, California. Though the peaceful transition of officials into and out of elective office is not a unique occurrence in this great nation, this particular event is worthy of our recognition.

Tim Raney was elected to the Citrus Heights City Council in November of 1996, on the same ballot that a proud community voted to make formal its desire to become an incorporated city. Tim was an active leader in the drive for Citrus Heights cityhood, an effort that was more than a decade in the making, going to the United States Supreme Court to affirm the right of its residents to self-governance.

As a member of the first city council, Tim and the four other council members were responsible for negotiating the contracts for police and public safety services, garbage and waste management services, and all other services that make a city responsive to its citizens.

In his six years on the council, he was a tireless advocate for the community. He served on the Sacramento Transportation Authority, Sacramento Regional County Sanitation District, and the Sacramento Metropolitan Fire District. In 1998, then Governor Pete Wilson appointed him to the Commission on Local Governance for the 21st Century. From naming a blue-ribbon panel to improve school test scores, to championing economic development issues and working to bring consensus to regional transportation issues, his mark on the community is clear.

As Councilman Raney steps down from the city council to pursue professional goals and commit more time to his growing family in their new home, he does so as more than a former councilman. He will be remembered as one of the founders of the City of Citrus Heights, and as a solid example of a true public servant.

HONORING THE WOODMERE SISTERHOOD OF CONGREGATION SONS OF ISRAEL

HON. CAROLYN McCARTHY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 8, 2002

Mrs. McCARTHY of New York. Mr. Speaker, I rise in honor of the past, present and future female congregants of Congregation Sons of Israel—Woodmere Synagogue.

For over 70 years, the Woodmere Sisterhood organization has promoted ideals that lie not only at the core of Judaism, but at the core of humanity. Their involvement on Long Island has affected individuals on many levels. Hundreds of women have dedicated themselves to bettering our community and on June 2, members of the Congregation will honor the Sisterhood at the annual Journal Dinner Dance.

These women led other congregants in perpetuating the rich heritage of the Jewish people through a variety of community outreach programs. These included trips to various museums, "Lunch and Learn" Sabbaths, screenings of pertinent films and lecture series.

They established and maintained a Judaic library and Video Center for the use of the congregation and Hebrew School. They also created several scholarship funds. One offers teens the opportunity to spend a summer in Israel; one offers partial tuition to the Hebrew High School; one offers needy children partial tuition to the Morgenstern Hebrew School; and one subsidizes camp tuition. They also have a Torah Fund for the Jewish Theological Seminary in New York City.

The Sisterhood plays a crucial role in certain day-to-day operations of the Synagogue. Their participation in the local community varies from providing new floral arrangements for the sanctuary every Sabbath to gift-giving on special occasions: Bar and Bat Mitzvahs, weddings and births. The Sisterhood was also instrumental in hosting Bat Mitzvah classes for adult women in the congregation.

The Sisterhood is involved in International matters, especially those concerning Israel. The current situation has greatly affected all members of Congregation Sons of Israel-Woodmere. The Sisterhood just concluded a fund raising drive to purchase an armored school van for an Israeli school.

The list of the Sisterhood's accomplishments and contributions is endless. Today I rise in recognition of the countless women who have contributed to this effort, in particular the following past Sisterhood presidents:

Florence Behrens, Rosetta Sokoloff, Jeanette Kirshenbaum, Roslyn Mayer, Gertrude Wicksel, Ann Studner, Mildred Kreiss, Gertrude Leinwand, Mollie Lewitt, Rose Lewis, Sherle Gross, Dorothy Feldman, Charlotte Koss, Dorothy Kimmel, Bertha Snyder, Blanche Finkel, Lila Goldman, Anne Selier, Barbara Semel, Arline Slepoy, Edna Ritzenberg, Muriel Liebowitz, Rosalie Bachana, Karen Boxer, Joan Mann, Shirley Fisher, Audrey Liberstein, Leslie Aronin, Teri Stein, and Liane Feuer.

PERSONAL EXPLANATION

HON. BOB GOODLATTE

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 8, 2002

Mr. GOODLATTE. Mr. Speaker, on rollcall No. 128, I was inadvertently detained. Had I been present, I would have voted "aye."

IN PRAISE OF THE BUSH ADMINISTRATION'S SUPPORT OF OUR 2ND AMENDMENT RIGHTS TO KEEP AND BEAR ARMS

HON. RONNIE SHOWS

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 8, 2002

Mr. SHOWS. Mr. Speaker, I rise today to offer my praise to President Bush for declaring that the Second Amendment protects an individual's right to possess a firearm and is not tied to the maintenance of state militias.

On Monday, Solicitor General Theodore Olsen made the Bush Administration's position clear when he filed briefs in the Supreme Court on two cases that are under review. In short, it is the Administration's position that the Second Amendment grants an individual the right to keep and bear arms.

I am pleased that the Bush Administration has recognized that the Constitution protects individual rights to keep and bear arms. But we must always remain vigilant against efforts to strip us of our rights. As a member of the National Rifle Association, I vigorously oppose any gun control efforts that violate our Constitutional rights, such as national registration of law-abiding gun owners or misguided law suits against gun manufacturers.

Some people believe that enacting new laws against guns will prevent school violence or crimes committed with guns. It is easy for them to equate gun violence with the need for greater gun control, but this is a complex problem with many factors contributing to it, not just guns. We should stop looking for scapegoats. Simply enacting more gun control laws on top of the many already in place does not begin to address this problem.

Again, I applaud President Bush for taking a strong stand in favor of our constitutional right to keep and bear arms.

IN HONOR OF DR. MARTY PLAX

HON. DENNIS J. KUCINICH

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 8, 2002

Mr. KUCINICH. Mr. Speaker, I rise today to recognize Marty Plax, for his 26 years of service as Director of The American Jewish Committee's Cleveland Chapter. His tenure as Area Director was characterized by integrity, character, and intelligence.

Marty Plax's academic background made him an ideal candidate to serve as director of the committee. After receiving an undergraduate degree from Washington University in 1963, he went on to the State University of New York at Buffalo where he earned a Masters Degree and Ph.D. in Political Science. Dr. Plax then embarked on a highly distinguished academic career, which included lecturing and holding professional positions at a number of major universities. In addition, Dr. Plax shared his expertise as the Visiting Scholar at the Hebrew Union College in Los Angeles and served as Adjunct Associate Professor at Cleveland State University since 1979.

Moreover, Dr. Plax is a man with a strong social conscience, who used his academic training to assist him in community involvement. He is a prolific social writer who has published several books, numerous articles, and countless "Letters to the Editor." However, his writings were only one aspect of his community work. He can be best described as a "Contemplative in Action." A leader in Community Conflict Resolution, he has been involved with mediation since 1968, served as Chairman of the Ohio Boxing Commission, as a member of the Community Relations Committee for The Cleveland Orchestra, and on the State Advisory Committee of the U.S. Civil Rights Commission.

I ask my colleagues to join me in rising to honor this truly remarkable individual for his distinguished years of service to Cleveland, the United States, and the world.

REMARKS BY BILL WEBB, EXECUTIVE DIRECTOR OF THE CONGRESSIONAL FIRE SERVICES INSTITUTE

HON. CURT WELDON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 8, 2002

Mr. WELDON of Pennsylvania. Mr. Speaker, I would like to enclose in the CONGRESSIONAL RECORD the remarks of Bill Webb, Executive Director of the Congressional Fire Services Institute, during a ceremony honoring one of our colleagues, NICK SMITH of Michigan, for his support of our Nation's fire and emergency service personnel.

Good afternoon. My name is Bill Webb, Executive Director of the Congressional Fire Services Institute. Established as a nonprofit, nonpartisan policy institute, CFSI serves a unique role in Washington, DC educating Congress about the needs and challenges of our Nation's fire and emergency services . . . not the needs of one particular facet such as the career or volunteer fire service or the chiefs, but all fire and emergency services providers.

Each day, we work with a select group of members—allied members so to speak—who understand the cooperative roles of our Nation's fire service and the Federal Government in protecting our communities. They represent both sides of the political aisle. Our efforts are geared towards developing legislation and influencing Federal policies for the betterment of public safety.

Today, we are honoring a true champion of our Nation's fire and emergency services, Congressman Nick Smith. While Congressman Smith represents the 7th district of Michigan, his contributions to public safety go way beyond his Congressional district, impacting the readiness of over 26,000 fire departments, nationwide.

The fire service is greatly indebted to this individual for championing many of our causes. For instance, two years ago, Congress authorized for the first time a major grant program specifically for local fire and emergency services departments. This year, the Assistance to Firefighters Grant program was funded at $360 million. It was through the efforts of Congressman Smith and a select group of colleagues that this program became a reality, enabling thousands of departments to receive funding to help reduce the threat of fire and other dangers within their local jurisdictions.

Operating a fire department is not an easy task. Nor is getting Federal programs established. The grant program was no exception. I'll never forget a meeting I attended two years ago in a Congressional office regarding this program. A number of Congressmen and women were meeting with the OMB Director to express their frustration with the budget proposal which failed to include funding for this program. One of the most vocal members at the meeting was Congressman Smith, who was not shy about expressing his frustration over the lack of funding. Two days later, the OMB Director had a change of heart and placed $100 million in the budget for this grant program. Everyone at the meeting would agree who made the difference for the fire service that day.

And before this program, Congressman Smith was working to revitalize the mission of the United States Fire Administration. In 1999, a blue ribbon panel charged with reviewing the mission of the Fire Administration issued a report questioning, among other things, an apparent lack of leadership within the Administration. The report included 34 recommendations for improvement.

Much of the problem had to do with a lack of funding—badly needed funding for research, education and training. As Chair of the Basic Research Subcommittee, which has oversight of USFA, Congressman Smith was able to significantly increase the funding authorization, enabling Congress to infuse a financial dose of medicine into the staggering agency.

That same year, I had the honor of attending the National Fallen Firefighters Memorial Service in Emittsburg, Maryland, an annual event honoring the sacrifices of those firefighters who fell in the line of duty that year. Congressman Smith delivered the special address. I don't remember any particular thing he said; but what I do recall is that he didn't read from a prepared script, but rather spoke from the heart. You could easily sense Nick Smith's admiration and respect for all first responders.

Congressman Smith is an individual of great character, a man who is truly dedicated to supporting our Nation's fire and emergency services. The events of September 11th have made all of us work a little harder to ensure we are ready for the next attack. In the case of Nick Smith, it has become a passion, an unrelenting mission for which we should all be grateful.

I have just shared with you my observation of Nick Smith in Washington. Now it is my pleasure to turn the microphone over to Chief Victor Hilbert, of the Delta Township Fire Department who will offer some insights into how the Congressman's work has benefited public safety in his own Congressional district.

TRIBUTE TO THE WILKERSON CHAPEL

HON. JOHN SHIMKUS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 8, 2002

Mr. SHIMKUS. Mr. Speaker, I rise today to pay tribute to the Wilkerson Chapel and the anniversary of its 140 years of service to the community of Collinsville, Illinois.

The people of the Wilkerson Chapel are truly good Samaritans. They have spent 140 years preaching the word of Christ to Collinsville and surrounding areas and participating in other good works.

To such people as Rev. Charles Orr and his congregation, the good deeds themselves are their own best rewards. Yet, on this special day, I think it is appropriate that they are recognized for their efforts. They are good Christians and good Americans, and remind us all of the compassion and energy that makes this country great.

To the people of the Wilkerson Chapel, thank you for all your good works over almost the last century and a half; and may God grant you the opportunity to continue doing His work for many years into the future.

RECOGNIZING STAFF SERGEANT WINFORD EVANS AS THE RECIPIENT OF THE DISTINGUISHED SERVICE CROSS

HON. JO ANN EMERSON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 8, 2002

Mrs. EMERSON. Mr. Speaker, on Saturday, March 30th, a great soldier and leader was awarded the Distinguished Service Cross, 56 years after its authorization.

Sadly, the recipient, SSG Winford Evans, who fought for this country in World War II passed away in 1991. However, the U.S. Army presented the award, along with two others, to his family during a ceremony held in Sikeston, Missouri.

SSG Evans earned the Distinguished Service Cross for his heroic action during a July 1945 battle in the Southwest Pacific Theater. Seeing his platoon leader wounded, SSG Evans disregarded enemy fire and brought the leader to safety. As the battle progressed, he directed mortar attacks and was wounded but continued to fight. Less concerned with his own immediate safety than with defending those around him, he positioned himself within 25 yards of the enemy, threw hand grenades, fired on the enemy and wounded and killed several enemy soldiers.

In addition to the Distinguished Service Cross, SSG Evans was awarded two Bronze Star Medals. The first has an oak leaf cluster and the other one has a "V" device. These two medals were awarded to SSG Evans for his heroic achievements in the Asian Pacific Theater from 1943–1945.

This May as we take time to celebrate Military Appreciation Month, it seems fitting that we recognize men and women in uniform like SSG Winford Evans. His sacrifice, along with the sacrifice of so many others who stood in harm's way to defend our country, remind all of us of the selfless valor of our military men and women. I am hopeful, particularly during this time of military action abroad, that others will reflect on the service and dedication of those who came before SSG Evans and those who will come after him and hold in their hearts an appreciation and admiration for their actions and desire to secure peace and freedom for all of us.

Mr. Speaker, on this very special occasion, I ask that all of my colleagues join me in recognizing and remembering SSG Evans and extend our best wishes to his family as they remember his service to the United States of America.

EXPRESSING REGRET AND SYMPATHY FOR FAMILIES OF CANADIAN SOLDIERS WHO LOST THEIR LIVES IN SOUTHERN AFGHANISTAN

SPEECH OF

HON. CASS BALLENGER

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 7, 2002

Mr. BALLENGER. Madam Speaker, I rise in support of H. Res. 412 and offer my sincerest condolences to the families and friends of the four Canadian soldiers who gave their last full measure of devotion in the defense of liberty during Operation Enduring Freedom last month. Eight of their comrades also were wounded in the same tragic incident. They, along with the rest of Canada, are now left to mourn the loss of their fellow patriots.

The tragic event of April 17 should remind all of us that war is dangerous. Service men and women often risk their lives each and every day, so that we may enjoy our freedom and security. These brave Canadians have made the ultimate sacrifice for Canada and for freedom throughout the world. Today, I pray for their families and loved ones.

Canada is not only our neighbor, it has been our closest friend and ally. Soon after the terrorist attacks on September 11, Canadian families selflessly opened their homes to American travelers who were stranded in Canada when American airspace was closed. Since then, Canada has stood, shoulder to shoulder, with its American ally to face the forces of evil in Afghanistan and elsewhere. Despite this tragic accident, Canada and the United States will continue to stand together and fight our mutual enemies until they are vanquished and peace prevails.

Canada, we grieve with you today for your fallen heroes. Their dedication and steadfastness in the face of danger should be a source of pride and comfort. With soldiers like these, I have no doubt that the days of the terrorist are limited and that victory will be ours.

I want to commend my friend and colleague from New York, Mr. HOUGHTON, for this resolution. I urge my colleagues to stand with our Canadian neighbors and support passage of the resolution.

TANF REAUTHORIZATION

HON. MAXINE WATERS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 8, 2002

Ms. WATERS. Mr. Speaker, in the past several weeks we have heard a lot of talk about TANF reauthorization. The Bush Administration wants to increase the number of hours that welfare recipients work to 40. Twenty-four hours would have to be in work-related activities, activities that do not include education or vocational training.

But even in the remaining 16 hours, the limits on education and job training are severe in the Republican proposals. Recipients can receive vocational training, education, or rehabilitation and substance abuse treatment for a total of three months in a 24 month period.

We know that education is one of the main avenues for a person to move out of poverty. A year 2000 survey of people who left the welfare rolls after 1996 found that only those workers who had at least a two-year post secondary or vocational degree were able to rise above the poverty line.

Single female heads of households with a high school diploma are 60 percent more likely to have jobs. That number increases to 95 percent when they have an associate's degree.

We need to focus less on putting people in jobs, and focus more on training people for careers with room for advancement. TANF Reauthorization should be about reducing poverty, not reducing caseloads.

RECOGNIZING THE OUTSTANDING WORK OF THE CONGRESSIONAL TOWN MEETING STUDENTS OF THE UNIVERSITY OF VERMONT

HON. BERNARD SANDERS

OF VERMONT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 8, 2002

Mr. SANDERS. Mr. Speaker, today, I recognize the outstanding work done by participants in my Student Congressional Town Meeting held this spring at the University of Vermont. These participants were part of a group of high school students from around Vermont who testified about the concerns they have as teenagers, and about what they would like to see government do regarding these concerns.

FINANCIAL AID AND HIGHER EDUCATION

(By Candace Crosby and Kim Dickenson Apr. 8, 2002)

CANDACE CROSBY. As students preparing for college, we find that the financial issue is becoming a larger problem compared to what our parents had to pay for college tuition. According to a VSAC representative, 70 to 80 percent of students today need some type of financial aid. The rates for tuition are high, but what's worse is that they are rising at a rate of about 5 percent a year all over the country.

What concerns us as future college students is how we will be able to pay for the tuition, and tuition doesn't include room and board and other expenses. We think that, today, there is a lack of adequate financial aid for college-bound students.

When preparing to pay for college, teens in Vermont turn to VSAC—which is the Vermont Student Association Corporation—for financial help. Of course, VSAC is a healthy program, but are they able to give financial aid to all the students that need it? No. Does VSAC have enough money to give scholarships and grants to the teens that need it at the same increasing rate that college tuition is rising? No.

We spoke to a representative from VSAC who gave us the information that VSAC has increased their funds for scholarships and financial aid, but has not been able to keep up with the increasing tuition costs. Based on one of VSAC's grants, the Vermont Incentive Grant, fulltime graduates can get between $500 and $8,650 for one year to help pay for college. The $8,650 is an extremely helpful amount of money to receive, but not all the teens going to college will receive this amount. Even if a student gets the minimum, $500, it will not even begin to help for any student to pay for their college education. It will only cover a few of the books that students will need for their first year of college.

KIM DICKENSON. Online at USNews.com, we searched for college tuitions for various Vermont colleges. We looked up the cost at Castleton State College, Lyndon State College, UVM, Johnson State College, VTC and Southern Vermont College. We found that the average tuition costs for these schools was approximately $6,825. We found that the average room and board add approximately $5,520 more to tuition. Together, this amounts to $12,345. Even more interesting is that some of the room-and-board costs are higher than the tuition costs. At Castleton State College, tuition is $5,392, and room and board is $5,530. $12,000 is a lot of money, even with VSAC's help, but students leave colleges thousands of dollars in debt.

What about students who want to go to college outside of Vermont? These costs are astronomical, and the tuition alone can be $20,000 or $30,000, because the students are not residents of the state. How are students supposed to pay for college without a lot of financial aid when they go to these schools?

0 percent of Vermont students take out loans provided by VSAC. We found a list of loans that could be borrowed from VSAC, and the amounts ranged from $1,000 to $50,000. Even if a student went to a college that had a tuition of $25,000 a year, and they took out a loan to pay for the first two years, they would have to pay back 73,615. The student pays 23,615 more dollars in interest. That is practically paying for a third year of college.

We think that is a ridiculous amount. We thought of a few solutions so that students can receive more financial aid and won't have to have an enormous debt to pay back. The burden of debt would decrease if funds for scholarships, grants and other financial aid would be increased. We think the federal and state governments should fund VSAC's financial aid programs even more then they already do. This would enable more students to receive money so that the financial burden on families wouldn't be as great.

THE RIGHTS OF THE ABENAKI

(By Evan Worth, Alan Blackman, Nicolette Baron, and Steph Bernath Apr. 8, 2002)

EVAN WORTH. We are doing the issue of Abenaki rights. And as of now, they are not recognized as an Indian tribe. They have been pushing, seeking federal recognition for the past 25 years, which is a criteria for federal recognition, which they need to have been a continuous entity since 1900, they need to have existed as a community since before 1900, there needs to be a political influence throughout history, they need a membership criteria and governing procedures, they need roots before 1900, and they cannot be members of any other type of group, and cannot be stripped of their status.

ALAN BLACKMAN. Vermont seems to have a very long-held tradition in being first in giving people, specific groups of people, rights—outlawing slavery, granting rights for all men to vote, and, more recently, civil unions. I feel we should continue this. And in doing this, it is another way to, so to speak, take Vermont forward.

The main concern against this, particularly Governor Dean's apprehension with granting them recognition is, casinos and land claims. Chief April Rushlow has claimed on numerous occasions that, quite frankly, they have higher concerns, such as burial grounds and things of this nature. The main reason they want this, what provoked this, actually, such a strong pursuit of this, was kids being taunted at school for being Abenaki, but not being recognized by the government. What they want is essentially grants for education, healthcare, things they couldn't get as of now. And I feel that it is a good idea and it would be a step in the right direction to grant them recognition.

NICOLETTE BARON. Some of the qualms that state government has cited for not giving recognition to the Abenaki was extra rights, aside from those already given to minorities, the fact that it will lead to federal recognition, and they can institute their own laws and have their own fish and wildlife regulations that do not need to concur with the guidelines of the state.

On the issue of the minorities, the minorities that are around the nation and around the state are African-Americans and Hispanics. While those groups do have an important part in the history of this state and the nation, the Abenakis were among the first inhabitants of this state, and they are the only native American tribe that has not been recognized.

State recognition could lead to federal recognition, which would give the Abenaki rights to make their own laws, including those regarding fish and wildlife regulations. The laws that they would make would most likely conform to the Constitution of the United States, not go beyond that or not be radical, which I think is what the state government is concerned with. All laws would be to prohibit harm and to make it, you know. And fishing and wildlife laws would be based on the need to eat, and not hunting game, not game-hunting. And being recognized as a tribe would allow them to sell their wares, like basket weaving, which is a tradition in the Abenaki, and to get better economic status for these people. And it would give them rights with scholarships, and that's really important, to send their kids to school.

STEPH BERNATH. What I find to be very disturbing about the Abenaki struggle for recognition is the negativity exhibited by the state department. I have yet to hear the acknowledgement from the state department that something positive may come out of the Abenaki getting the recognition they obviously deserve. Nearly every argument brought forth by the state of Vermont has been critical of what the tribe may do once they receive recognition. It has been made clear very many times that the Abenaki are not interested in gambling or hurting Vermonters in any way. Chief April Rushlow has clarified this one too many times.

The victims of this criticism, on the other hand, the Abenaki, have openly acknowledged they are aware of what the State Department fears may happen to those people who live on Abenaki land if they are given recognition. They have said that they are willing to work with the people of Vermont, as they have done in years prior, and stated that they have nothing to fear from the tribe.

The Abenaki are willing to work with the state of Vermont, but it appears as if the state of Vermont is unwilling to work with the Abenakis, the People of the Dawn, the people who have lived in Vermont for thousands of years. It is time that these people receive the recognition they deserve. The state of Vermont must be willing to give them a chance to prove who they are and what they stand for.

Chief April Rushlow has stated, "We're the only race in the United States who has to prove who we are." She was right. Chief Rushlow also said, "We're here when it is convenient for the state of Vermont." Once again, Chief Rushlow was right.

HONORING SUMNER COUNTY EXECUTIVE THOMAS MARLIN ON THE OCCASION OF HIS RETIREMENT FROM GOVERNMENT SERVICE

HON. BOB CLEMENT

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 8, 2002

Mr. CLEMENT. Mr. Speaker, I rise today to honor Sumner County Executive Thomas C. Marlin on the occasion of his retirement from government service. I consider him to be a good friend of the Clement family and appreciate his dedication to the people of Tennessee and Sumner County in particular.

An outstanding public servant, Marlin. was born and raised in Nashville, Tennessee. He served his country in the U.S. Navy from 1952–1956. Upon returning from his tour of duty, he worked in the private sector at the telephone company for some 22 years. During this time he became active in county government, serving as election commission chairman, county coroner, and county magistrate, respectively.

In 1976 he was elected Assessor of Property where he served honorably for 18 years. He was also an active member of the Board of County Officials Association and was elected President of the Tennessee Association of Assessing Officials by his peers across the state. In 1988, he was named Overall Outstanding County Official of the Year for the entire state of Tennessee.

Marlin ran for and won the office of Sumner County Executive in 1994, a position from which he will retire this month after working relentlessly to make various improvements throughout the county, including upgrading the county road system. Additionally, he has been an active participant in community and civic organizations within the county throughout his life.

Marlin and his wife of 46 years, Nancy, are members of Hendersonville Church of Christ and have two children and four grandchildren. In his leisure time he enjoys fishing and University of Tennessee football.

As a county executive with a solid open door policy to the citizens of Sumner County, Marlin's motto has always been, "It is a pleasure to serve you."

May he be commended for his tenure of public service and enjoy his retirement.

KLUGERS RECEIVE ANTI-DEFAMATION LEAGUE DISTINGUISHED COMMUNITY SERVICE AWARD

HON. PAUL E. KANJORSKI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 8, 2002

Mr. KANJORSKI. Mr. Speaker, I rise today to call the attention of the House of Representatives to the well-deserved recognition that my friends Allan M. and Sue Kline Kluger will receive from the Anti-Defamation League on May 8, 2002, in Plains Township, Luzerne County, Pennsylvania. The Klugers will receive the League's 2002 Distinguished Community Service Award.

Allan is the president and founder of the Wilkes-Barre-based law firm Hourigan, Kluger & Quinn, P.C. He is a graduate of Wyoming Seminary, Amherst College and the University of Pennsylvania Law School.

He is a member of the board of directors of Luzerne National Bank, Bertels Can Company, King's College, the Valley Auto Club, Bloomsburg University Foundation, F.M. Kirby Center for the Performing Arts, Northeast Pennsylvania Ethics Commission and the Luzerne Foundation. Mr. Kluger is also on the board of directors and executive committee of the Greater Wilkes-Barre Chamber of Business and Industry.

He has received the following honors: B'nai B'rith Outstanding Citizen Award, Ethics Award given by Ethics Institute of Northeastern Pennsylvania, Wyoming Seminary Distinguished Service Award, Boy Scouts Distinguished Citizen Award, and Lifetime Achievement in Philanthropy Award presented by the Greater Pocono Northeast Chapter of the National Society of Fund Raising Executives.

Sue, a graduate of Goucher College and College Misericordia Graduate School, has served as the executive director of Leadership Wilkes-Barre for the last 20 years. Leadership Wilkes-Barre brings together existing and emerging leaders from throughout Wyoming Valley and exposes them to the problems and challenges of their community and motivates and encourages them to assume leadership roles in community affairs.

She has received the following honors: Woman of the Year, Sisters of Mercy; Lifetime Achievement in Philanthropy Award, National Society of Fund Raising Executives; Preceptor Award, National Association for Community Leadership; National Director of Who's Who in Executive and Professional Women; United Way of Pennsylvania, Volunteer of the Year Award; Alumni Medallion, College Misericordia; B'nai B'rith Distinguished Service Award; Distinguished Daughter of Pennsylvania; U.S. Postal Service Honoree for Women's History Month; Northeastern Pa. Council of Boy Scouts Honoree, Salute to Northeastern Pennsylvania Women; and Athena Award, Greater Wilkes-Barre Chamber of Commerce Award for Outstanding Business Women.

Sue is also on the board of directors of Northeast Regional Cancer Institute, the Diversity Institute and the Greater Wilkes-Barre Chamber of Business and Industry. She is a trustee of Wyoming Seminary and a member of the Northeastern Regional Advisory Board of PNC Bank.

Allan and Sue have three children, Attorney Elizabeth Kluger Cooper of Great Falls, Va.; Attorney Joseph E. Kluger, Allentown and Wilkes-Barre; and Lawrence Kluger of Mechanicsburg. The couple also has four grandsons.

Mr. Speaker, I am pleased to call to the attention of the House of Representatives the service to the community of Allan and Sue Kluger and this well-deserved award, and I wish them all the best.

PERSONAL EXPLANATION

HON. DOUG BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 8, 2002

Mr. BEREUTER. Mr. Speaker, on May 7, 2002, official business on the other side of Capitol Hill caused this Member to unavoidably miss roll call vote 128 (H. Con. Res. 271, expressing the sense of the Congress supporting the National Importance of Health Care Coverage Month). Had this Member been present he would have voted “aye.”

WHAT AMERICA MEANS TO ME

HON. MARK FOLEY

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 8, 2002

Mr. FOLEY. Mr. Speaker, I rise today to pay tribute to young Americans who have penned essays describing the ideals and characteristics that they believe make this country great. These essays, entitled “What America Means to Me,” are particularly impressive because they were written by elementary students at The Joseph Littles—Nguzo Saba Charter School in West Palm Beach, Florida.

The following 4th and 5th graders are to be commended for their inspirational works: Alia Bougouneau, Diandra Buchanan, Simon Calixte, Diriki Geuka and Stewart Scott. These students have indeed impressed their fellow students, teachers and the surrounding community.

The dreams expressed by these students are dreams common to every American but I find it remarkable that these students have, at such a young age, already grasped the essential strands that weave our country together with great strength. Our country is one that has always thrived on the support of its citizens and, now more than ever, this support is integral to our nation’s might. I am most pleased to honor these young Americans for their show of support to the country they love. Mr. Speaker, let the record reflect Congress’ appreciation for their efforts.

MINNESOTA MOURNS THE DEATH OF LLOYD DUXBURY, JR.

HON. JIM RAMSTAD

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 8, 2002

Mr. RAMSTAD. Mr. Speaker, I rise to salute a Minnesota legislative giant who served our great state with the highest distinction and recently passed away at the age of 80.

Former Speaker of the Minnesota House of Representatives, Lloyd L. Duxbury, Jr., served in the Minnesota Legislature from 1951 to 1969, the final eight years as Speaker. I had the privilege of working for Speaker Duxbury as his chief aide in 1969—and I will forever be grateful for that invaluable experience and our friendship of the past 33 years.

“Dux,” as he was affectionately known to his countless friends, was a very influential leader in our state’s political history, a brilliant lawyer-legislator and legendary politician.

Everyone loved “Dux”—for his infectious laugh and great sense of humor, as well as his warmth, charm and love for people from all walks of life.

Speaker Duxbury was born and raised in Caledonia, Minnesota, a small town in the southeastern part of our state. Dux loved his bluff-and-farm-filled native southeastern Minnesota. He loved the farmers and small shopkeepers, and he loved his fellow lawyers and legislators.

And everyone loved Dux!

From his prep school days at Phillips Exeter Academy to his college and law school years at Harvard University, Dux had literally thousands of friends and admirers, as his legendary career touched thousands of lives.

Dux served his country in the U.S. Army from 1943 until 1946. He received his B.A. degree from Harvard University in 1947 and his J.D. degree from Harvard Law School in 1949.

Elected to the Minnesota House in 1950, shortly after graduating from Harvard Law School, Dux rose to the leadership ranks. He was highly respected as a legislator, served the House Conservative Caucus as its leader from 1959 until 1962, and was elected Speaker of the Minnesota House in 1963.

Lloyd Duxbury’s top legislative priority was fairness. That’s why he worked so hard in Minnesota to remove the tax on people’s personal property and convert it to a sales tax.

Speaker Duxbury worked with people of all sides to get things done and he was at his best when circumstances got the most heated.

Dux brought people together to solve problems, and he hated partisan wrangling. When President Richard Nixon nominated Dux to be U.S. Attorney in 1969, he turned the post down because of its partisan nature.

Following his retirement as Speaker in 1969, Dux was appointed Vice President and Counsel of the Burlington-Northern Railroad and moved to Washington, D.C.

Subsequently, Dux worked for the U.S. Senate Committee on Aging and lobbied for the National Committee to Preserve Social Security and Medicare. At age 78, he was still taking the subway to his office here before returning to Minnesota so he could spend more time with his beloved family and friends.

Lloyd Duxbury is survived by his son and daughter-in-law, Dr. David and Margaret Duxbury, daughter, Marna Duxbury and 3 grandchildren, Nicole, Christine and Jacob Duxbury, as well as his brother, John Duxbury.

You might be gone, Dux, but you will never be forgotten, as your legacy will live forever.

You truly represented the best in public service, Speaker Duxbury, and your love for your family, friends and country will live forever in the hearts of each of us. God bless you, Dux, and rest in peace dear friend.

TRIBUTE TO DR. ROGER BOYKIN

HON. GREGORY W. MEEKS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 8, 2002

Mr. MEEKS of New York. Mr. Speaker, I rise today to pay tribute to a man whose commitment and dedication in the areas of health and community service warrant our utmost commendation. On Friday, Dr. Roger Boykin will be honored for his many years of community service in the City of New York at a celebration entitled “A Salute to Our Very Own.”

I feel privileged to have known and worked along side Dr. Boykin, a long time resident of Jamaica, New York. On a first hand basis, I can attest to the fact that the quality of life in communities across the great State of New York has been enriched by the diligence and compassionate commitment of Dr. Boykin. Very early in his life, career and residency, Dr. Boykin demonstrated his singular purpose as care and concern for others. With patience and compassion, Dr. Boykin served his community and his state in fine form.

Dr. Boykin was born the son of Richard Boykin, Sr. and Thelma Boykin. He attended Brooklyn Technical High School. He went on to receive his Bachelor of Science in Pharmaceutical Sciences (cum laude) from Columbia University School of Pharmaceutical Sciences. Following his life long passion to become an M.D. and a servant in the community, young Roger successfully completed his Doctor of Medicine degree (cum laude) from State University of New York-Downstate in June of 1973.

After completing his residency and internship at State University of New York Downstate Medical Center/Kings County Hospital Center and Brooklyn Veteran’s Administration Medical Center respectively, in Internal Medicine, he received a Fellowship and served at Albert Einstein Hospital, Bronx Municipal Hospital and VanEtten in Pulmonary Medicine.

His unique talent for giving to the community and his expertise in his profession were not lost on his peers and colleagues. Among his many achievements include certification as a Diplomate of The National Board of Medical Examiners; Diplomate of The American Board of Pulmonary Medicine; Diplomate of the American Board of Critical Care Medicine; Diplomate of the American Board of Geriatric Medicine; and, he is a Member in good standing of the American Lung Association of Queens.

Dr. Boykin practiced his unique brand of compassionate medical care and considerate patient relations as a staff physician at Brooklyn Veterans' Administration Medical Center, Catholic Medical Center of New York, Mary Immaculate Hospital, and The Jamaica Hospital. In 1982, he began his career as an instructor in Clinical Medicine at State University of New York Downstate Medical Center and in 1992, Dr. Boykin became an Assistant Professor. Currently, Dr. Boykin is the Associate Chief of Staff for Primary and Extended Care for Veterans Affairs, New York Harbor Healthcare System; Assistant Professor of Clinical Medicine at state University of New York Health Sciences at Brooklyn; Assistant Professor of Clinical Medicine at Touro College and an Instructor for the American Heart Association.

Throughout his career, Dr. Boykin has served his patients with compassion and care. Through his many years of service to the community, he has contributed to the improvement and enrichment of his neighborhood family. Dr. Boykin may have single handedly changed the standard of behavior for community physicians involved in public service. He has for many many years worked with and perpetuated the highest professional standards, unwavering commitment, and irreplaceable knowledge and expertise. He has put much more than a dent in the quest for quality health care for all and we in the State of New York are most grateful to be the recipient of his personal largess and generosity.

"A Salute to Our Very Own" is a fitting title for honoring Dr. Boykin. He is our very own. He has made a nation and a neighborhood a much better place to live. He has given without reserve and we can only hope to thank and commemorate him adequately.

I wish him well in all his future endeavors and join with my Queens family, friends, colleagues and fellow elected officials in commemorating his years of service.

IN HONOR OF TOM BARRON

HON. MARK UDALL

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 8, 2002

Mr. UDALL of Colorado. Mr. Speaker, I rise today to honor Tom Barron for his extraordinary advocacy of environmental causes and his unwavering commitment to young people everywhere.

A dear friend of mine once said that she looked for two qualities in leaders—that they care about the earth, and that they care about kids. If caring about the earth and kids is the mark of a special leader, and I believe it is, then Tom Barron is such a man.

Tom grew up in the ranch country of Colorado with his seven brothers and sisters. It was on the family ranch that he developed a love for the land and a passion for exploring nature—all at a very young age. Tom has been a manager of a successful venture capital business, a Rhodes Scholar, a board member of the Wilderness Society, Yale University and a Trustee for the Nature Conservancy of Colorado. Today he is a very popular writer who has created the beloved characters of young Merlin and Kate, in The Ancient One.

He believes that stories are the most powerful and effective way to express complicated and philosophical points of view. He knows that experience, rather than lectures, are often what teach us the most in life. This is very clear in all of his work. In The Lost Years of Merlin, Merlin learns all of his most important lessons from nature. He learns how to be humble and to understand his connection to the larger universe. Most important of all, he realizes his fundamental responsibility to something greater than his own self-interest. Tom's character Kate, the heroine of The Ancient One, turns herself into an ancient redwood tree in order to save her town. In the book, a chain saw cuts into the side of the tree, into Kate's side, which is a powerful metaphor for violence, cruelty and senseless destruction.

Throughout his professional and private life Tom Barron has made it a goal to bolster educational causes and recognize exceptional young people. He has donated incredible amounts of his own time and many resources to the betterment of children's lives. His mother, Gloria Barron, spent twenty years creating The Touch Museum at the Colorado School for the Deaf and Blind. She was an example of selflessness and service, and to honor his mother, Tom Barron founded the Gloria Barron Prize for Young Heroes. The prize honors young people from diverse backgrounds who have shown exceptional leadership in making the world a better place. Recipients of the award have distinguished themselves by organizing many wonderful projects, including the creation of scholarships, working to conserve a local river, and organizing a rodeo for disabled children.

Mr. Speaker, I ask my colleagues to join me in expressing our gratitude to Tom Barron for his extraordinary contributions to Mother Earth and to all of her children.

RELIGIOUS FANATICISM AND HUMAN RIGHTS IN SAUDI ARABIA

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 8, 2002

Mr. LANTOS. Mr. Speaker, in recent months our Nation, and this Congress, has sought to understand the motivation for and consequences of religious fanaticism, especially in the Middle East. An opinion article entitled "In Saudi Arabia, an Extreme Problem," published in the Washington Post today brings into focus the fundamental problem of religious fanaticism in Saudi Arabia. This insightful article asserts persuasively that political and religious fanaticism has given rise to the deplorable human rights conditions, particularly concerning women, in Saudi Arabia. The article is all the more compelling because its author, Sulaiman Al-Hattlan, is a Saudi Arabian citizen and a courageous voice for democracy and human rights and who has witnessed firsthand the devastating effects of religious fanaticism in his country. He believes that the Saudi government must pursue reforms in order to promote education, free-thinking, political participation, and the human rights of the Saudi people. Mr. Speaker, I earnestly commend the following article to the attention of my colleagues and request that the article be placed in the CONGRESSIONAL RECORD.

[From the Washington Post, May 8, 2002]

IN SAUDI ARABIA, AN EXTREME PROBLEM

(By Sulaiman Al-Hattlan)

While the Saudi Crown Prince Abdullah rightly searches for peace in the Middle East, it is equally important for us in Saudi Arabia to seek peace for our own home.

As a citizen of Saudi Arabia, I dread the possibility that Osama bin Laden might instigate a repeat of a deadly 1979 Saudi government mistake. In that year, a group of religious fanatics occupied the Grand Mosque of Mecca. They denounced the legitimacy of the Saudi government, claiming that it wasn't "Islamic" enough. The government managed to reclaim the mosque, and later the group's leader and most of his followers were executed.

But the end of the story had a twist: Though the government killed the extremists, it then essentially adopted their ideology. After the Mecca incident, Saudi authorities began imposing crushingly strict and pointless rules. Women were banned from appearing on television. Music was not allowed to be played in the Saudi media. Stores and malls closed during the five daily prayers. Members of the religious police were granted more power to intervene in people's personal lives. The Saudi government did all of this to please the Islamists, perhaps fearing further extremist threats. The fundamentalists interpreted these government actions as a nod to their power and an indication that they were now dictating the rules of the game.

The result has been all sorts of restrictions that have created notions of fanaticism in the kingdom, and a society with a constant undercurrent of a "witch hunt." Different groups in Saudi society end up competing with fundamentalists over who can appear more conservative in the public eye. Our private life, too, has been full of contradictions and hypocrisy, as we seek to avoid being alienated or excluded as "seculars" or "liberals." In our obsession with our image, and fearing each other, we all lose. As a society, Saudi Arabians lost 20 years of a generation by avoiding a harsh reality: Our government was wrong, and, by extension, so were we. None of us dared to say it loudly then, and some still cannot say it. But our reaction to the 1979 Mecca tragedy has created a generation of angry, confused young people, many of whom have become fanatics, including those 15 Saudis among the 19 suspects in the Sept. 11 terrorist attacks and the 100—or more—Saudi prisoners in Guantanamo. How many other confused young Saudis are still out there?

It does not take a great deal to describe the motives of terrorism. Oppression and poverty are an easy recipe for fanaticism. People with no option of independently leading their lives will more willingly follow an extremist mentality because they know nothing else, and have no moderate alternatives to compare it with. This extremist mentality becomes so entrenched and pervasive that its endurance is not dependent upon the life or death of one persuasive leader. Therefore, whether bin Laden eventually is killed or survives the current war is a temporary concern; in the long term, the real issue is the endurance or destruction of his rabid philosophy.

The Saudi government itself must fight against all kinds of monopoly of thought or debate. Right now, it faces a historical opportunity to develop its educational system, augment freedom of the press and expand women's rights, among other pressing issues. It can begin to give qualified, young, educated Saudis access to more political participation. This would involve ending regionalism, a process that gives greater privileges to some families from certain Saudi regions. As an added bonus, such a measure would safeguard against future tribal conflicts—still very much a part of Saudi national politics—that could result from the continuation of regional economic and political favoritism. It might also help end the civil cold war our society, silently, is going through.

Saudi Arabian society must also start a tough process of social and political reform. Our independent writers and intellectuals should be part of a public social dialogue that tolerates different ideas and thoughts. Our universities need to open doors for political and social activities to their students: At the very minimum, students ought to have the right to form students' organizations. This would teach them the concept of "social activism," and to organize civilized and peaceful activities within their universities. Such ideas can help the next generation create and participate in a productive and peaceful civil society, instead of dying in Afghanistan or elsewhere for causes that most of them do not even fully comprehend.

What we learned from the deadly 1979 Mecca experience should be put to use now. Ending political and religious fanaticism is crucial for the survival of the Saudi society and its leadership. Release from this chokehold can only come from within Saudi Arabia. Just as Prince Abdullah has become the most promising hope for peace in the Middle East, he is also our best hope for immediate social and political reforms in the kingdom.

ENHANCED BORDER SECURITY AND VISA ENTRY REFORM ACT OF 2001

SPEECH OF

HON. NEIL ABERCROMBIE

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 7, 2002

Mr. ABERCROMBIE Madam Speaker, I voted "Present" on final passage of the Senate amendments to H.R. 3525, the Enhanced Border Security and Visa Reform Act of 2001. I fully support the bill's stated purpose of reducing threats posed by individuals and organizations which would enter the United States with the intent to commit acts of terrorism.

My concern with this measure centers on Section 306, entitled "Restriction On Issuance Of Visas To Nonimmigrants From Countries That Are State Sponsors of International Terrorism." Section 306 establishes a sweeping, over-broad prohibition against issuing nonimmigrant visas to citizens of any nation on the State Department's list of terrorist states.

This could preclude the kind of people-to-people contact that can change cultures, and even the political regimes of those countries. Even at the height of the Cold War, we had exchange programs involving students and scholars from Communist nations. By sharing their first-hand experiences and changed perspectives, returnees from these programs helped undermine the demonized image of the USA projected in the official propaganda of the Soviet Union and its satellites.

In many of the nations on the prohibited list, there is a vast reservoir of good will toward the United States and a broadly based public sentiment exerting a countervailing pressure against their regimes' official hostility toward our country. Iran is a case in point, where large numbers of voters in the most recent national elections cast their ballots in favor of candidates who disagreed with the policies of the dominant faction. It is a serious mistake to discount that popular sentiment and to ignore opportunities to strengthen it by exposing citizens of those nations to Americans and American life.

Section 306 authorizes the Secretary of State, in consultation with the Attorney General and heads of other agencies, to make exceptions to individual aliens covered by this Section if they are found to pose no threat to the safety or national security of the United States. Section 306 directs the Secretary of State, in consultation with the Attorney General and heads of other agencies, to develop standards for making these exceptions.

The language here is unacceptably broad. If the exemption guidelines or standards were outlined in the legislation, we would have had an opportunity to discuss and consider the merits of programs like education and cultural exchange and their usefulness for attaining U.S. national security and foreign policy goals. As it stands, it allows the current or a future Administration to establish exemption standards so narrow as to preclude the possibility of accruing the benefits of a broader—but still regulated with an eye to security considerations—exchange of citizens. In abdicating its role in setting standards, the Congress has forgone an opportunity to have a voice in this important aspect of policymaking.

COLONEL KENNETH J. SWEET HONORED AS LANCE P. SIJAN AWARD RECIPIENT

HON. GERALD D. KLECZKA

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 8, 2002

Mr. KLECZKA. Mr. Speaker, on Thursday, May 16th 2002, the Greater Milwaukee Aerie 4214 Fraternal Order of Eagles will award Colonel Kenneth J. Sweet (Retired) the Lance P. Sijan Award.

Lance P. Sijan was born and raised in the Milwaukee community of Bay View. After graduating from the Air Force Academy in 1965, he went to serve in DaNang, Vietnam where he flew sixty-six combat missions. On his last mission his plane was shot down over enemy territory and, although he evaded the enemy for 6 weeks, rescue efforts failed and he died as a prisoner of war.

Lance was posthumously awarded the Medal of Honor along with the Distinguished Flying Cross, two Purple Hearts, two Air Medals and a Certificate of Honorable Service. His courageous service is recognized throughout the country with scholarships and memorials.

Throughout a career that spans over 40 years, Colonel Kenneth J. Sweet (Retired) has served his country faithfully and in the same courageous manner as Lance P. Sijan.

Colonel Sweet's first assignment with the Army Air Corps was at Wheeler Field, Hawaii where he was on guard duty on December 7, 1941 when the Japanese attacked Pearl Harbor. He was among the first to fire a rifle in defense of his country at the start of WWII. After the war ended he became one of the founders of the 128th Air Refueling Wing when the unit gained Federal recognition in 1947.

During the Korean War, Colonel Sweet was active for 21 months, and earned his commission on September 29th, 1961. Retiring in 1982 with 40 years and 8 months of service to his country, Colonel Sweet remains active in the community, advocating for military retiree's in Wisconsin and founding the Wisconsin National Retiree Council in 1983, and has served as its director for 16 years.

So it is with great pride that I thank Colonel Kenneth Sweet for his years of dedicated military service, and congratulate him on receiving the 2002 Lance P. Sijan Award.

SENSE OF CONGRESS REGARDING PUBLIC AWARENESS OF THE IMPORTANCE OF HEALTH CARE EDUCATION AND HEALTH CARE COVERAGE MONTH

SPEECH OF

HON. DENNIS MOORE

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 7, 2002

Mr. MOORE. Madam Speaker, I rise today to express my support for H. Con. Res. 271, a resolution calling on the President to designate a National Importance of Health Care Coverage Month.

It is time for the leaders of our country to acknowledge that we are facing, in the near future, a nationwide health care crisis. This crisis will cut across all sectors. Seniors insured by the Medicare program and low-income children insured by the Medicaid program are facing severe cuts in nearly every state. Workers with employer-based insurance will face radically increased premiums, and the uninsured, who are already the most vulnerable will still be without.

The Baby Boomers will soon retire and flood the Medicare program. In preparation for this long-anticipated event, Congress has set forth unrealistic budgets calling for severe cuts in Medicare reimbursement for home health care, hospital services and nursing home services. At the same time, some physicians are refusing to take new Medicare patients due to an illogical and unworkable reimbursement scheme.

Hospitals are closing their doors across the country due to low federal reimbursements and lack of nursing staff. Recently, in my district, all but one hospital emergency room was declared "on diversion"—meaning they were unable to take any more ambulances or emergency patients. Yet, the administration plans to cut the hospital update again this year. We must do all that we can to ensure that this does not happen. I want to enter into the record a letter signed by myself and 24 Blue Dog colleagues asking the Speaker to support adequate reimbursement to all Medicare providers.

Think for a moment if our already crumbling health care infrastructure was challenged by a crisis—a terrorist attack resulting in a large number of casualties or a bioterror attack. The time for us to act—to secure our health care system, in terms of infrastructure, workforce and health insurance coverage—is now.

Approximately 44 million working Americans are uninsured. We in Congress need to realize that continuing to ignore the problem of the uninsured in our country will cost us as a nation—in terms of overall health and financial security.

The uninsured are more likely to delay doctor visits, delay needed care or choose not to receive that care at all. Last year, more than 40% of uninsured adults delayed a necessary medical test or treatment. Twenty percent say that they needed, but did not get, recommended treatment last year. Many who received treatment did so at a hospital emergency room. A third of uninsured children did not see a doctor in the past year.

Delaying, or not receiving health care treatment, can lead to more serious health problems. The uninsured are more likely to be hospitalized for avoidable conditions, such as pneumonia or uncontrolled diabetes. The uninsured who are finally diagnosed with cancer may often be in late stages or beyond treatment.

In addition to health consequences, the financial burden on families can be severe. Debt due to high, unexpected medical bills is one of the primary reasons that families file for bankruptcy. Nearly 30% of uninsured adults say that medical bills had a major adverse impact on their families' lives.

The burden falls on our local communities through our health care safety net—but that safety net is being stretched very thin. Community clinics and public hospitals in my congressional district, and all over the country, are straining under the burden of caring for uninsured Americans. Safety net providers, despite their good work, cannot take the place of quality health management and health insurance.

We know who the uninsured are. And we know where they work. The statistics show us that, overwhelmingly, low income workers in small businesses are the most likely people to be uninsured. According to the Blue Cross and Blue Shield Association, the working uninsured are most likely to be employed in firms with less than 25 employees.

But we in Congress are not doing a good job telling small businesses about the tax benefits available to small business owners who do the right thing and offer health insurance. A study of employers commissioned by the National Association of Health Underwriters found that small businesses are not always aware of the benefits, tax and otherwise, associated with offering health insurance.

Fifty-seven percent of small employers do not know that health insurance premiums are 100% tax deductible. Sixty-five percent of employers do not realize that health insurance premiums are treated like general business expenses with regard to taxes.

I have seen the Child Health Insurance Program make a difference to kids in my district. But despite the success of the CHIP program, 26% of poor children and 16% of near-poor children remain uninsured. Nine million American children remain uninsured.

Madam Speaker, it is time for our nation to address the health care crisis that is looming on the horizon. Congress needs to act immediately to ensure that our health care system is secure, by adequately funding and maintaining our infrastructure, addressing the workforce shortage, especially that of registered nurses, and ensuring that health care coverage is available and affordable for all Americans.

This resolution is a small part of that effort. Today, we need to take the first step to make the public aware of the importance of health care coverage—to ensure that small businesses are aware of the benefits of health insurance coverage, and that parents know when their children are eligible for Medicaid or CHIP.

Congresswoman WILSON and I are asking the President to designate a National Importance of Health Care Coverage Month to help bring this issue to the forefront of the national health care debate. During that month, I will challenge my colleagues to tell small businesses, parents of children and uninsured people in their congressional districts about the importance of health care coverage, the existing tax benefits of offering coverage to employees and the public and private programs for which they are eligible.

Lack of information should not be an additional barrier to health insurance access. We must begin now.

WASHINGTON, DC, *May 1, 2002.*

HON. J. DENNIS HASTERT,
Speaker, U.S. House of Representatives, Washington, DC.

HON. RICHARD A. GEPHARDT,
Minority Leader, House of Representatives, Washington, DC.

DEAR SPEAKER HASTERT AND MINORITY LEADER GEPHARDT: We are writing to express our dismay and disappointment in the latest recommendation by the Administration to pit provider against provider by using reductions to hospitals' market basket update to restore payments to physicians. We believe this proposal is short-sighted and ill-advised. While we certainly agree that physicians deserve fair and adequate reimbursement, the Administration's proposal jeopardizes the health of patients, the viability of our communities, and the financial stability of our hospitals.

The problems facing the Medicare program will not be solved without setting priorities and funding them through honest budgeting. The assumption by the Administration that Medicare will grow at a rate 10 percent less than projected by the Congressional Budget Office, and slower than medical inflation is irresponsible. Moreover, cutting Medicare payments for one provider to give to another fails to address the issue at hand: what are our priorities in the Medicare program, and are hospitals and doctors among them? We believe that they are both priorities and ought to be funded accordingly.

Therefore, we strongly disagree with the Administration's recommendation to use hospital reimbursement as a "cash cow" for other provider adjustments. Hospitals are not only the backbones of our healthcare system, but they are also the centers of our communities. We expect great things from them, such as enhancing bioterrorism preparedness, implementing the Health Insurance Portability & Accountability Act (HIPAA), hiring and retaining essential nursing staff, and above all providing timely, quality care to the patients they treat. What they expect from their govemment in return is fair reimbursement for the vital services they provide.

Our Medicare providers are facing very real and very serious circumstances, and we must answer them with serious solutions. Should Congress consider Medicare legislation this year, we urge you to support adequate reimbursement for the healthcare providers in our communities. We look forward to working with you to achieve this goal.

Sincerely,

Marion Berry, John Tanner, Max Sandlin, Mike Ross, David Phelps, Adam Schiff, Ellen O. Tauscher, Jim Turner, Charles W. Stenholm, Tim Holder, F. Allen Boyd, Jr., Dennis Moore, Collin Peterson, Gene Taylor, Bud Cramer, Joe Baca, Jim Matheson, Sanford Bishop, Jr., Chris John, Mike Thompson, Ronnie Shows, Mike McIntyre, Ken R. Lucus, Steve J. Israel, Jane Harman.

HONORING THE REVEREND DR. S. HOWARD WOODSON, JR.

HON. RUSH D. HOLT

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 8, 2002

Mr. HOLT. Mr. Speaker, I rise today to call the attention of my colleagues to an effort taking place in central New Jersey today to honor one of our area's most noted spiritual and community leaders, the late Reverend Dr. S. Howard Woodson, Jr.

Today, in the City of Trenton, New Jersey, one of our community's busiest thoroughfares, Calhoun Street, is being renamed in honor of Dr. Woodson. It's an expression of thanks from a grateful community for over half a century of leadership and community involvement by this amazing man.

Reverend Woodson was a community leader in Trenton since 1946. As the respected pastor of Shiloh Baptist Church, Dr. Woodson was also a noted leader in our nation's civil rights movement. As the Chairman of the Board of the Carver YMCA, Rev. Woodson fought to be granted independent status from the National YMCA, in order to desegregate that community institution. Later, as President of the State Conference of the NAACP, he convinced officials to convene the first state conference on housing discrimination. This conference raised awareness and led to many advances in housing rights for all in our community. Reverend Woodson's long and distinguished career has been marked by many firsts. He was the first individual of color elected as councilman-at-large in Trenton. He was also the first person of color to serve as Chairman of the Ranking Legislative Committee, Assistant Democratic Leader, and Speaker of the New Jersey State House.

In addition to being a respected and influential leader in community events, Reverend

Woodson nurtured and helped grow the congregation of the Shiloh Baptist Church into one of the strongest, most committed and most spiritually vibrant churches in New Jersey. Through Reverend Woodson's leadership, the church erected a new center of worship and reached out to our community to clean up neighborhoods and bring people together for positive social change.

Today's honor is well deserved, and one of many earned by the late Dr. Woodson over his long and distinguished career. I take pride in joining with my colleagues in the House in marking this honor for an individual who meant so much to so many in central New Jersey.

FIBROMYLAGIA AWARENESS DAY

HON. MARK FOLEY

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 8, 2002

Mr. FOLEY. Mr. Speaker, I would like to express my support for the National Fibromylagia Association and to recognize May 12, 2002 as Fibromylagia Awareness Day. This year alone, over 10 million Americans will be diagnosed with Fibromylagia, a disease of which there is no known cure.

Fibromylagia is a chronic illness which causes fatigue and debilitating pain in women, men and children of all ages and races. Patients with this illness often have to learn to live with widespread pain throughout their bodies; extreme fatigue; sleep disorders; stiffness and weakness; migraine headaches; numbness and tingling; impairment of memory and concentration.

As with many diseases of this type, medical professionals frequently are inadequately educated on Fibromylagia diagnosis and treatment. What is worse, children and young adults with the disease not only suffer from the illness, but also from the lack of understanding and social acceptance. Others with the disease may be discriminated against at work, by friends or family. Developing a greater understanding of this disease will help guarantee hope for a better future for people with Fibromylagia.

I am proud to recognize the needs of the National Fibromylagia Association and to acknowledge May 12, 2002 as Fibromylagia Awareness Day in Palm Beach Gardens. I urge all of our citizens to support the search for a cure and help those individuals and families who deal with this devastating disease on a daily basis.

HONORING SGT. KERRY PORTERFIELD ON THE OCCASION OF HIS RETIREMENT

HON. MIKE THOMPSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 8, 2002

Mr. THOMPSON of California. Mr. Speaker, I rise today in recognition of Senior Sergeant Kerry Porterfield as he retires from a thirty-one year career of exemplary service as an officer of the St. Helena Police Department.

As a native of St. Helena, I know first hand the impact that Kerry has had on our community while both on and off duty. As a police officer, his dedication to the pursuit of justice is admirable. With over 2,000 hours of law enforcement classes and 60,000 hours of experience under his belt, Kerry has a wealth of experience and know-how that will be sorely missed. A self-taught computer guru and driving force behind the adoption of new law enforcement technologies, he has helped make the St. Helena Police Department the modern and effective institution it is today. This year, with crime at a five-year low, Kerry has been honored as "Officer of the Year."

A devoted family man, Kerry and his wife, Dianne, have two daughters, Jennifer and Kareese. Once named "Father of the Year" by his daughter Kareese's pre-school, Kerry loves to spend time with his daughters, and was very involved in their school age activities.

After attending Napa High School, Kerry went to Napa Valley Junior College where he discovered a fascination with law enforcement. Upon graduating with an associate's degree in Criminal Justice, Kerry became a patrolman with the St. Helena Police Department on December 1, 1970.

As the son of Virginia and Cliff Porterfield, both Navy veterans, Kerry is a devoted fan of the Blue Angels, and often travels to see them.

Mr. Speaker, Sergeant Kerry Porterfield has served the people of the St. Helena, California with both enthusiasm for his work and steadfast professionalism. He is an invaluable asset to our community and I speak on behalf of the people of St. Helena when I thank Kerry Porterfield for his outstanding service and wish him luck in his future endeavors.

IN HONOR OF INTERNATIONAL ASSOCIATION OF MACHINISTS AND AEROSPACE WORKERS DAY OF ACTION

HON. DAVID E. BONIOR

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 8, 2002

Mr. BONIOR. Mr. Speaker, I recognize the hard-working men and women of the International Association of Machinists and Aerospace Workers, and all that they do for our safety and the safety of our nations' transportation services. Today, IAMAW workers from Detroit to Dallas, and from Phoenix to Philadelphia, will be rallying together in a display of strength and solidarity.

Far too often, their good work goes unnoticed and underappreciated, but these are the men and women who inspect our planes before they take off, ensure hazardous materials get transported by rail safely and build the ships for our national defense. They are truly stewards of the public health.

IAMAW members safely transport more than one million passengers each day. They keep the traveling public safe in our planes and trains and check in passengers and their luggage. They keep America moving. They deserve to be treated with dignity and respect. We need to stop the cycle of hardships, cutbacks and threats of privatization that IAMAW members have had to face in recent times. They work hard everyday to ensure that our transportation systems are safe, reliable and professionally maintained—and for that we owe them a great debt of gratitude.

So today, I thank the IAMAW's 150,000 airline and railroad workers for what they do. Together, they keep our nation moving safely, and I am proud to honor them on this day of action.

TRIBUTE TO KANSAS BUSINESS AND PROFESSIONAL WOMEN

HON. DENNIS MOORE

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 8, 2002

Mr. MOORE. Mr. Speaker, I rise today to offer my congratulations to the Kansas Business and Professional Women for their upcoming 83rd annual state convention, which will take place from June 7th–9th in Topeka, Kansas. I also want to congratulate their new president, Julie Smith, a resident of the Third Congressional District of Kansas, for putting together an outstanding weekend of programs and events for her members.

Among the outstanding speakers scheduled are: Coach Marian Washington of the University of Kansas' women's basketball team, who will serve as keynote speaker; motivational speaker Susan Mayer; and author Suzy Allegra. A candidates' forum for Kansas Attorney General candidates is planned, as well as a sock hop, casino night, and many opportunities for networking and information exchanges.

The Kansas Business and Professional Women's organization is nationally associated with the American Business and Professional Women's Association, both of which offer outstanding networking, educational and support services for their membership.

DEATH TAX

HON. ADAM H. PUTNAM

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 8, 2002

Mr. PUTNAM. Mr. Speaker, during my first term in Congress, I am proud that I have helped pass a number of bills to reduce taxes and regulations on the entrepreneurs and small businesspeople of Florida and the United States of America.

Even so, there is much work left to be done. On April 2, 2001 the House successfully passed H.R. 8, the Death Tax Elimination Act of 2001 with my support. On April 18, 2002 the House again acted and successfully passed H.R. 586, the Taxpayer Relief Guarantee Act of 2002 with my support. It is time that the other body of Congress recognizes the importance of these two bills and acts to take up these two pieces of legislation immediately. Even so, I will continue to push to make last year's death tax repeal and tax relief permanent, because the bills are still set to expire in 2011.

Repealing the death tax and making tax relief permanent are two critical issues facing America today. First, repealing the death tax is of utmost importance because of its wide reaching debilitative impact. More than 98 percent of the businesses in Florida are small businesses, and 84 percent of the jobs in Florida come from firms having 25 or fewer employees.

The real casualties of the death tax are those businesses and farms in the 98-percent range providing their owners' families a middle-class income and standard of living. Before the death tax phase-out, when small businesspeople and farmers died, their assets were subject to liquidation in order to raise money needed to pay for their tax liabilities. Now their money goes into their businesses, to pay their employees and take care of their families.

Despite their best estate planning efforts, 70 percent of small and family-owned businesses do not survive through the second generation and 87 percent do not make it through the third generation. And 9 out of 10 successors whose family business failed within three years of the owner's death said death taxes played a major role in the company's demise. Repealing the double-dipping taxation of the death tax is not only just it is long overdue.

Another major issue facing small businesses throughout America is the burden imposed by the Federal tax system. The Tax Relief Act of 2001 much needed relief for small businesses and the self-employed. About 85 percent of America's small businesses—17.4 million-pay taxes at individual rates and do benefit directly from the marginal tax rate reductions in the act.

Last year we repealed the costly ergonomics regulations put in place in the waning days of the previous Administration, passed major tax relief, and after years of work we found the votes necessary in Congress to finally end the small-business's nightmare. We have begun the process to repeal the death tax and make tax relief enacted last year a permanent reality. We have succeeded in doing much, but still, more is needed to protect America's small business and secure its future for generations to come.

HONORING ROBERT WETZEL—RECIPIENT OF THE DISTINGUISHED EAGLE SCOUT AWARD

HON. JERRY F. COSTELLO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 8, 2002

Mr. COSTELLO. Mr. Speaker, I rise today to ask my colleagues to join me in recognizing Robert Wetzel as a recipient of the Distinguished Eagle Scout Award.

The Distinguished Eagle Scout Award was established in 1969 to acknowledge Eagle Scouts who have distinguished themselves in business and in service to their community and country, Robert Wetzel is one of 1467 people who are in the same class as President Gerald Ford, astronaut Neil Armstrong and film Director Steven Spielberg. Eagle Scouts are eligible to receive the award 25 years after their first receipt of the Eagle Scout Award.

Forty-nine years ago, Bob earned his Eagle Scout award as a Boy Scout with Troop 27 in Edwardsville, Illinois. Bob attributes his upbringing to his active role in the community and to our nation. In fact, both of Bob's parents volunteered many hours with the Boy Scouts.

Among the many service organizations to which Bob belongs are: the Leadership Council of Southwestern Illinois, the Regional Commerce and Growth Association, the Eden United Church of Christ and the advisory Council for the Boy Scouts Trails West Council. Bob is the first recipient of this award from the Trails West Council. Trails West serves Madison, Jersey, Greene, Calhoun, Macoupin and Bond counties in Illinois.

The Distinguished Eagle Scout Award has been given to governors, senators, military Flag Officers, university presidents, chief executive officers of Fortune 500 companies and nationally known educators, physicians and attorneys. We can now count among its illustrious membership, Mr. Bob Wetzel.

Mr. Speaker, I ask my colleagues to join me in honoring the service of Robert Wetzel to the community and to the United States and congratulate him upon the receipt of the Distinguished Eagle Scout Award and to wish him and his family the very best for the future.

NATIONAL SMALL BUSINESS WEEK

HON. LAMAR S. SMITH

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 8, 2002

Mr. SMITH of Texas. Mr. Speaker, this week is National Small Business Week.

It is a time to celebrate the contributions that America's small businesses make to our economy.

Small business is the engine that drives this Nation, producing 75 percent of new jobs, accounting for almost 98 percent of all employers and 53 percent of the private work force.

It is our small businesses that will continue to lead us to economic recovery.

In particular, small tech businesses are on the front lines of the digital revolution. They have led the way in advances from broadband deployment to software development.

My state of Texas ranks second nationally in high tech workers, employing more than 411,000 with an annual payroll of about $25 billion. Many of those employees are working for small businesses.

And my new congressional district contains thousands of small, innovative high tech centered businesses.

One such company is Security Broadband in Austin. Security Broadband was founded in 1999 and already has over 100 employees.

Security Broadband uses real-time audio and video via highspeed cable Internet to provide security for homes.

If there's an emergency, the Security Broadband system sends audio and video signals to a central monitoring station. Personnel use this information to help verify whether an actual emergency exists. With 95 percent of home alarm incidents not genuine, law enforcement officials spend a large amount of time responding to false alarms. In case of an actual emergency, audio and video capability provides information that can help make the scene safer for responding officers.

Customers also can view their homes and see and talk with family via the Internet when away from home.

Security Broadband is just one of the thousands of small technology businesses around the country connecting rural America, developing next generation hardware and software, and keeping America on the forefront of technological advances.

TRIBUTE TO CAPTAIN JOSEPH A. PARISEAU

HON. DUNCAN HUNTER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 8, 2002

Mr. HUNTER. Mr. Speaker, I rise today to give recognition to the extraordinary life of Captain Joseph A. Pariseau who, at the age of 82, passed away on February 23, 2002.

Joe was born March 19, 1919, in Franklin, MA, the son of a baker. Nurtured by a loving family of seven, Joe spent a happy childhood in Attleboro, MA, excelling in sports like the other Pariseau boys. He attended Providence College on a football scholarship, graduating in 1941 with a degree in Philosophy.

After earning his Navy wings in 1942, Joe was assigned to VP–63, flying combat missions based from Wales, Gibraltar and North Africa, patrolling for German submarines. Other career highlights include Flight Ordnance Test Pilot with VX–5, Fleet Air Gunnery Unit (precursor to Top Gun) in 1958, Aide to Admiral Wendell Switzer, an icon in Naval Aviation, evaluation of the first U.S. angled carrier deck on USS *Antietam* and Air Boss on the USS *Ranger*. He served as Commanding Officer of Fighter Squadron VF–53, Carrier Early Warning Wing 12 and NAS Chase Field.

During his distinguished career, Joe flew over 40 aircraft types. His many Naval honors include the Distinguished Flying Cross, Air Medal, Presidential Unit Citation with star, European-African-Middle Eastern Campaign Medal with two stars, and the Meritorious Service Medal for his work as Project Manager for the Navy's billion dollar E–2C Hawkeye aircraft project.

After his 30-year career as a Naval Aviator, the "Flying Frenchman" (his aviator call sign) retired to manage his ranch in Beeville, TX, for 31 years. Joe was married to Mary D. Lassiter of New York, until her death in 1960. He married Anna Claire Heard of Beeville, TX, in 1965. They remained devoted to each other and married for 36 years until her death on February 13, 2002.

Joe is survived by his daughter, Paige Pariseau Ochenrider of Whitefish, MT; son Robert R. Pariseau and wife Laurie of San Antonio, TX; brother Roland Pariseau; sister, Lucille Pariseau, both of Attleboro, MA; grandchildren Michael Pariseau of Mountain View, CA, Stacey Lowrance of Tacoma, WA, and

Mark Ochenrider of Seattle, WA; and great grandchildren Colton and Madilynn Lowrance. A talented chef and superb dancer, Joe was devoted to his family and a true gentleman. A hero in the eyes of his family, Joe's service to our country reminds me of a passage in James A. Michener's great classic, "The Bridges at Toko-Ri".

"Why is America lucky enough to have such men? They leave this tiny ship and fly against the enemy. Then they must seek the ship, lost somewhere at sea. And when they find it, they have to land upon its pitching deck. Where did we get such men?"

ENRON GREED

HON. SAM FARR

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 8, 2002

Mr. FARR of California. Mr. Speaker, memos released this week by the FERC, confirm what those of us from California long suspected: Enron reaped millions upon millions of dollars off the backs of Californians by manipulating the energy market, cheating consumers, and lying to energy regulators and the State. Recently released internal documents clearly illustrate Enron's strategies to game the energy trading system. The Enron documents describe knowingly and consciously submitting false information to the State in order to increases energy prices.

Enron's overwhelming greed is beyond outrageous; it may be criminal. Clearly, the billions of dollars stolen from Californians must be returned. It is also imperative that FERC reopen California's long-term contracts to prevent us from being further gouged.

Throughout the California energy crisis the Governor of California joined with the majority of California's congressional delegation to call on the Federal Government to do something to stop price manipulation. I want to share with my colleagues an editorial from today's Los Angeles Times, that sums up the consequences of Federal inaction.

[From the Los Angeles Times, May 8, 2002]

MAKE ENRON PIRATES ANSWER

It was a scam after all.

As California faced desperate electricity shortages in 2000 and 2001, power giant Enron was manipulating the market to drive up prices and turn modest power shortages into critical ones. This arrogant behemoth, since brought down by its own hubris, toyed with the public health and safety of California to boost its own profit, and there's finally a smoking gun to prove it.

Internal Enron documents released by the bankrupt company's new management describe these unethical, if not illegal, trading practices in detail and indicate that other companies were doing the same thing. All the while, everyone from Enron's then-chief Kenneth Lay to Energy Secretary Spencer Abraham and regulators who should have smelled a rat would say it was all California's fault. For failing to build enough power plants. For adopting a power deregulation plan that wasn't free-market enough. For environmental laws with a Malibu mind-set.

The Federal Energy Regulatory Commission refused to accept its legal responsibility to rein in a wildly out-of-control market. Ultimately, commissioners said, the free market would work. For California, that meant a year of crisis, of rolling blackouts, of one major utility going bankrupt and another flat broke, of the state doling out $6 billion to buy daily power and an additional $40 billion for long-term contracts at what we now know are grossly inflated rates. FERC finally acted out of political necessity; it was too little, too late.

The Enron memos go on in pages of sneering, "gotcha" detail about such things as how to get paid for not putting any energy on the grid. In another ploy, the firm would buy power in California at a capped price of $250 a megawatt-hour and resell it in Oregon for $1,200—at a time when California was flirting daily with blackouts. The schemes had cute names like Death Star and Fat Boy.

When California complained and Gov. Gray Davis denounced the energy manipulators, an Enron official said, "California is trying to perpetuate the greatest political dodge of the last 100 years."

Yes, deregulation was flawed, California was short of power plants and a drought in the Northwest had reduced hydroelectric power. Davis was slow to react to the crisis. But these factors alone did not cause the state's power costs to go from $7 billion in 1999 to $27 billion the next year.

FERC should help the state obtain substantial refunds from the power-generating companies that charged exorbitant prices. The state has asked for $9 billion, an amount that federal regulators had deemed far too high but that they now should regard as just about right.

The Justice Department should investigate possible criminal violations. The state should demand that all of its long-term contracts, signed under the duress of the inflated market, be nullified and renegotiated without delay. And FERC should extend its modest market controls beyond the present Sept. 30 expiration. Electricity is vital to public welfare. It must not be held hostage by manipulators piously invoking the free market.

They scoffed in Washington and Houston when Davis called the energy manipulators pirates. Now we know why he was right.

CELEBRATION OF ST. LUKE'S HOUSE 30TH ANNIVERSARY OF HELPING PATIENTS BECOME PRODUCTIVE CITIZENS

HON. CONSTANCE A. MORELLA

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 8, 2002

Mrs. MORELLA. Mr. Speaker, I rise today to recognize and celebrate "Three Decades of Hope" at St. Luke's House (SLH) in Bethesda, Maryland. SLH helps patients released from psychiatric hospitals to live and work successfully in their communities by offering integrated mental health services and community resources.

St. Luke's House was founded in 1971, by St. Luke's Episcopal Church. The programs offered by SLH include supported living, life skills training and vocational rehabilitation, and 24-hour crisis care and services for youth with serious emotional disabilities. Currently, SLH provides care for over 800 youth and adults. To accomplish its programs, SLH operates 31 group homes and apartments in the community. It has helped more than 4,000 individuals return to an active community life.

There are four basic programs SLH provides individuals under its care. The Psychiatric Rehabilitation Program which offers individuals supported living opportunities, residential rehabilitation assistance, back-to-work skills, and a life skills building program. The SLH Mental Health Clinic provides mental health services to the public and patients in other SLH programs. Its McAuliffe Crisis House is a voluntary community-based residential alternative to inpatient hospitalization. The Career Transition Program is a joint endeavor between SLH and Montgomery Public Schools that help high school students with serious emotional disabilities to receive counseling and vocational training.

The efforts at SLH have raised public awareness of an ever increasing mental health issue. Its continued success is due to the hard work of SLH staff and volunteers that give thousands of hours to make this ministry beneficial to SLH residents and community. St. Luke's House is fortunate to have the leadership of Ms. Pam K. Cudahy as President and CEO as it moves ahead in meeting the needs of people in the 21st century. Our community is richer because of the residents and staff of St. Luke's House.

TYRANNICAL NEW LAW ALREADY BEING ABUSED

HON. EDOLPHUS TOWNS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 8, 2002

Mr. TOWNS. Mr. Speaker, I was saddened to read an article in the Times of India showing that India's repressive new "Prevention of Terrorism Ordinance" (POTO) is already being abused. The new law allows the police to hold someone without charges for up to 180 days, according to the Washington Post.

According to the article, a court granted bail to a POTO defendant named Abdul Ahmed Bhat and granted him bail of Rs 2,500. The judgment shows how the police are abusing POTO. The police filed two varying reports against Mr. Bhat, abusing the process to make certain that he stayed in police custody. The official police reports exonerates Mr. Bhat of the charges against him, while the investigating officer's report implicates him.

Unfortunately, this kind of abuse is typical of the Indian government. The Rashtriya Swayamsewak Sangh (RSS), a hardline, militant Hindu fundamentalist organization published a booklet on how to implicate Christians and other minorities in false criminal cases. The RSS is the parent organization of the ruling BJP, which sponsored and passed POTO.

Mr. Speaker, we must not support this kind of tyranny. We should end all our aid to India until it ends. We should also put ourselves on record in favor of self-determination for everyone in the subcontinent by means of a free and fair, democratic vote on independence for Khalistan, Kashmir, Nagaland, and the other nations seeking their freedom from India.

Mr. Speaker, I would like the permission of the House to insert the Times of India article into the RECORD for the information of my colleagues.

[From the Times of India, Apr. 3, 2002]

POTO MISUSED BY POLICE IN BHAT CASE

SRINAGAR.—Two varying police reports by the same investigating officer prompted the special court to grant bail to Abdul Ahmed Bhat on Monday. Bhat, a resident of Ahmad Nagar, was booked under the Prevention of Terrorism Ordinance (POTO) under FIR No 12/2002 at police station Soura.

The special court had granted bail to Bhat against a bond of Rs 25,000.

The judgment points a finger of suspicion at the police for misuse of the prevention of terrorism law—despite the Centre and the state government's assurance for its fair use to tackle terrorism across the country.

Announcing the judgment on Monday, special Judge M I Qureshi said: "After close and minute examination of the two police reports and case diary that the prima-facie case under Sections 3 and 21 of POTO is made out against the accused persons except Abdul Ahad Bhat."

The judgment further reveals that there were variations in the two police reports about the date of Bhat's arrest. Also, the police report exonerates Bhat from the implication of alleged offences, while the second report submitted before the court on March 14 by the investigating officer of his own, implicates him (Bhat) for the alleged offences.

PAYING TRIBUTE TO TODD SALIMAN

HON. SCOTT McINNIS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 8, 2002

Mr. McINNIS. Mr. Speaker, I would like to take this opportunity to recognize the efforts of State Representative Todd Saliman and his efforts to improve the lives of his fellow constituents and the State of Colorado. Todd has served in the Colorado General Assembly since 1994 and has dedicated countless hours of his time and energy to his position and constituents. Now, after eight years of service, Todd is retiring and I am honored to take this time to thank him for his service to Colorado.

Todd is a native Coloradan whose family has lived in the state for generations. During his tenure as a representative, he served on many committees including the Joint Budget Committee, Finance, Appropriations, and Local Government committees. Throughout his time in the legislature, he has championed the issues of health care, children and families, the environment, education, and transportation. He is known throughout the community as a devoted husband and a proud father of a new son, and is often found providing his support to the board of directors at the Developmental Disabilities Center and was instrumental in the assembly for securing funds for children's and senior's health services.

Mr. Speaker, Todd's hard work in the legislature has not gone unnoticed during his tenure and he has been recognized repeatedly over the years for his legislative accomplishments. Today, I continue to honor his service by thanking him for his devotion and dedication to his community, his state, and his nation. Thanks for all of your hard work Todd, and good luck in your future endeavors.

COACH MIKE DAVIS AND THE INDIANA HOOSIERS

HON. JULIA CARSON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 8, 2002

Ms. CARSON of Indiana. Mr. Speaker, I rise today to recognize that the Black Coaches Association will honor Indiana University's Head Coach Mike Davis as the "Male Coach of the Year" during their national convention to be held in Indianapolis this weekend.

Mr. Speaker, my heartfelt and enthusiastic congratulation is extended to Coach Mike Davis and the Indiana University Basketball Team for their achievements in this year's NCAA Final Four Tournament.

Coach Davis started his coaching career as Alabama's assistant basketball coach in 1995, and remained with the program until 1997.

In 1997 Coach Davis became an assistant coach for the Indiana University basketball program.

On September 10th, 2000, Coach Davis became the interim men's basketball coach at Indiana University.

With only a month to prepare for the 2000–2001 season Davis led the Hoosiers to a 21–13 record, a runner-up finish in the Big Ten Tournament and an at-large bid to the NCAA tournament.

Displaying leadership, unwavering faith, and heart throughout the 2001–2002 season, Coach Davis led the Indiana Hoosier's to their first NCAA Final-Four appearance since 1993, narrowly missing the championship.

Coach Davis makes it no secret that he is a religious man; in fact the Christian faith permeates his entire life including basketball.

The Indiana University basketball team has voluntary chapel each week at Eastern Star Church in my district where Coach Davis is a member.

Coach Davis believes unto whom much is given much is required. He is a cheerful and generous philanthropist. For example, Coach Davis donated to non-profit organizations the bonus he received for leading Indiana to the Final Four. His gifts helped to enrich the lives of many.

Coach Mike Davis and Indiana University are to be congratulated for reminding Hoosiers and basketball fans everywhere that leadership, faith, and determination are products of achievement.

Mr. Speaker, to Coach Davis, keep up the good work and congratulations on your award and great season!

Your spirit has enriched the lives of countless individuals, especially the young people.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Meetings scheduled for Thursday, May 9, 2002 may be found in the Daily Digest of today's RECORD.
